

STREET FIGHTER X TEKKEN TRAILER

EPISODE 0

这一集考虑将两个系列的主要人物:隆与一八作为主题,打响风格化的第一炮.烟灰墨风格的视觉效果继承自《街头霸王IV》,用微妙而震撼的方式完美传达了他们的格斗精神.火引弹在描绘一八的残忍本性方面扮演了重要角色——他被随手打倒就不管了。

SCENE

- 11・12 夜幕降临,一只蛾子被火光引到了一幢建筑边上,从蛾子的视角可以看到隆盘腿坐着,处于深刻的冥想状态。
- 13・14 宁静突然被弹打破了,他被打得半死不活,被丢了进来滚到隆身边,隆并没有看弹一眼,因为旁边的存在更需要他全神贯注,隆猛然睁开了眼睛。
- 15・16 弹被不幸击败后,一个带着不祥气氛的身影出现了,恰好在这个时候,夜空中厚厚的乌云散去了一些,现出一轮满月,照亮了一八周围,隆和一八都经历过严酷的训练与生死大战,这两名战士都静静站着审视对方。
- 17・18 一八自信地歪嘴一笑,他身周的气氛忽然扩展开来,形成了两片庞大的羽翼,街头霸王与铁拳…两个世界就此交会!
- 19・20 在最后,我们做了点怀旧吃豆人幕间动画的滑稽剧,可以看到洛克人追着一只鬼魂怪跑过屏幕,但猎人很快成了猎物,我们又看到洛克人被吃豆人追着跑,有理由相信这算是吃豆人与洛克人在《街霸X铁拳》中客座出场的预兆。

from Polygon Pictures (Toshio Ohnishi)

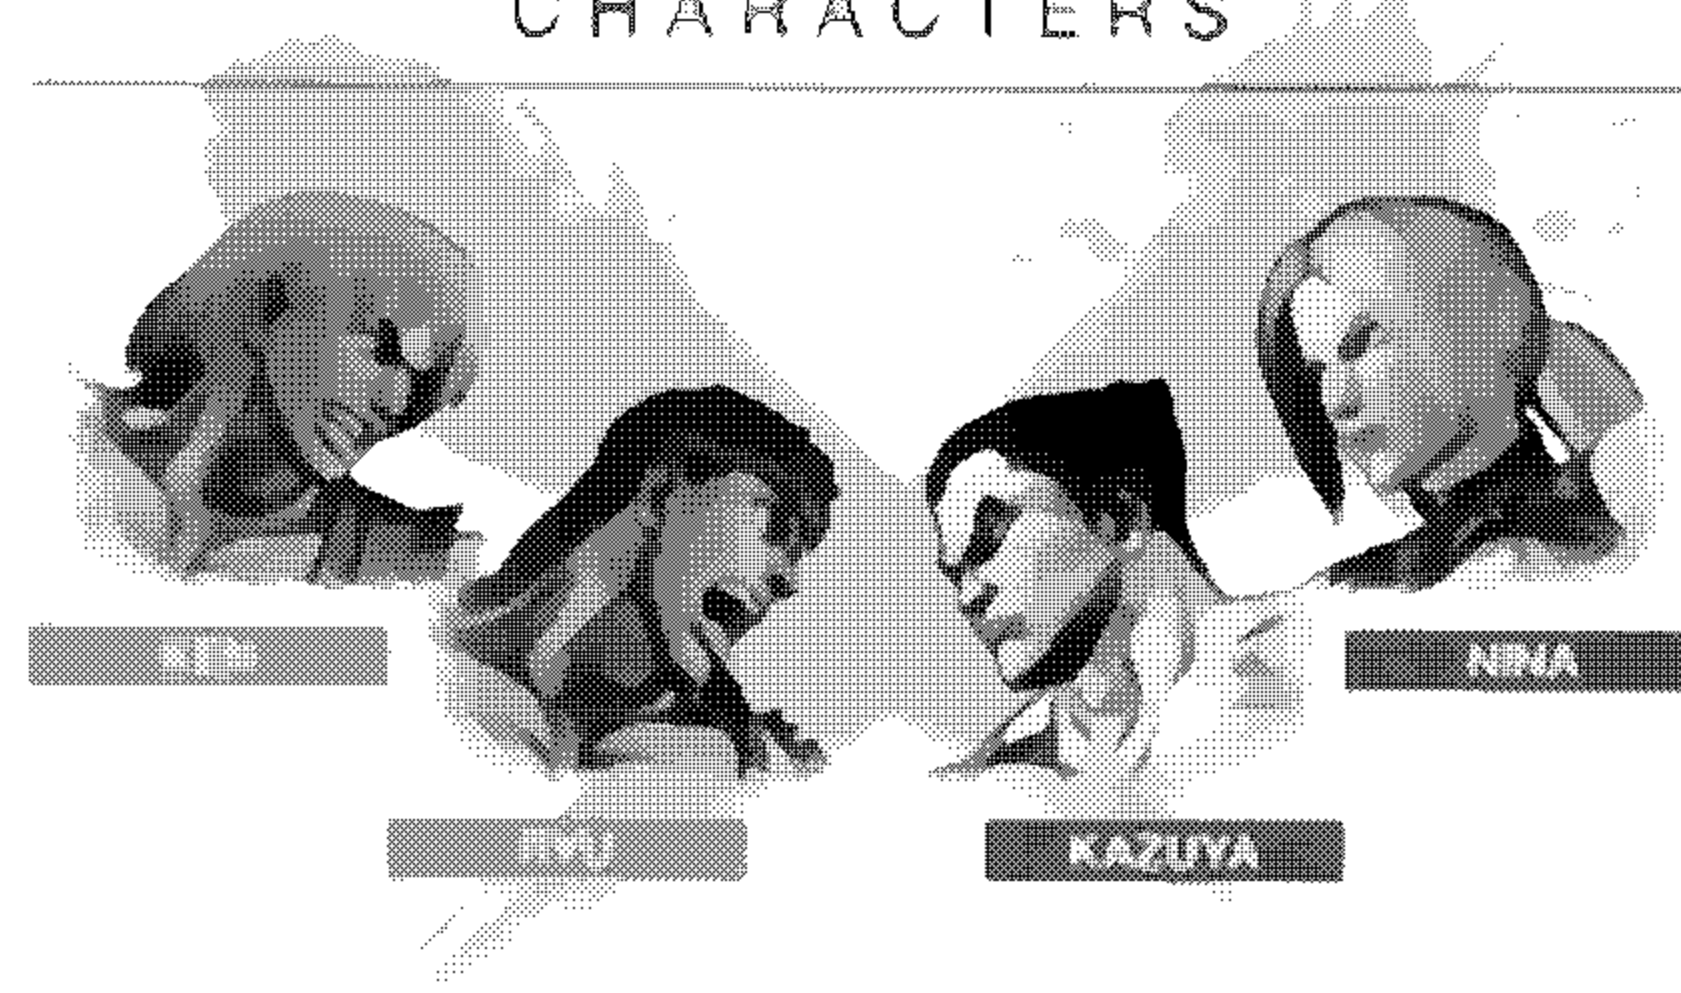

制片人小野说“三个月把它做出来好吗?”时,我感觉脸色苍白,我们使用了在《街霸IV》中用过的烟灰墨风格,让闯入的一八周身覆盖黑墨,就传达了《铁拳》将接入《街头霸王》世界的事实,大约一年半前,这段视频刚在本游戏的首次官方预告上公布,卡普空和PP社都还在这令人惊异项目的早期制作阶段,所以我们只要投入自己的狂热就能跟上这紧张忙碌的日程…可我总是感觉随着我们的开发,给我们定的期限越来越短了,也许只有我这么觉得(笑)

STREET FIGHTER X TEKKEN TRAILER

EPISODE 1

隆与肯,一八与妮娜:这就是本游戏官方的主角双人组.预告片第1集中描绘了一场动作场面密集的战斗,展现了四人格斗令人兴奋的混乱感——这无疑是双人组合格斗游戏的精髓.这集里也大量运用了水花效果,那是《街霸X铁拳》的官方视觉主题.

CHARACTERS

SCENE

- 01 > 02 城市在混乱的战斗中崩塌。一八通过仁派来打败他的格斗家，给其发了段讯息。一八将内置的摄像头转向了被他踩在脚下的隆。
- 03 > 04 与此同时，肯和妮娜在一座废弃的建筑中以命相搏。一架NANCY-MI847J(也是仁派来的)突然打断了他们的乐趣。肯看到隆失去了意识，便大喊他的名字，喊声在这片区域里回响。
- 05 > 06 肯的喊声让隆的眼中恢复了生气。隆成功推开了一八，并放出了波动拳，但他状态还很虚弱，一八只用单手便轻松挡下了他的波动拳。
- 07 > 08 隆在肯的帮助下躲开了迫近的威胁，却被妮娜从身后抓住了。一八的左眼闪过凶光，接着向无法动弹的隆发射出恶魔光束。在最后关头，肯得以干扰了一八的瞄准，被

先束射中的是NANCY-MI847J。随之而来的爆炸迫使妮娜脱离了战斗。

- 09 > 10 肯在一八无情的攻击面前疲于招架，就连他放出的波动拳也被闪过了。终于，从妮娜手中逃脱的隆加入了混战。隆和一八同时挨了对方一记重拳，但双方都不打算认输。从他们握得更紧的拳头中，可以看出他们不屈的战斗精神。

from Polygon Pictures (Toshio Ohnishi)

《街头霸王IV》中的烟火量全都是手绘的，但本游戏所用的水花模式都先用物理模拟器计算过。我认为这集最酷炫的部分就是隆和一八的脸庞碎裂开来，露出一副新的面容。

STREET FIGHTER X TEKKEN TRAILER

EPISODE 2

《街头霸王》中的毒药与雨果,《铁拳》中的金与马杜克:这四名摔角明星荟聚于此,展开一场精彩绝伦的对决!这集峰回路转,令人眼花缭乱,还有地铁城的科迪,凯及市长哈格客串亮相,让这集中源自《快打旋风》的角色达到五人之多,让所有卡普空的老粉们大快朵颐。

CHARACTERS

SCENE

- ・■ 金与马杜克刚刚赢下一场大型摔角比赛.在他们庆祝胜利时,竞技场的灯光突然灭了.两人张望着,想要找到干扰来自何处.
- ・■ 总是很诱人的毒药选择在此时登场.她一声呼唤,雨果就扯掉了铁栅门.这个巨人出发后继续冲向擂台,而金与马杜克等待着.
- ・■ 雨果一登上擂台,即刻便用一招强力套索把马杜克打飞了,然后开始认真地与金格斗,而毒药则坐到边上的金属塔顶观赏着.不过毒药的自得其乐没能持续多久,马杜克将塔连同上面的毒药扳起来倒向雨果.

- ・■ 雨果成功撑住了倒向他的金属塔,但双手举塔的他留给了金一个大空档.雨果被金用大回环丢出,他巨硕的身躯带倒了毒药,两人被判落败了.
- ・■ 凯与科迪入场时,毒药与雨果横躺在走道上.两人边回忆着在疯狂齿轮帮地下牢笼赛时的日子,边大步走向擂台.

from Polygram Pictures (Tooshin Chushin)

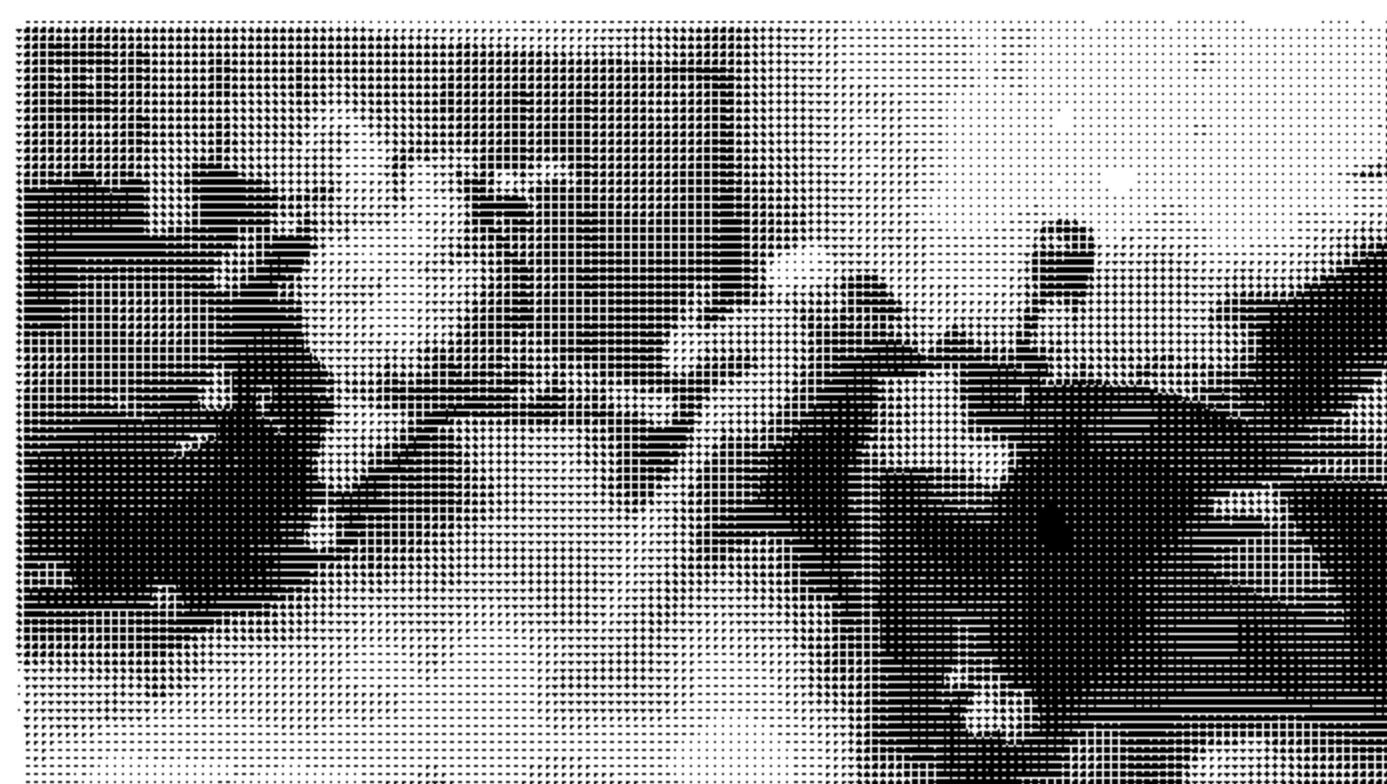

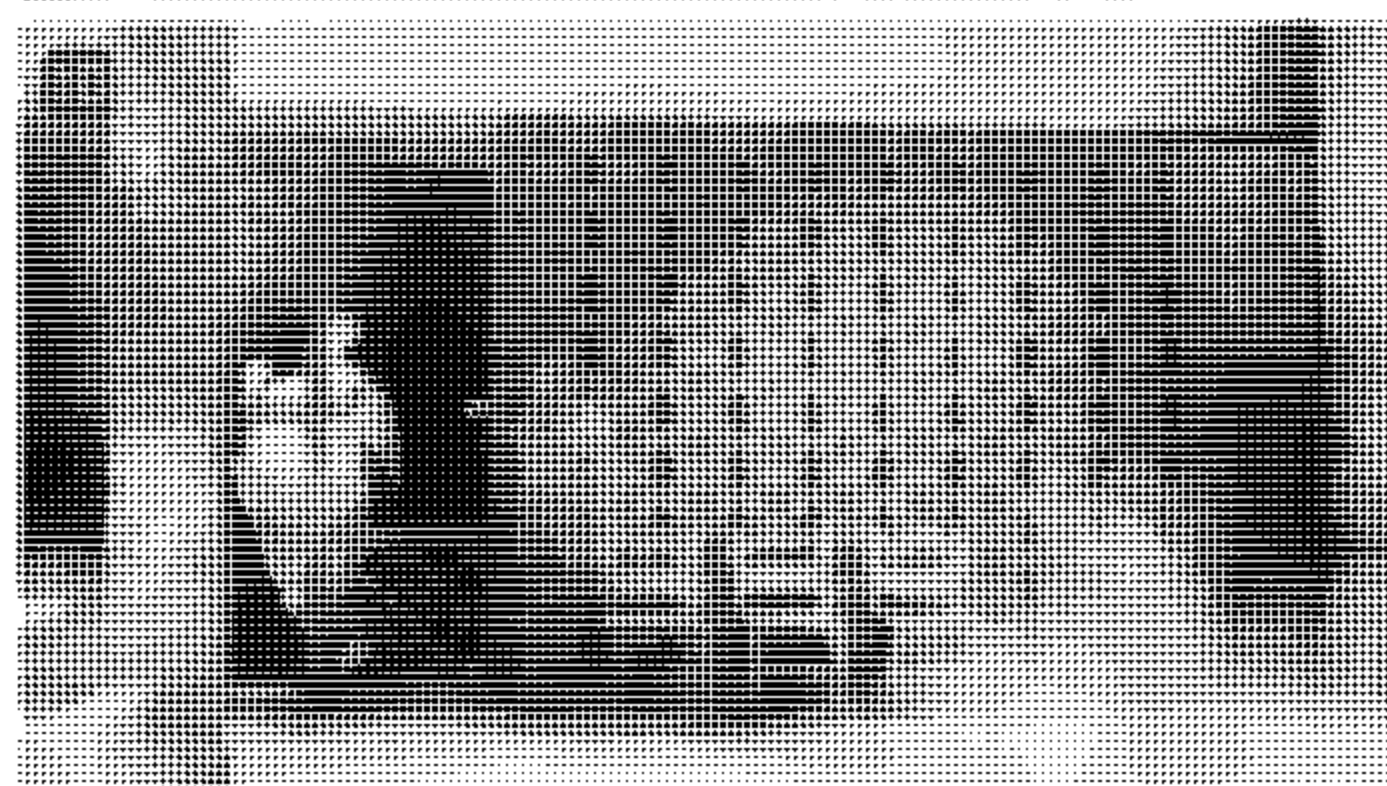

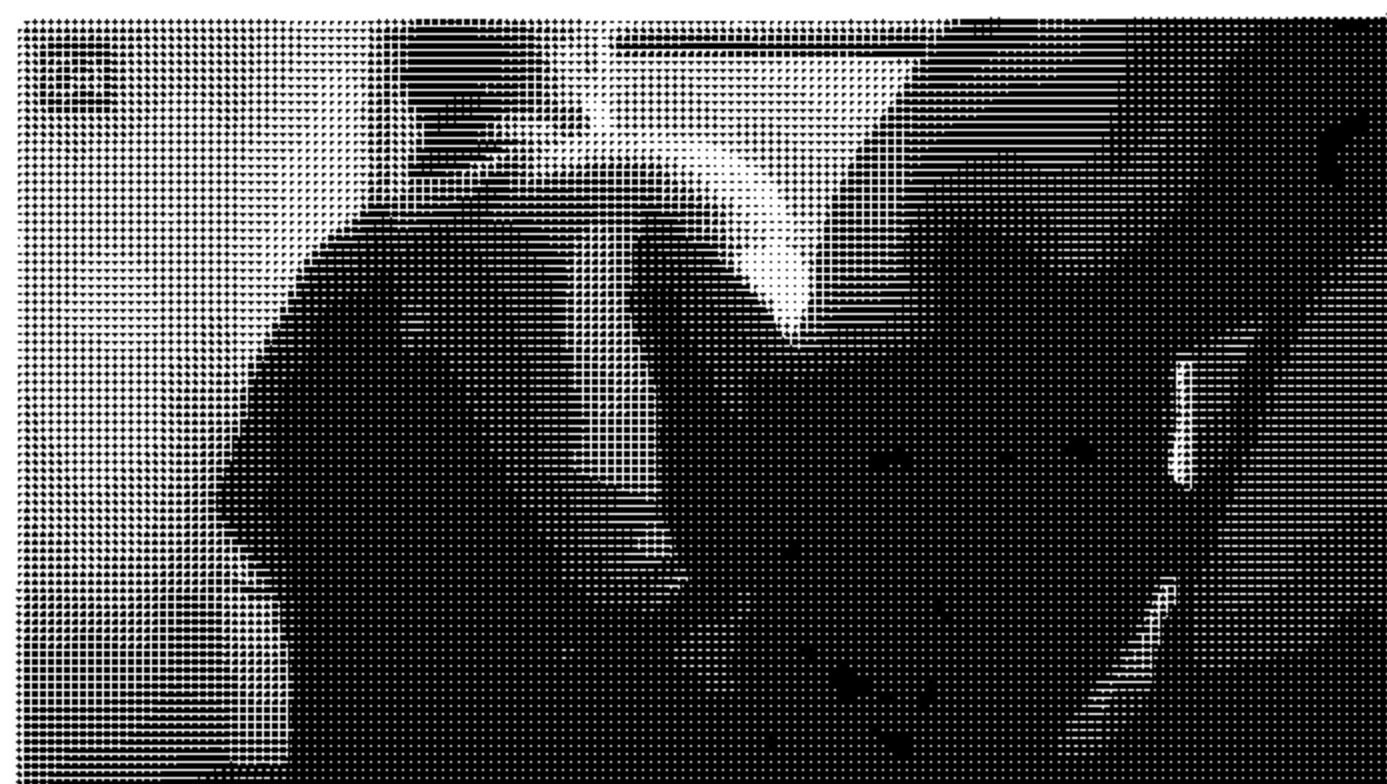

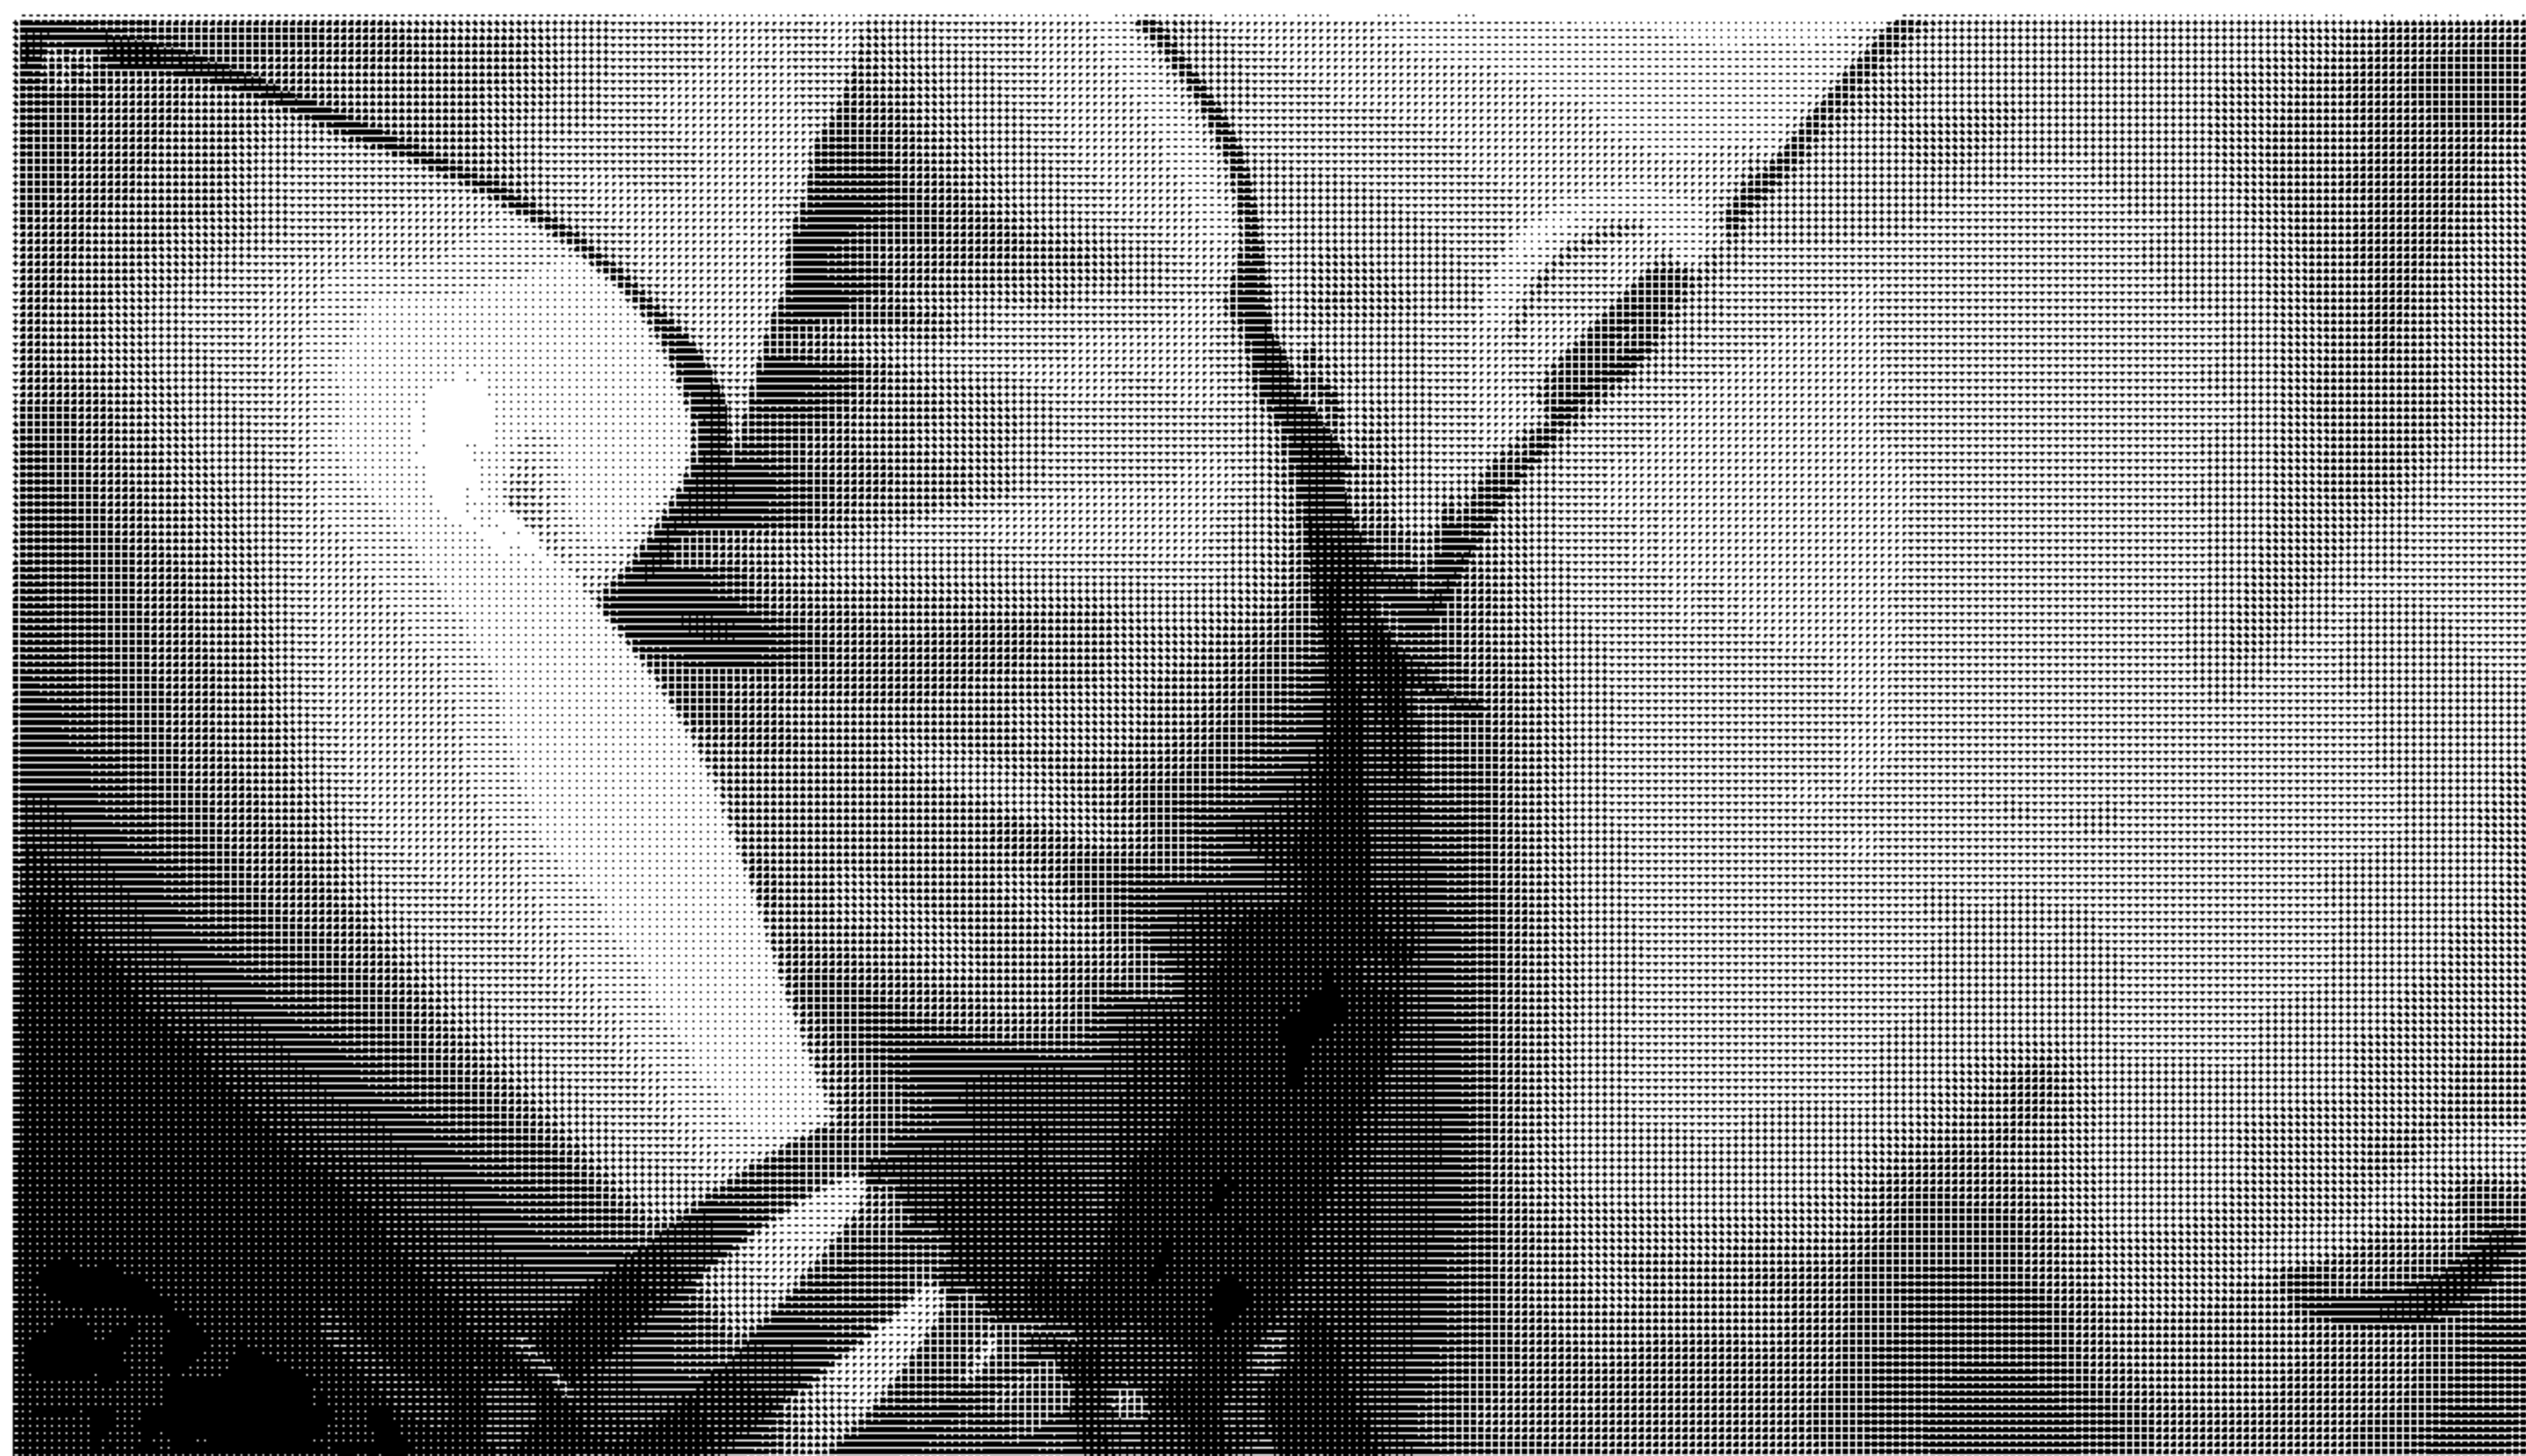

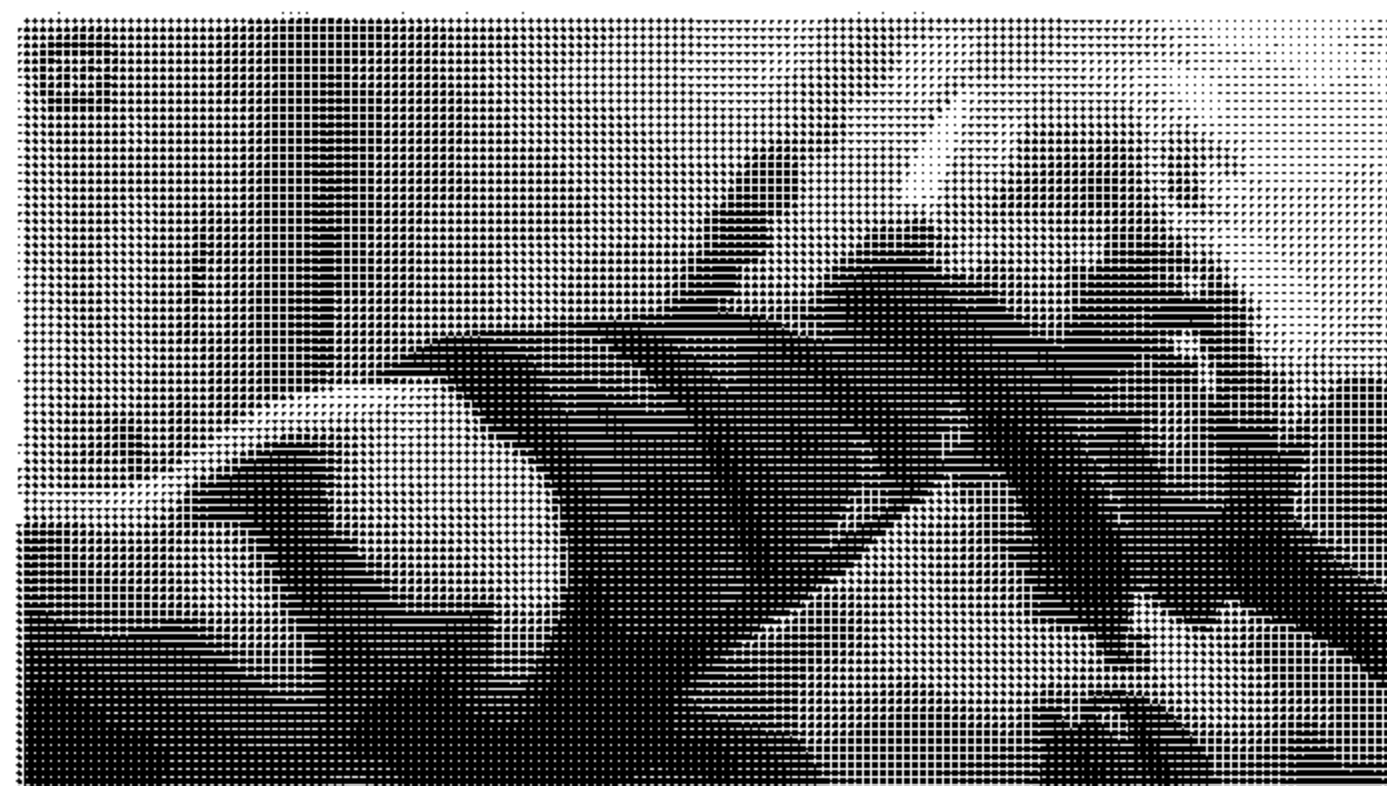

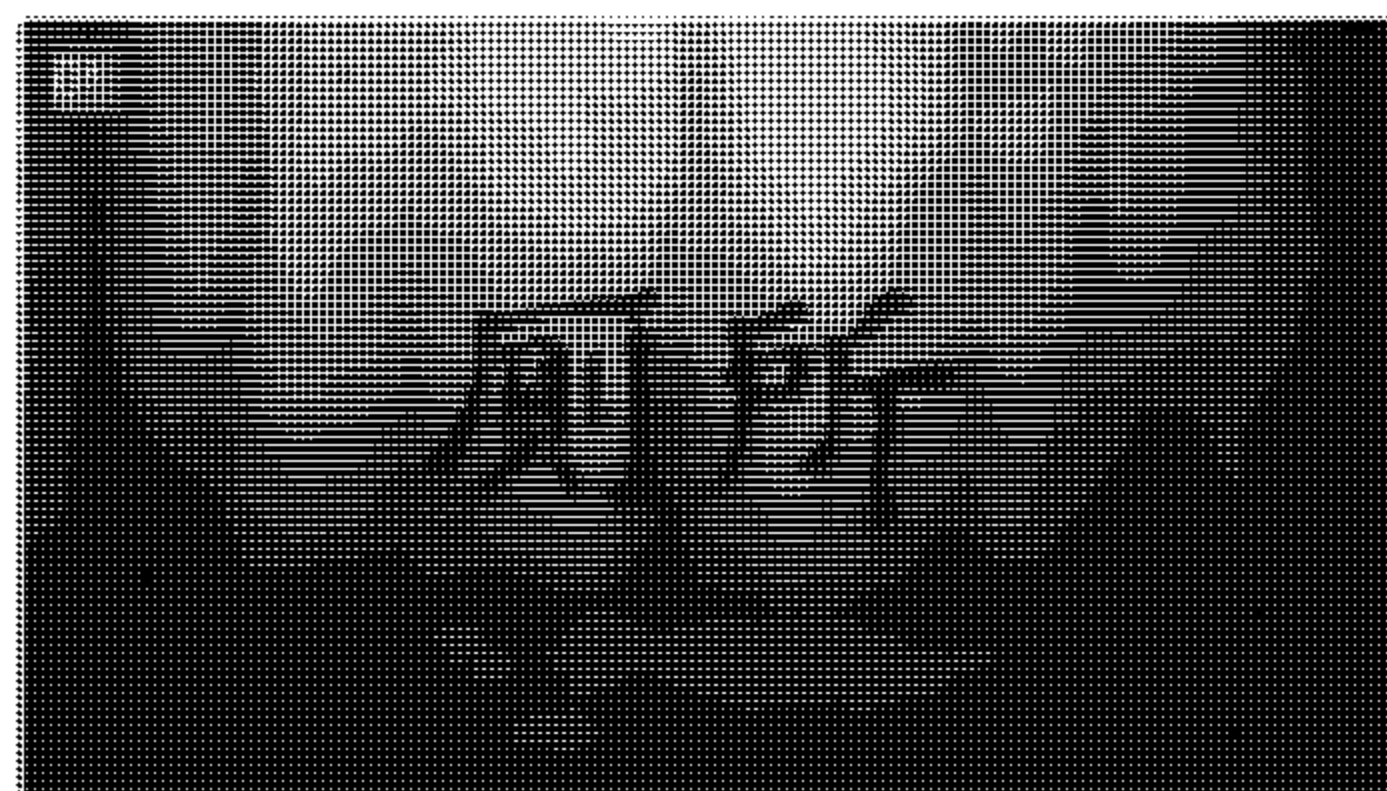

在这集中我们将华丽炫酷的职业摔角娱乐推到了中央.其中大部分的动作我们都是请真正的职业摔角手来进行动作捕捉的,结果这次盛大演出就连我们团队中最硬核的摔角迷都相当满意.

STREET FIGHTER X TEKKEN TRAILER

EPISODE 3

《街头霸王》中的鲁夫斯与桑吉尔夫,《铁拳》中的鲍勃与茱莉亚,这集的特色在于两支有游戏里最富态角色的双人组合,斗殴设定在洛的餐厅里,鲁夫斯在里面把鲍勃误认作是肯·马斯达斯,继而发生了有趣的事情,隆和肯也作为餐厅的顾客客串出场。

CHARACTERS

SCENE

- 1. 从厕所出来之后,鲁夫斯与一个穿红衬衫的金发男擦肩而过。那是鲍勃,但鲁夫斯深信面前出现的红衣金发男子只可能是肯·马斯达斯。于是鲁夫斯做了任何有自尊的街头格斗家在这种情况下都会做的事——他挑起了争斗。
- 2. 两人完全无视了桑吉尔夫和茉莉亚,猛烈舞动闯回了餐厅的用餐区。鲍勃不断试图向鲁夫斯解释他认错人了,但鲁夫斯才不会理会这么明显的谎话呢——肯·马斯达斯出于强烈的嫉妒,为了加强羞辱的效果,不仅否定自己的存在,显然还扮成了与鲁夫斯相似的体格。哎,某些人的神经真粗!
- 3. 眼看鲁夫斯就要打败鲍勃时,承载他们的桌子折断了,让鲁夫斯飞向了半空。他落在了一个木桶里,一下子无法动弹,而同时鲍勃觉得自己已经受够了。

- 4. 鲁夫斯和那个桶被打得在餐厅里滚来滚去,最后茉莉亚精准的一击打碎了桶。桑吉尔夫对茉莉亚的力量展示大加赞赏,并向她提出了友谊赛的挑战。
- 5. 就在一场新的格斗即将展开时,鲍勃用脚略微调整了一下身边木桶的位置。不一会,从空中掉落下来的鲁夫斯就置身于一个合身的全新木桶之中。或许现在误会能够开释了吧?

from Polygon Pictures (Twitter Official)

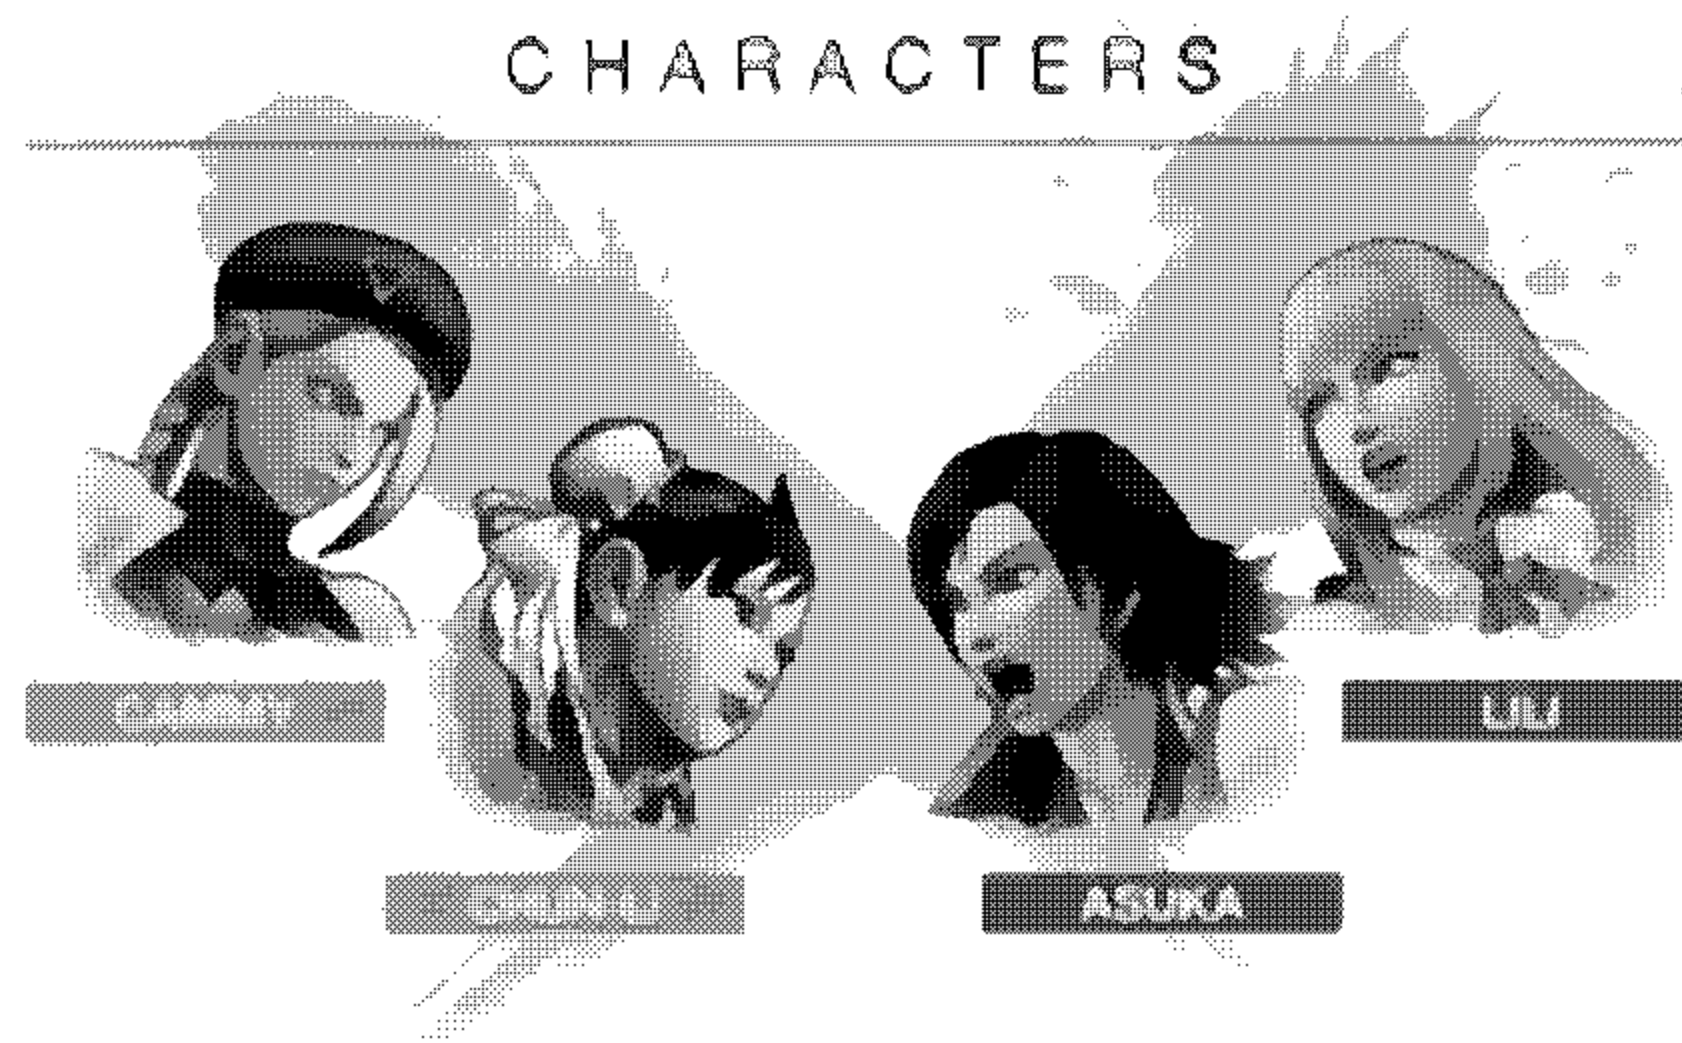

制定本集的故事梗概欢乐多多,我都开始觉得自己有写喜剧的天分了。当鲁夫斯扑通掉进木桶后,就成了“蹦蹦跳跳”的游戏时间。我们非常重视于描绘出鲁夫斯和鲍勃的大肚子,所以它们当然值得仔细看看。

STREET FIGHTER X TEKKEN TRAILER

EPISODE 4

引人入胜的这一集主角是《街头霸王》和《铁拳》的四位女英雄:春丽与嘉米对飞鸟与莉莉.这场格斗从一辆高速飞驰的大货车上开始,到莉莉跳上一艘货船结束.角色们敏捷的动作完全足以让观众们目不转睛,不过她们的对话(多处语带双关)也值得一听.

CHARACTERS

SCENE

- 1. 飞鸟,嘉米和春丽在一辆大卡车上格斗.飞鸟的同伴莉莉不在,她一个人只能被迫躲开这两个老练的格斗家.
- 2. 出了隧道之后,三个争斗者跳下卡车,在路边继续战斗.莉莉终于现身了,而飞鸟将嘉米甩向莉莉,以拉平差距.
- 3. 嘉米一拳打在莉莉胸前,并说莉莉的战斗技巧稚嫩.莉莉完全误会了意思,以为说她胸小而大怒.
- 4. 飞鸟终于来到了莉莉身边,四个女人准备要进行二对二战斗了,但...

- 5. 莉莉优雅地踩在飞鸟头上,跳上了旁边的一艘离港的货船.莉莉得意地自以为获胜,边乘船离开边嘲笑着其他三人.然而不幸的是,她并没有注意到船上漆的是影罗的标志...

from Polygon Pictures (Toshio Okazaki)

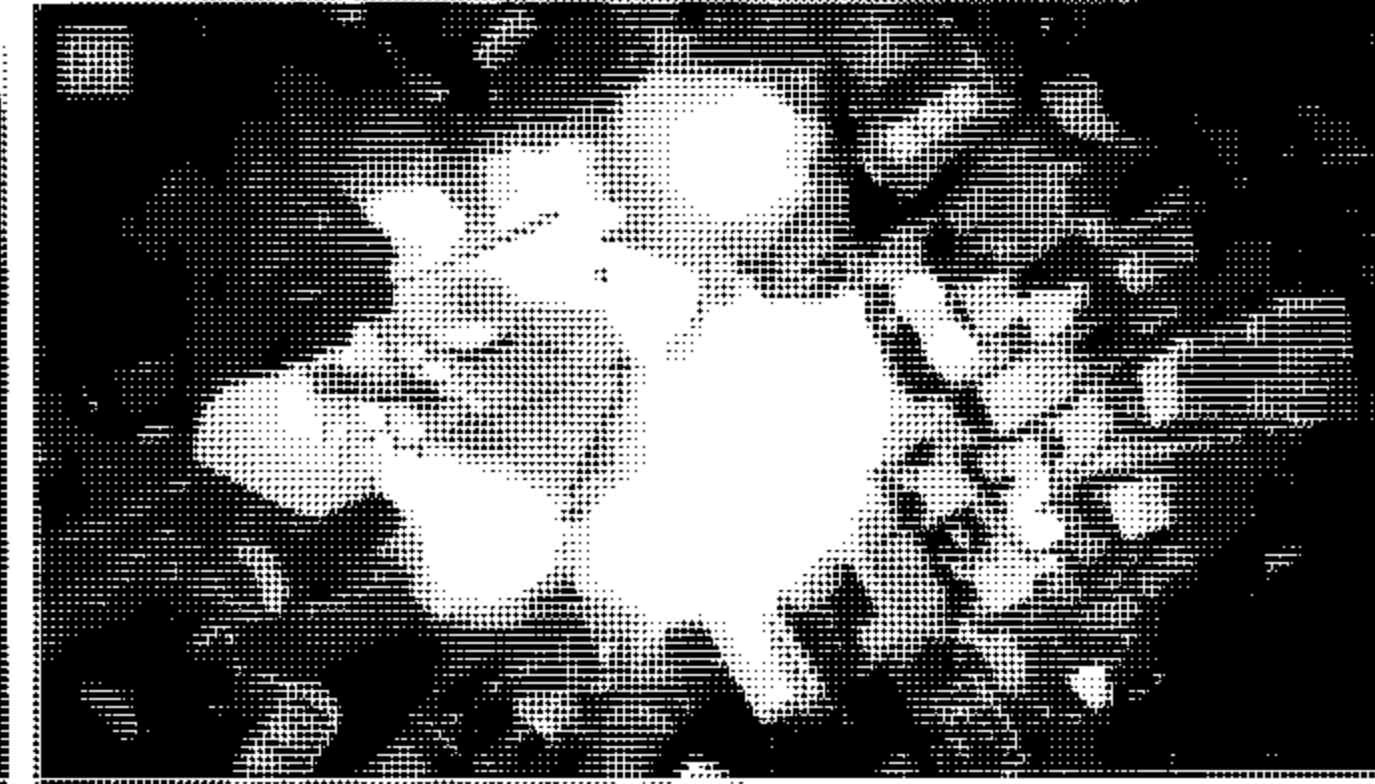

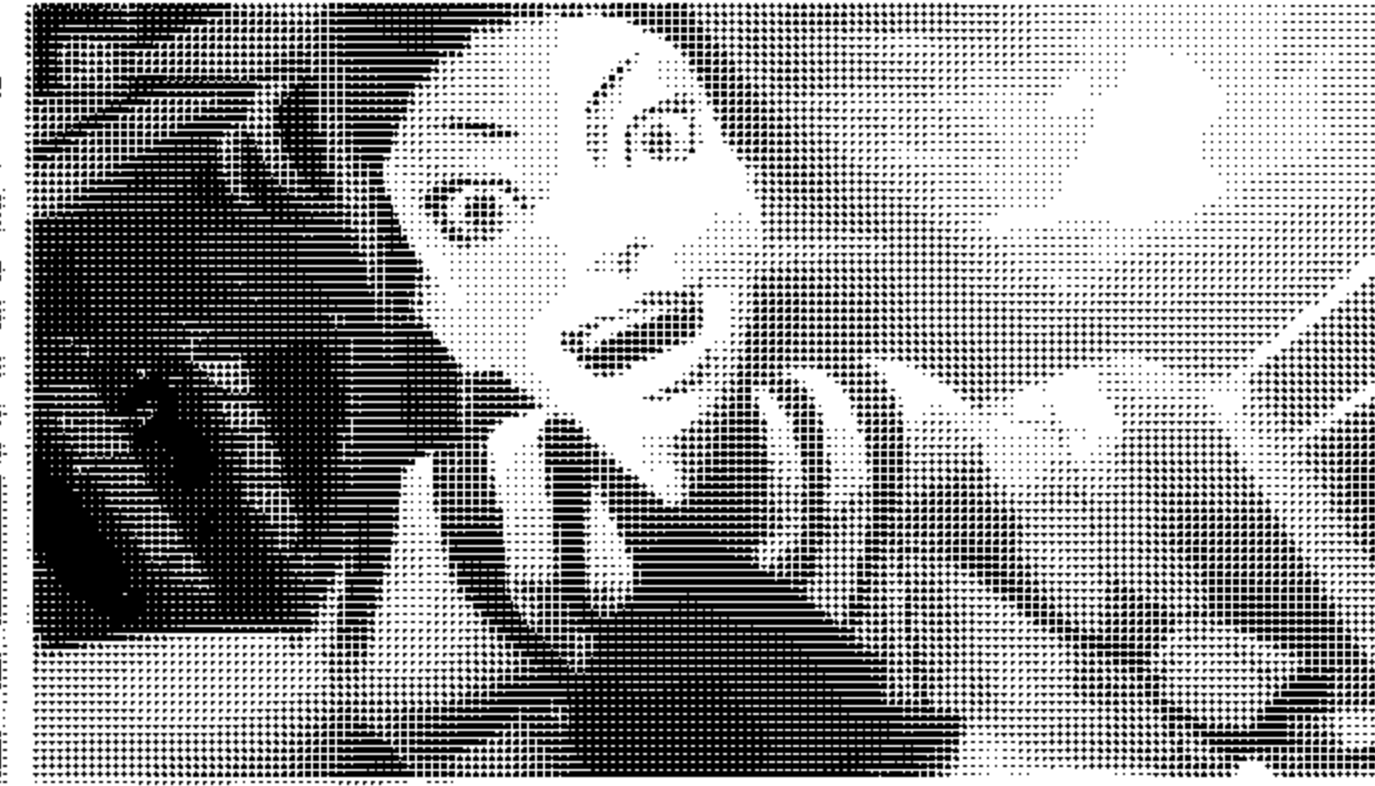

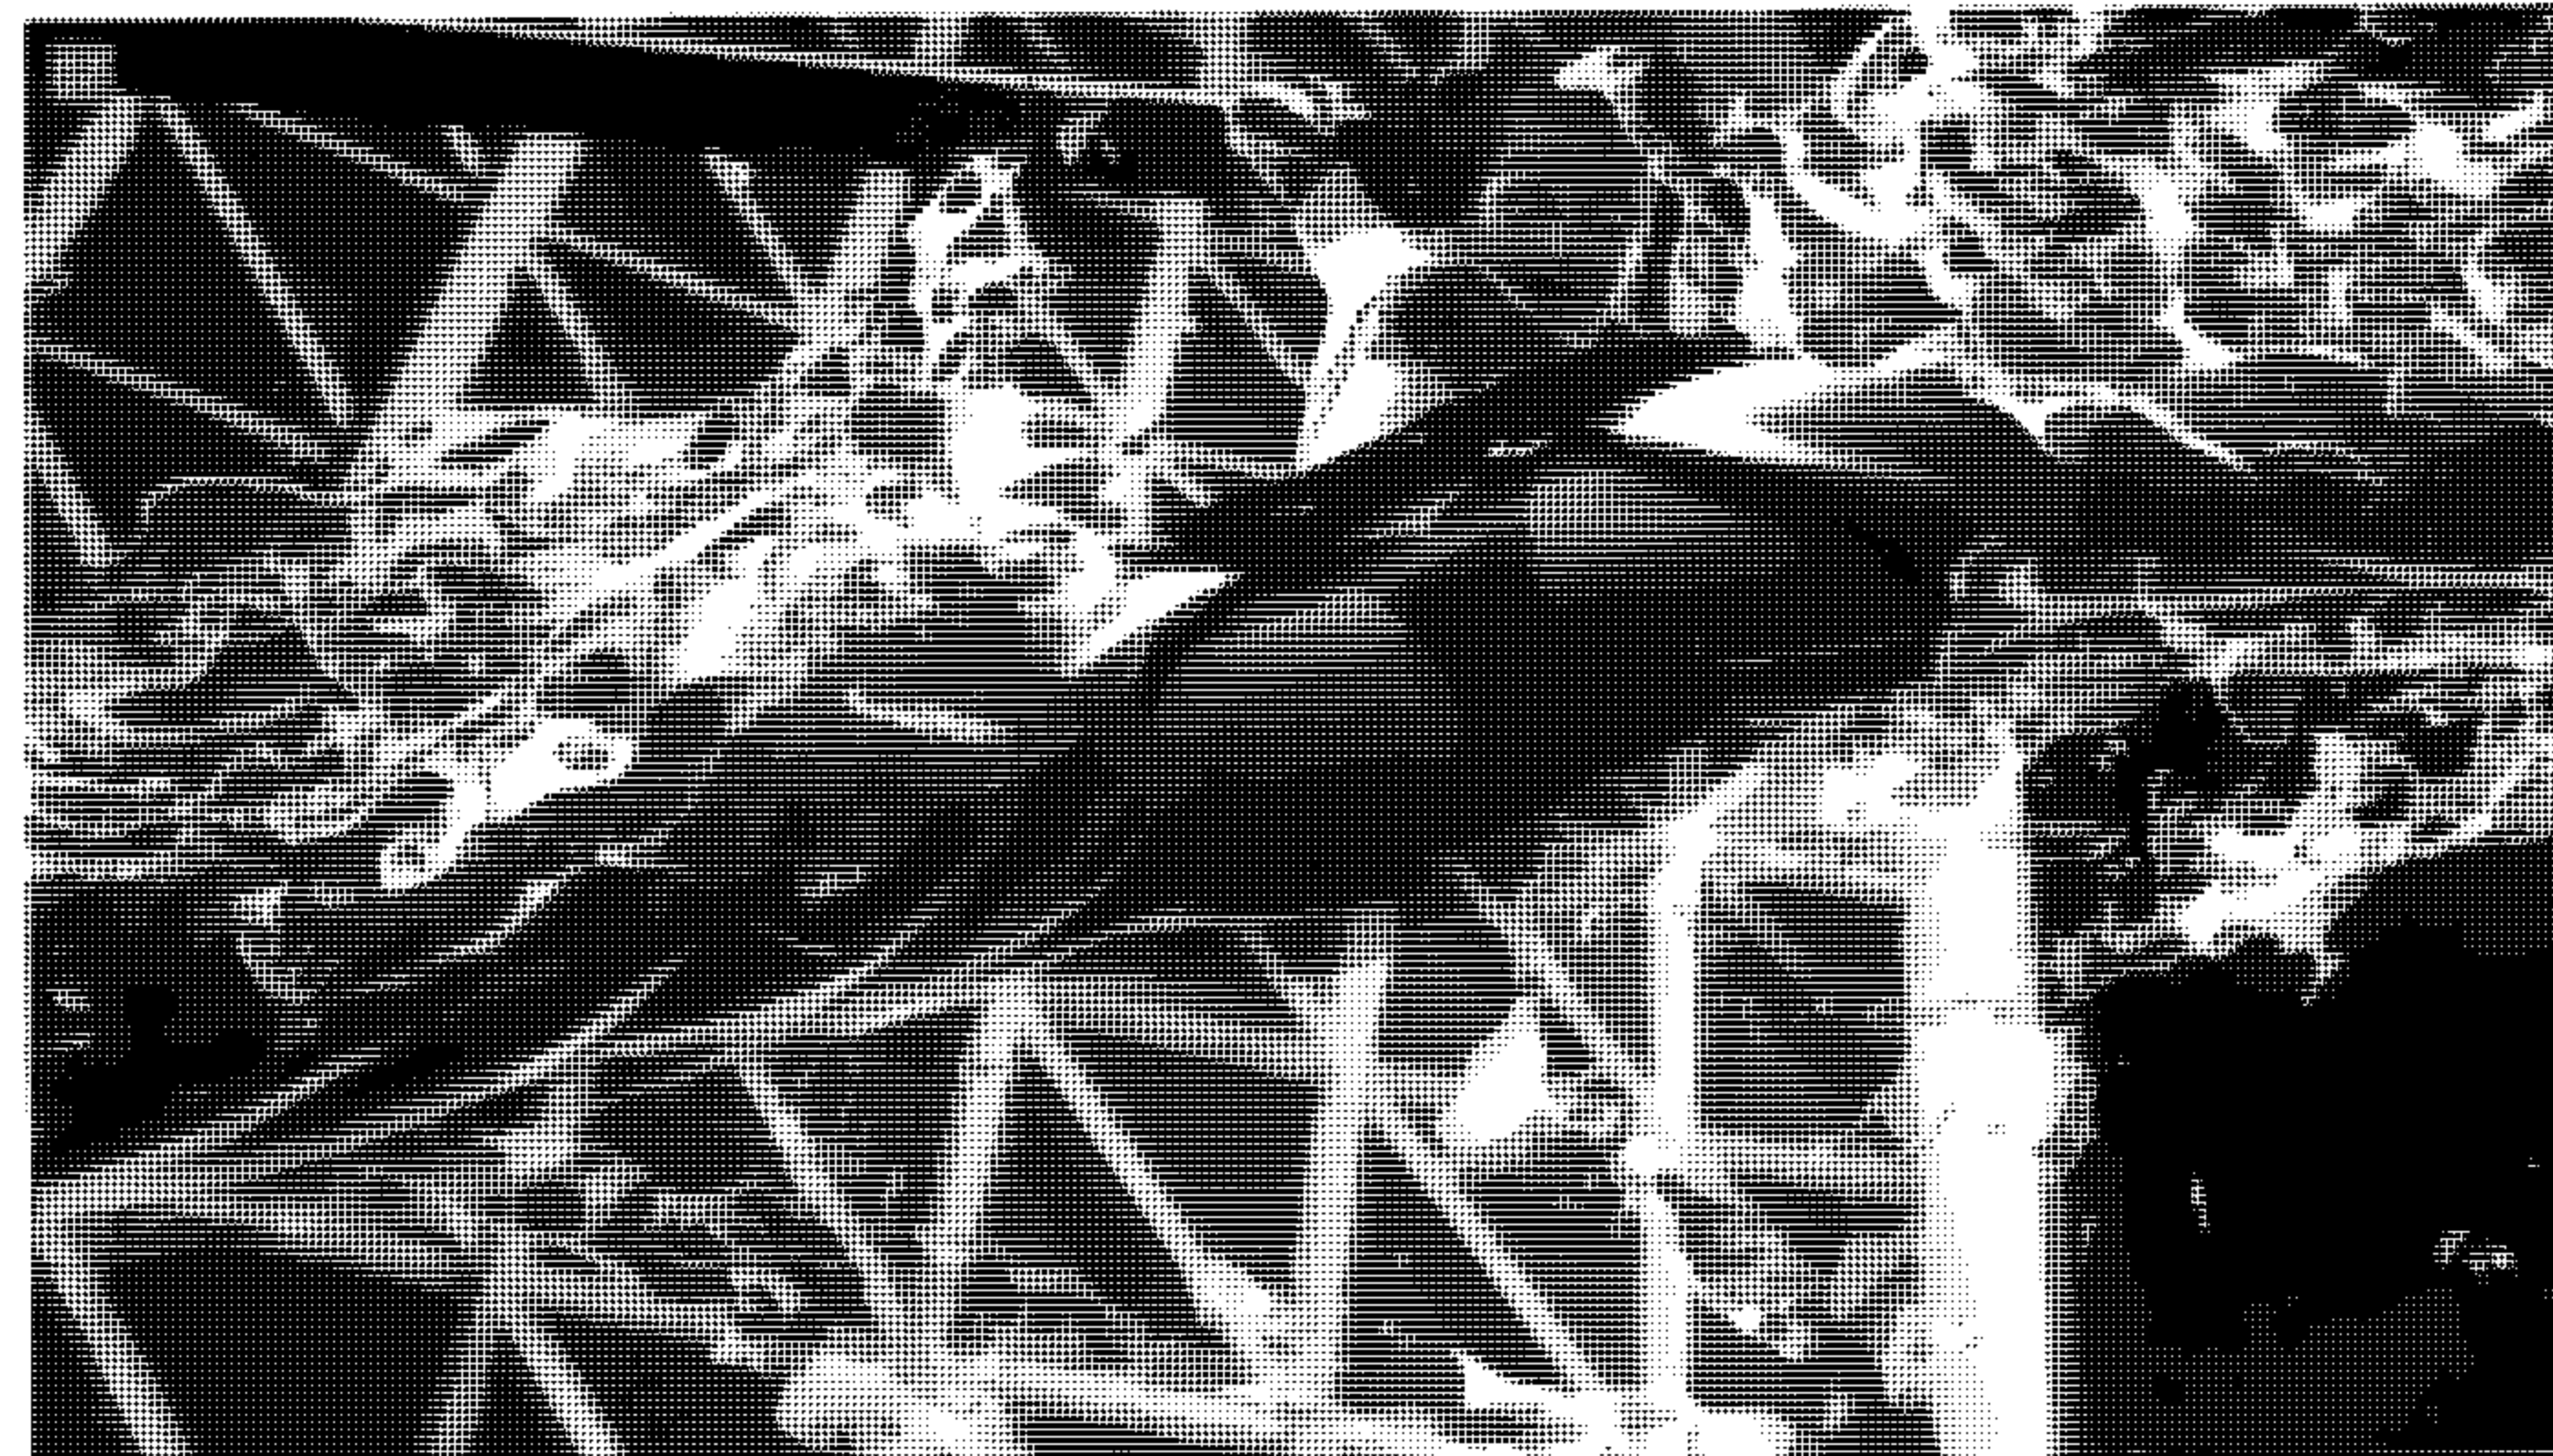

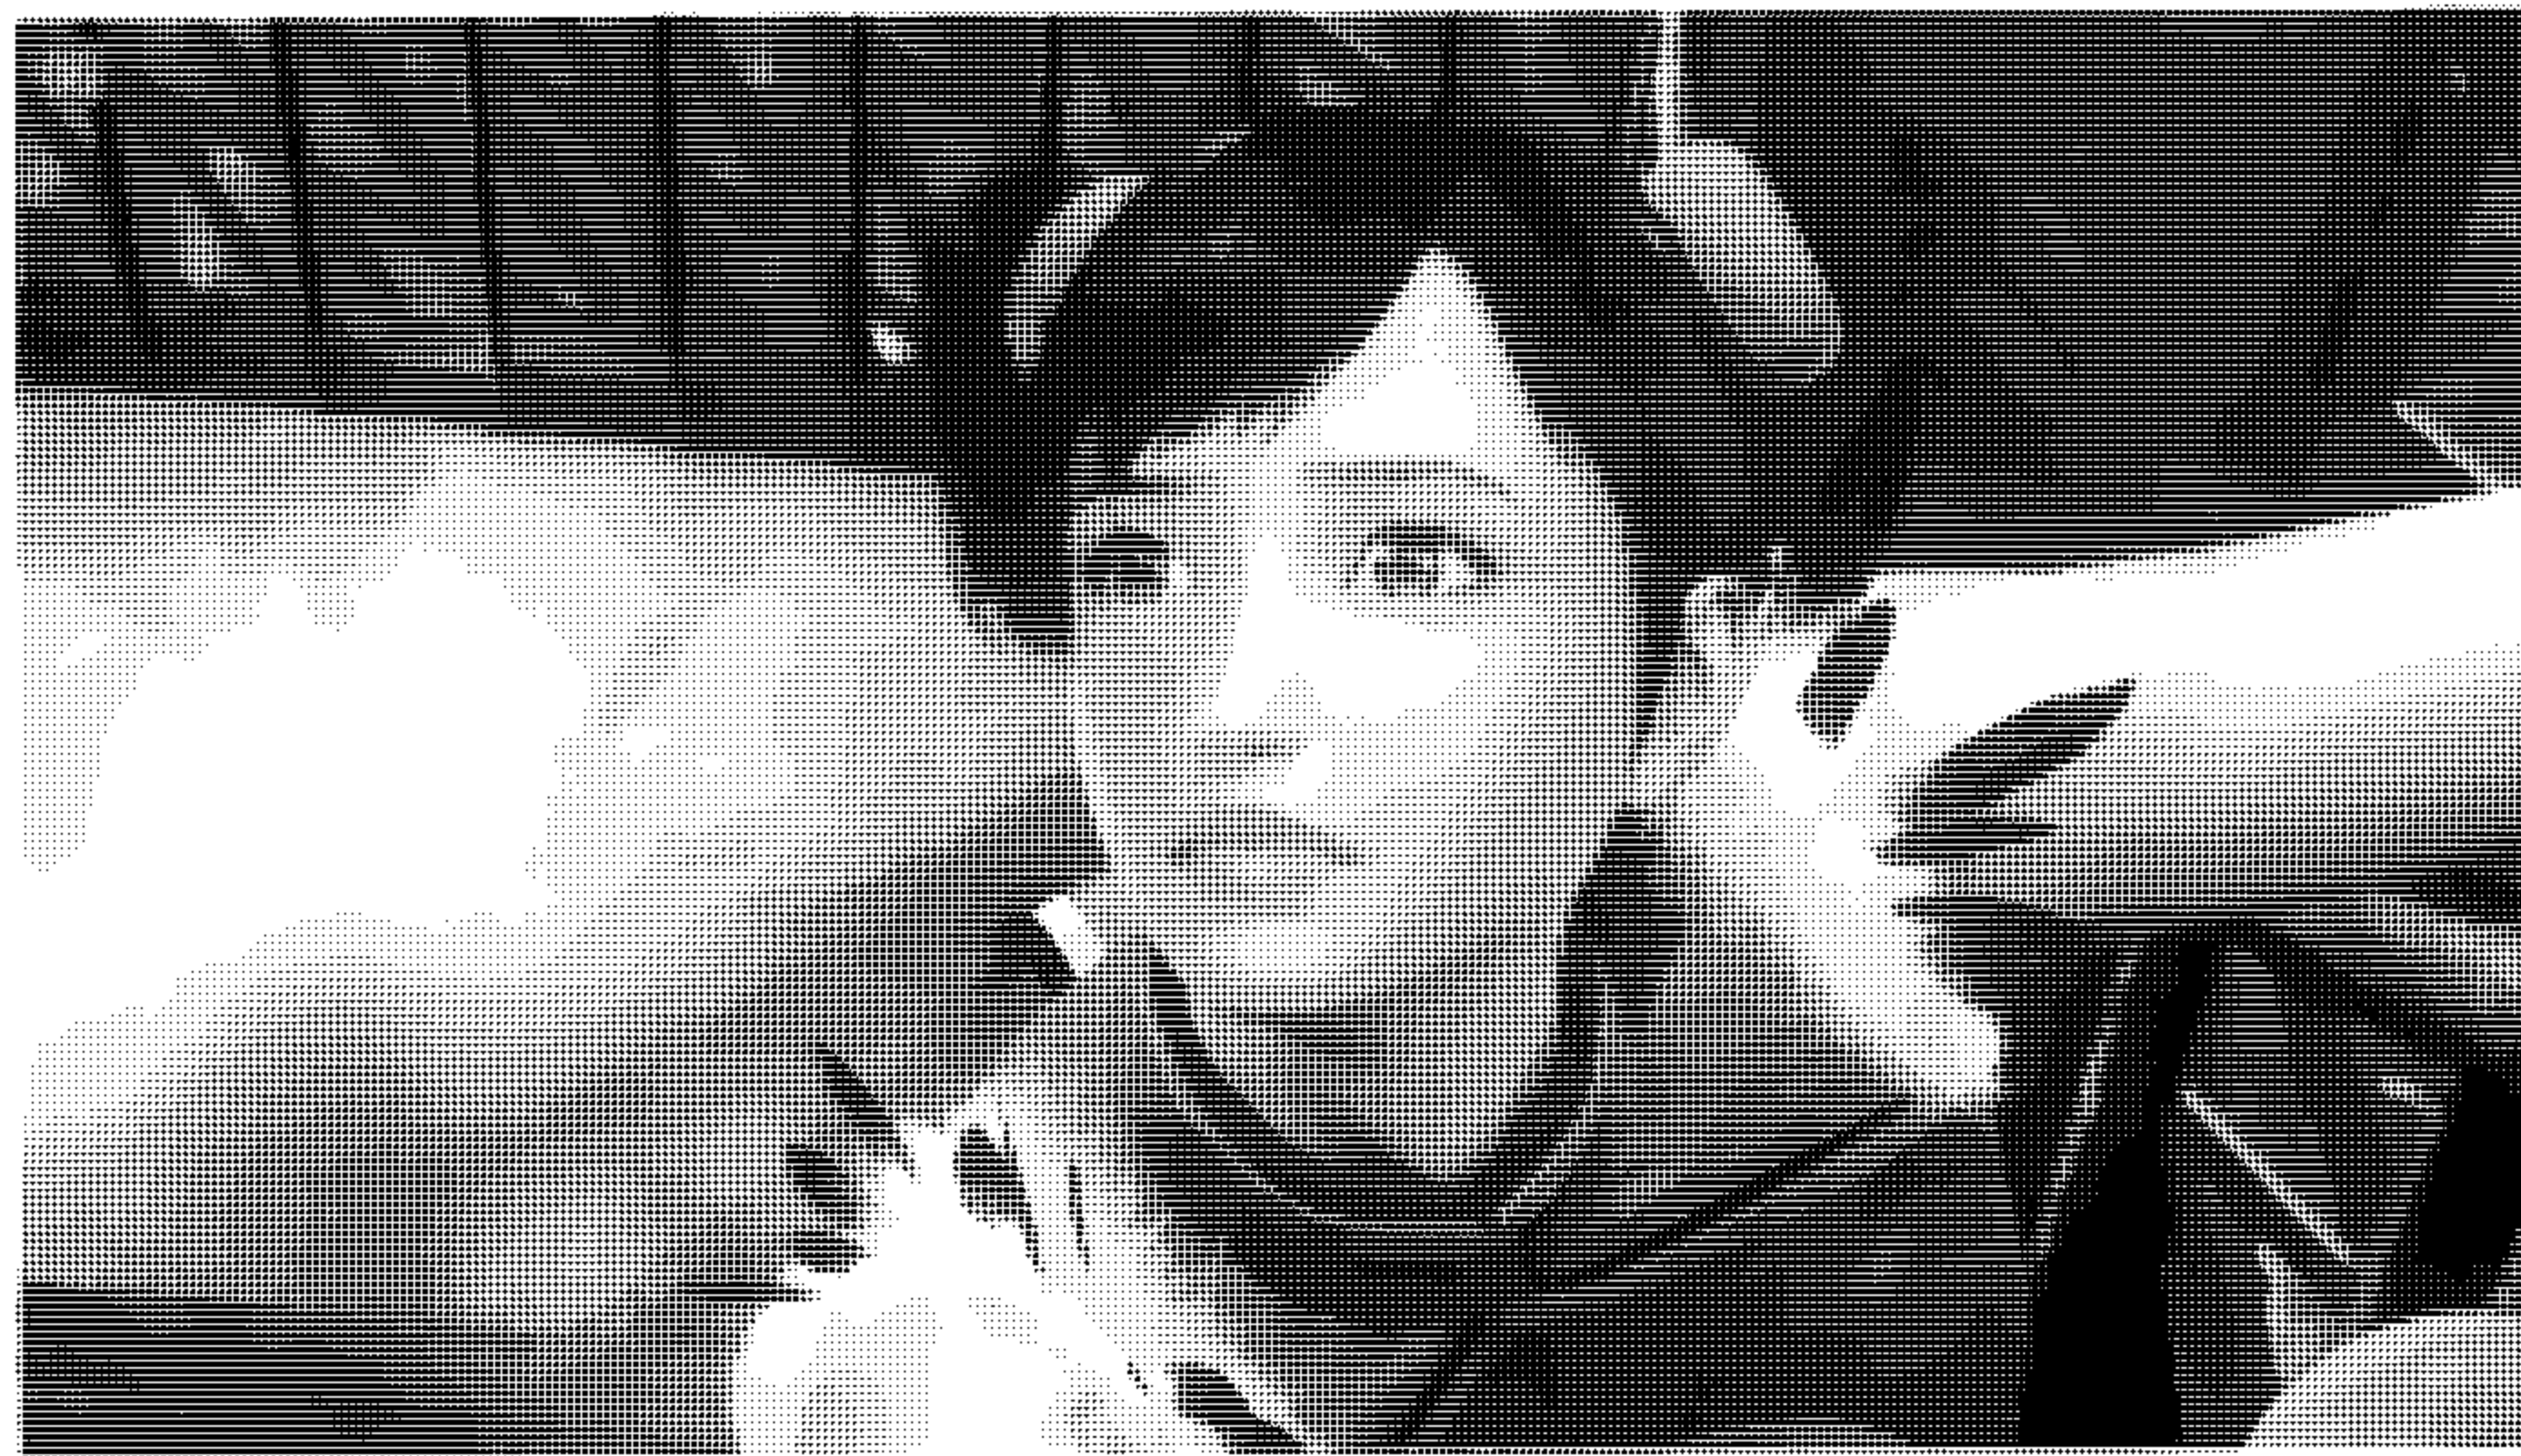

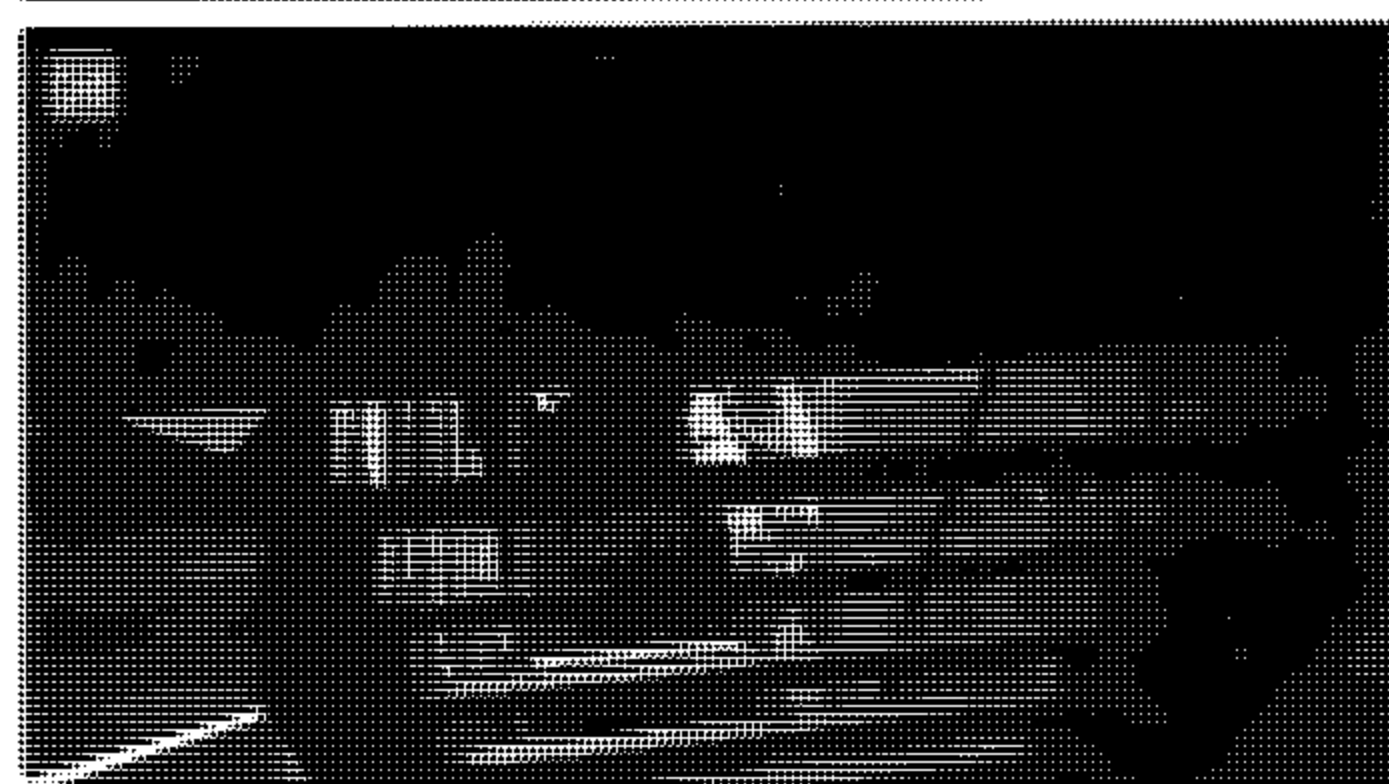

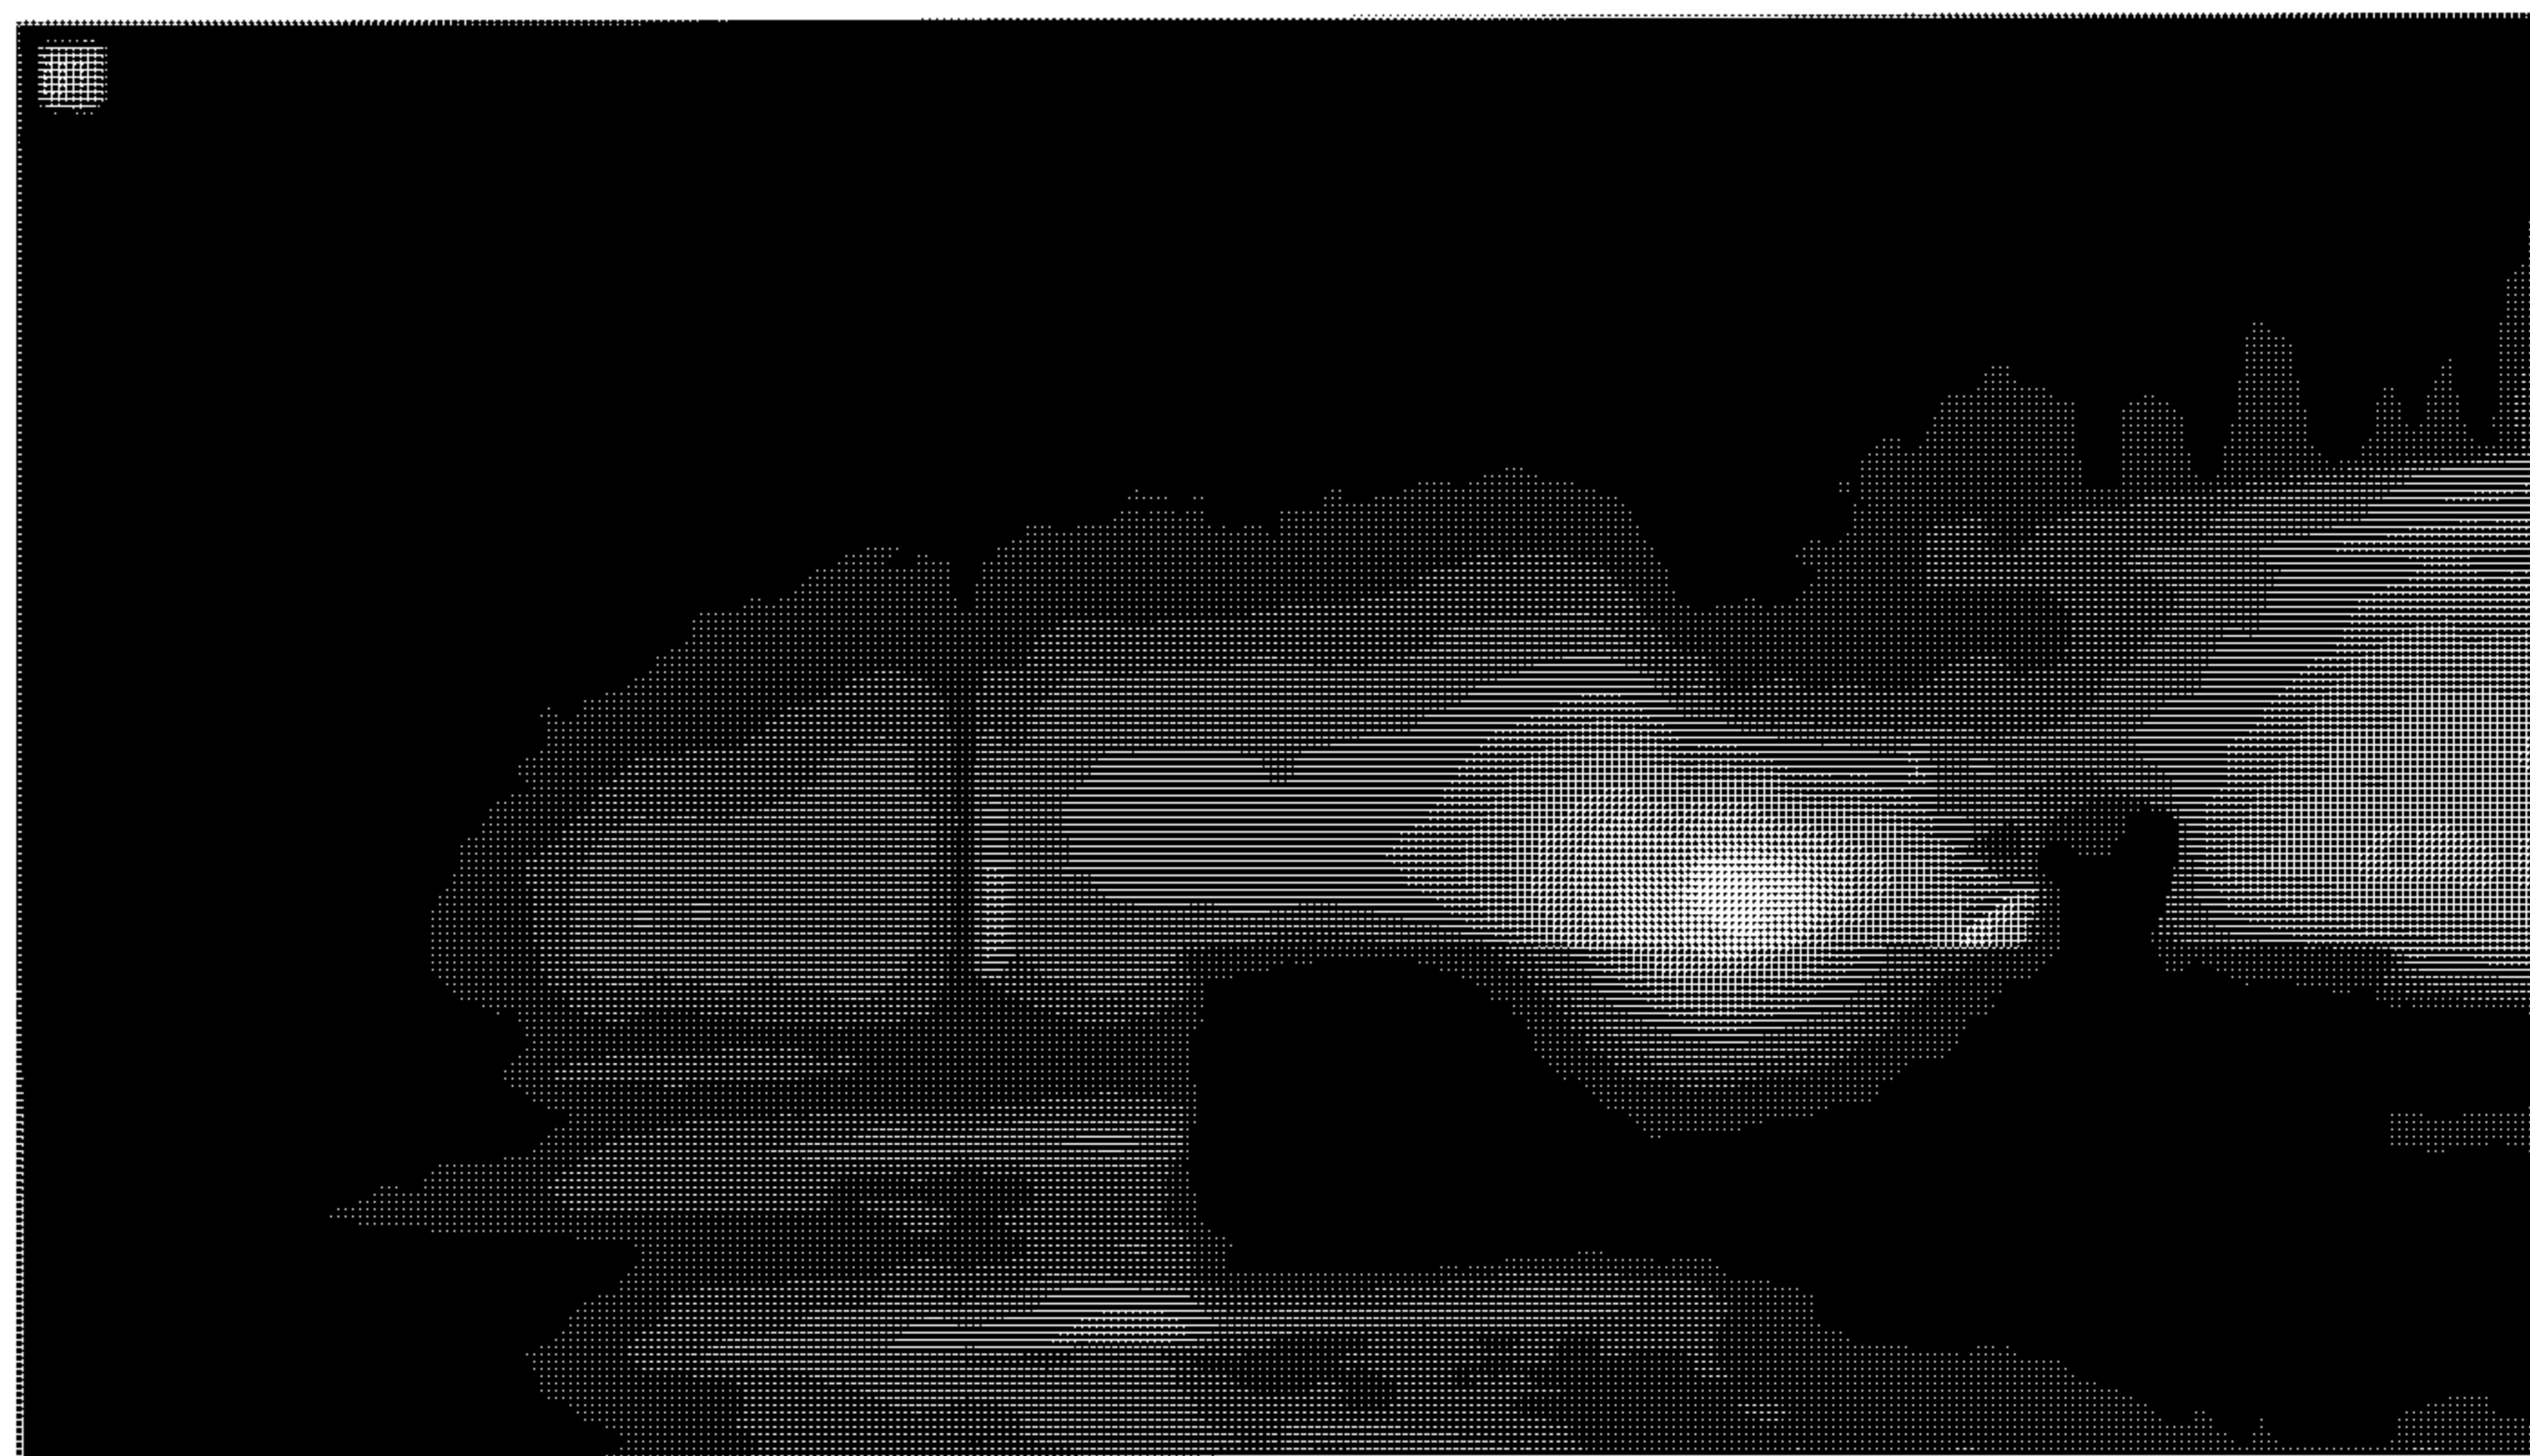

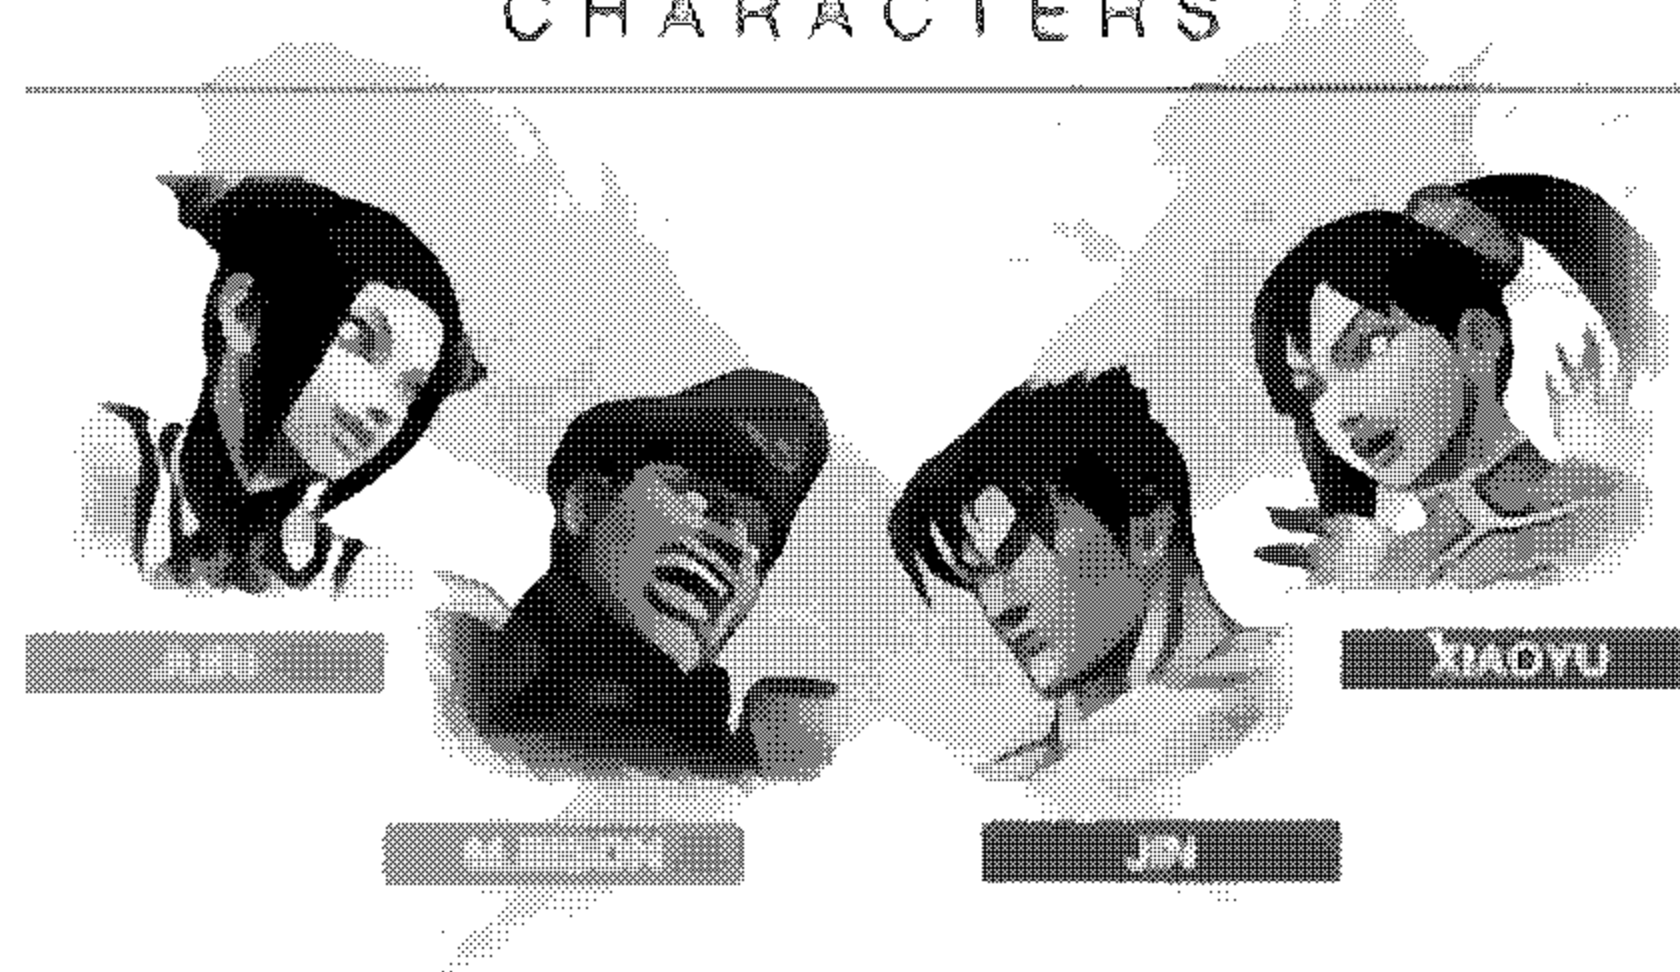

这一段我想象成姑娘们在水族馆里格斗.我也听取了某个著名画薄的艺术家之提示,让画面充满了饱和的色彩.打光不需要真实,而是设计用来尽量更好地展现演出.

STREET FIGHTER X TEKKEN TRAILER

EPISODE 5

《街头霸王》中的M.拜森与韩蛛俐这次直接对上了《铁拳》中的仁与晓雨。本集讲述了邪恶势力与根除邪恶的努力之间的战斗。M.拜森与韩蛛俐在寻找潘多拉盒，希望它能强化其邪恶力量，而仁与晓雨寻找这件宝物是要用它潜藏的力量来助力对抗邪恶。这场令人兴奋的对抗发生在一座三岛财团的建筑里，以恶魔基因的觉醒为主题。这集可以说是游戏剧情的主心骨。

CHARACTERS

SCENE

- 11・12 风间仁终于坐到了这栋大楼的顶层,但在他陷入沉思的时候,M.拜森经过时空裂缝出现了,我们还看到凌晓雨不顾一切地沿着外层疏散楼梯往楼顶上跑,想要到仁那边,忽然她头上的爆炸引起了她的注意。
- 13・14 不知名的人因为爆炸而从楼里飞了出去,接着就看到韩蛛俐从楼中猛冲而来袭击晓雨,爆炸继续摇晃着整幢大楼,它显然临近倒塌了。
- 15・16 M.拜森与蛛俐显然即将赢得这场战斗,不过仁体内的恶魔基因觉醒了,蛛俐感受到了危险,并激活了她的风水引擎躲开了,M.拜森立即用一招精神力穿击撞上了仁。

- 17・18 仁被M.拜森的攻击钉在了墙上,但他已经被恶魔基因接管了,仁带着可怕的笑容咆哮道:“我来教你什么叫恐惧!”

from Polygon Pictures (Tohru Ohashi)

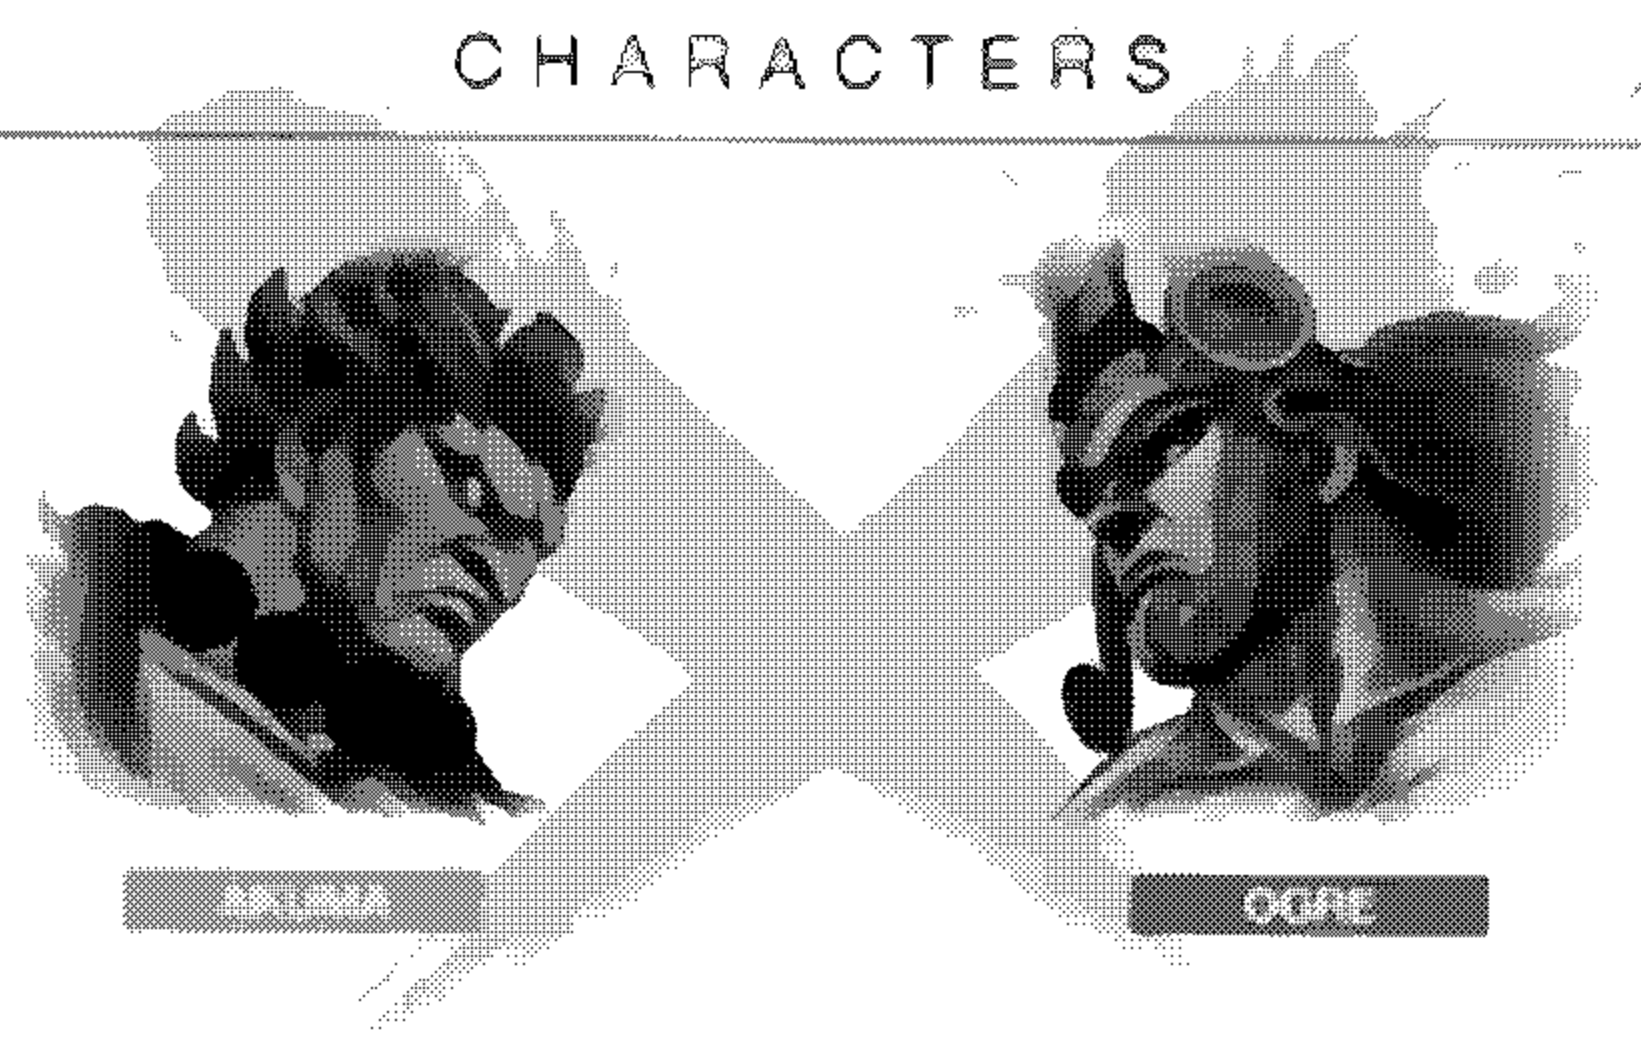

我听说粉丝们很喜爱风间仁抓住韩蛛俐瞬间时,她脸上掠过的一丝脆弱感,因为这与她平时残虐而傲慢的面部表情有着冲击性的不同,仁的翼翅展开时,他脸上不可一世的笑容也值得一看。

STREET FIGHTER X TEKKEN TRAILER

EPISODE 6

《街头霸王》的豪鬼和《铁拳》的斗神,都在对力量的追寻中超越了凡人的极限.要是这两股无可阻挡的力量相互冲突时会发生什么?两个系列的所有爱好者们都希望这个问题能得到解答.在两个传奇战士命运般的遭遇战这个重要时刻,空气本身似乎都凝结了.

CHARACTERS

SCENE

- ・■ 豪鬼追求纯粹的究极力量,而斗神在寻找他的创造者.两个战士宛如在看不见的手引导下,各自来到了南极洲.他们意识到了彼此的存在,并暗自燃烧起了斗志。
- ・■ 豪鬼和斗神在估摸着对方,同时陨石在他们中间的开阔空间落下.在陨石引发大爆炸前的一瞬间,我们看到了杀意瞬间闪现了一下。
- ・■ 两个恶魔般战士的立足点动荡不稳起来,他们怒吼着跃身而起,场面一片混沌.两人在潘多拉盒上方的高处停顿,场景中彻底沉寂了,就像是巨大风暴前的平静.最后,豪鬼和斗神一声大吼,冲向了对方!

- ・■ 《街头霸王》和《铁拳》中的战士们将在南极洲交汇,潘多拉盒引领着他们的欲望.这场历史性的穿越会给我们留下什么?这就是格斗游戏新时代的黎明!

from Polygon Pictures (Toshio Okumura)

这集真是在与时间和预算限制赛跑.我们没有太多展现豪鬼和斗神的格斗动作,而是利用他们周围的暴风雪来表现他们的强大。

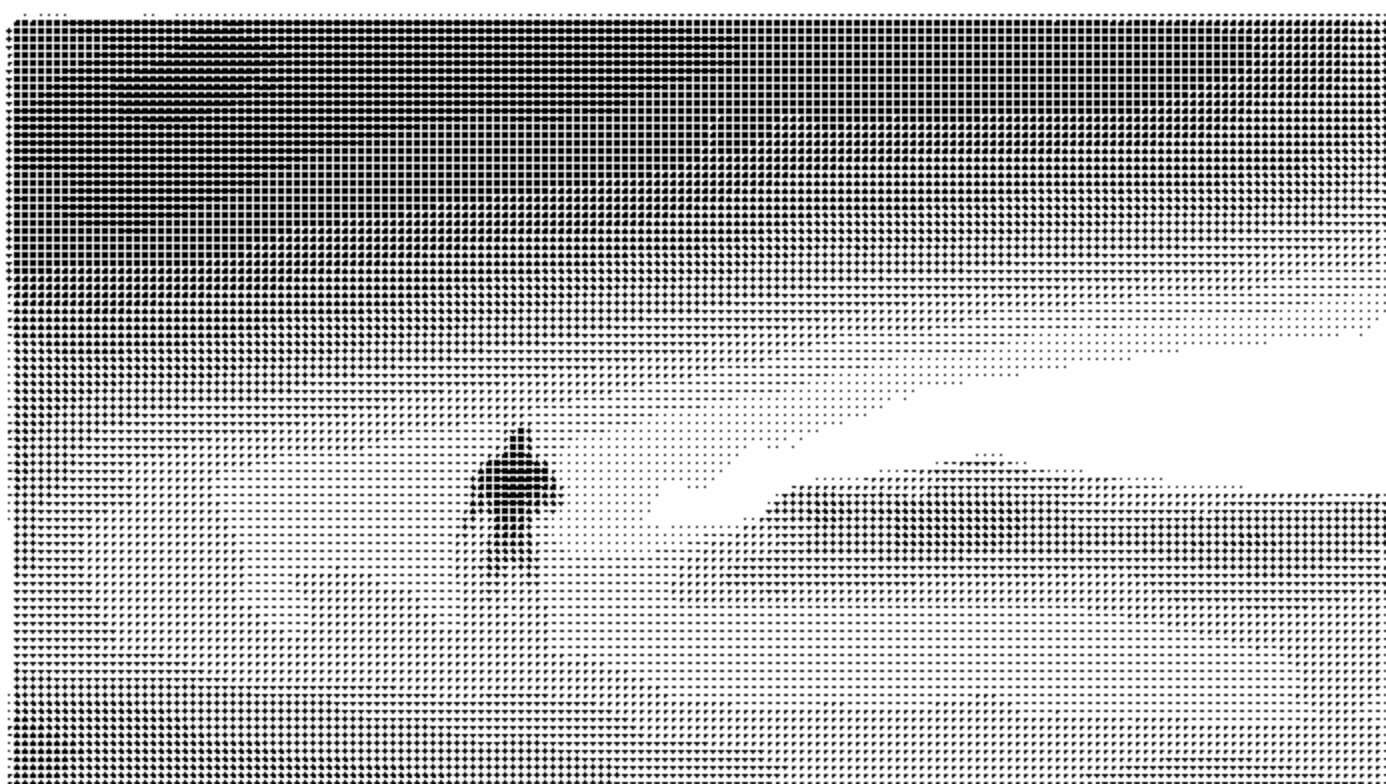

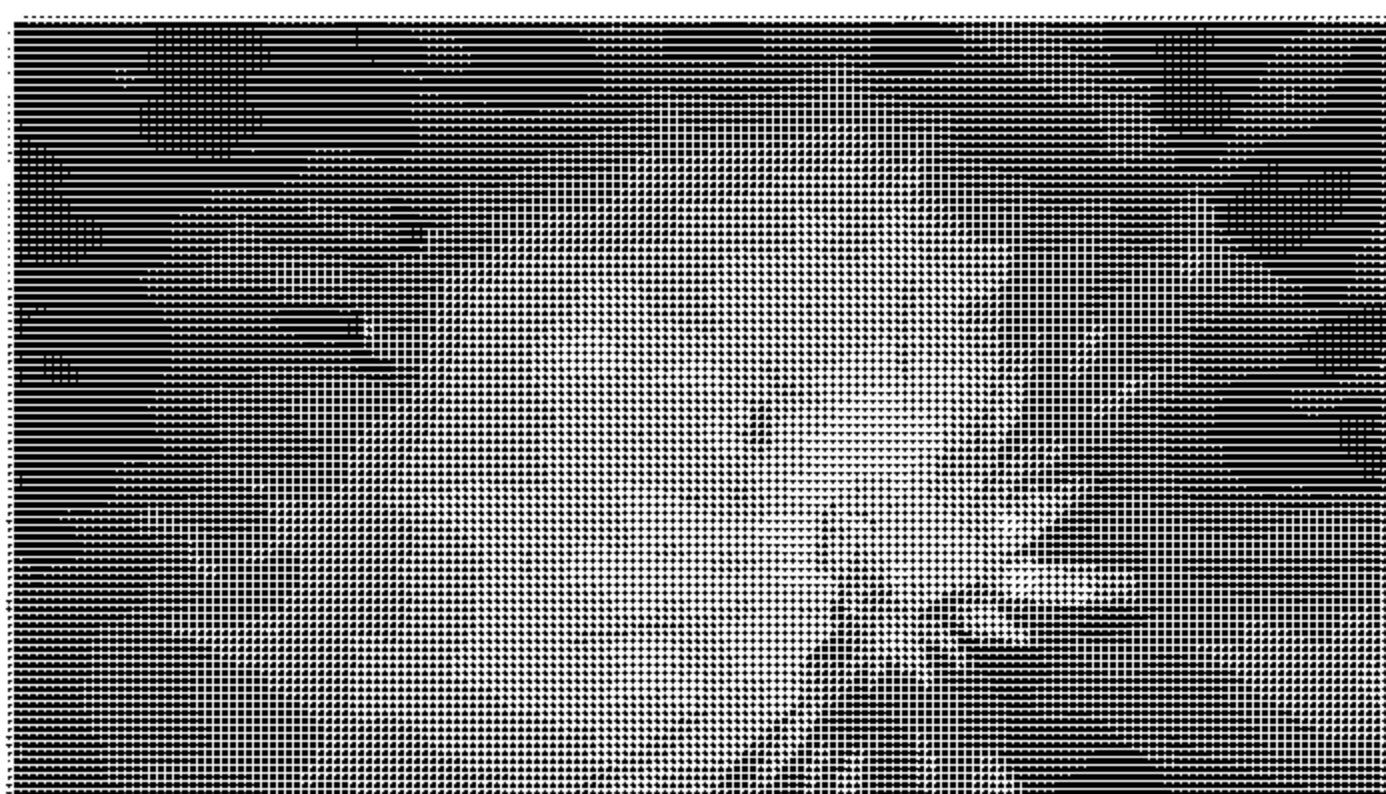

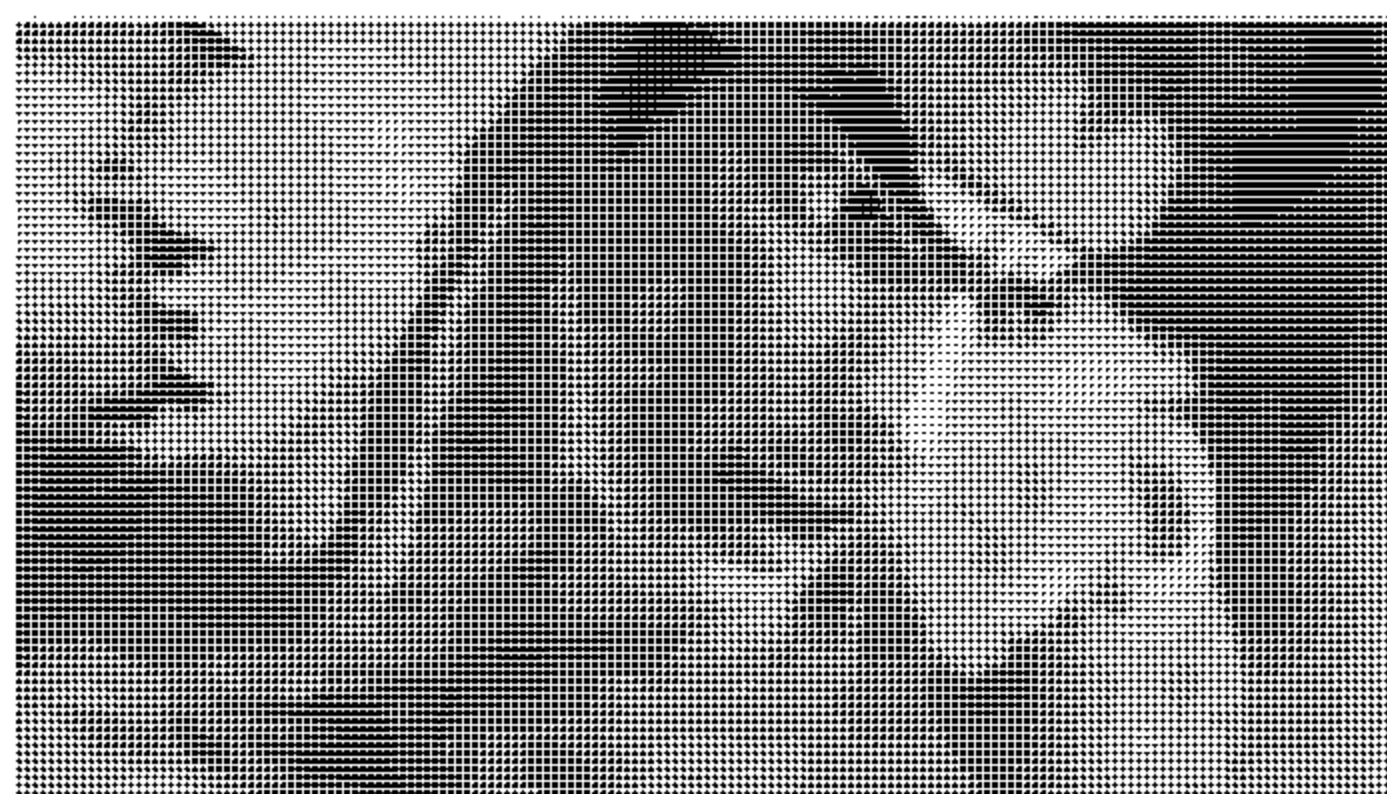

STREET FIGHTER X TEKKEN ENDING

隆与肯

リョウ & ケン

from Polygon Pictures (Toshio Ohashi)

我们最初的计划是让潘多拉盒“拯救”隆免于被杀意之波动所吞噬,但后来还是认为隆的命运未知才更有趣。有鉴于此,我们选择了一段用肯担忧的表情结尾的影片。

他们站到潘多拉盒前时,一种紫色的光环开始吞没隆的身体。他举起一只手不让肯接近,但光环的烈度令隆也无法忍耐,发出了痛苦的惨叫。潘多拉盒逐渐解体,它神秘的光芒伸向了隆身上杀意之波动的紫色触手。当耀眼的光芒消散时,隆已经不见了。

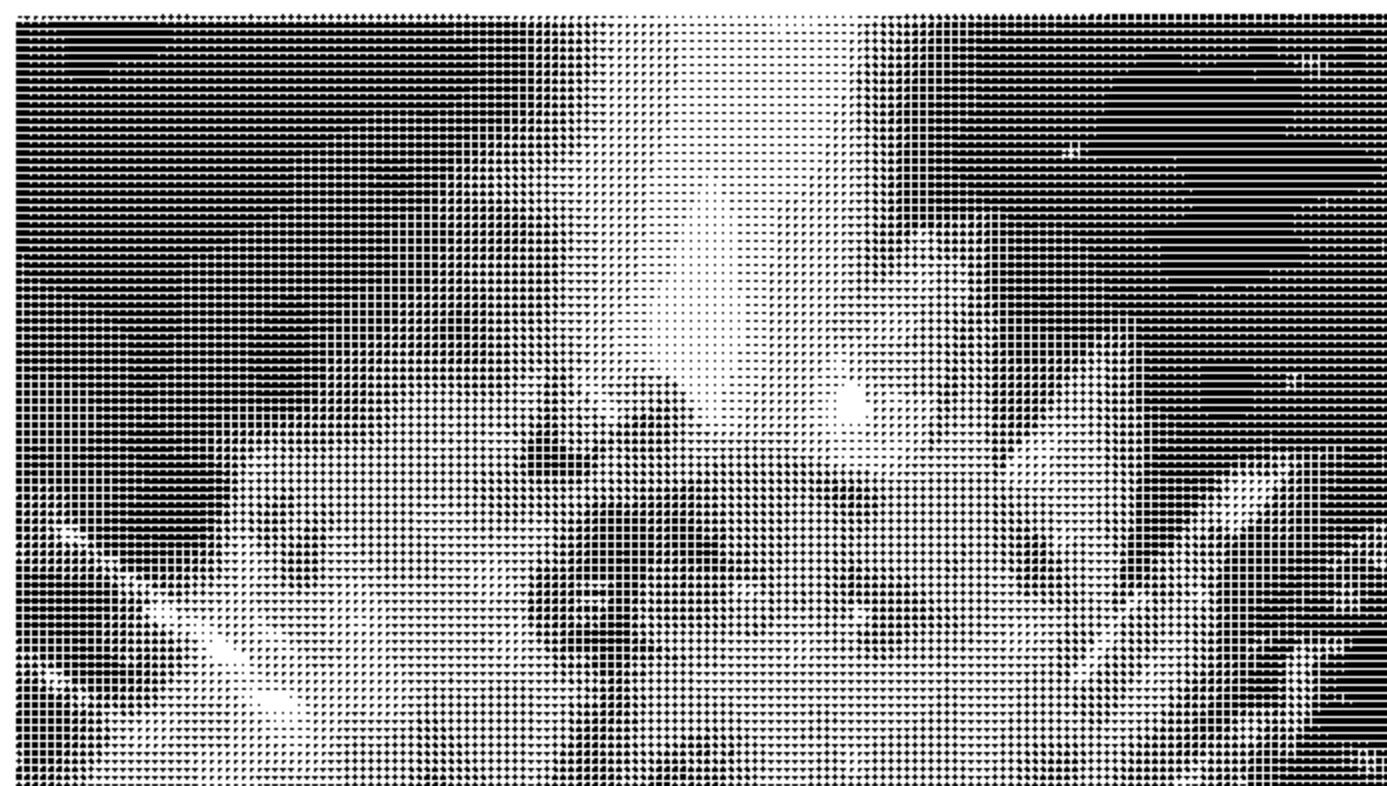

STREET FIGHTER X TEKKEN ENDING

春丽与嘉米

スプリング & キャンディ

from Polygon Pictures (Toshio Ohashi)

在春丽与嘉米的场合,总是在表现她们华丽的动作和绝佳的敏捷。我们想要尝试一种截然不同的手法,因此这个结局氛围十分平静,春丽和嘉米只是简单交谈了几句。

春丽和嘉米现在站到了潘多拉盒—影罗和三岛财阀成员都不顾一切要获得之宝物前面。一道平和的蓝光从潘多拉盒中射向天空,两位格斗家意识到不需要恐惧了,也没有受到潘多拉盒的负面影响。

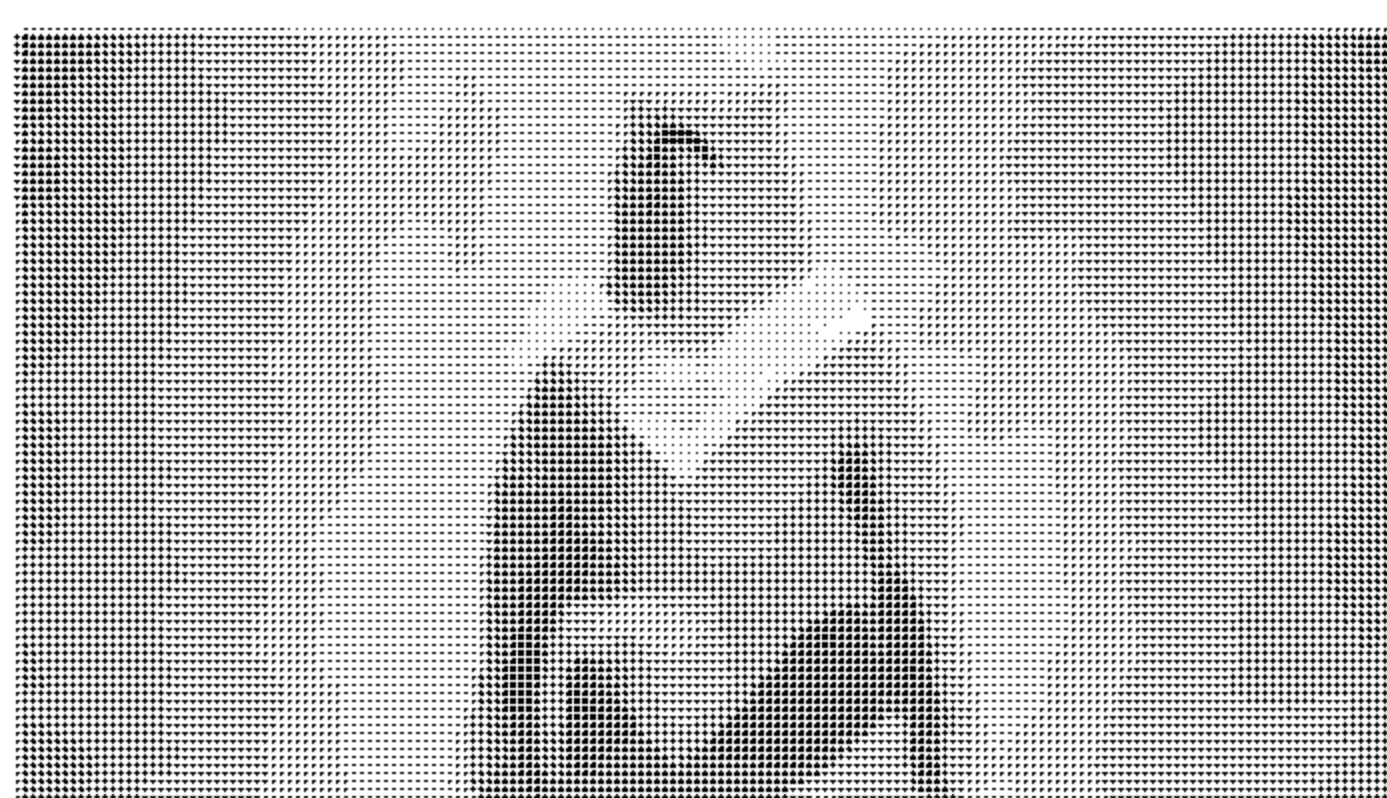

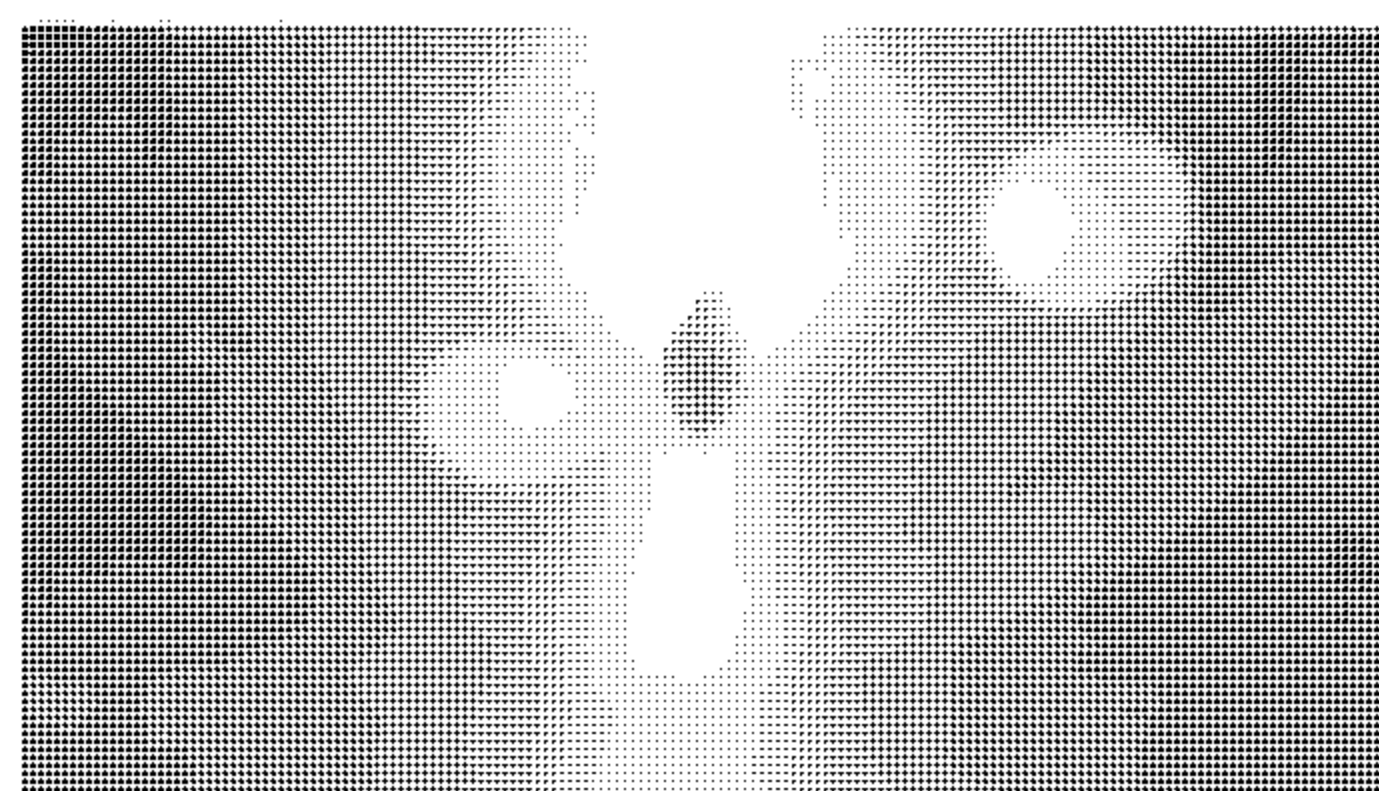

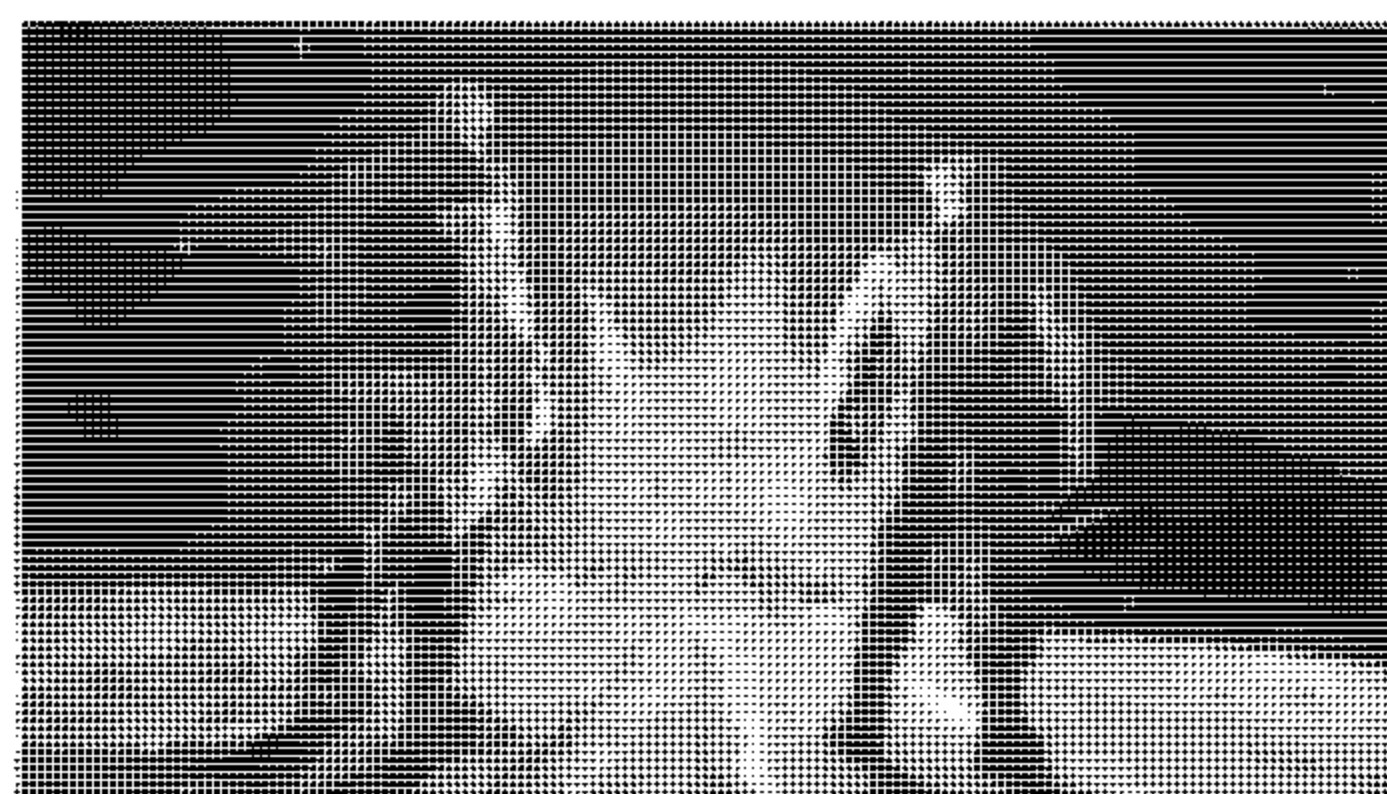

STREET FIGHTER × TEKKEN ENDING

古烈与阿贝尔

カイル & アベル

from Polygon Pictures (Toshio Ogashti)

古烈和阿贝尔很可能是整个游戏中最为刻板的两个人物了,但结果他们却得到了最为荒诞超现实的结局.在我提出熊外星人的想法时,我自己相当确定会被当即否决,所以它得到通过也给了我不少的激励。

古烈与阿贝尔一路战斗来到潘多拉盒前,但他们没有得到什么有关过去的线索作为奖赏.阿贝尔不顾古烈的警告,在好奇心的驱使下打开了盒子.一道明亮的蓝光从潘多拉盒中迸出,射向了一艘不知从何而来的飞碟.随后,光束成为了一些熊形的外星人从飞碟落入潘多拉盒的通道。

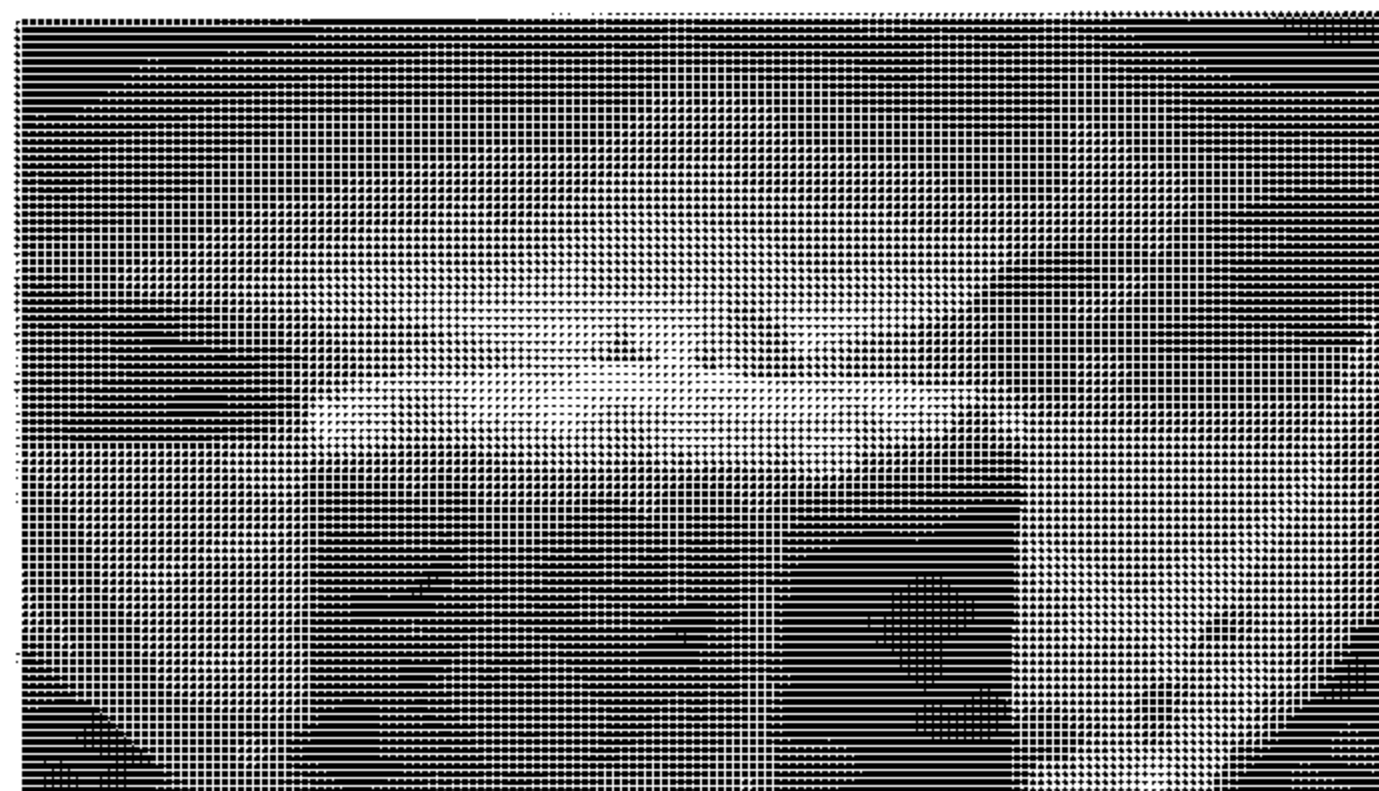

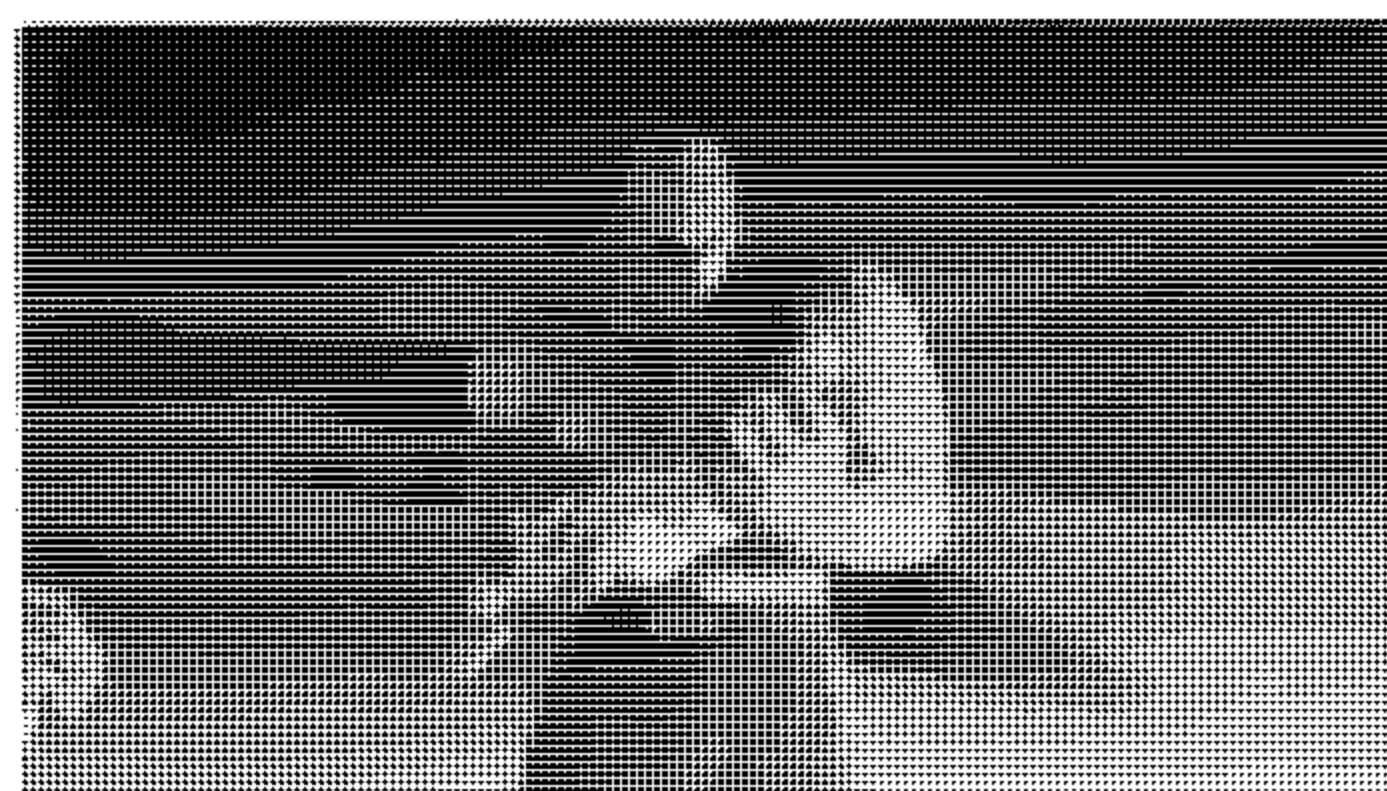

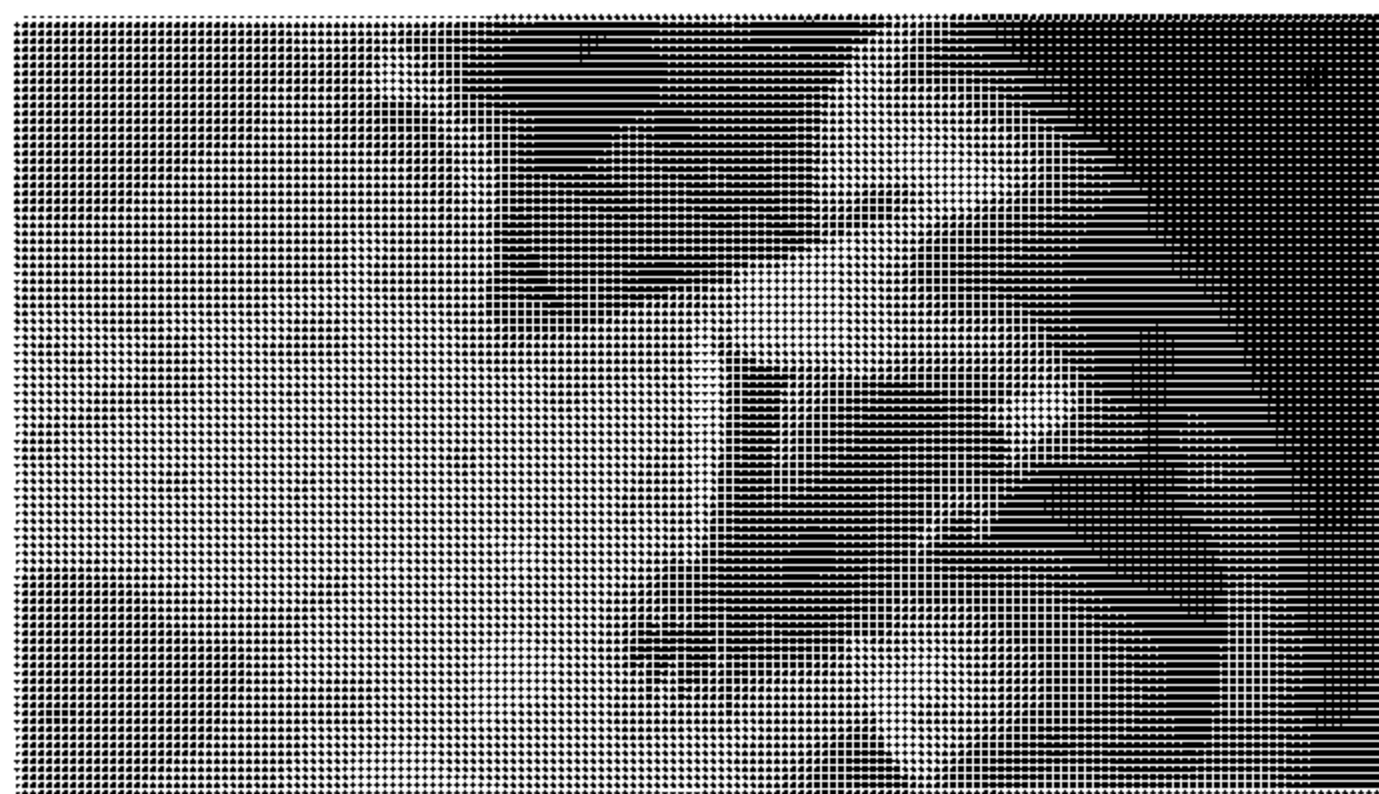

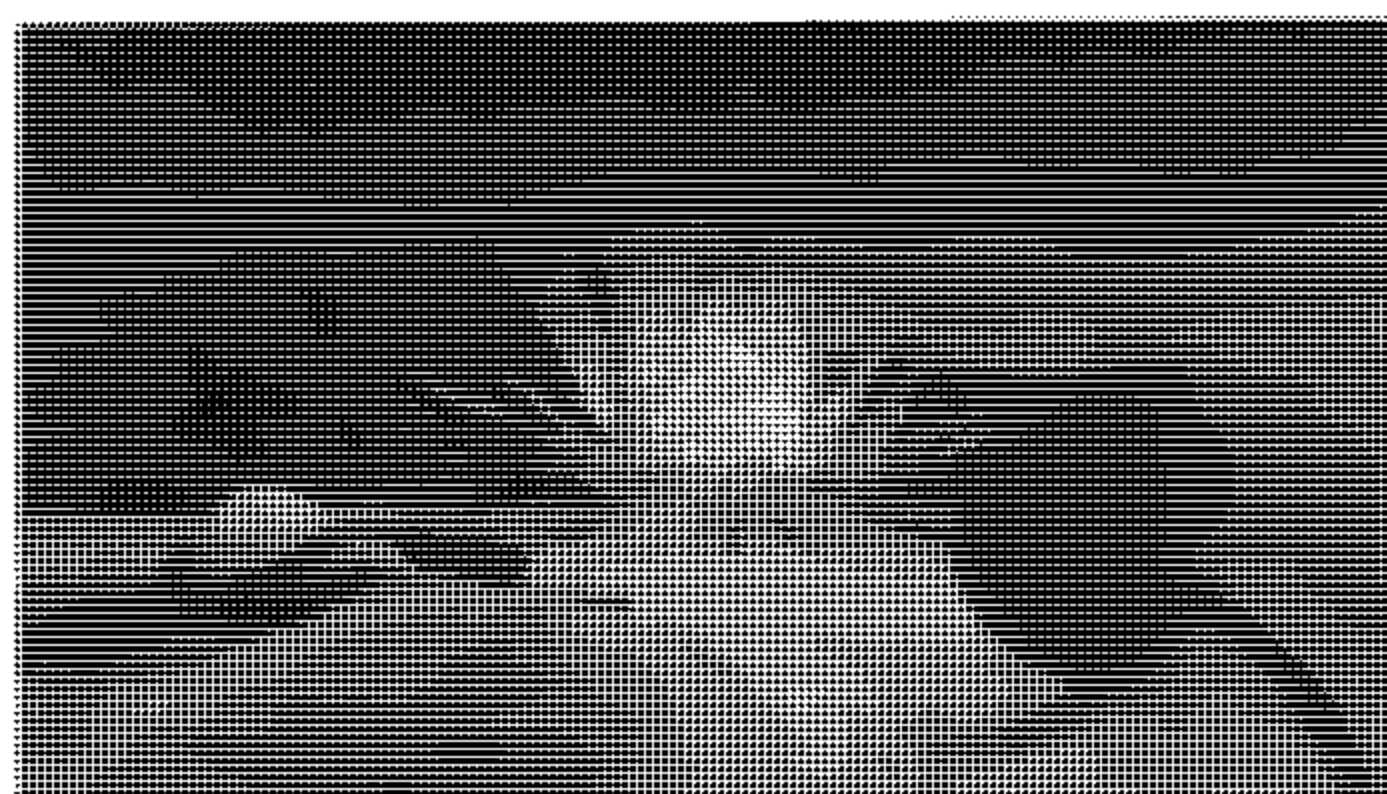

STREET FIGHTER × TEKKEN ENDING

达尔锡与沙加特

ダルク & サガタ

from Polygon Pictures (Toshio Ogashti)

这个结局最困难的部分在于,让沙加特和达尔锡这样可怕而肌肉发达的格斗家温柔地抱着失去意识的孩子们。

达尔锡与沙加特为寻找失踪的孩子们一路旅行至南极洲.他们在一个发光的盒子边上找到了这些安然无恙活着的孩子们.潘多拉盒似乎拥有着某种神一般的力量,但两个睿智的格斗家对此不感兴趣并离开了。

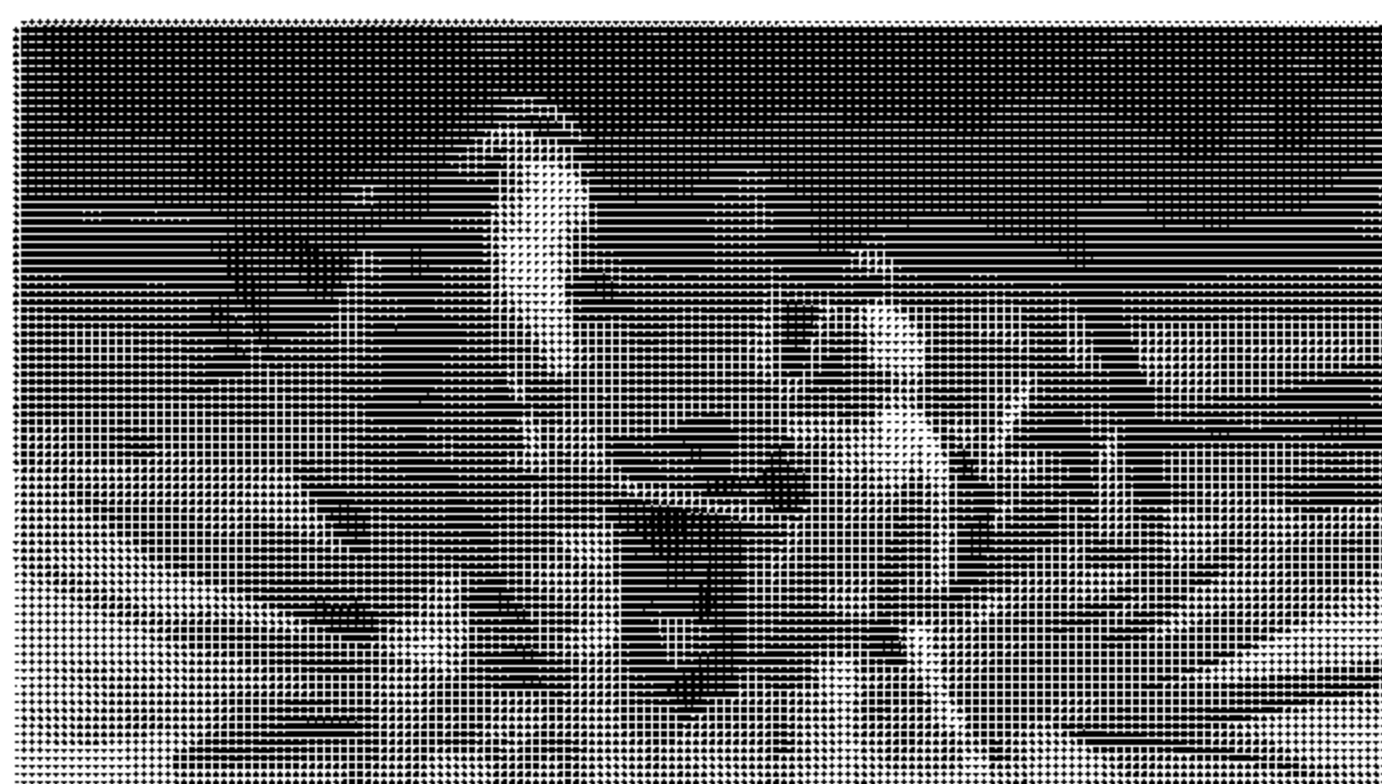

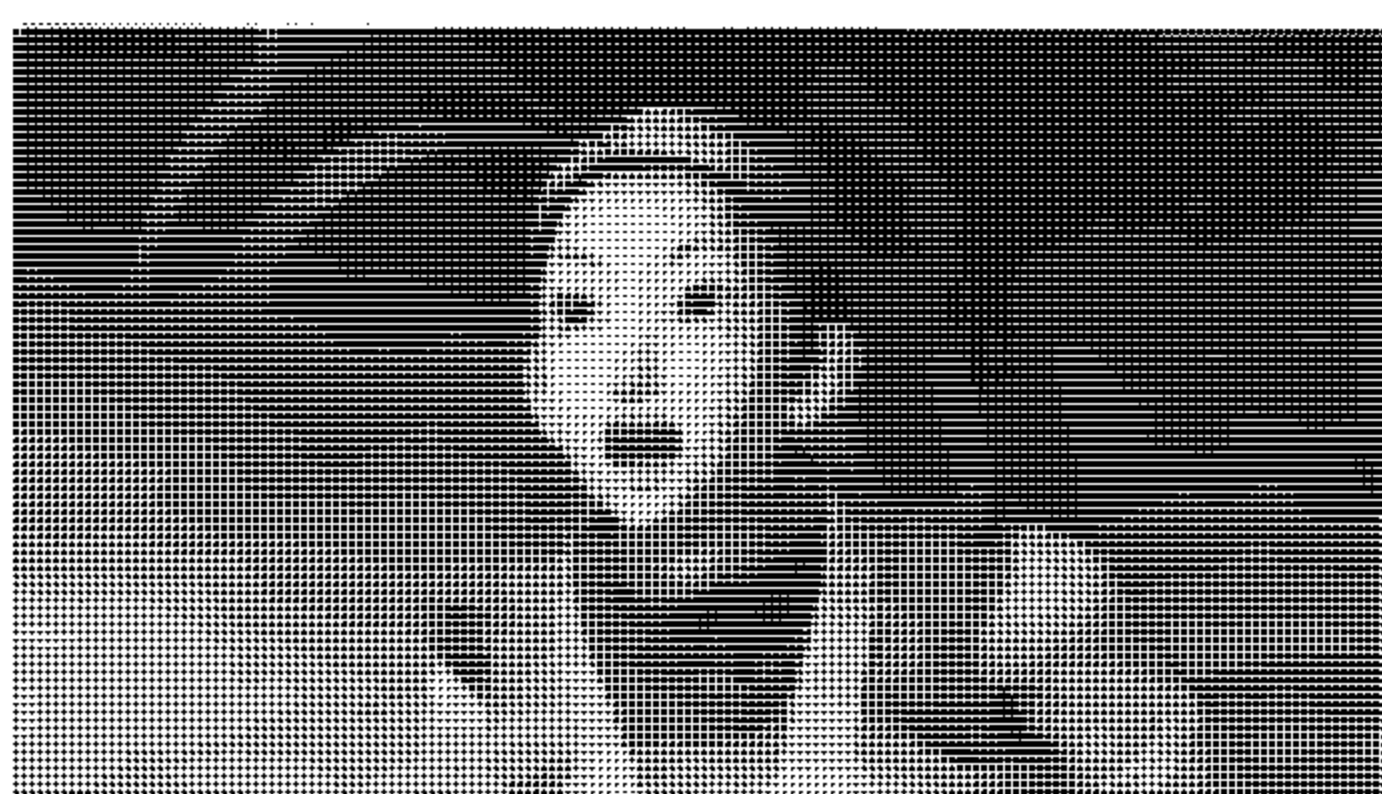

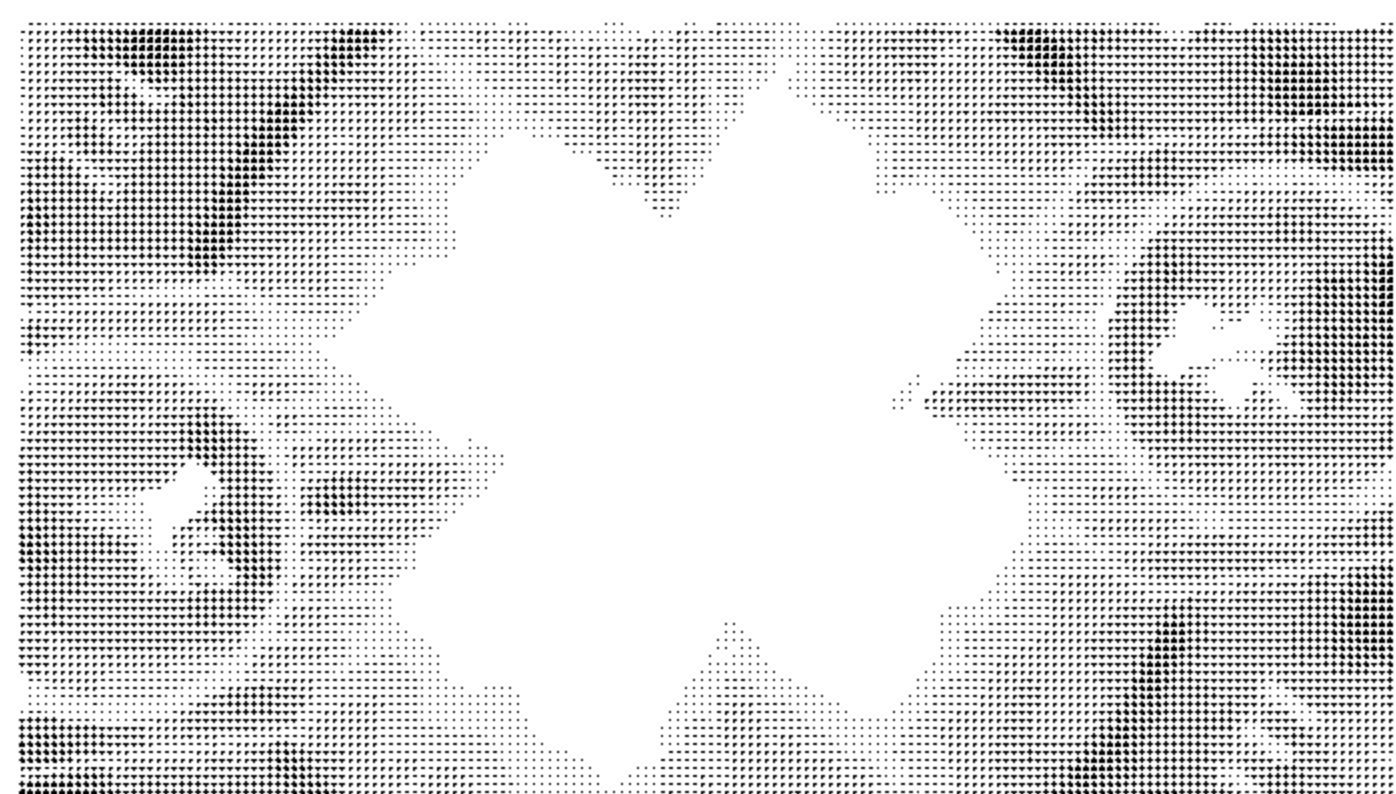

STREET FIGHTER × TEKKEN ENDING

罗兰托与伊吹

ロレント & いぶき

from Polygon Pictures (Toshio Ohashi)

我们在这个结局的挑战是让伊吹对罗兰托荒唐之举的反应既可爱又有趣。在动画CG里萌萌哒可不常见，但我觉得我们做得很好。

罗兰托和伊吹在南极洲发现了一个射出明亮蓝光的盒子。罗兰托怀疑是敌人的陷阱，便偷偷前进来安全地抵达盒子旁边，而伊吹也不耐烦地照做了。当两人靠近盒子时，光已经消散了。罗兰托坚信盒子里的“敌人”聪明地撤走了，并要继续追踪他们，伊吹只得怏怏不乐地跟着。

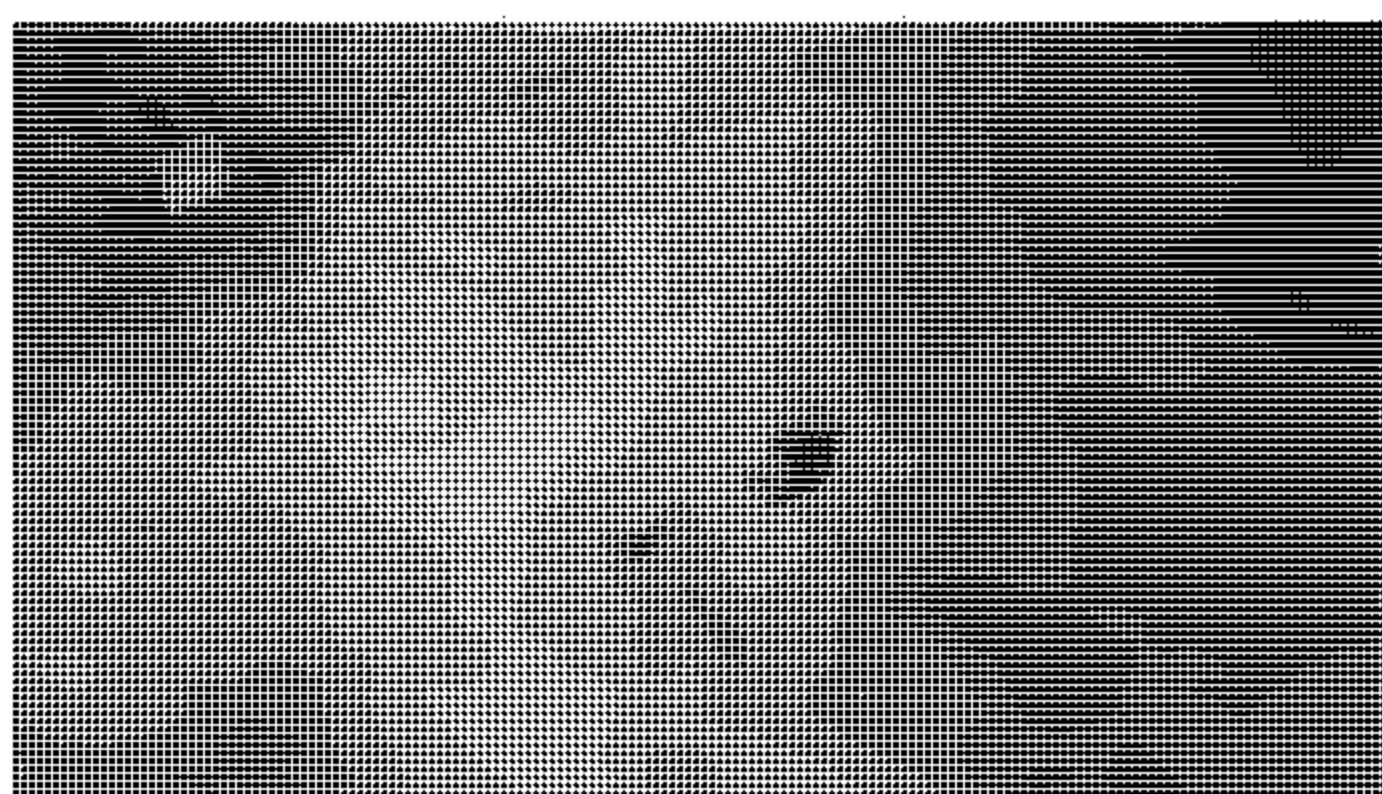

STREET FIGHTER × TEKKEN ENDING

毒药与雨果

ポイズン & ヒューゴー

from Polygon Pictures (Toshio Ohashi)

毒药的麻烦之处在于既要尽可能性感，又要小心防止越界。我们对雨果也要同样当心，在他困惑时偶尔显得有点太可爱了。

毒药和雨果最终得到了获取潘多拉盒的机会，但所有的摄影师都撤走了，他们没能得到想要的媒体关注。愤怒的毒药大步走开，而被她说成“垃圾”的盒子也静静地融化了。后来，毒药和雨果凭借组建HWA上了头条。

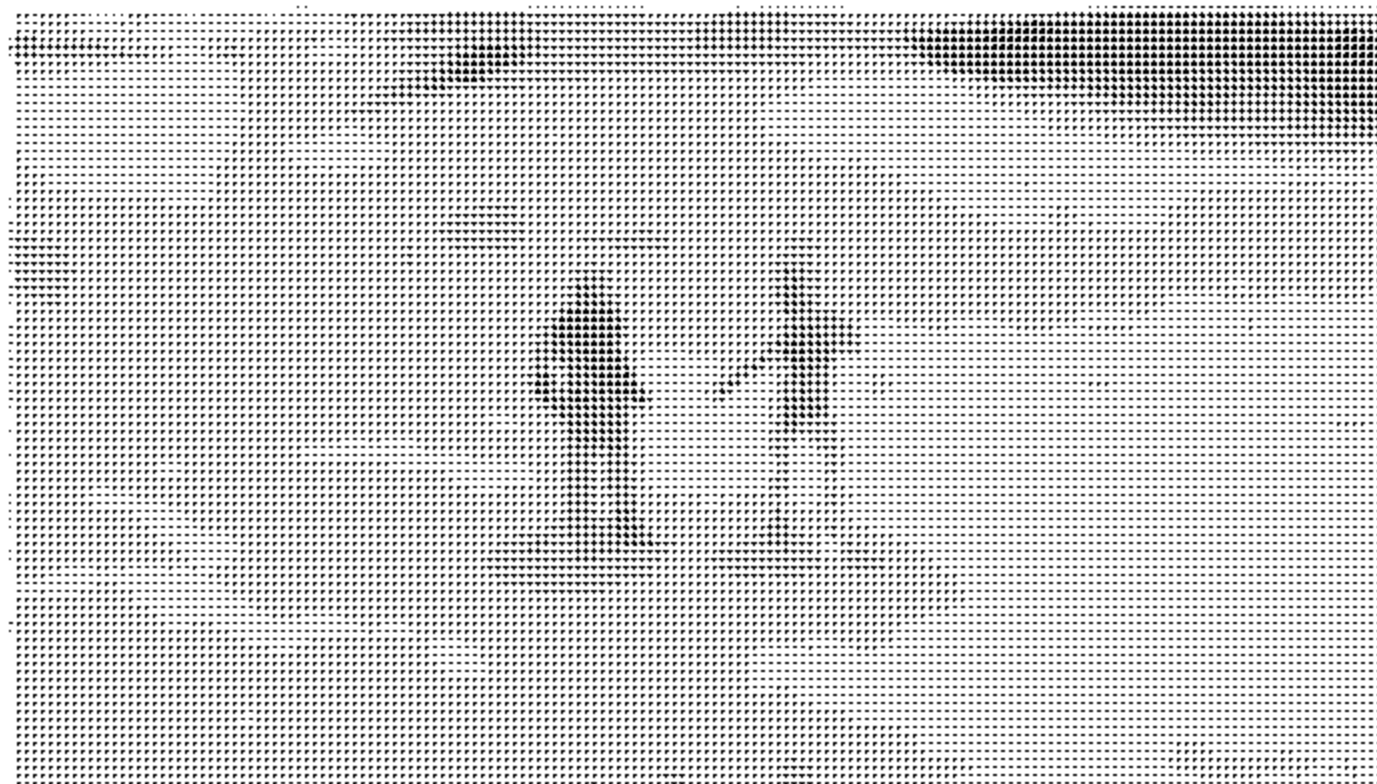

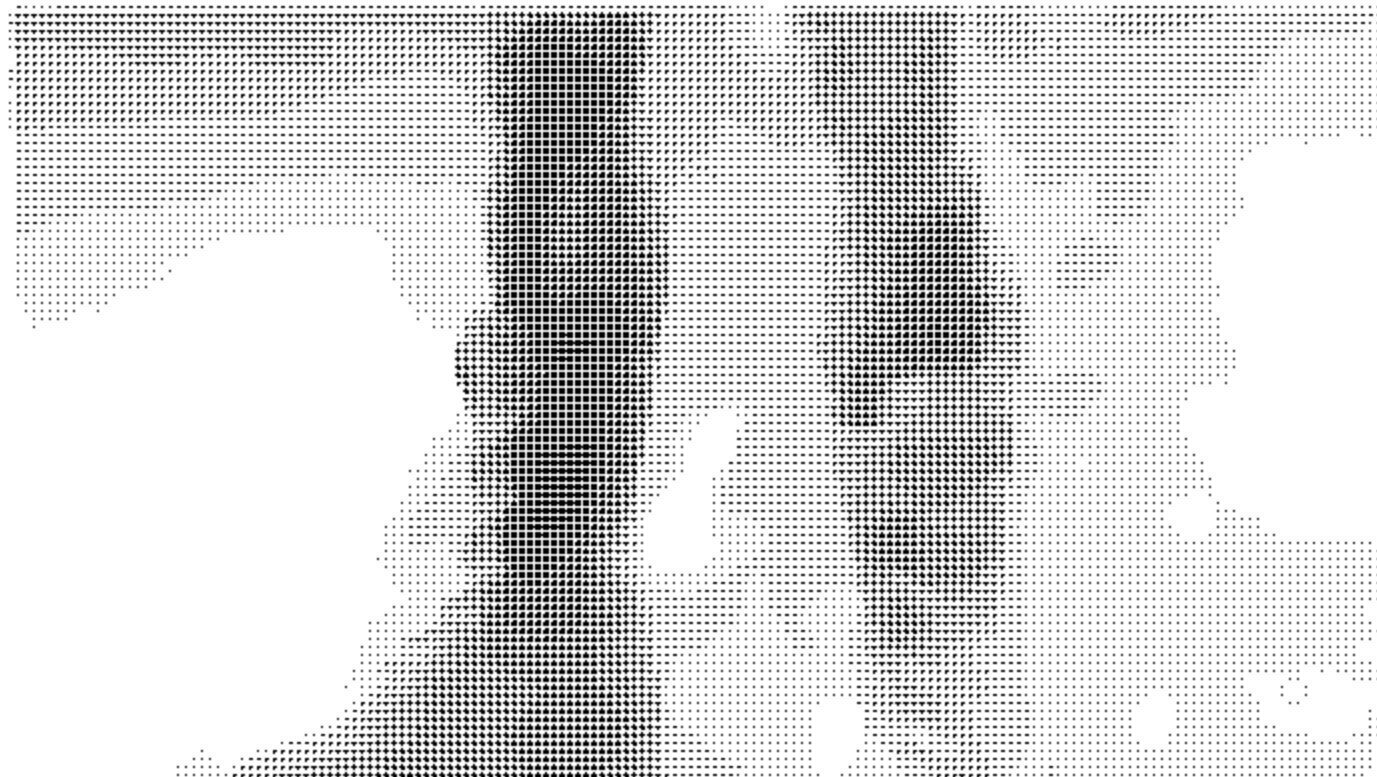

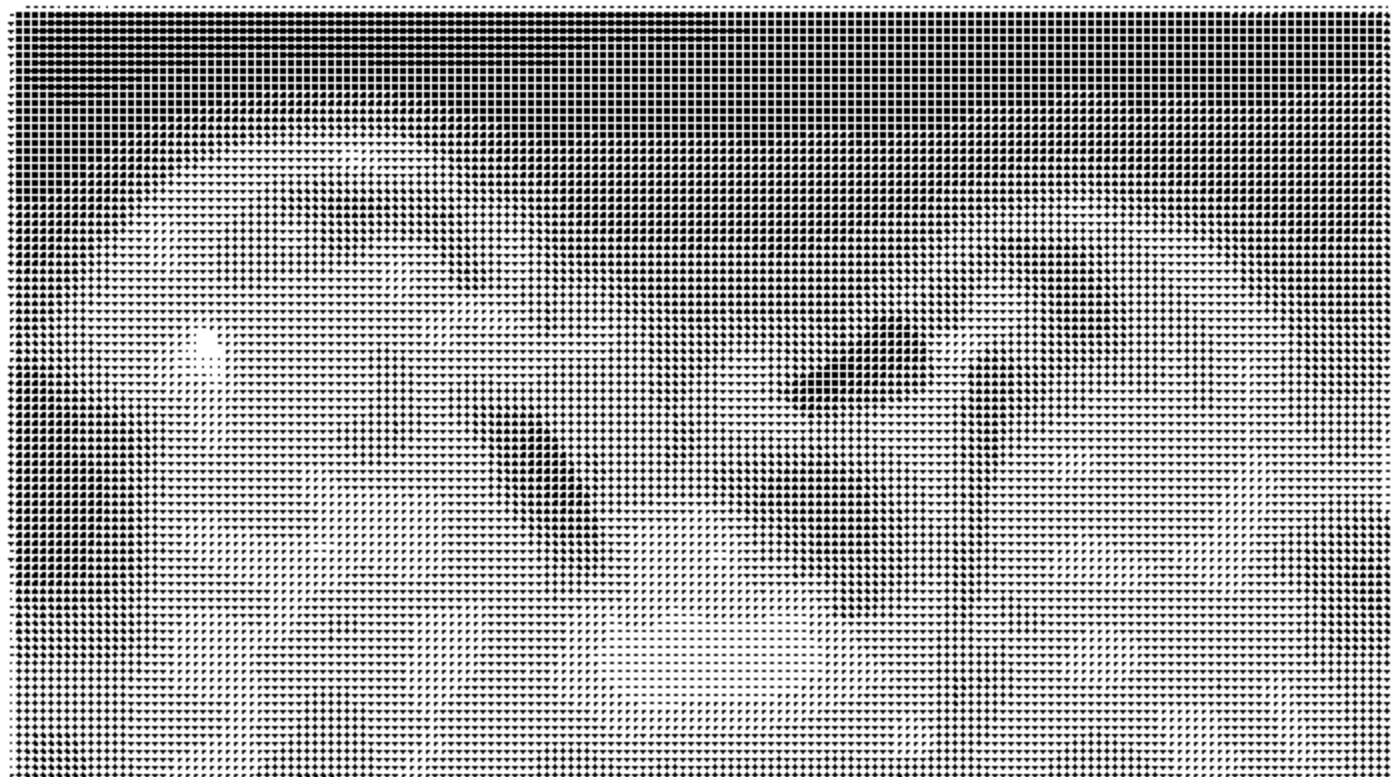

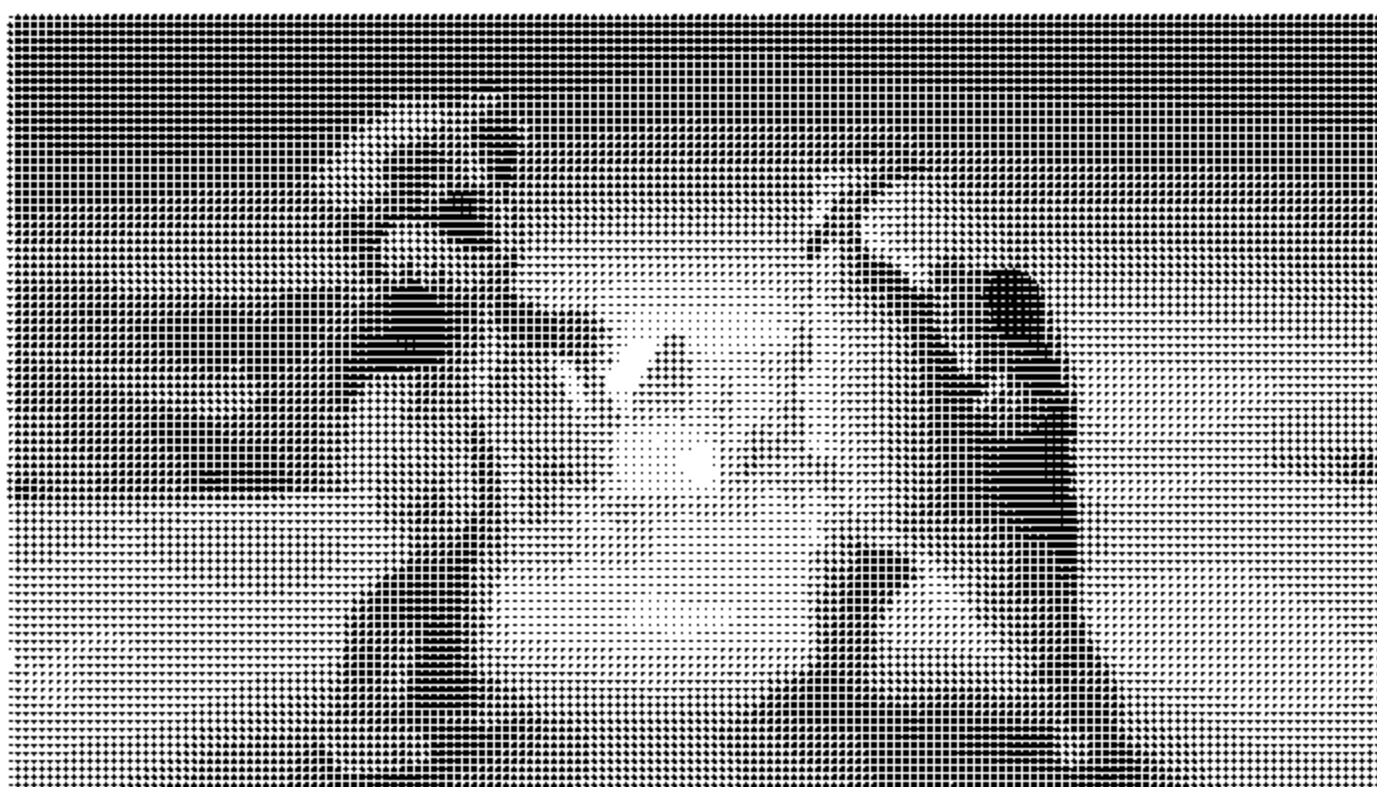

STREET FIGHTER X TEKKEN ENDING

鲁夫斯与桑吉尔夫

ルーファス & ザンギエフ

from Polygon Pictures (Toshio Ohashi)

我们在制作这一结局时有效利用了这两个角色的卡通化形象。我们的团队轻松愉快地做出了“帅气的”鲁夫斯与桑吉尔夫。能有机会基于这些人物的创作副产品我也很高兴。

桑吉尔夫和鲁夫斯是为了某人的要求去找寻潘多拉盒的,但这两个壮硕的格斗家一接近盒子,就被卷入了闪耀的蓝光。当光芒散去后,他们发现自己被彻底瘦了身,显得惊慌失措。

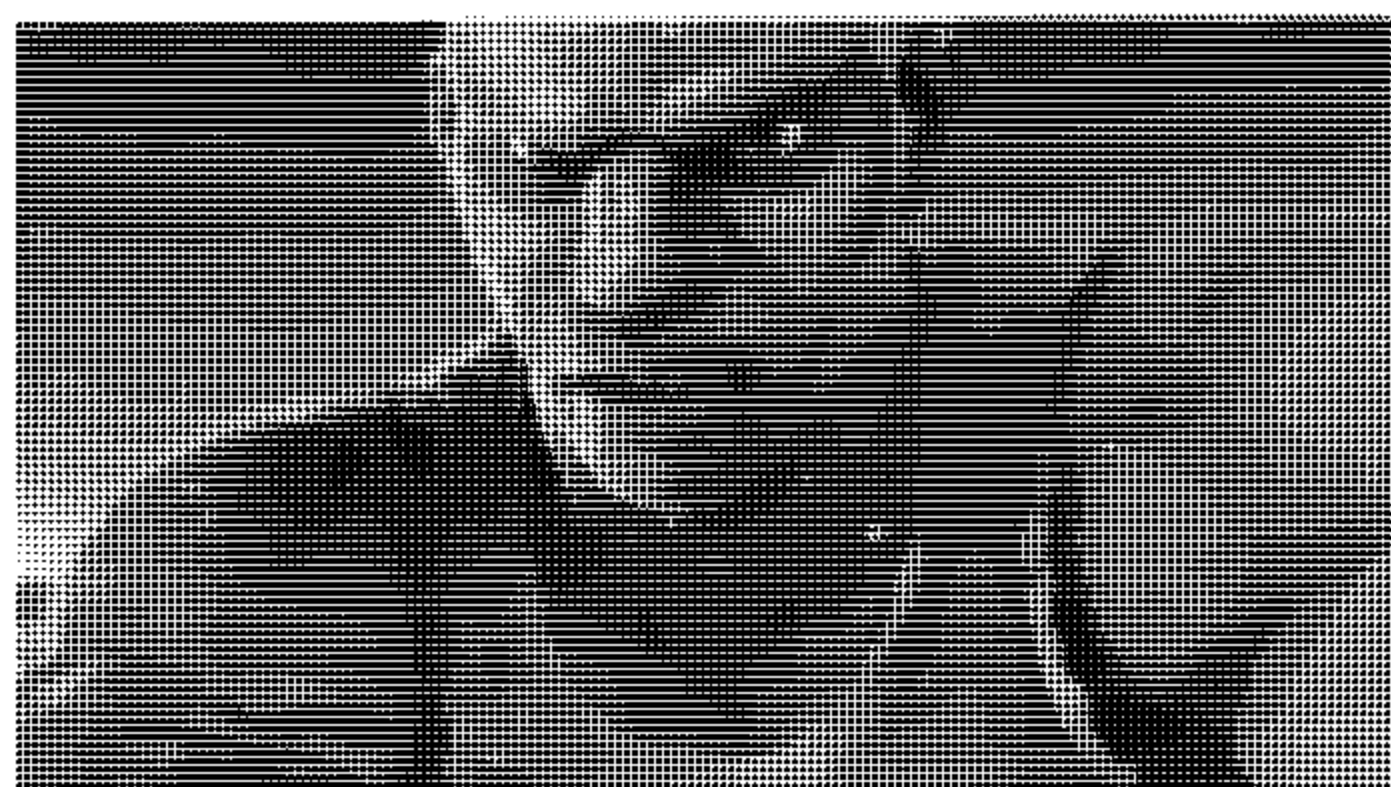

STREET FIGHTER X TEKKEN ENDING

维加与巴洛克

バルログ & バイソン

from Polygon Pictures (Toshio Ohashi)

在所有的官方双人小队(含铁拳人物)中,维加/巴洛克队绝对是个性最不相称的。我们在他们的结局中又强调了这一事实。

在M.拜森的命令下,维加和巴洛克共同努力着接近潘多拉盒。然而他们真正夺得了潘多拉盒后,盒子却拒绝开启。在他们逐渐暴怒的时候,盒子打开了,两个格斗家被潘多拉盒所转化。维加和巴洛克眼中闪现出疯狂,带着杀气冲向了对方。

STREET FIGHTER × TEKKEN ENDING

M.拜森与韩蛛俐

ペガ & グヨリ

from Polygon Pictures (Toshio Choshi)

M.拜森和韩蛛俐的结局也是少有的在两个人物间发生争斗,难点在于如何在有限的结局时间里描绘出他们的情感宣泄。

支配世界的使命将M.拜森和韩蛛俐带到了南极洲的潘多拉盒这边。M.拜森碰触盒子的瞬间,蛛俐就用她强力的踢击对其发动了突袭。在两人继续相互嘲讽的同时,潘多拉盒的力量转化了两人。这两名格斗家都屈服于邪恶与嗜血,获胜的会是谁呢?

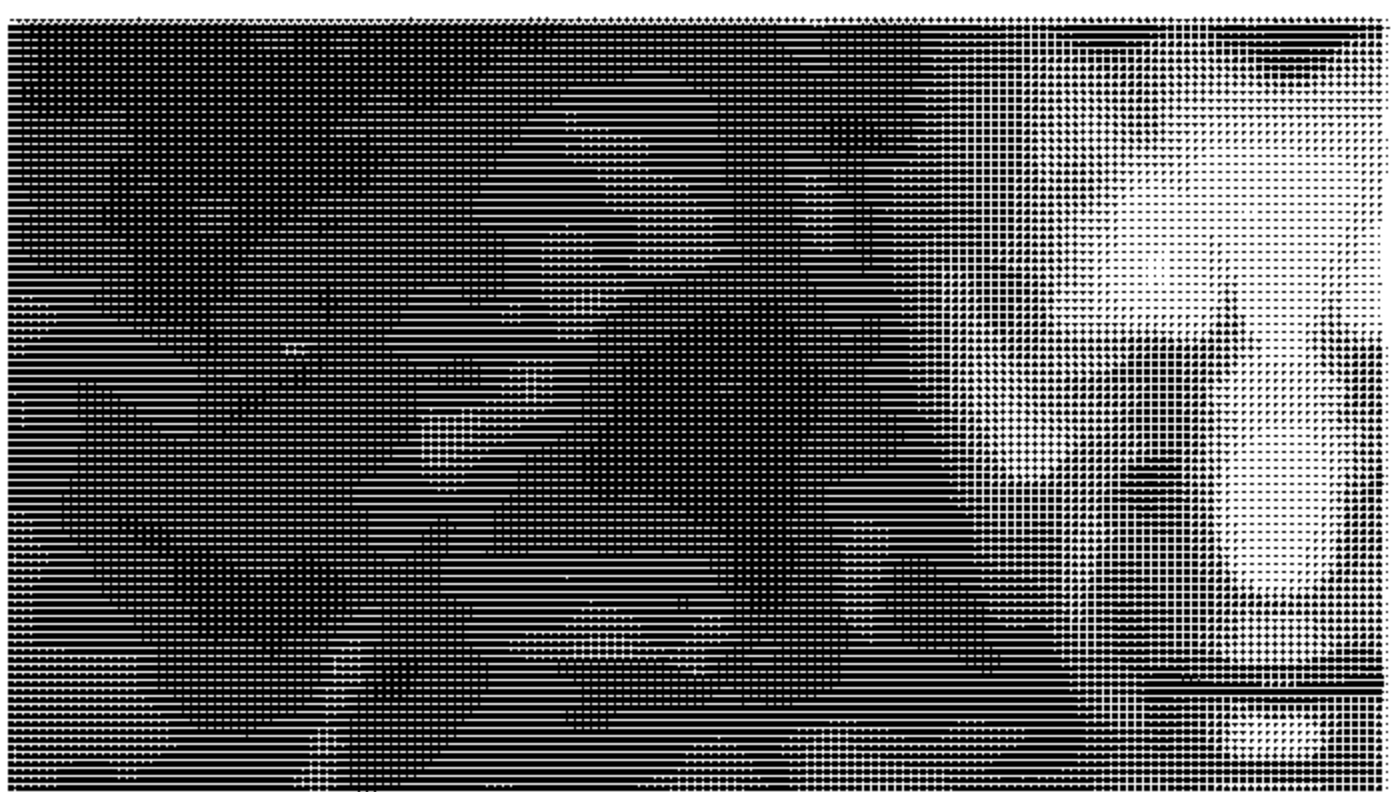

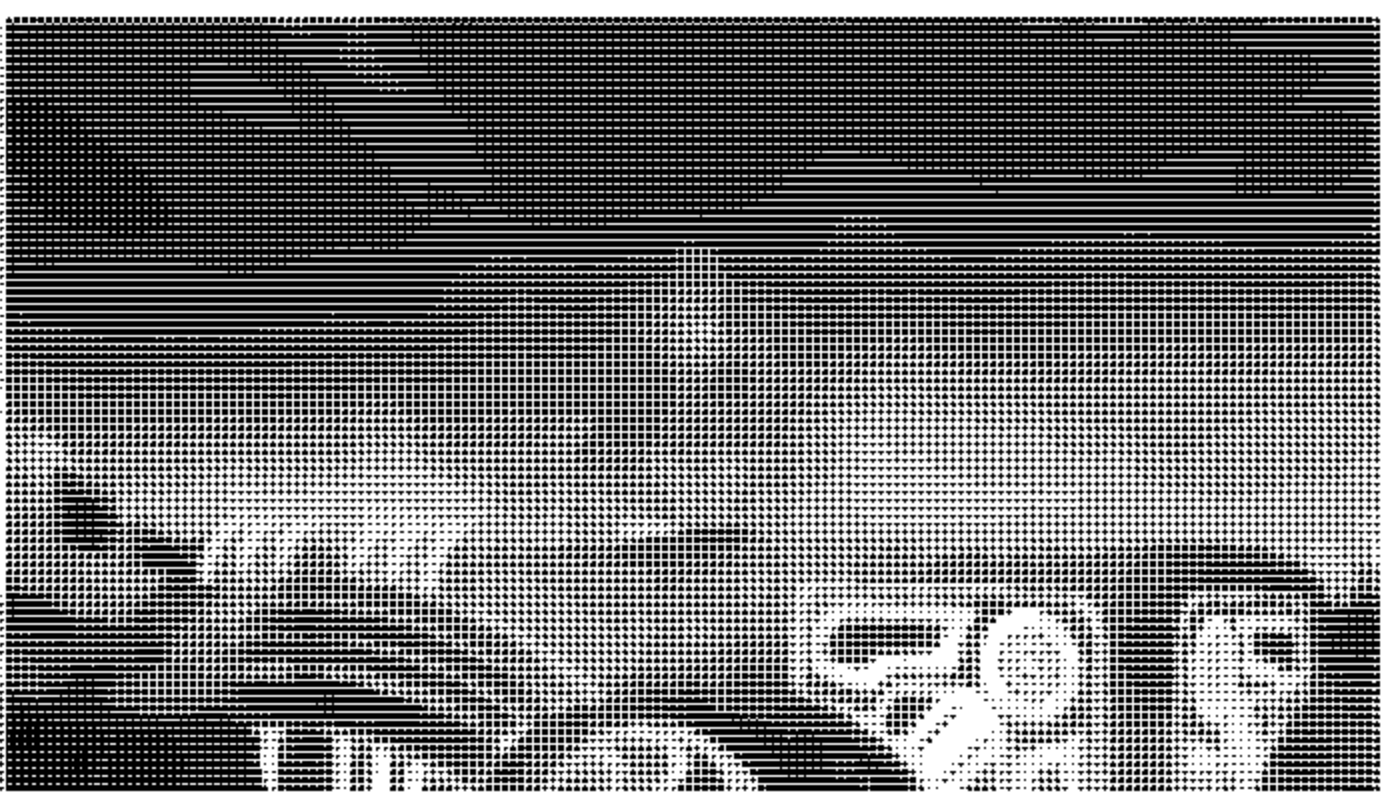

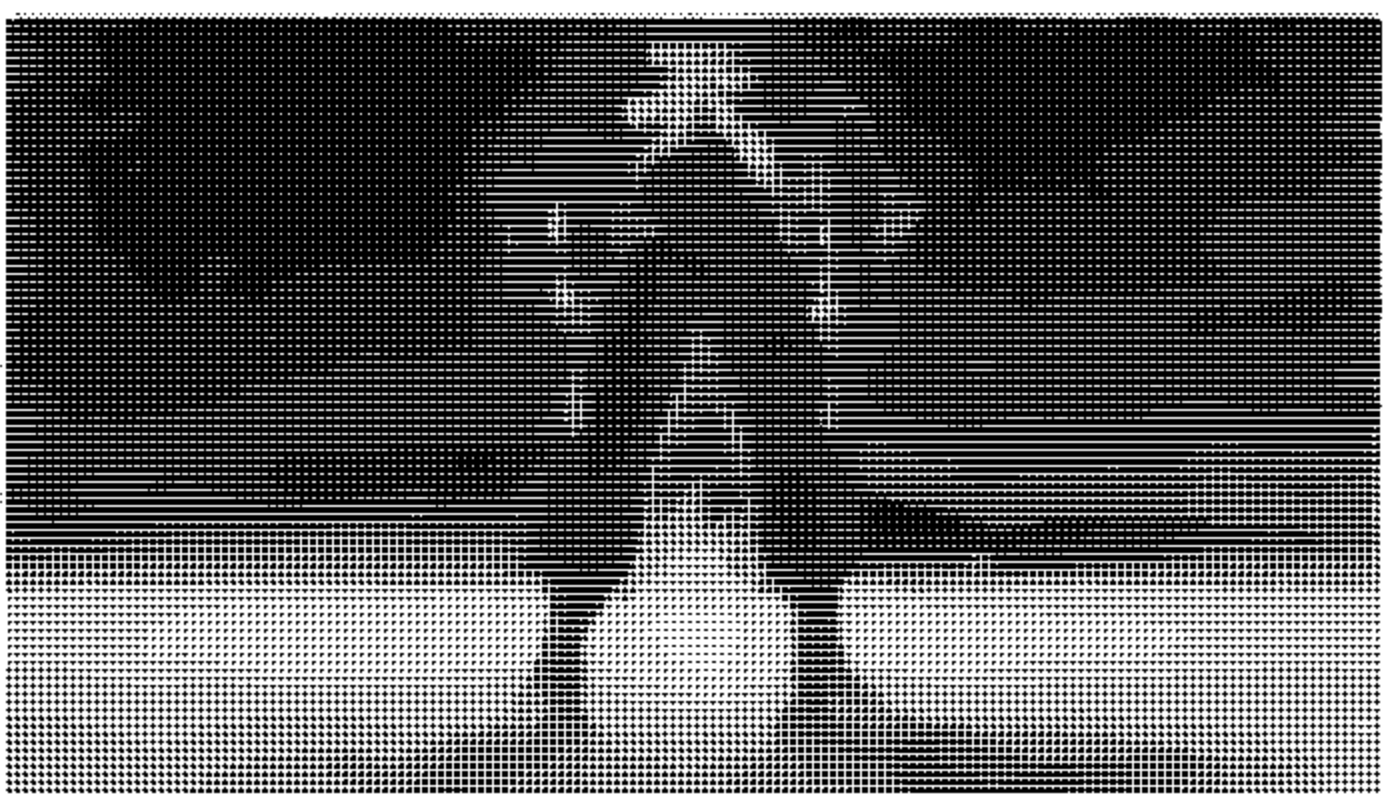

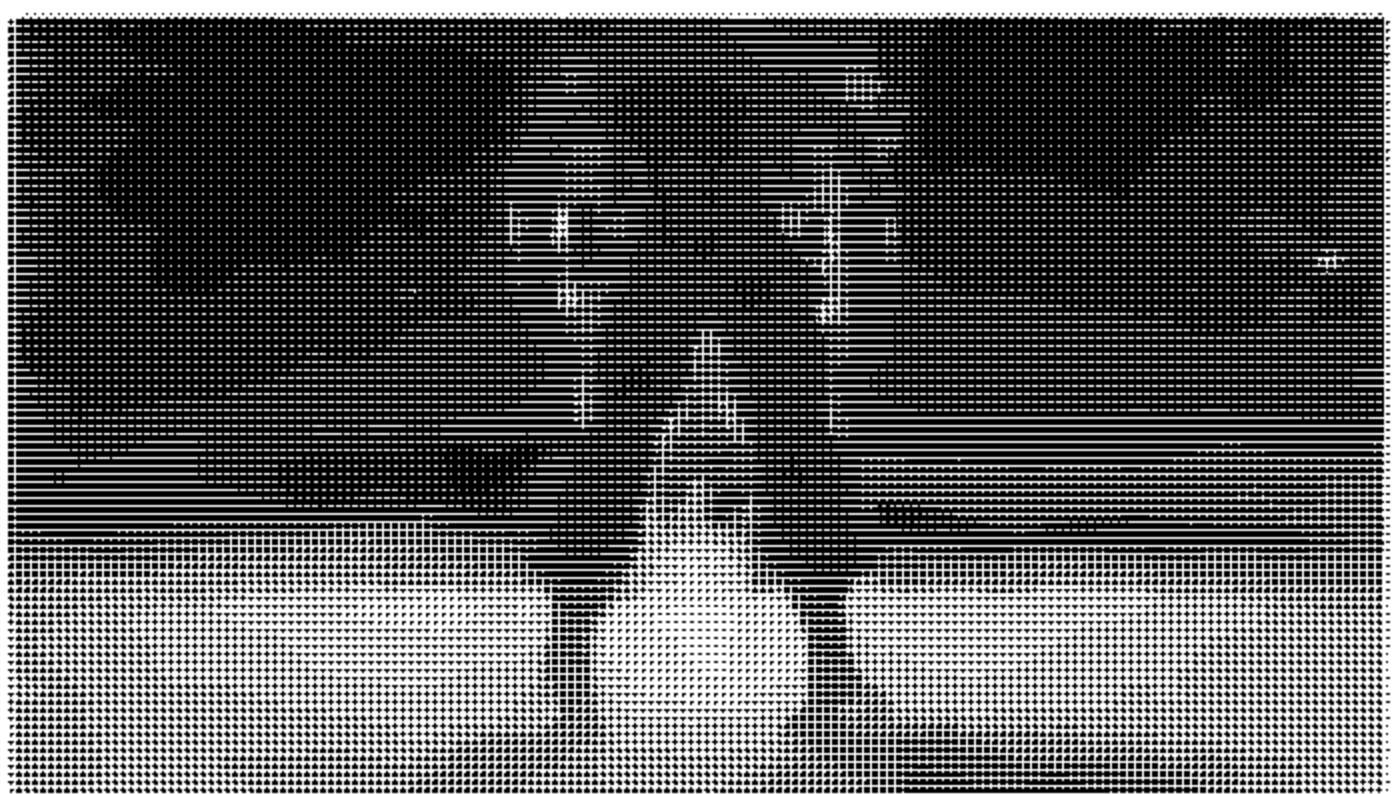

STREET FIGHTER × TEKKEN ENDING

豪鬼

暴鬼

from Polygon Pictures (Toshio Choshi)

豪鬼结局的重点在于强调他压倒性的气势。我们有效利用了动画绘制,镜头角度,暴风雪与光环等元素来构建他的气魄。

豪鬼被一种不可否认的隐形力量引向盒子的能量,并因此踏上了南极洲。他越过潘多拉盒散发的光波,接近了这个神秘的盒子。盒中忽然跳出一个晦暗的人影,那是豪鬼的潘多拉影子化身。豪鬼全身散发着杀意之波动冲向了他的影子。

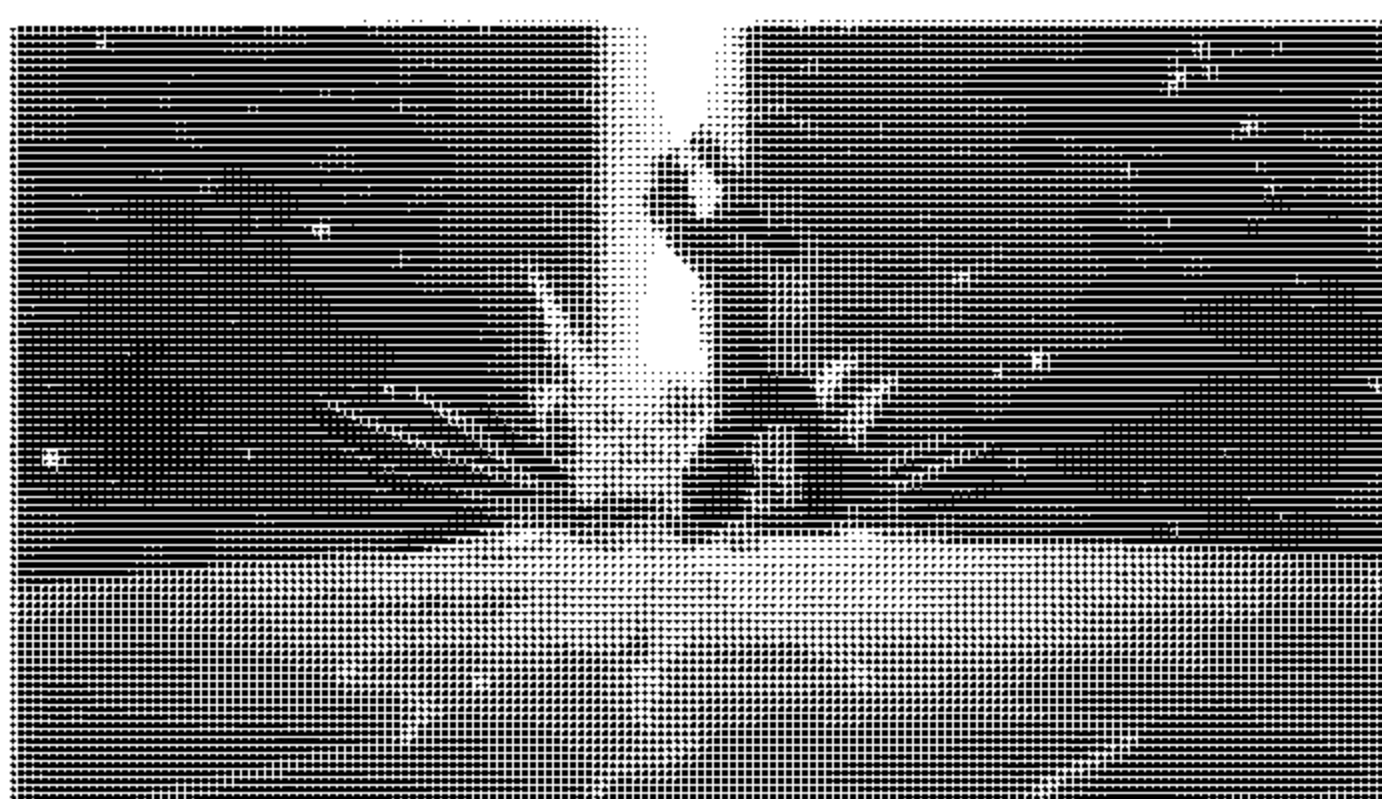

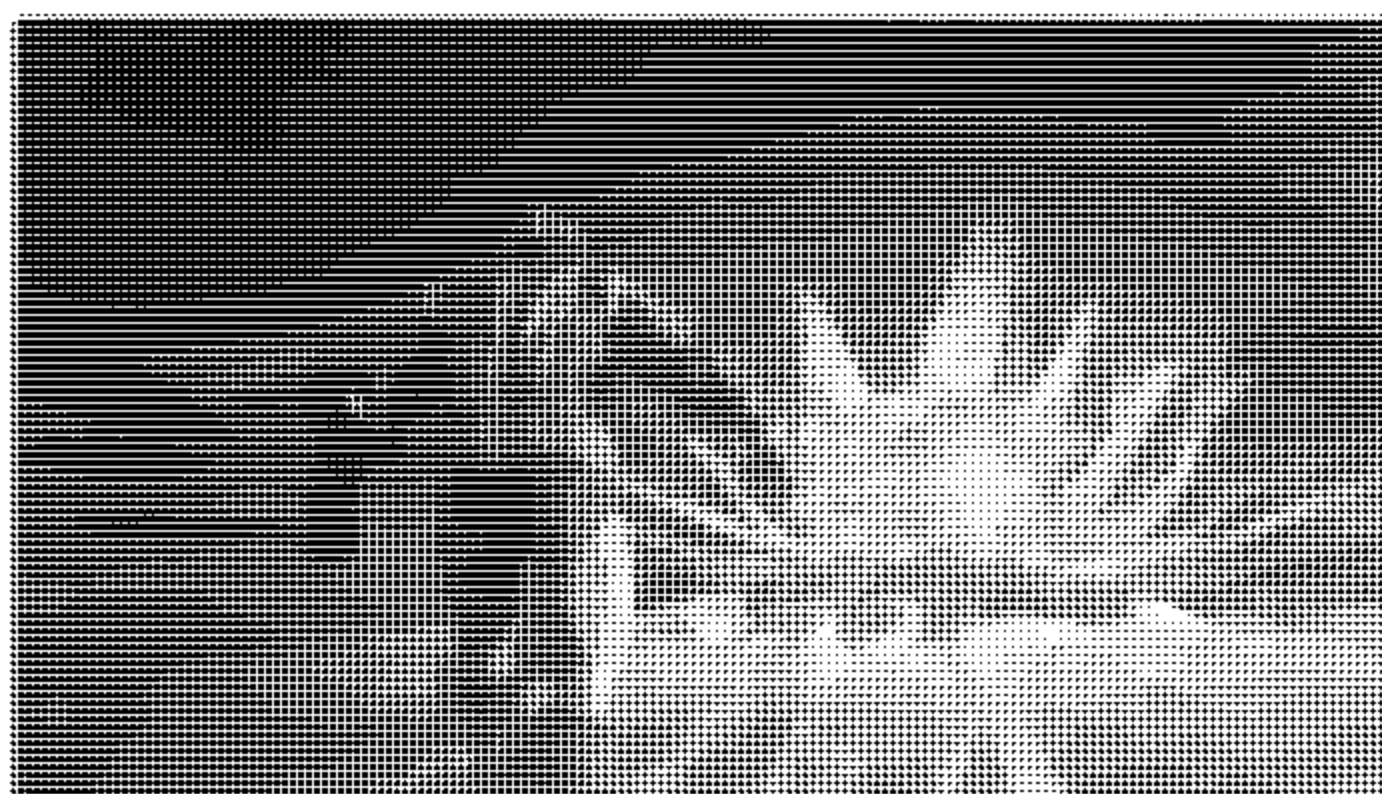

STREET FIGHTER X TEKKEN ENDING

洛克人

メガマン

Polygon Pictures (Toshio Ohashi)

这个结局是我个人最喜欢的之一,飘落的美丽光点与洛克人急切想要完成萝露使命的打算恰成对比.这个结局的基调是喜剧,但我们也加入了一些悲剧色彩.

在南极洲获胜之后,洛克人将注意力转向了潘多拉盒里冒出的耀眼光芒.盒子已经打开了,而洛克人的困惑被通信系统中萝露的呼叫打断了.萝露要洛克人一定要设法吸收潘多拉盒中逸出的光芒,但这个任务对洛克人来说显然太过复杂了.

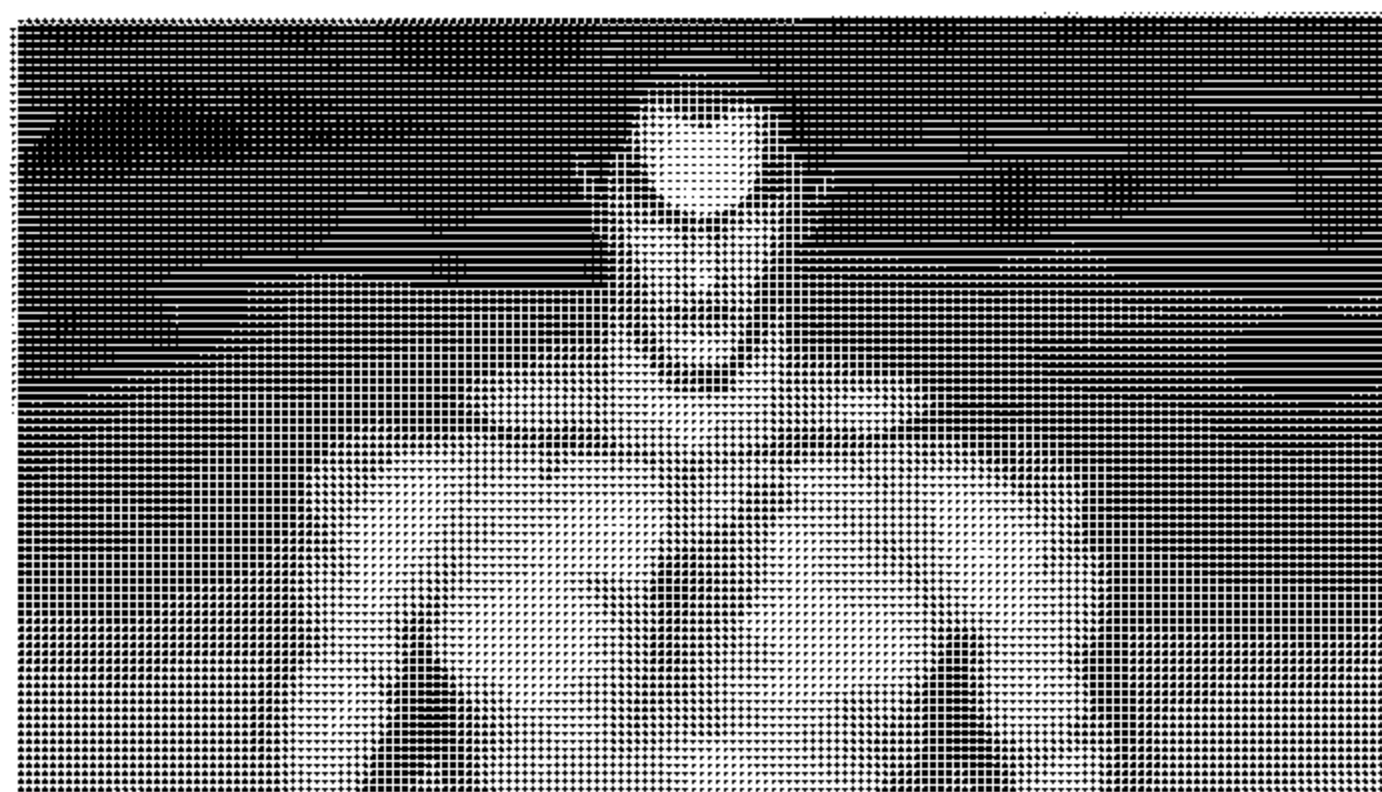

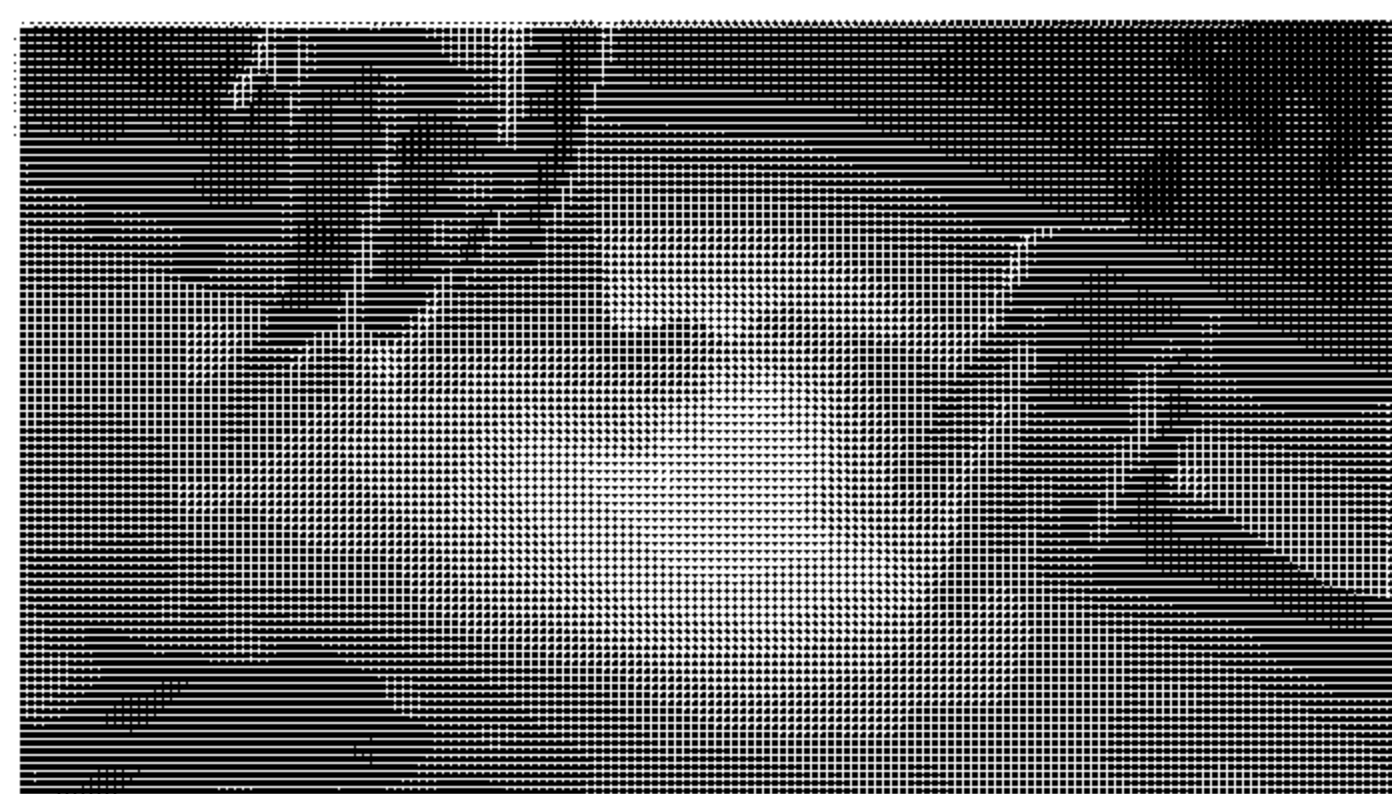

STREET FIGHTER X TEKKEN ENDING

一八与妮娜

一八 & ニーナ

Polygon Pictures (Toshio Ohashi)

我得说这个结局是所有结局中最“影片式”的.它有严肃的氛围,有戏剧性的转折,还有大量的悬念.一八和妮娜都是相当有深度的角色,于是他们就像两个好莱坞的A级影星一样针锋相对.

一八与妮娜若有所思地看着面前发光的盒子.他们相互合作着来到了这里,但妮娜在此时说出了她真正的打算:拦在一八和潘多拉盒之间.一八显然是预料到了这一背叛,一个手势就唤出了一个士兵军团.一会之后,士兵们失去了战斗力,但妮娜也不见了,没有什么能阻挡一八获取潘多拉盒了.

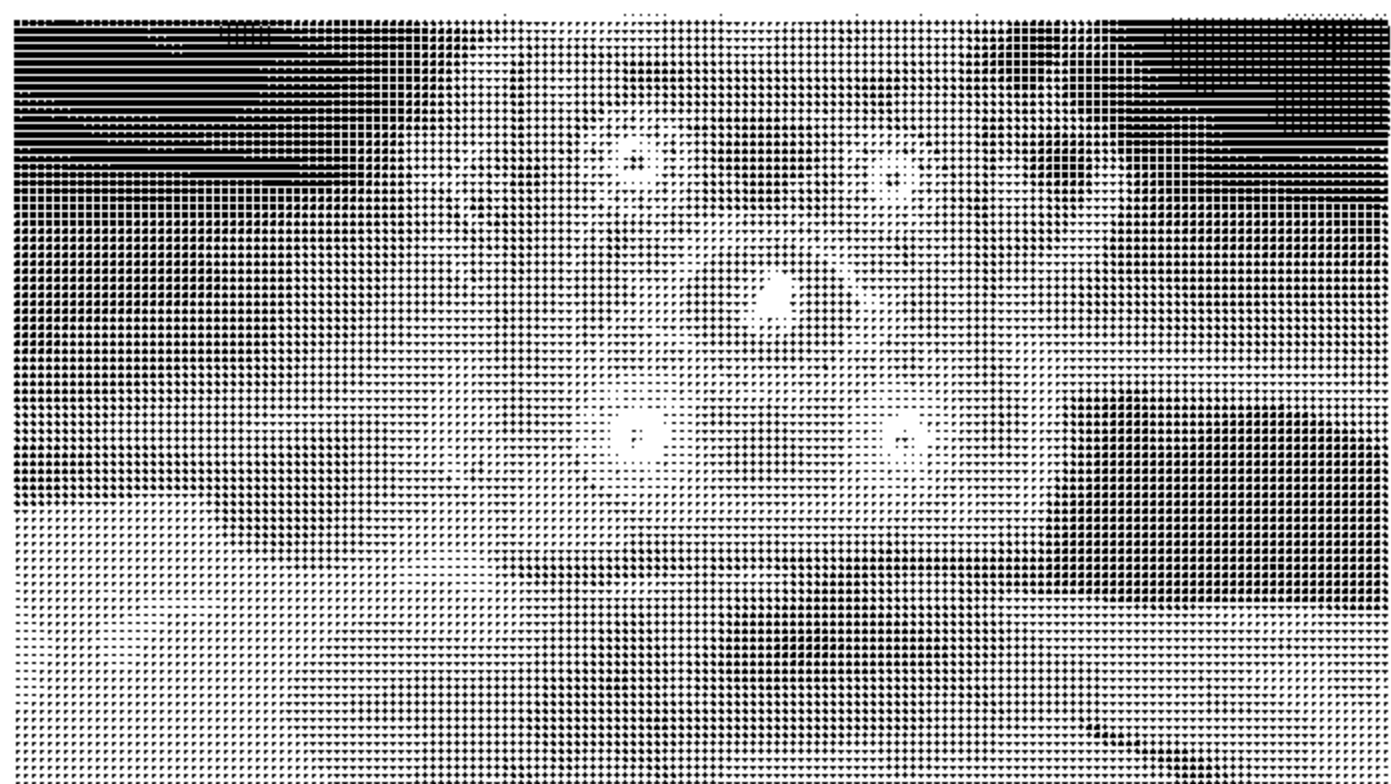

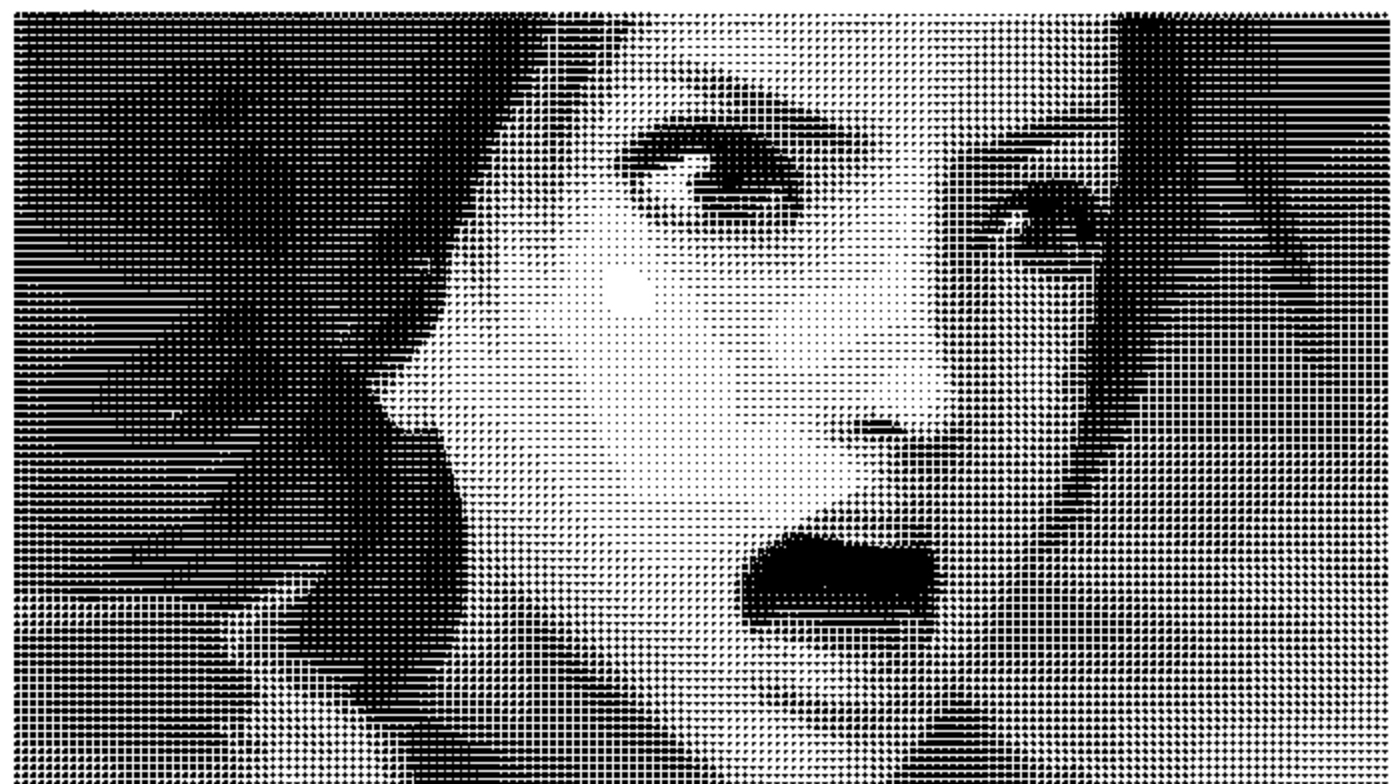

STREET FIGHTER X TEKKEN ENDING

飞鸟与莉莉

飛鳥とリリ

from Polygon Pictures (Toshio Choshi)

飞鸟和莉莉的结局是最有韵律感的,主题当然是两个可爱姑娘之间的精彩争斗,我们不得不一帧帧地检查这个结局,确保莉莉的内裤不会走光,一旦我们发现有问题的时候,就会把飞鸟的拳或脚换到合适的位置。

莉莉一直在为父亲追寻盒子,而飞鸟只是来帮忙的,在找到潘多拉盒之后,莉莉突然宣称要同飞鸟打一场来争夺所有权,飞鸟试图说服莉莉没必要争斗,但莉莉不听,当飞鸟一记踢击的力道让潘多拉盒滚进了简直无底的深渊后,这场战斗戛然而止。

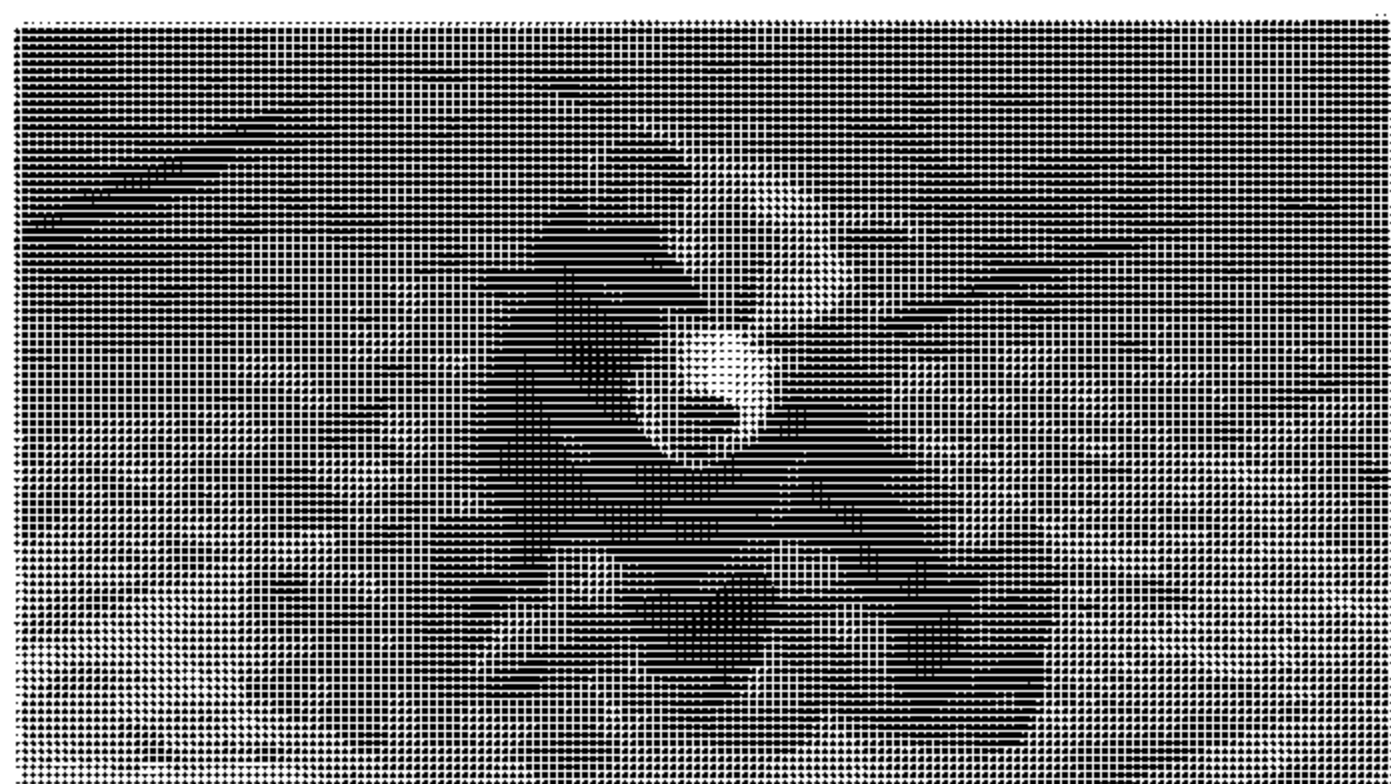

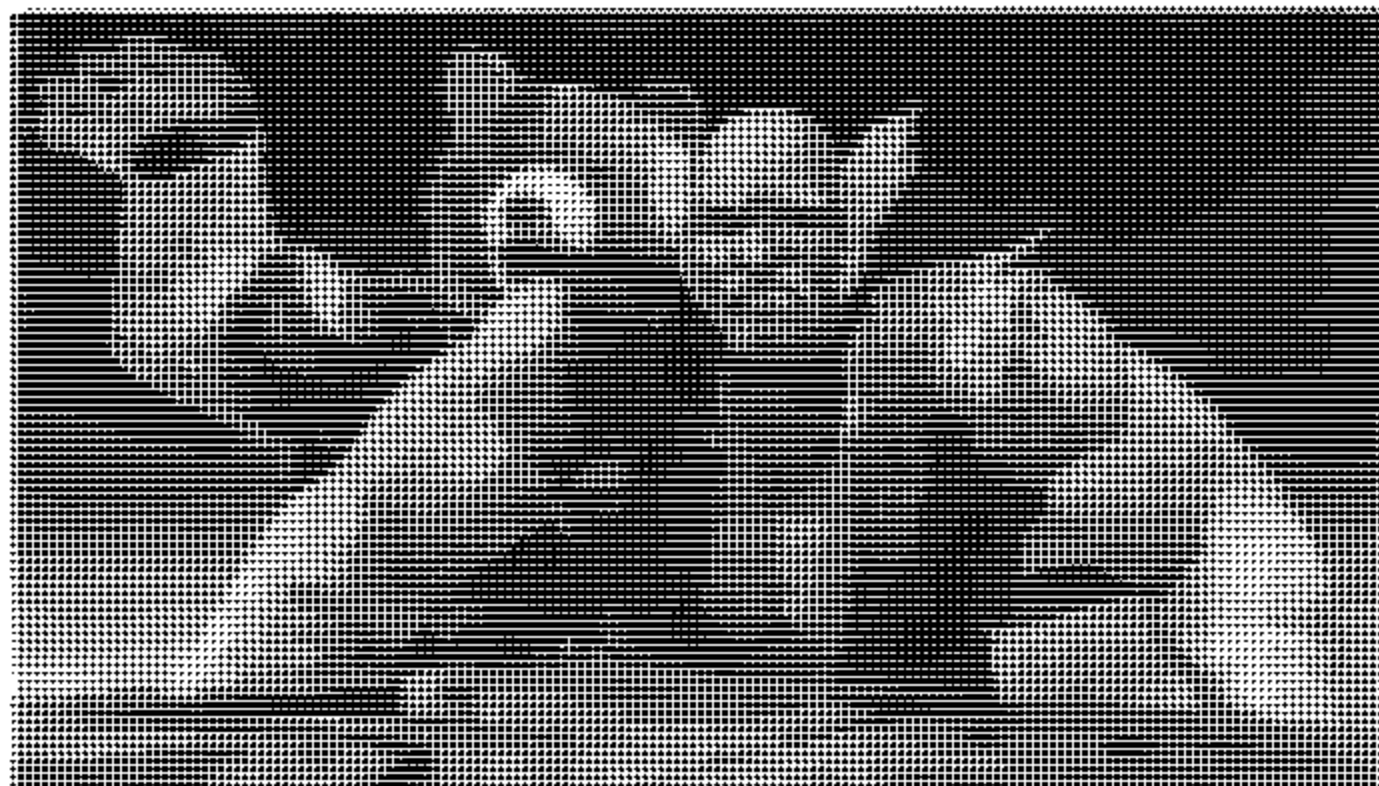

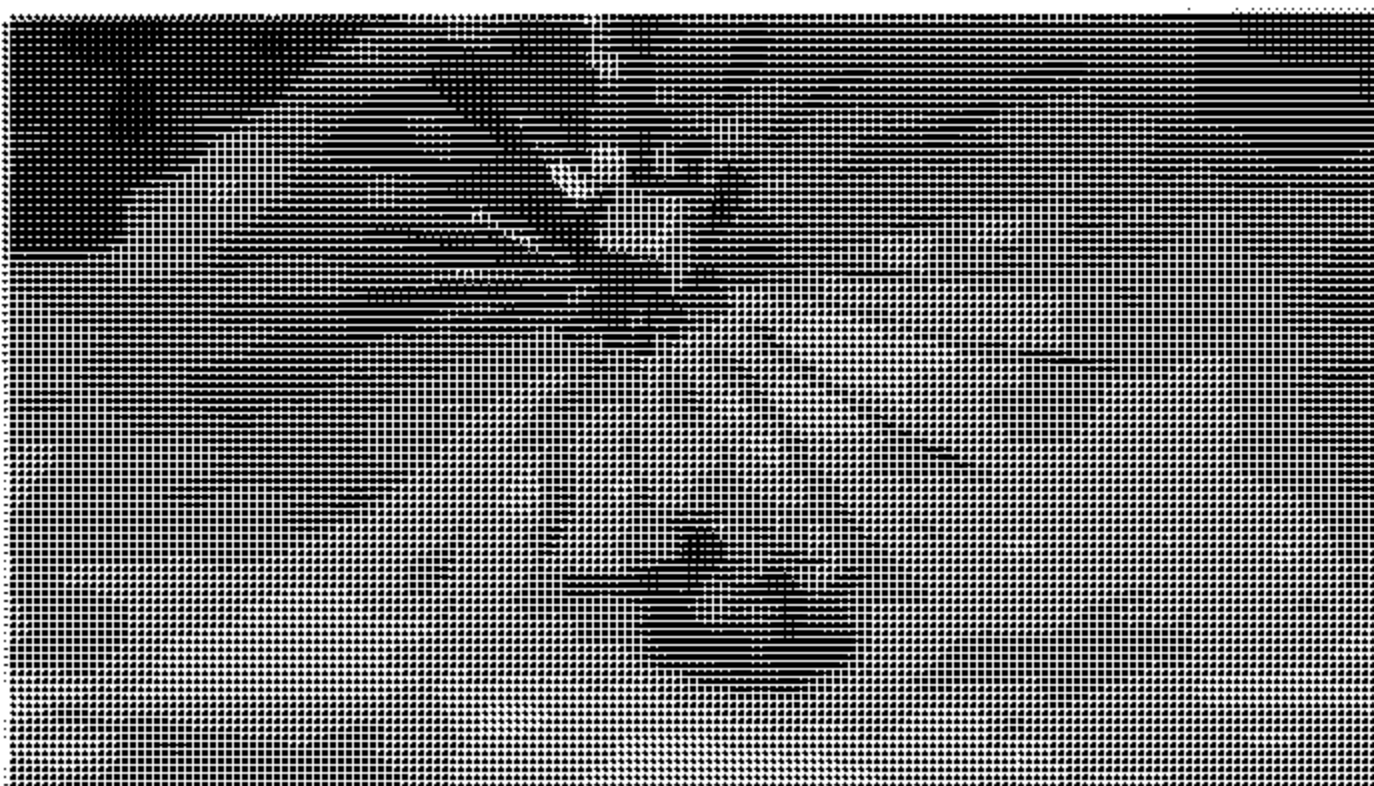

STREET FIGHTER X TEKKEN ENDING

平八与熊

平八とクマ

from Polygon Pictures (Toshio Choshi)

说到平衡,熊当然是最难处理的角色,虽然我们给它做了点改变,但它仍然有着危险野兽的可怖形象,所以如何让它的挥打有逗趣的样子就很重要了。

在史诗般的对决后,平八和熊终于站在了潘多拉盒前面,平八渴望打开盒子,但熊要他小心,等盒子最终被打开,射出强大的光束时,平八本能地躲开了察觉到的危险,把熊留在光束的冲击中,一切恢复如常之后,平八看到了变小的熊,意识到了自己的错误。

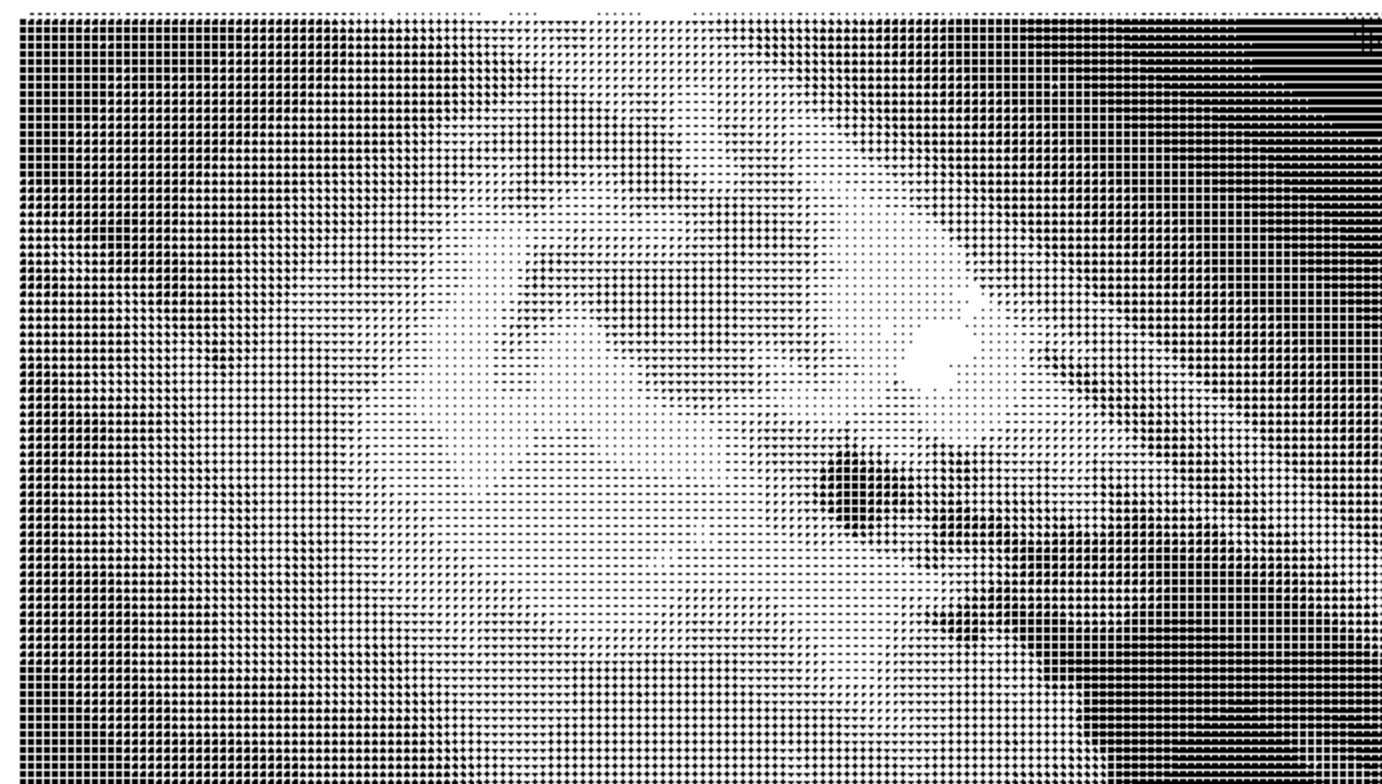

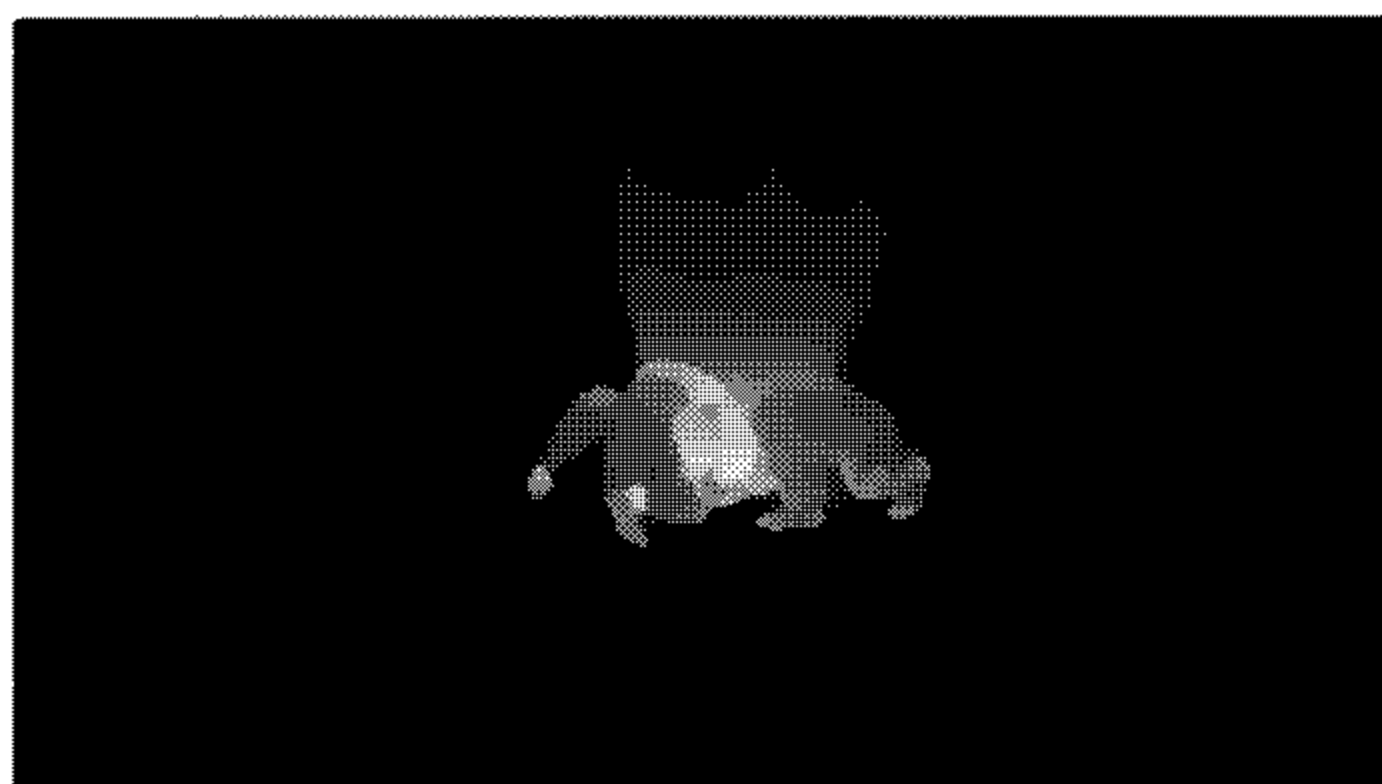

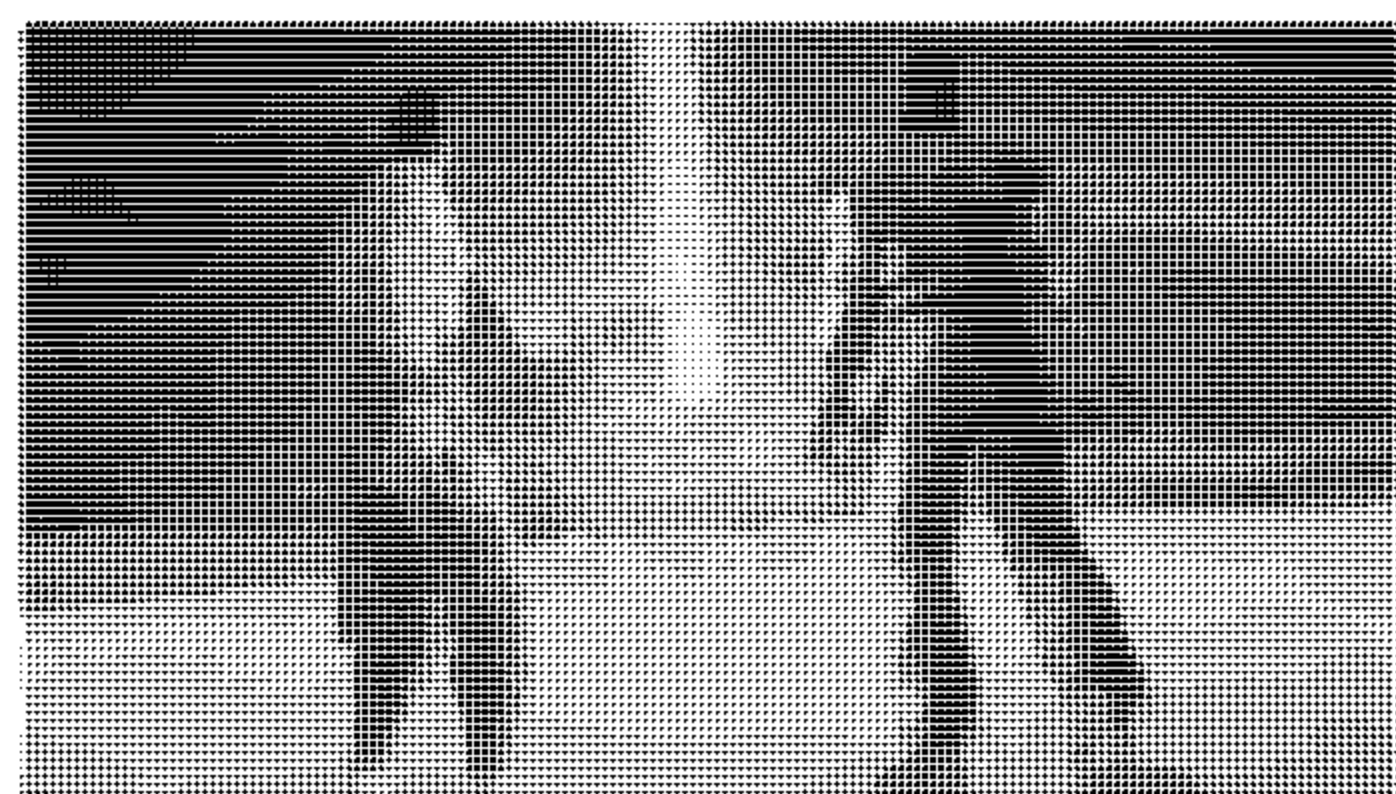

STREET FIGHTER × TEKKEN ENDING

保罗与洛

ポール & ロウ

from Polygon Pictures (Toshio Ohnishi)

像保罗与洛结局这样晃晃悠悠的动画其实相当难做,不过还是挺有趣味的。这个结局也是我个人最喜欢的之一。

保罗和洛希望获得潘多拉盒并得到无从想象的财富,这种强烈的愿望让他们战胜了阻挡他们的所有对手。两个格斗家带着欣喜的表情接近盒中射出的迷人光芒。短暂的坠落感之后,两人发现自己处在了绝对的黑暗之中,唯一的光源来自地上的一个小窗。透过它,两人看到了地球那无价的美景。

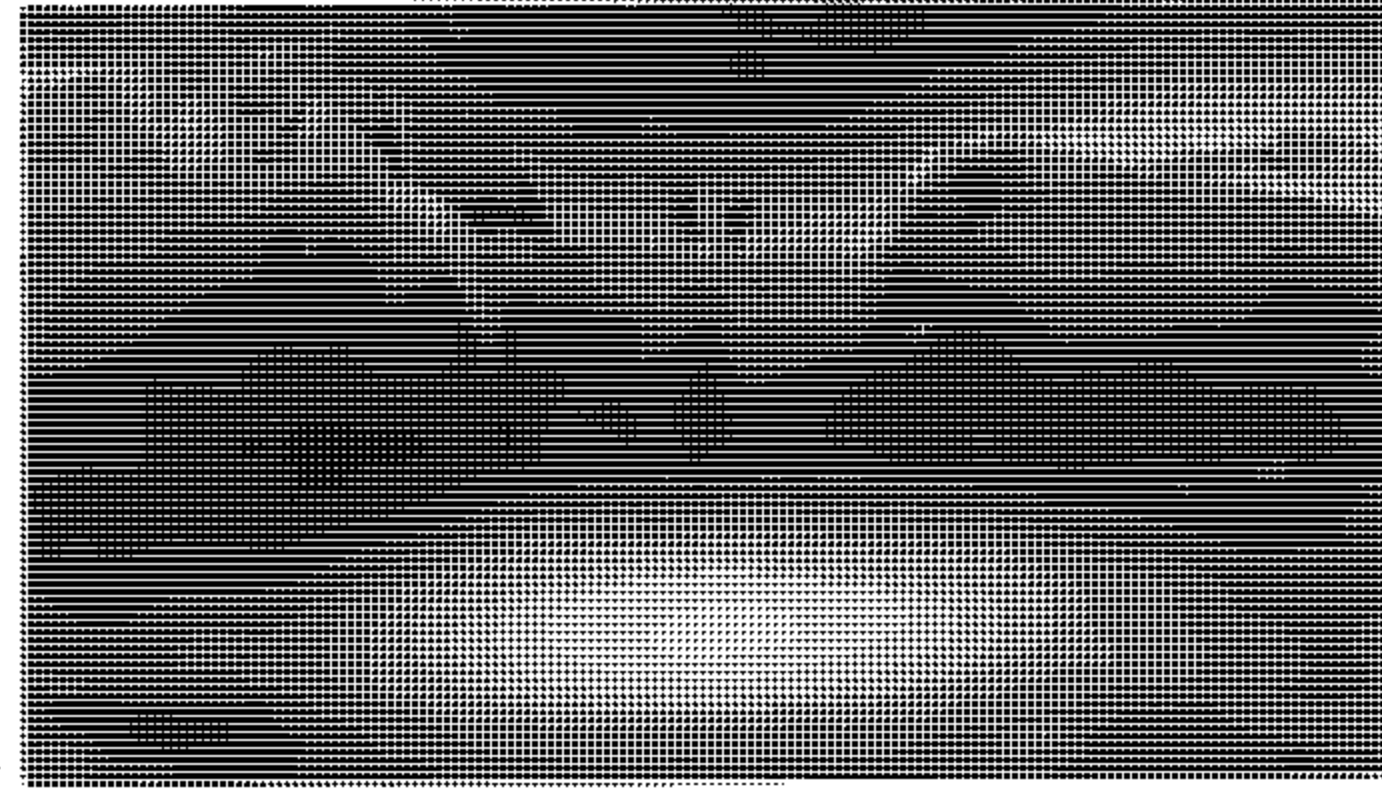

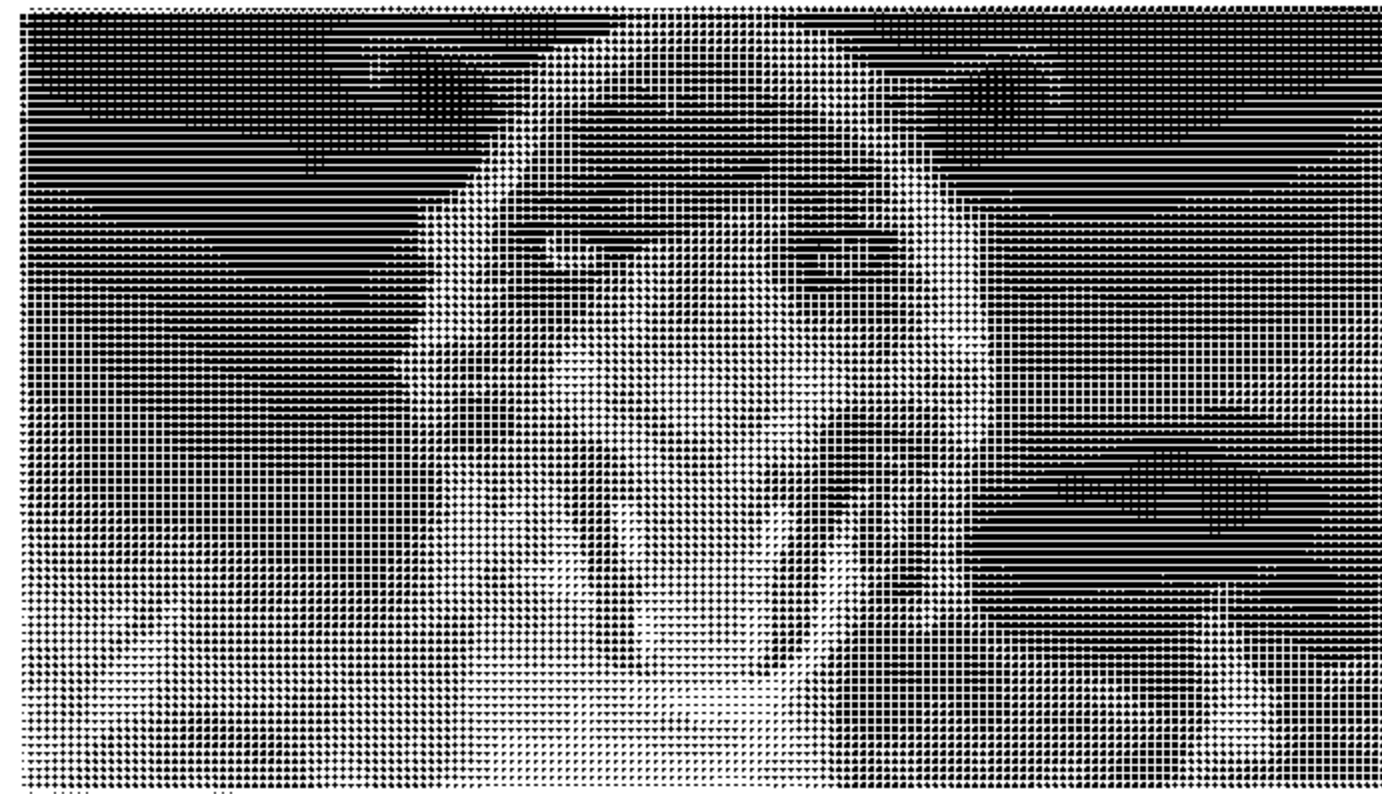

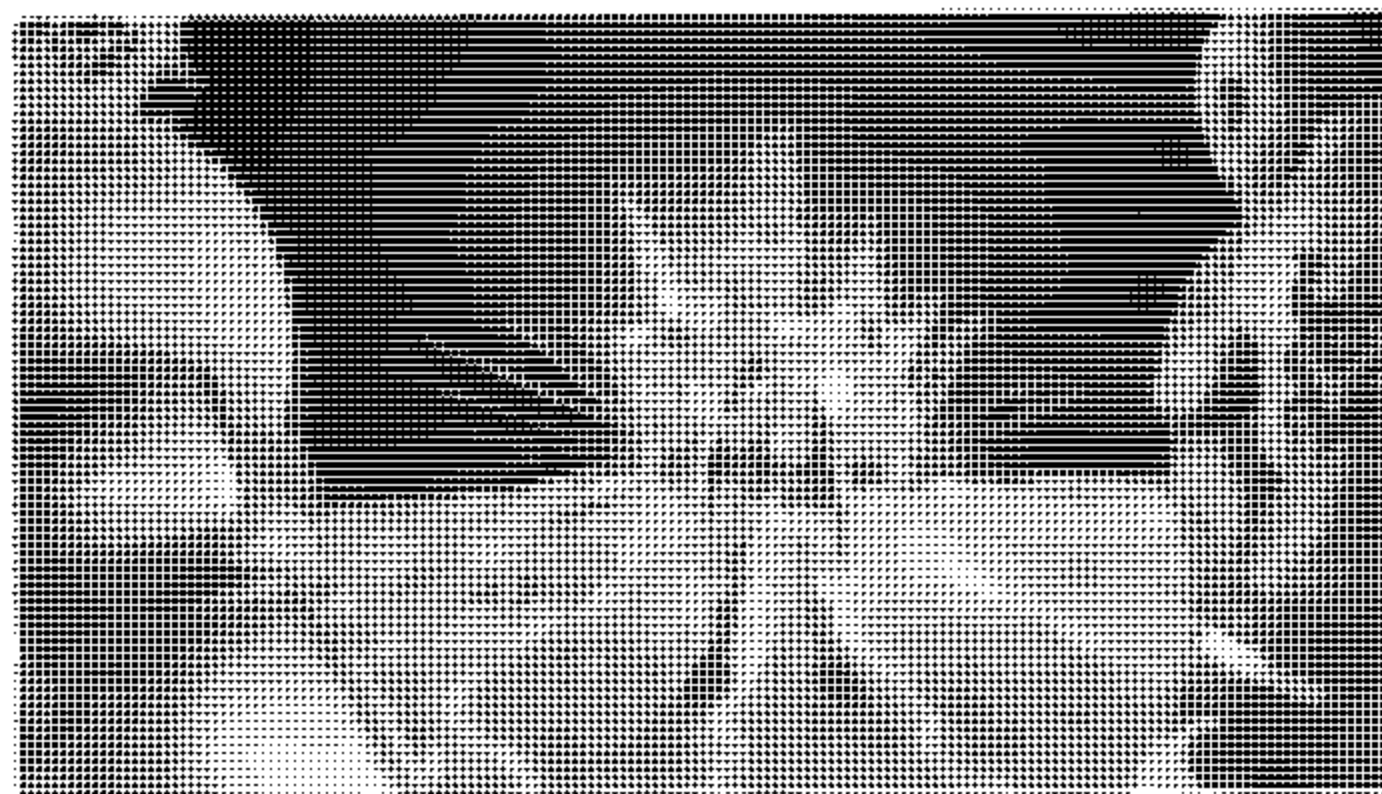

STREET FIGHTER × TEKKEN ENDING

金与马杜克

キング & マドック

from Polygon Pictures (Toshio Ohnishi)

创作这个结局时,描绘透明的装甲的影像是最具挑战性的部分。镜头的震颤是想表现凌厉的寒风。我想我们对幻觉氛围的构建做得很不错。

马杜克和金追随看到已故装甲的传言线索,来到了南极洲的冰雪国度。当他们将视线转向潘多拉盒时,正看到了装甲。马杜克显然很震惊,但金很快就看出这是盒子的能量制造的幻象。同样不安而失望的两个格斗家把潘多拉盒丢进了黑暗的大海深处。

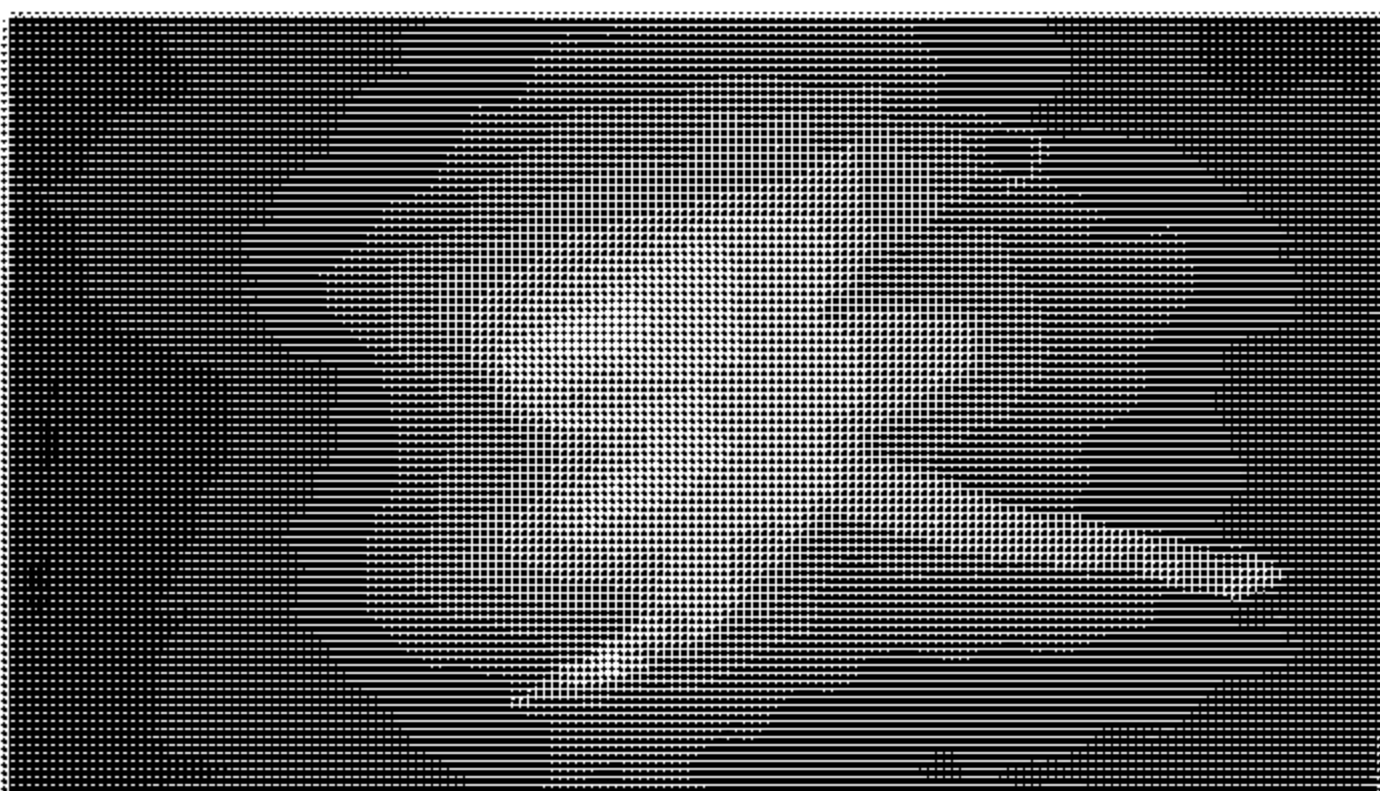

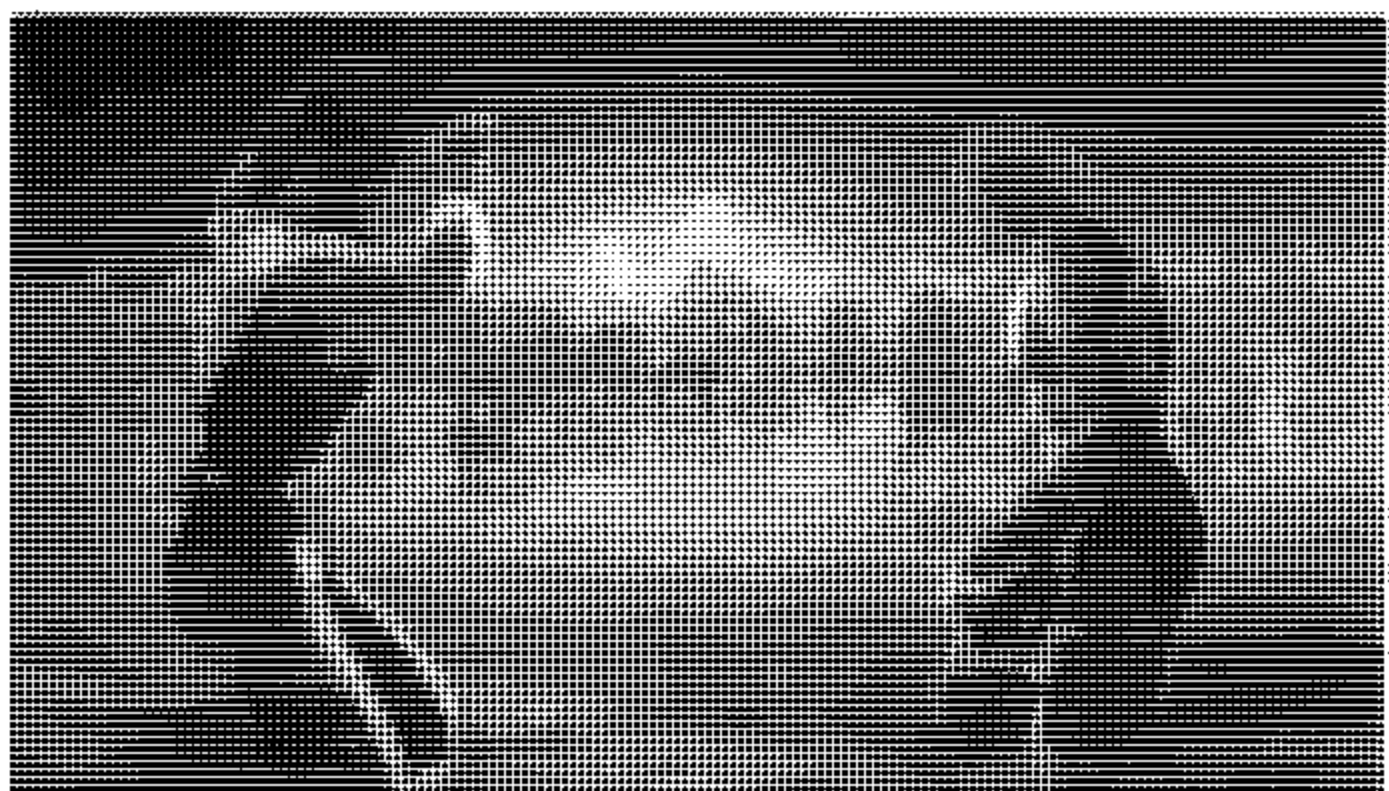

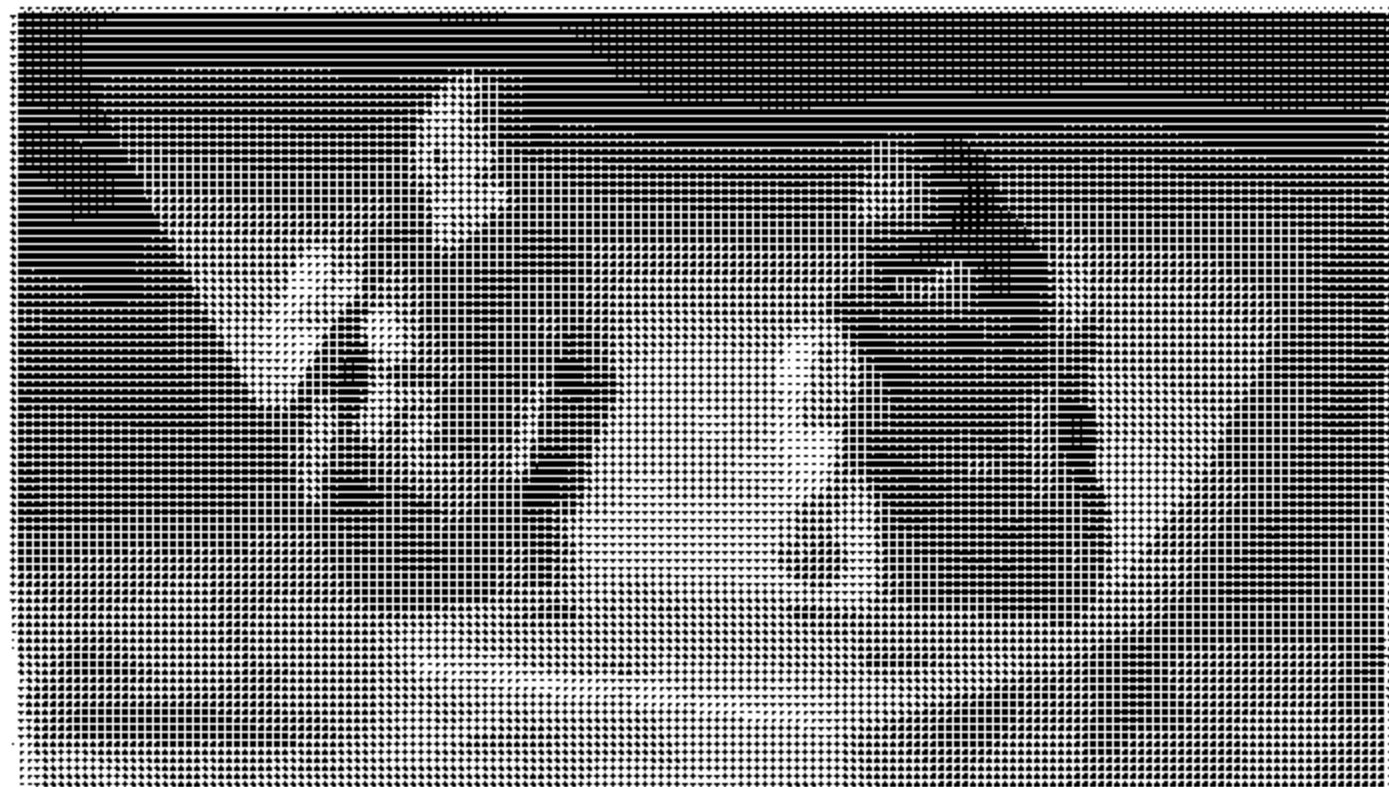

STREET FIGHTER × TEKKEN ENDING

花郎与史蒂夫

アラン & スティーブ

from Polygon Pictures (Toshio Ohashi)

在两人背对盒子,花郎自信地吹嘘自己的技巧时,我相信大家都明白下面会发生些什么.我们希望这个结局很明显,但是依旧有趣,所以最困难的部分在于让这两名格斗家有准确的反应。

因比赛被影罗和三岛财阀之间的冲突干扰而深感愤怒的花郎与史蒂夫旅行前往南极,要去贯彻正义.他们的目标达成后,两人转身要走,但却注意到潘多拉盒散发出反常的光芒而突然停下脚步.花郎和史蒂夫转头朝向盒子后,便看到了无数豪鬼复制品的奇观.显然,逃跑不是什么选择...

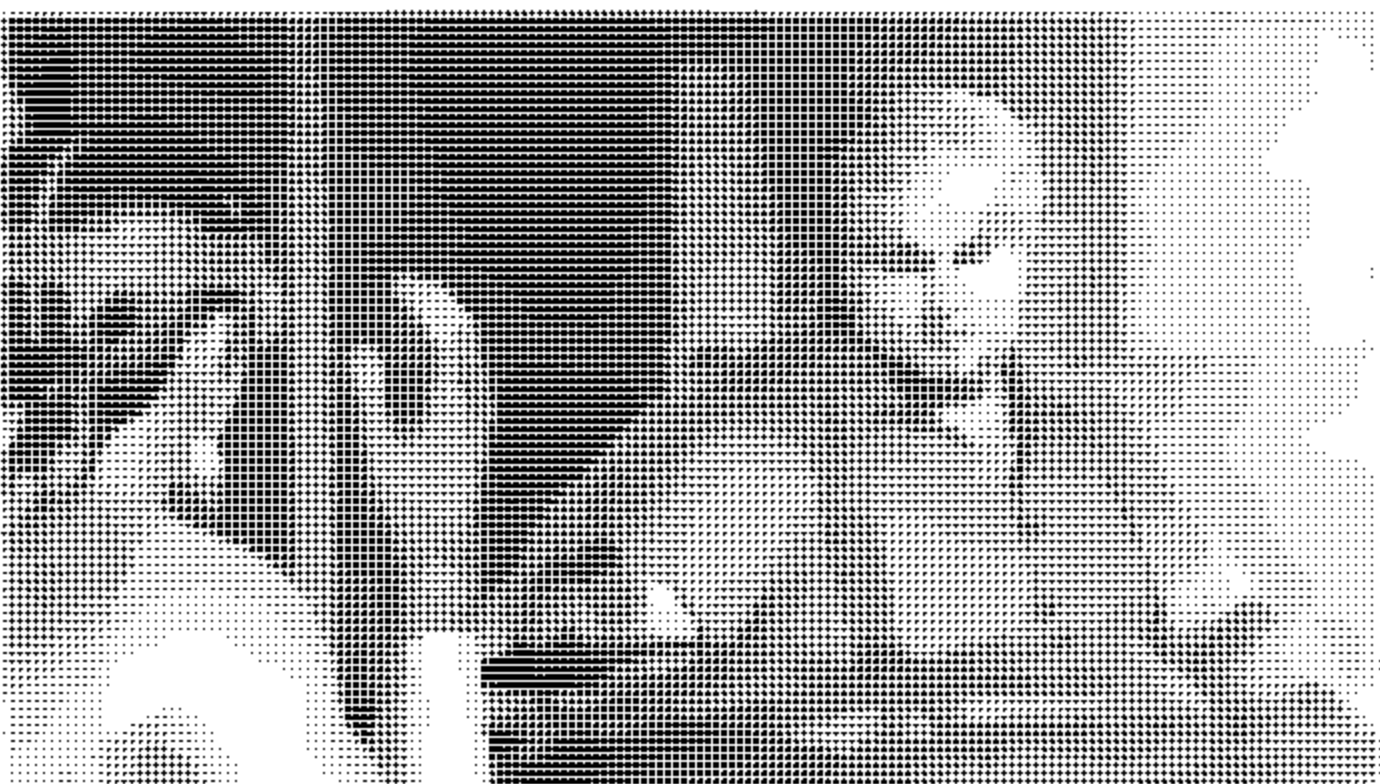

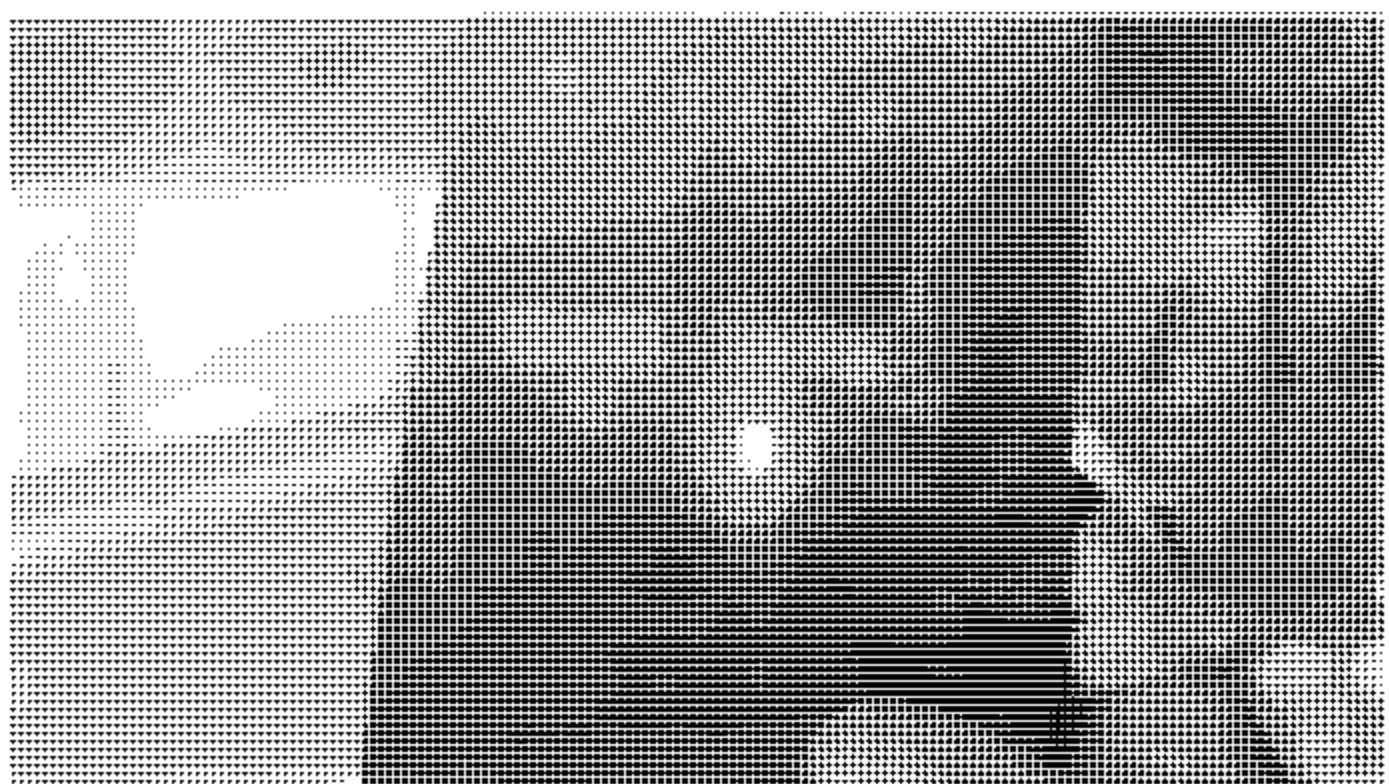

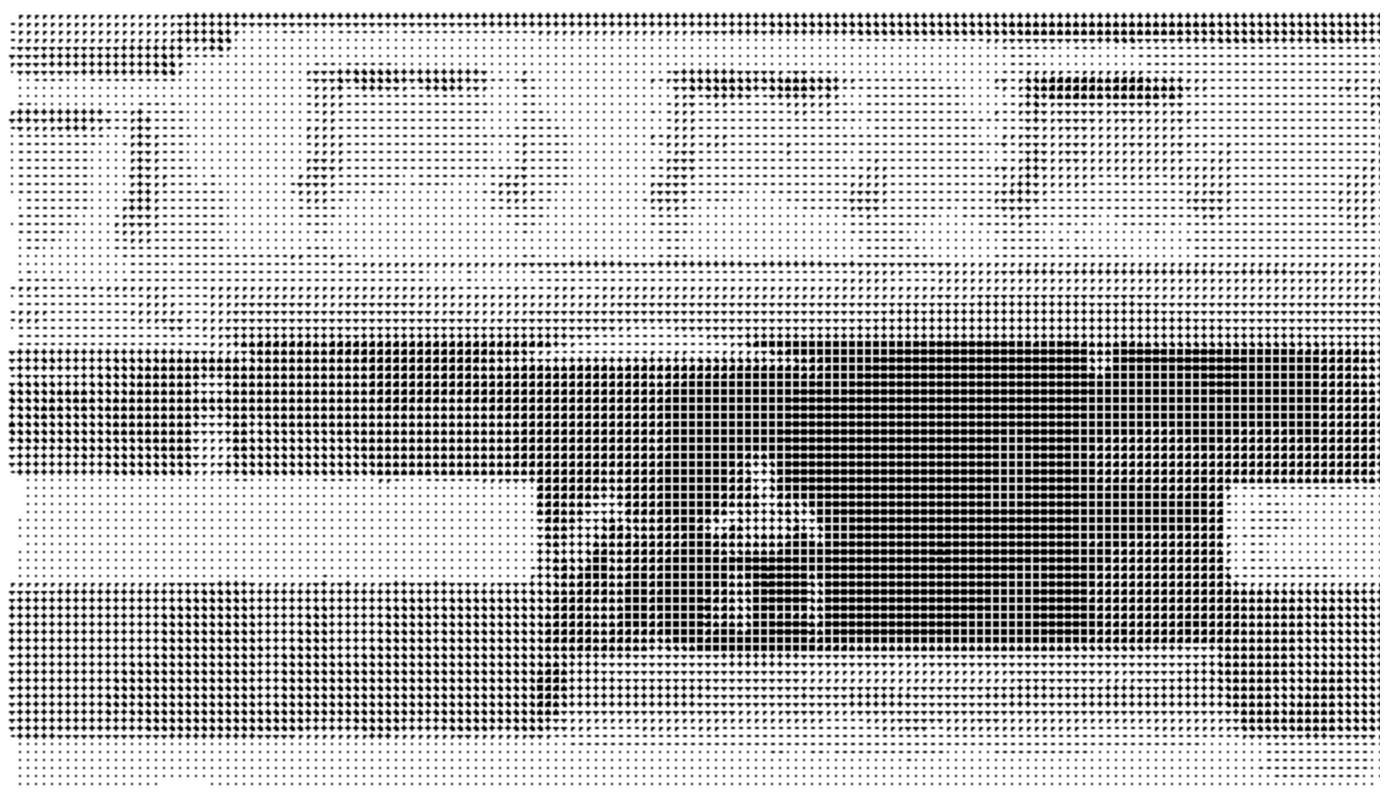

STREET FIGHTER × TEKKEN ENDING

鲍勃与茱莉亚

ボブ & ジュリア

from Polygon Pictures (Toshio Ohashi)

这个结局带你远离了南极洲冻土,前往西部海岸的温暖气候.鲍勃本来就是个小友好,但把他做得文雅而有魅力的确是个挑战.我们运用他的对话台词和小动作来传达他的魅力。

在鲍勃的协助下,茱莉亚成功将潘多拉盒送进了研究设施,它在那里应该能免于落入邪恶之手.茱莉亚给了鲍勃承诺的报酬,但鲍勃拒绝接受,而是温和地对茱莉亚说旅程本身就足够作为奖赏了.茱莉亚忍不住笑了起来,而鲍勃继续说着圆滑的台词,最后以魅惑的眨眼结尾。

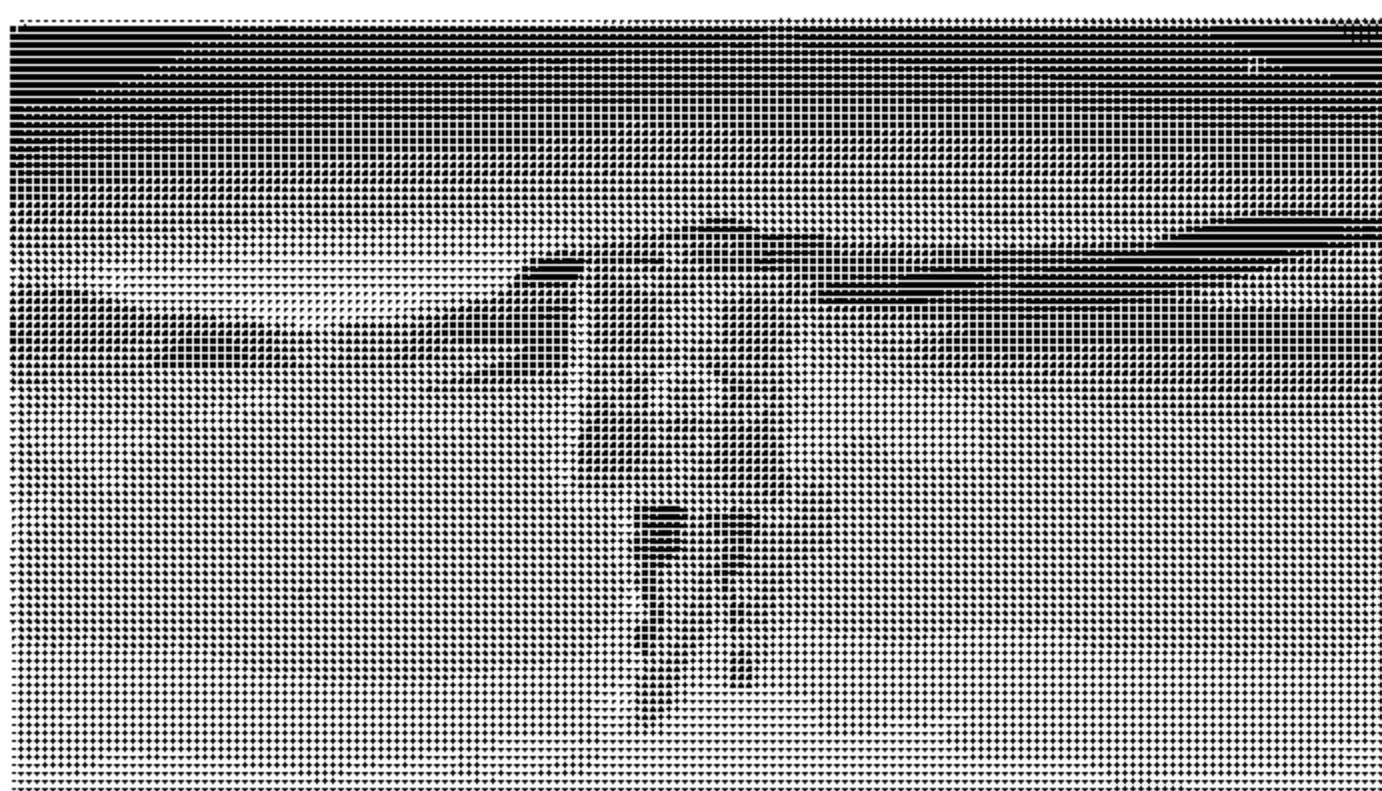

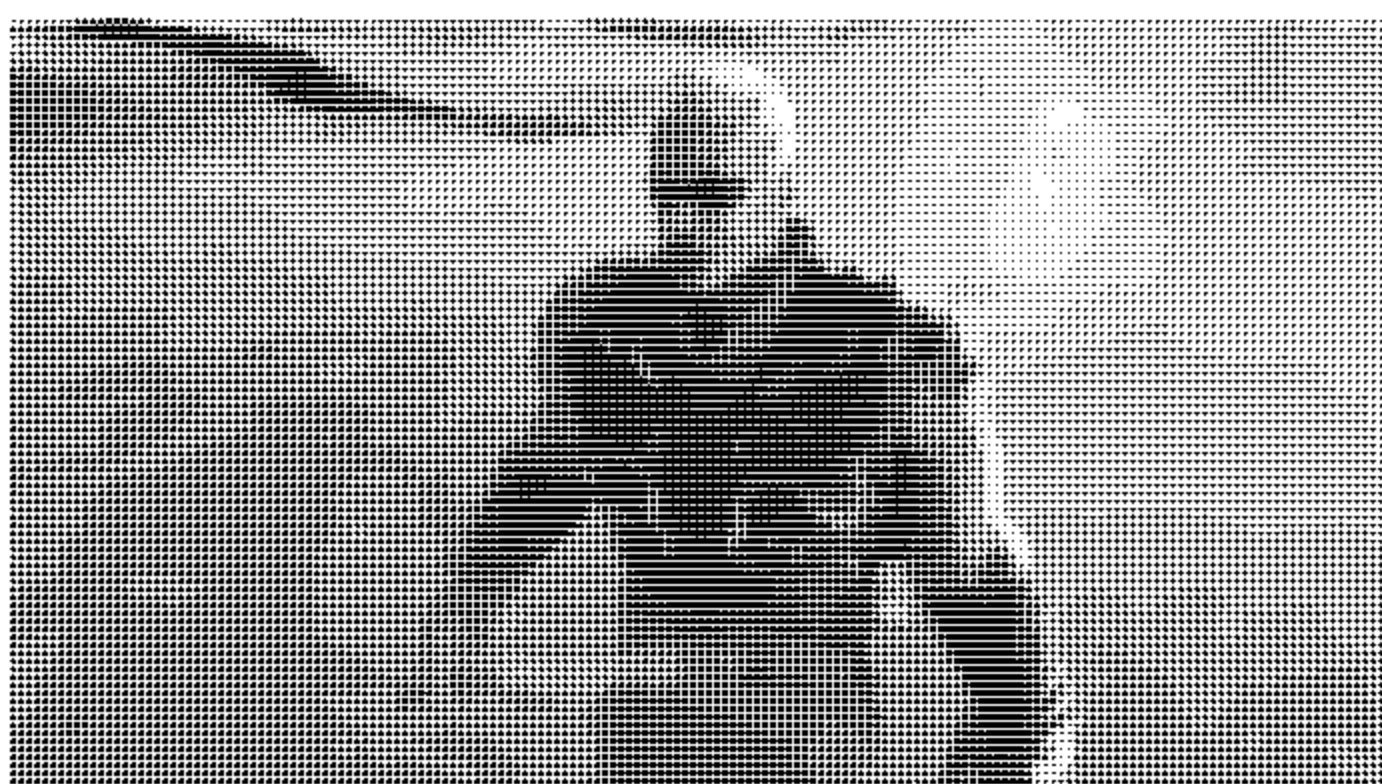

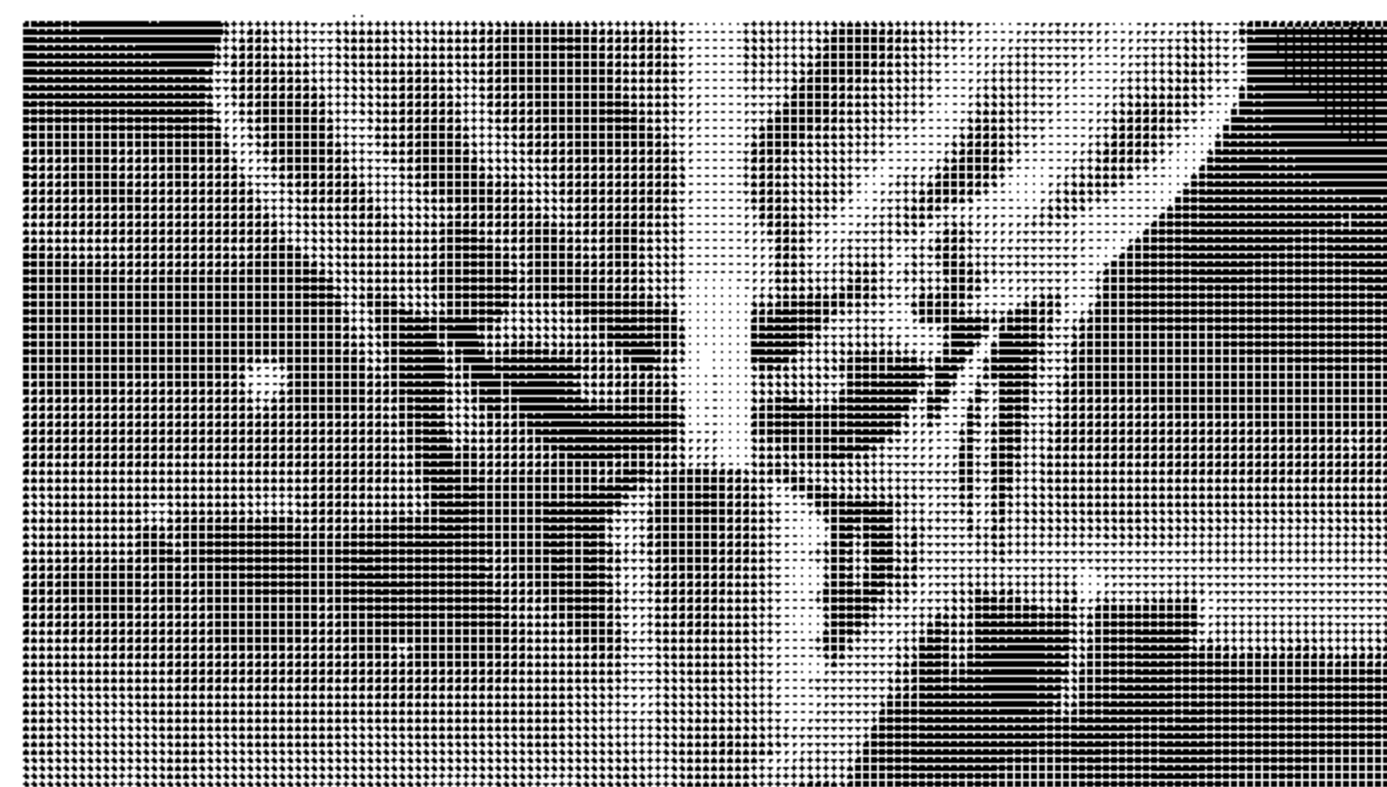

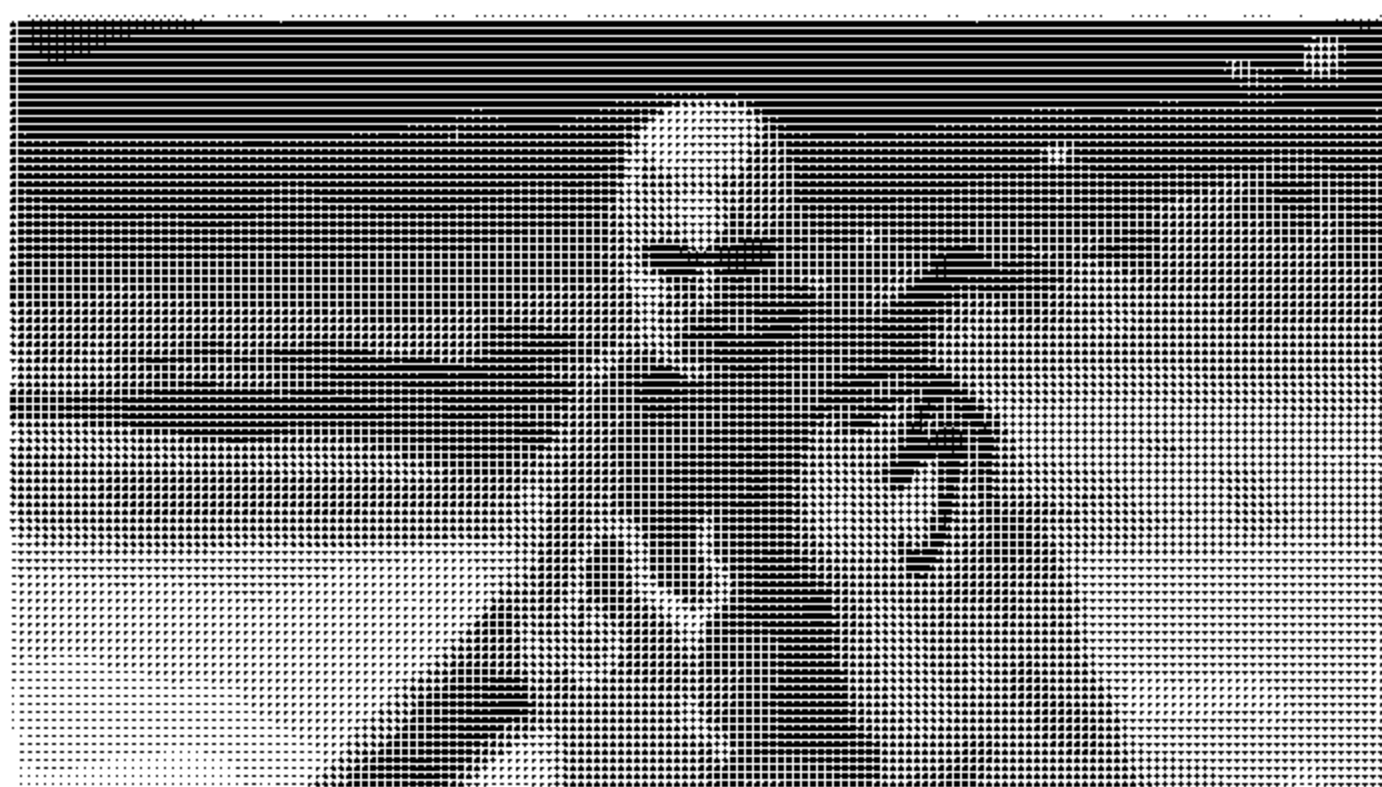

STREET FIGHTER × TEKKEN ENDING

吉光与雷文

吉光 & レイブン

from Polygon Pictures (Toshio Ohashi)

我认为我们借助于雷文闪躲吉光攻击时的严肃气氛,成功制造了真正的笑点:雷文意外地掉进了盒子里。我得说这个结局在整体上是成功的。

吉光很感谢雷文的协助,但他专横的个性实在有点让雷文受不了。吉光被雷文的反应所激怒,毫不犹豫地从此后攻向了他,但洞察力强的雷文躲过了这一击…结果掉进了打开的潘多拉盒里。在这一段的最后,吉光背着装有雷文的盒子回了家。

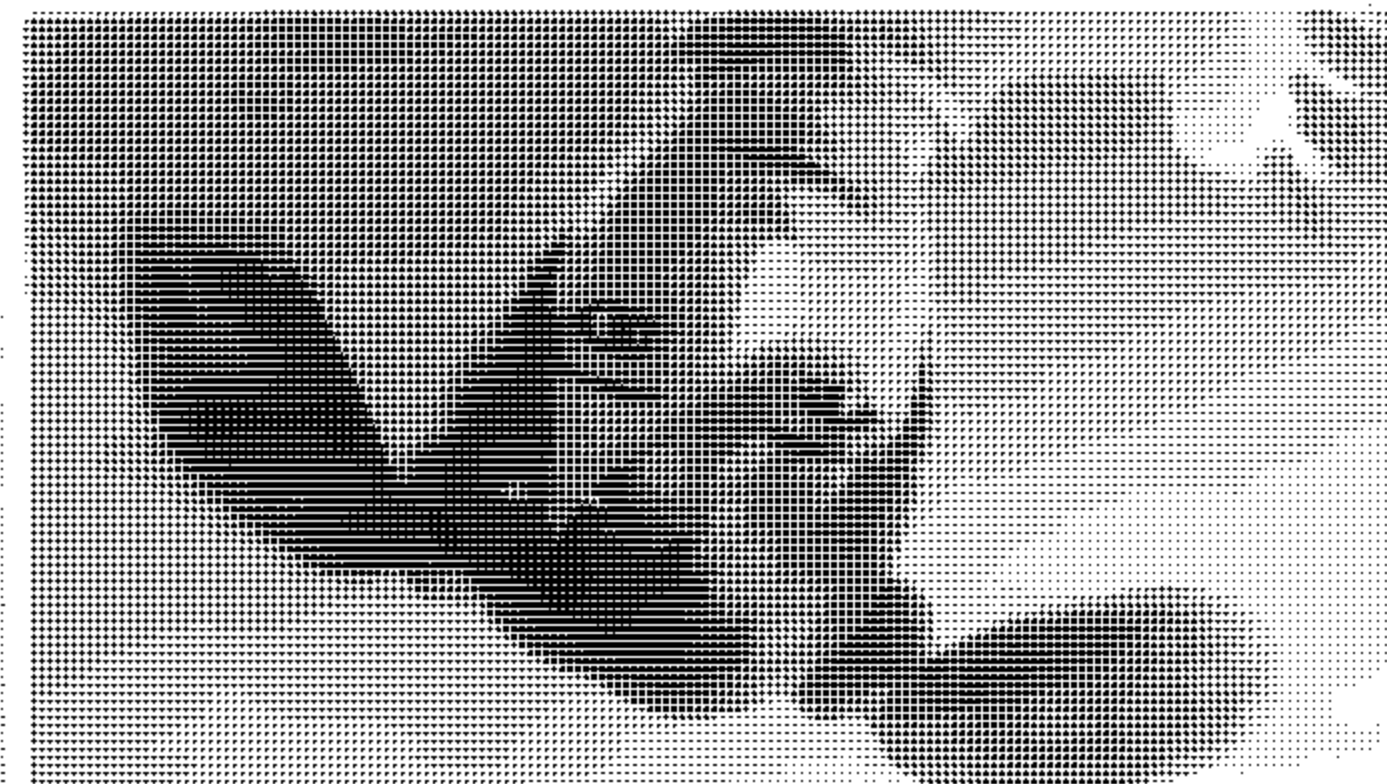

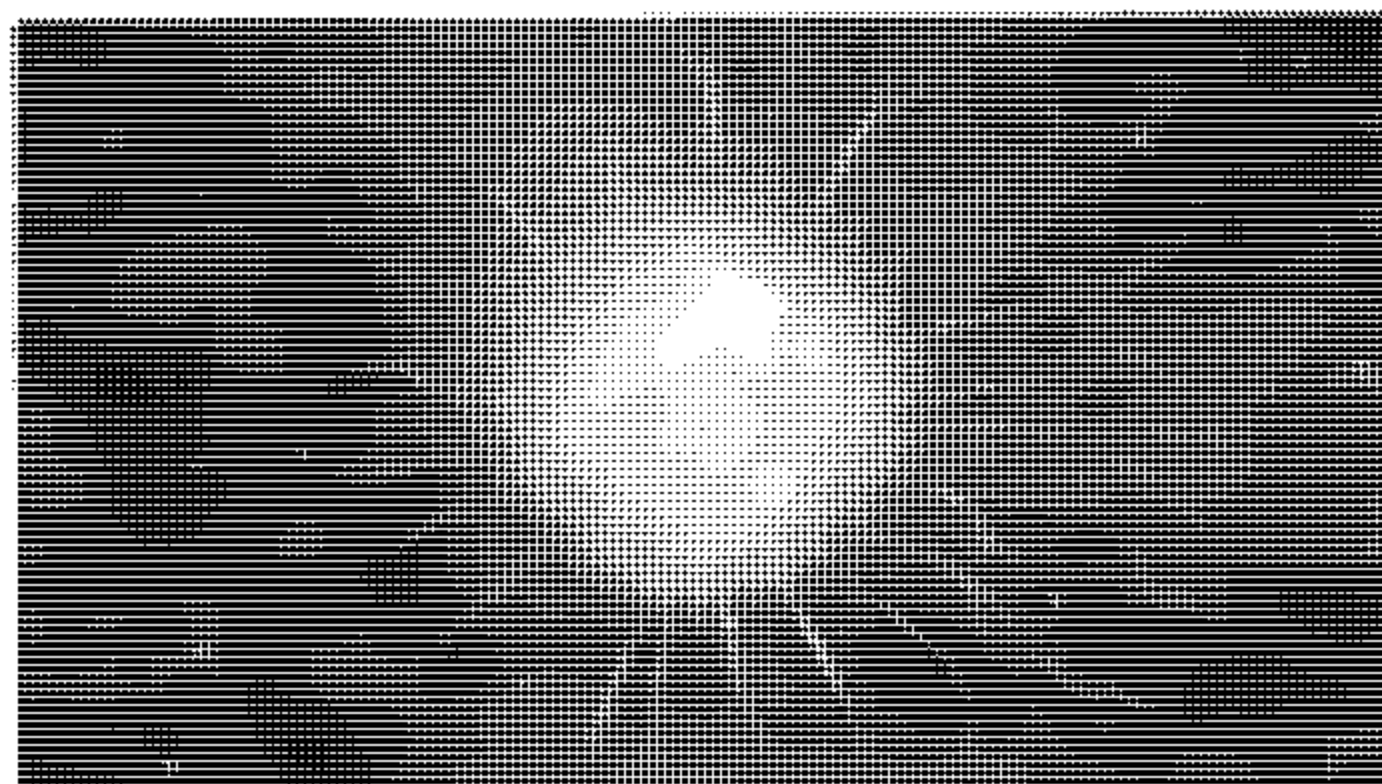

STREET FIGHTER × TEKKEN ENDING

仁与晓雨

仁 & シンオウ

from Polygon Pictures (Toshio Ohashi)

我们在仁的转变上花了很多时间,因为我们想要在本就严肃的事件上再添一些氛围。我感觉我们通过结局前半部分的混乱,让仁最后暗自下的决心更富意义了。

在接近潘多拉盒时,仁被盒子的能量所转化,连试图跑向他的晓雨都被推了回去。盒子的光芒环绕在两个格斗家周围,从仁的体内抽出邪恶的能量。在恢复意识后,仁看到恶魔基因的标记还是在他的肩膀上,于是再度重申了打破诅咒的誓言。

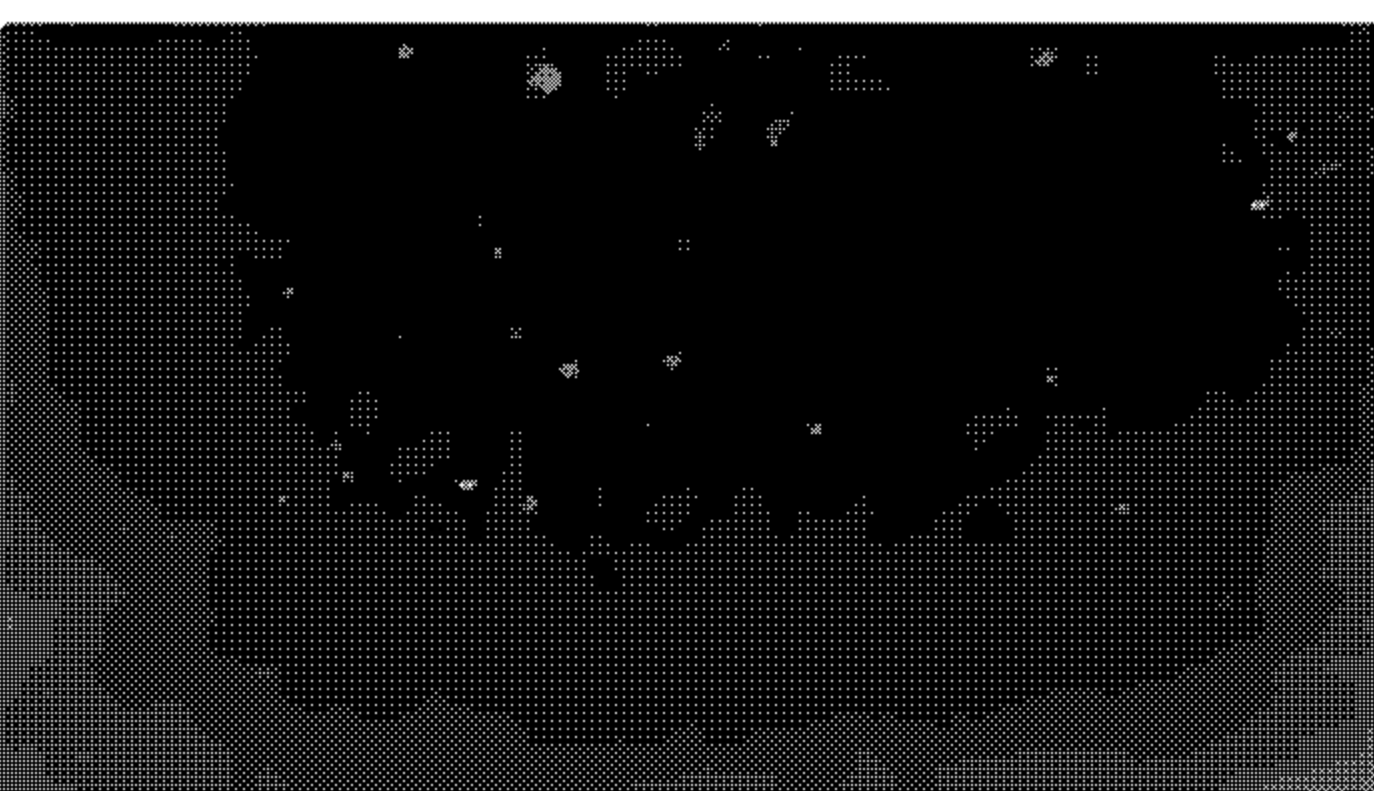

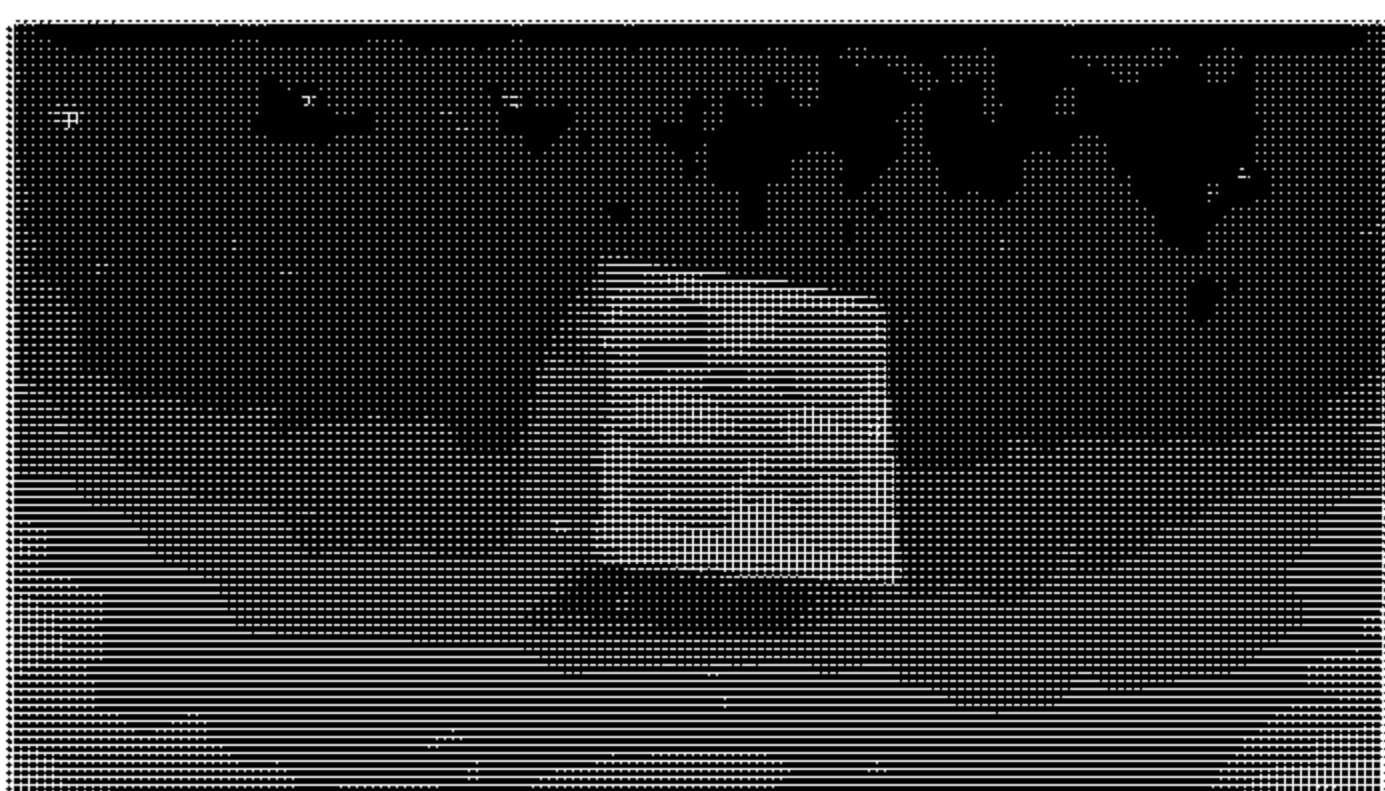

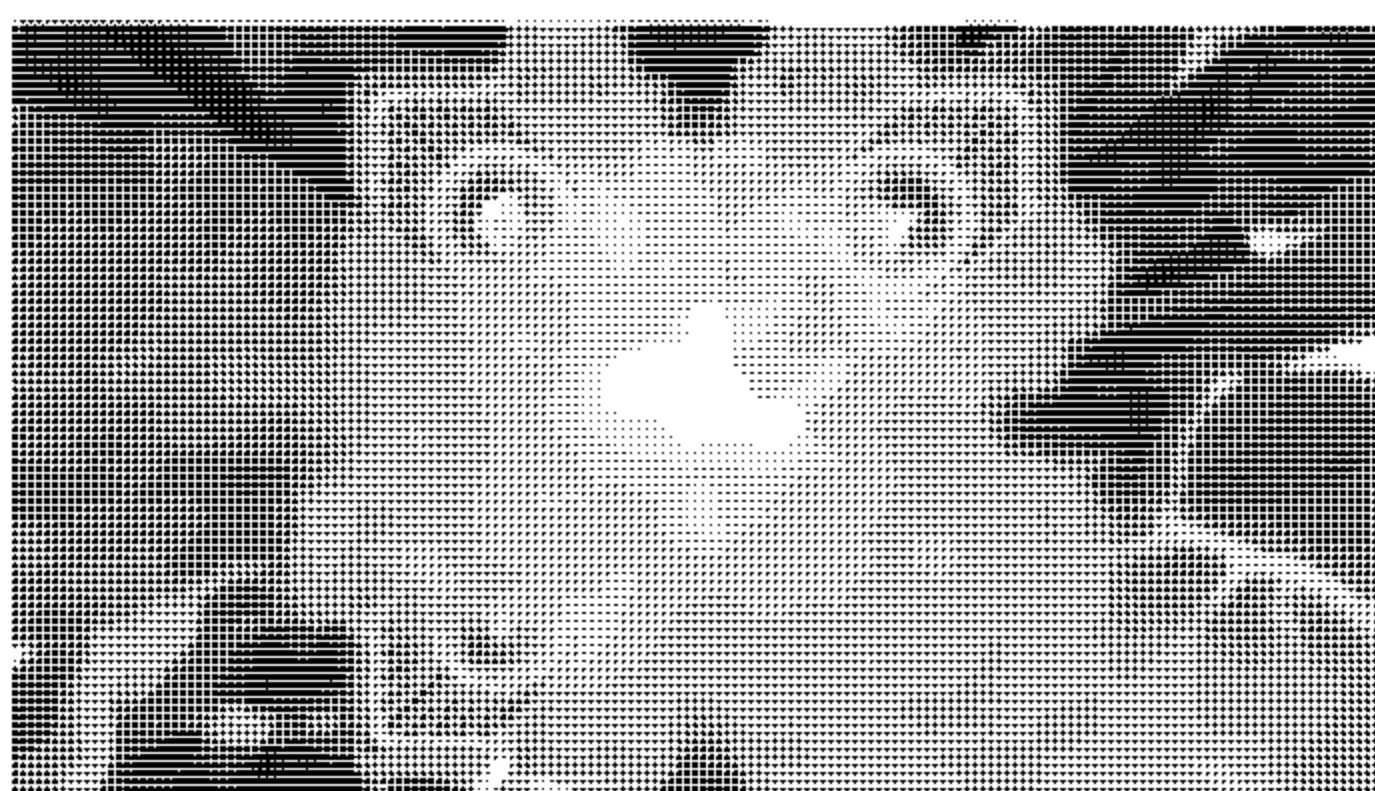

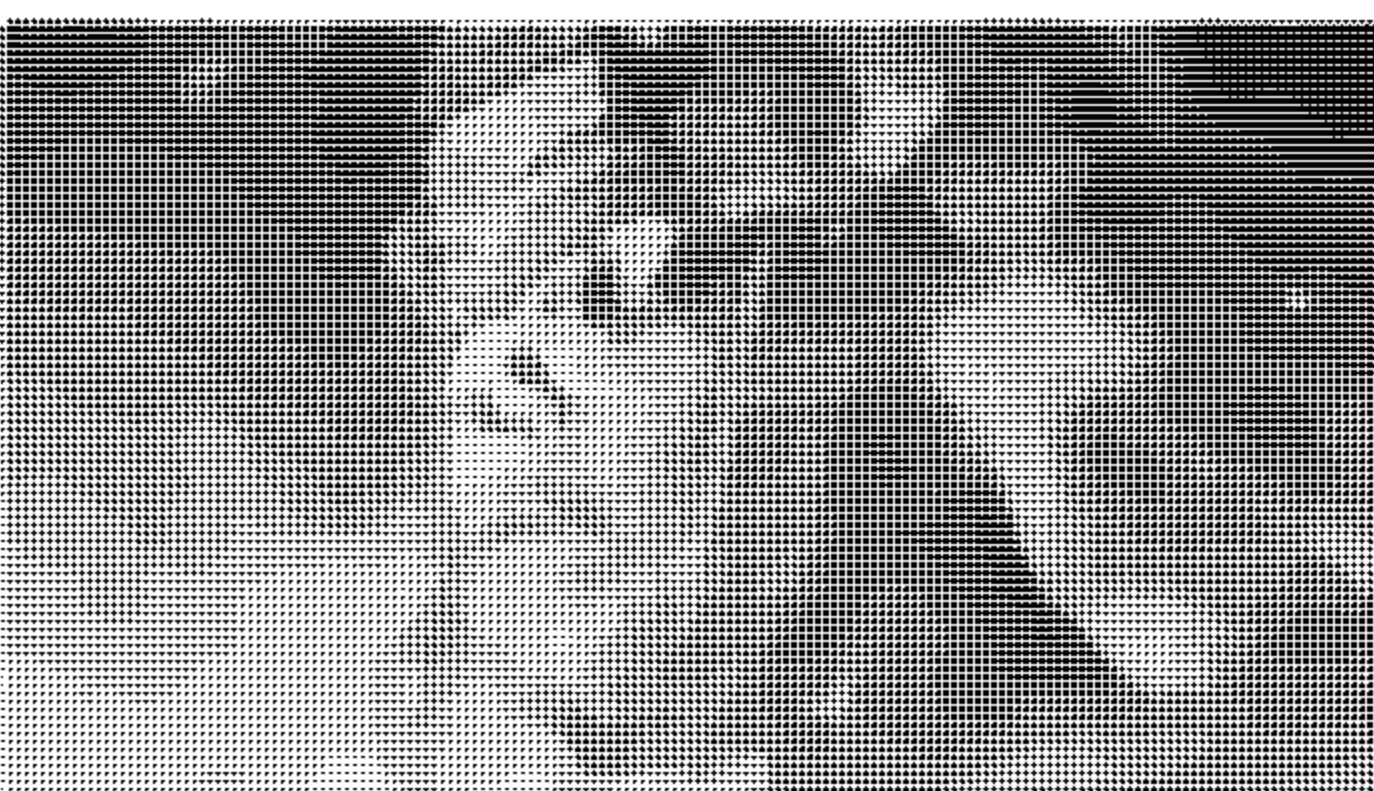

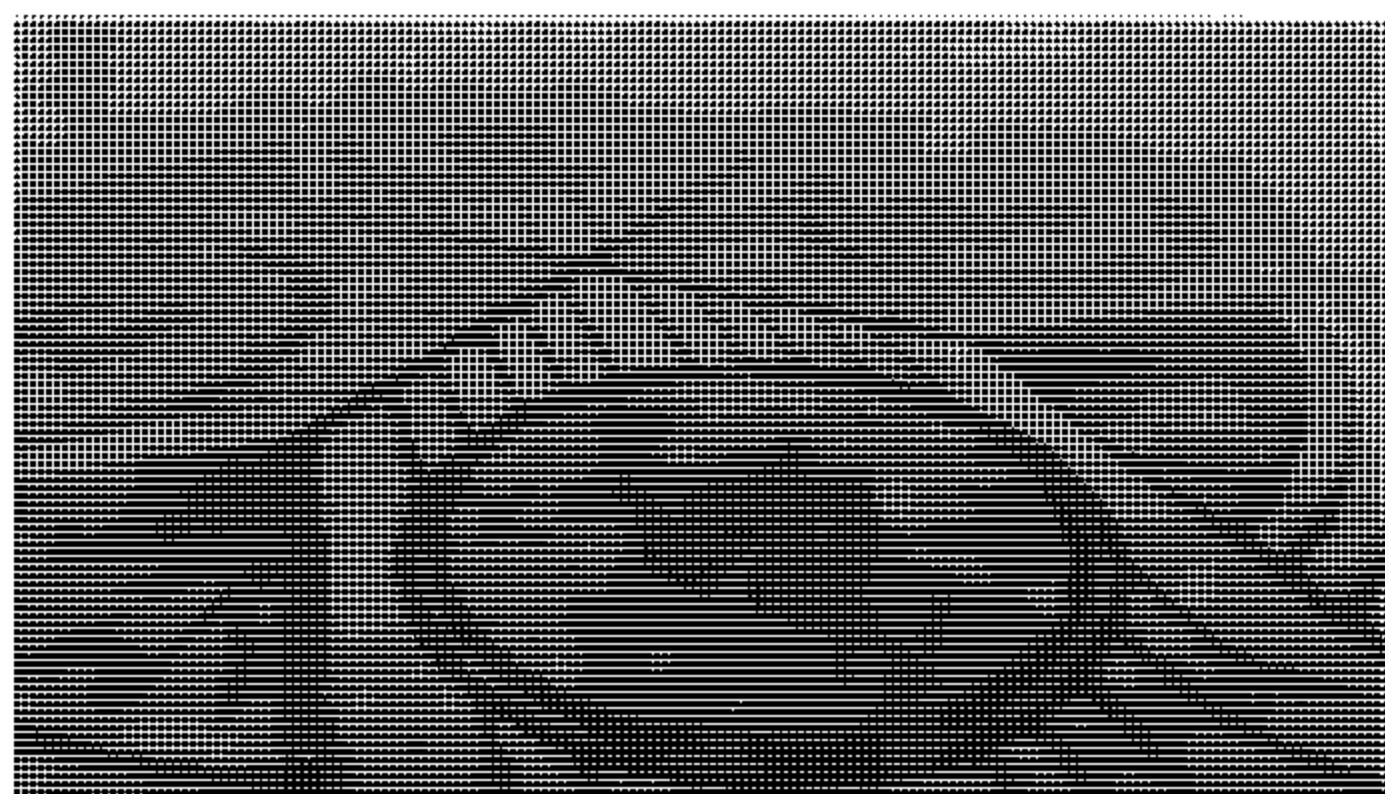

STREET FIGHTER X TEKKEN ENDING

斗神

オーガ

from Polygon Pictures (Toshio Ohnishi)

斗神是这个结局中唯一的角色,并且他甚至都没怎么动,因此,主要的挑战集中于让这个结局有趣起来,我想我们还是成功做出来了,我对斗神被吸入潘多拉盒的效果很满意。

斗神受他创造者的声音所指引,来到了南极洲。在他靠近潘多拉盒时,斗神举起双手,开始接纳灿烂的蓝光。当蓝光流回他面前的盒子时,斗神的身体逐渐从画面上消失了。潘多拉盒将斗神整个吸收完成后,便静静地从地面上升起,飞向了天空。

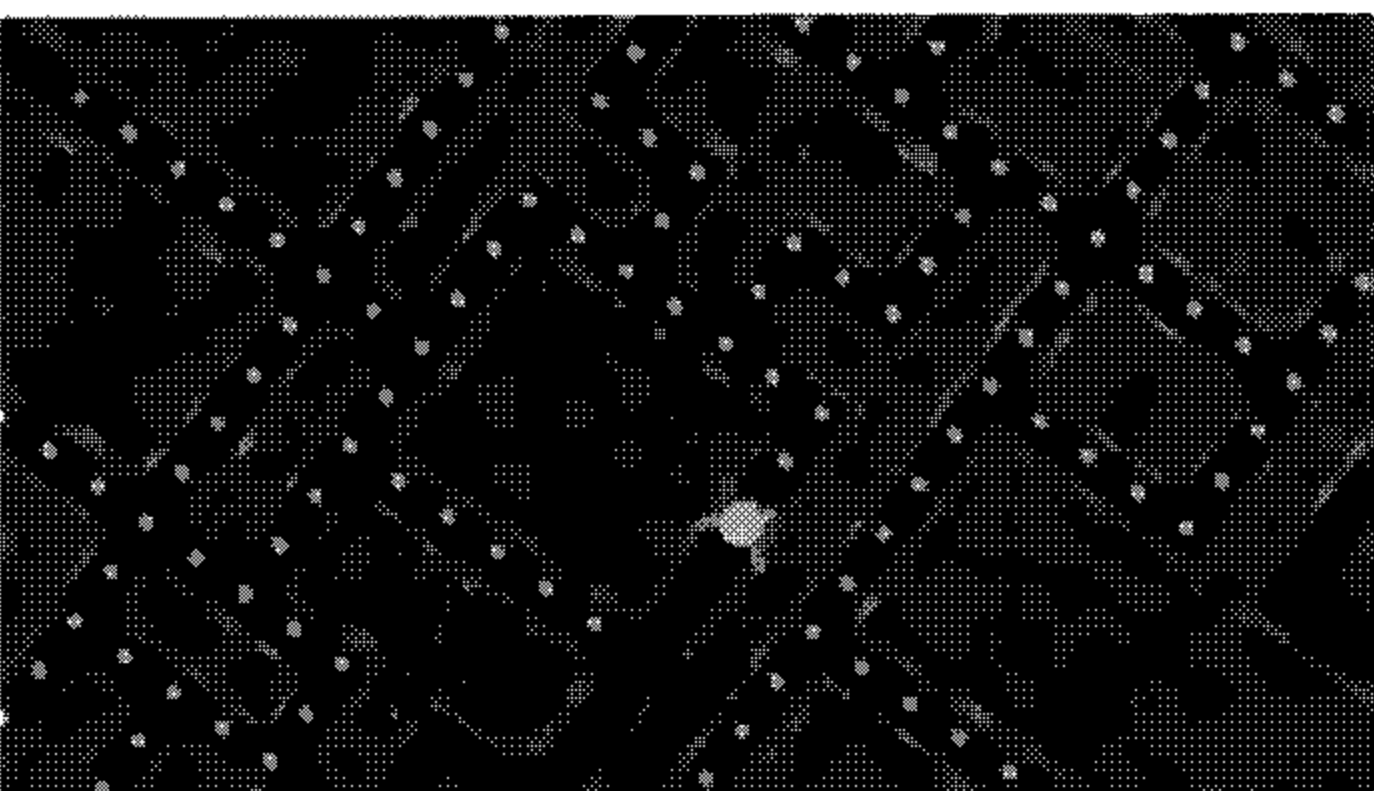

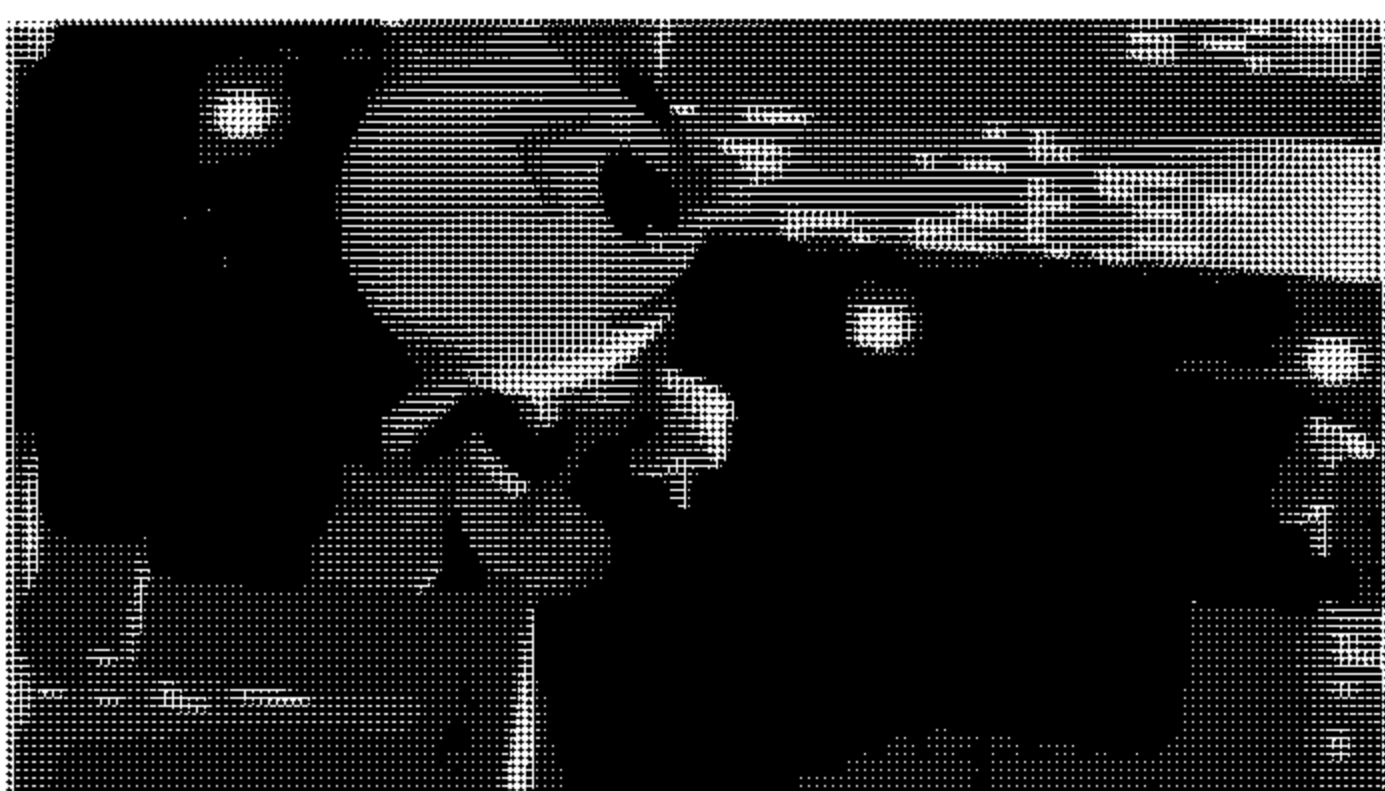

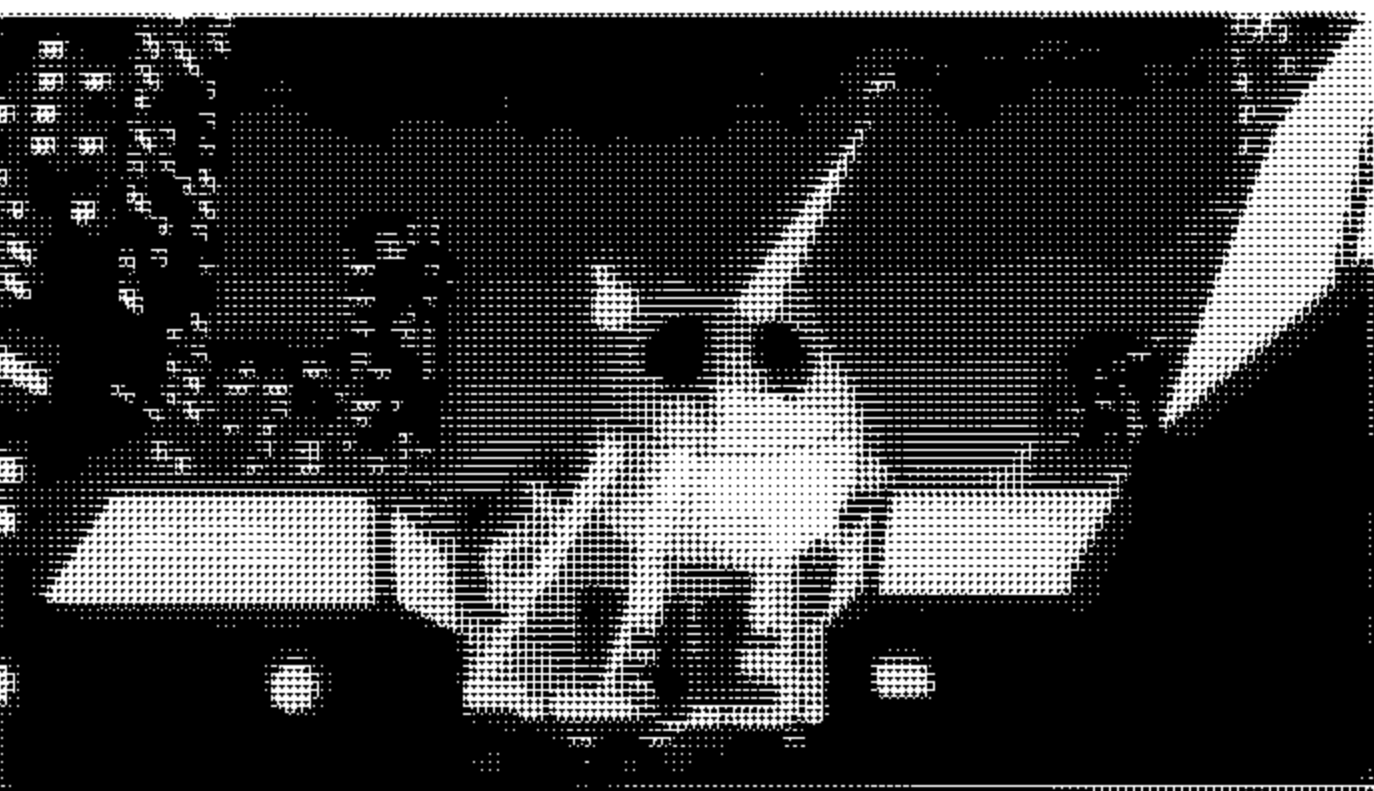

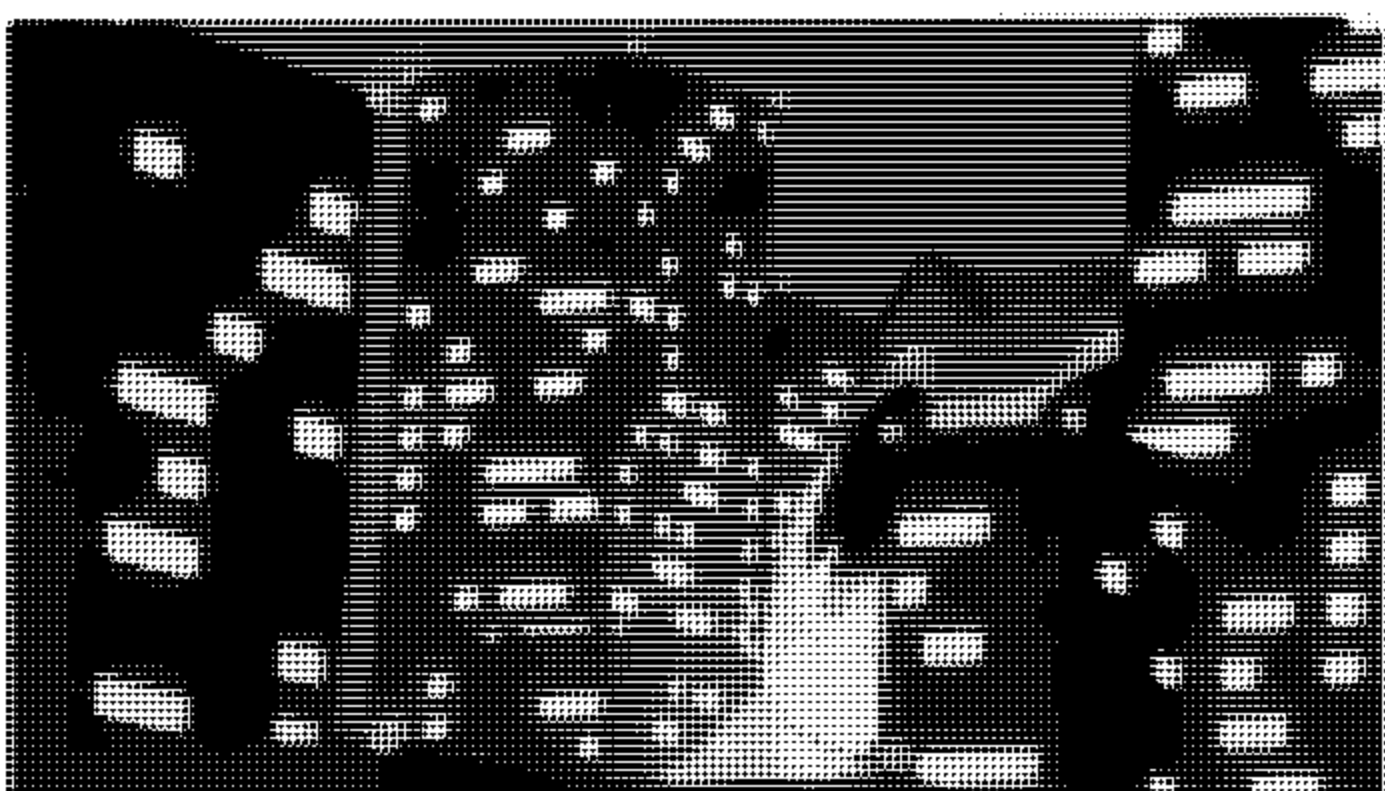

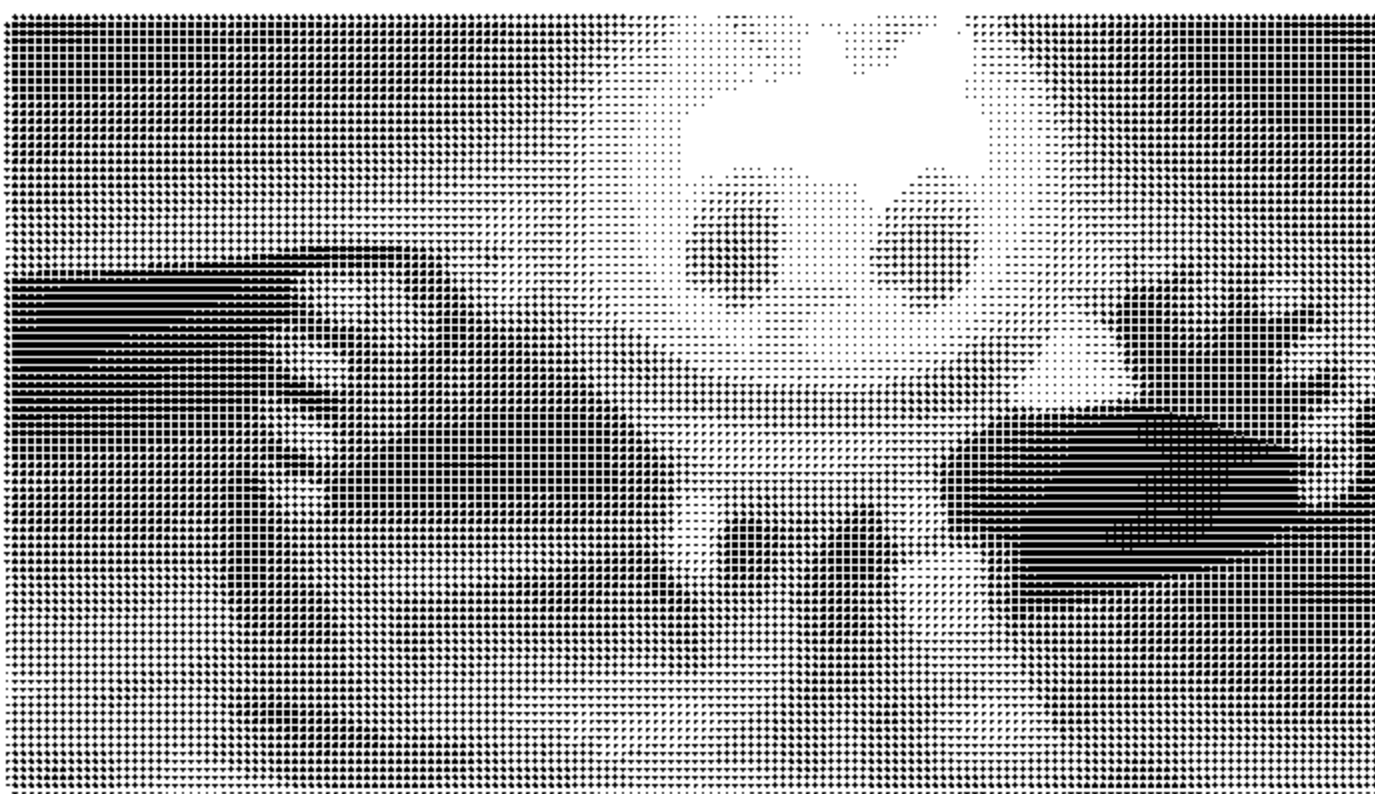

STREET FIGHTER X TEKKEN ENDING

吃豆人

パックマン

from Polygon Pictures (Toshio Ohnishi)

吃豆人的结局其实最终影片与故事梗概有着很大的不同,巨大化的吃豆人是参考了《捉鬼敢死队》里的“棉花糖鬼”,我很高兴我们做到了让如此巨大的吃豆人依然保持可爱。

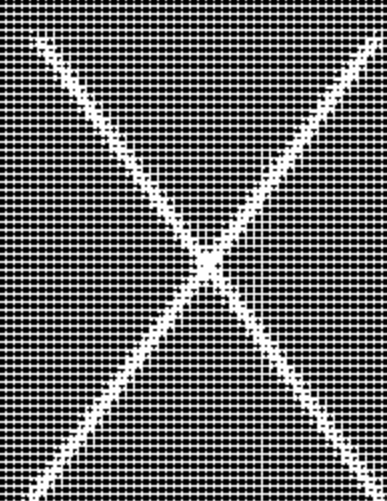

吃豆人接近并务实地吃掉了发光的潘多拉盒,结果它成长得史诗般的巨大,之后出现在某座大城市的建筑丛中。吃豆人边走边俯身吞吃路边的树木,而它肯定非得吃光所有的树才能满足自己的大胃口。

STREET FIGHTER SERIES

TEKKEN SERIES

ストリートファイターX鉄拳スペシャル

STREET
FIGHTER

This special section of the book is focused on celebrating the collaboration between Capcom and Bandai Namco, as well as the 'Street Fighter' series' 25th anniversary. As part of this celebration, the interviews contained in this section are records of Atkinson and the Tekken Development Team talking about the origins of their characters and series. These interviews also inadvertently became a treasure trove of wisdom and memorable quotes, so we hope you will give them a thorough read.

TEKKEN

SPECIAL

安田朗

我第一次体验到《街头霸王II》招式的真实性,是在火车上听到某个孩子大喊"升龙拳!"

ANY SERIOUS DISCUSSION REGARDING THE FIGHTING GAME CRAZE STARTED BY "STREET FIGHTER II" WILL EVENTUALLY LEAD TO ONE NAME: AKIMAN. IN ORDER TO REAFFIRM THE HISTORY OF THE "STREET FIGHTER" SERIES, WE ASKED AKIMAN TO REFLECT ON SOME OF HIS FAVORITE MEMORIES.

《快打旋风》的贡献

I UNDERSTAND THAT YOU WERE NOT DIRECTLY INVOLVED WITH THE FIRST "STREET FIGHTER" (HEREINAFTER "SFI"), BUT WHAT ARE YOUR THOUGHTS ON THAT GAME?

AKIMAN: I believe "SFI" was the correct way to make an arcade game. The tactile method of inputting commands was very easy to grasp. If you hit the pad hard, you get a stronger attack, and if you hit the pad lightly, you get a weaker attack. This very basic gameplay system was simple enough for anyone to understand, and offered a literal "game experience" while still remaining unique. At the time, there was a mockup "SFI" machine with wooden buttons in the Capcom building. When you hit the controls on that machine, it'd actually peel the skin off of your hands, and the black paint on the buttons would stain your hands pretty badly. I remember screaming, "Argh! I can't get this damn paint off my hands," yet it would never stop me from going back for another round against Nishitani (*1).

WHAT KIND OF WORK WERE YOU DOING FOR CAPCOM AT THE TIME?

AKIMAN: I was doing graphics for "Side Arms: Hyper Dyne" (1987) and "Forgotten Worlds" (1988), which were both shooting games. "Forgotten Worlds" was the first CP System project, for which I did both graphics and planning work, so it's a very memorable game for me. That was the first time I worked alongside Nishitani. He was originally a game writer, and my then-boss introduced us while telling me, "This guy's a genius, so I want you two to make something together." I was told that Nishitani was great with games but didn't know the first thing about graphics, so I was there to support his efforts. For "Forgotten Worlds", I came up with ideas for the world and characters, which Nishitani then adapted into a form that would be interesting in a video game. This unique workflow we created

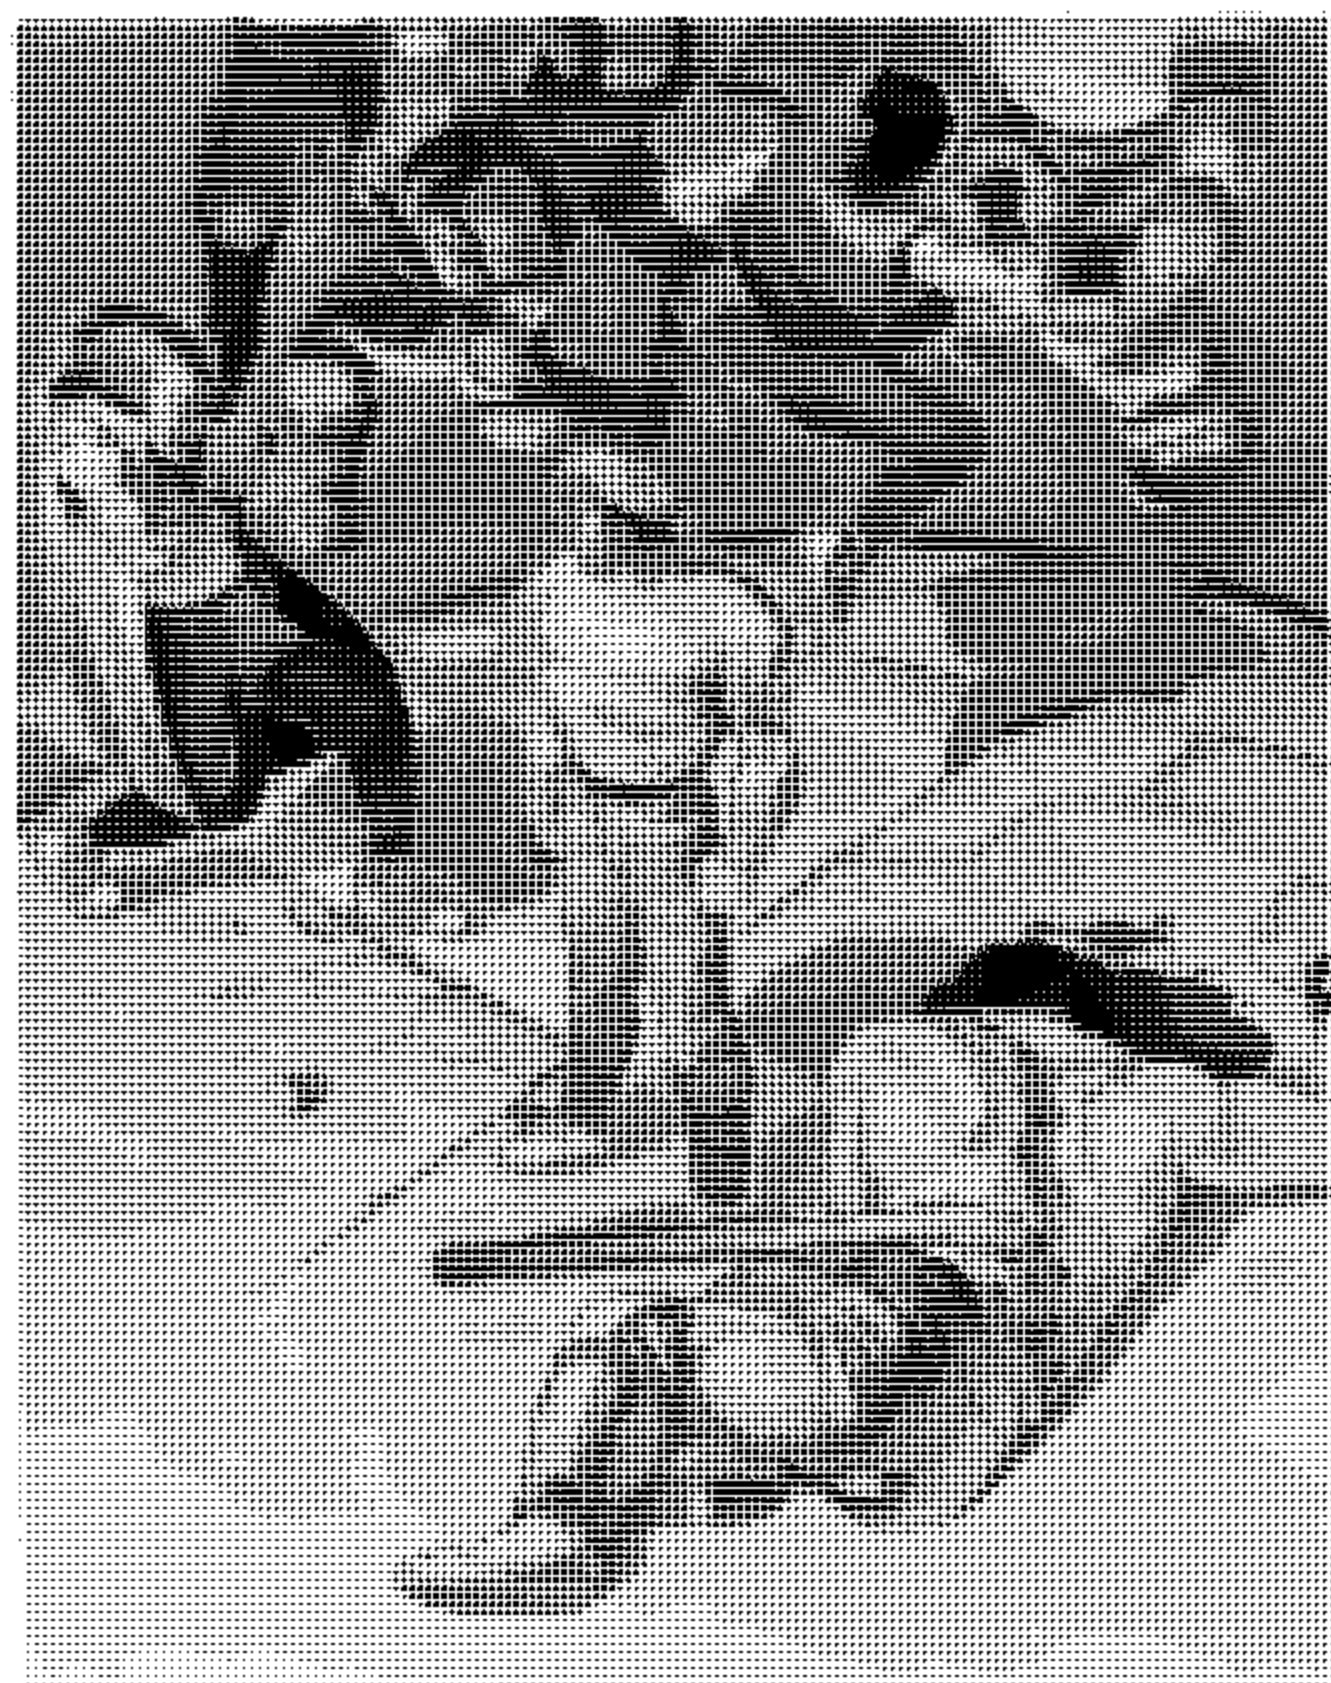

for ourselves would end up serving us well later, in "Final Fight" and "SFI". There were some characters that Nishitani came up with on his own, though I admit I thought they were a bit boring at first. Once I played the game, however, I realized that all of Nishitani's designs were insanely fun once they were put into a game environment. An example would be something that started off looking very bland, but as the player continued to attack it, its armor would gradually be broken off, and that would in turn offer the player a certain sense of satisfaction. I was always so consumed with the notion of creating "something no one has ever seen before" with a stunningly beautiful visual aspect, but Nishitani had the wisdom to think about the gameplay whenever he designed something. When designing Stage 1 for "Forgotten Worlds", I drew influence from "Salamander" (Namco/1986) to create a unique and organic stage. When I first finished that design, I was so proud of it that I took it straight to my boss and said, "Look at my take on 'Salamander' isn't it awesome?" My boss looked at it and replied, "It is quite awesome, but there's no room for emotional transference. Try again with something that will be more familiar to the average person." Up until that point, I had believed that familiar things were boring, so being told that familiar things were actually the key to creating something interesting was a shock, to say the least. Thinking about it now, I realize the wisdom in my former boss's words when I see the popularity of things like "slice of life" anime. So, after being knocked down a few pegs by my boss, I quickly redesigned Stage 1 into an urban wasteland. I ran out of time though, and was only able to change the first part of it.

HOW DID YOU COME TO WORK ON YOUR NEXT PROJECT, "FINAL FIGHT"?

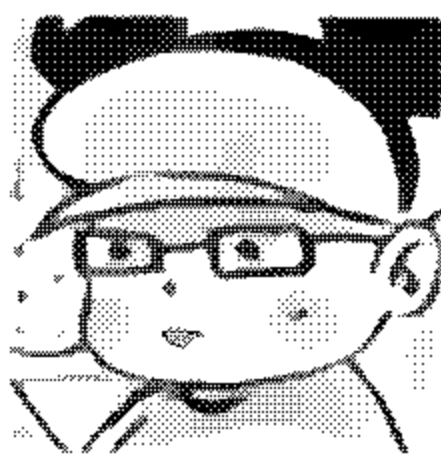

AKIMAN: It's not like we had planned for a side-scrolling beat 'em up game to begin with. We were actually planning to make a sequel to "Street Fighter". The topic came up during a company meeting, but no one volunteered to take it on, so I raised my hand and said, "I'll do it." To start the project off, I drew up drafts of a few characters, including the "wild child" that later became Blanka, as well as a knife expert. Things went smoothly enough and my submissions were approved. The problem was the technology. When I calculated the required resources to support the graphics I had in mind, I found that we simply did not have enough ROM capacity. At the time, burning ROMs only had a 20% success rate, so it was very difficult to arrange for large amounts of data. I did consider putting it together with less capacity than "SFI", and although the idea of taking down a massive army with only a handful of troops sounds like a great scene for a movie, reality proved to be far more severe. Just when I was at a total loss as to what I should do, I happened to witness someone playing a beat 'em up at an arcade center I visited during a business trip. The beat 'em up games of that era were unreasonably difficult and the player did not have a wide variety of actions to choose from, so it was basically like throwing your money away. You were never satisfied with your defeat, and every time you played, you didn't feel like it was going anywhere. I started to think that beat 'em ups could be more fun if the player could move around more freely and perform a bunch of different actions, so I quickly rewrote my project proposal.

THAT NEW PROPOSAL WAS "FINAL FIGHT"?

AKIMAN: My first idea was to have three different lines of depth that the player could freely switch between, but Nishitani said, "Lines? That's kinda lame." (laughs) By then, I had smartened up enough to know that if Nishitani thought it was lame, it probably was. I just wanted the player to have more freedom of movement, so I decided to leave the gameplay details up to him. I also revisited all of the advice my boss had given me during "Forgotten Worlds", and made sure I didn't make the same mistakes again in "Final Fight". Even after "Forgotten

《快打旋风》是一款在世界范围掀起热潮的清版类游戏,这一系列所培养的动画风格和武术动作模式延续到了有趣的《街头霸王II》中。

REAL NAME: AKIRA YASUDA **ORIGIN:** HOKKAIDO
While working for Capcom, Akiman proved his worth as a planner for "Forgotten Worlds", "Final Fight", and "Street Fighter II". He left his mark on the development of Capcom's graphics and animation patterns. Under the name "Akira Yasuda", he also did character design work for the TV anime "Turn A Gundam", as well as mechanical design work for "Overman King Gainer" and "Code Geass: Lelouch of the Rebellion". To this day, Akiman continues to bridge the gap between games and anime by working on the TV anime "Bodacious Space Pirates", while also doing character design work for certain video games.

Worlds" was released, my boss gave me some very important advice. He said, "I promise you that 70% of the players who play this game in an arcade won't be able to clear it. That means that most of the amazing detail and work that you poured into the second half of the game will never see the light of day. You should put your best work at the beginning and aim to maintain that level of quality throughout the rest of the game." This meant that creating an epic boss battle was meaningless if only a handful of players would ever see it. On the other hand, every player is guaranteed to see Stage 1, so putting your best foot forward at that early point is the right way to make an arcade game. So with "Final Fight", I dedicated most of the resources to the characters' actions and animations so that the player would be treated to the best parts of the game just by inserting a coin. For the background of Stage 1, I set down a bunch of buildings, because that was the kind of scenery everyone could relate to. Shortly before that, I would have dismissed such an idea as "boring," but I soon learned how fun it could be to recreate a familiar setting in a game. These days, I absolutely think it's fun to have a crazy fight inside a convenience store, or have a sumo character raise his stats by eating a bowl of ramen. (laughs) "Final Fight" was first announced at the AMI Show under the title "Street Fighter '89", and the feedback was decidedly positive. The problem was, although the project did start off as a sequel to "Street Fighter", it had clearly evolved into something that was not even remotely "Street Fighter". For this reason, the title was changed to "Final Fight."

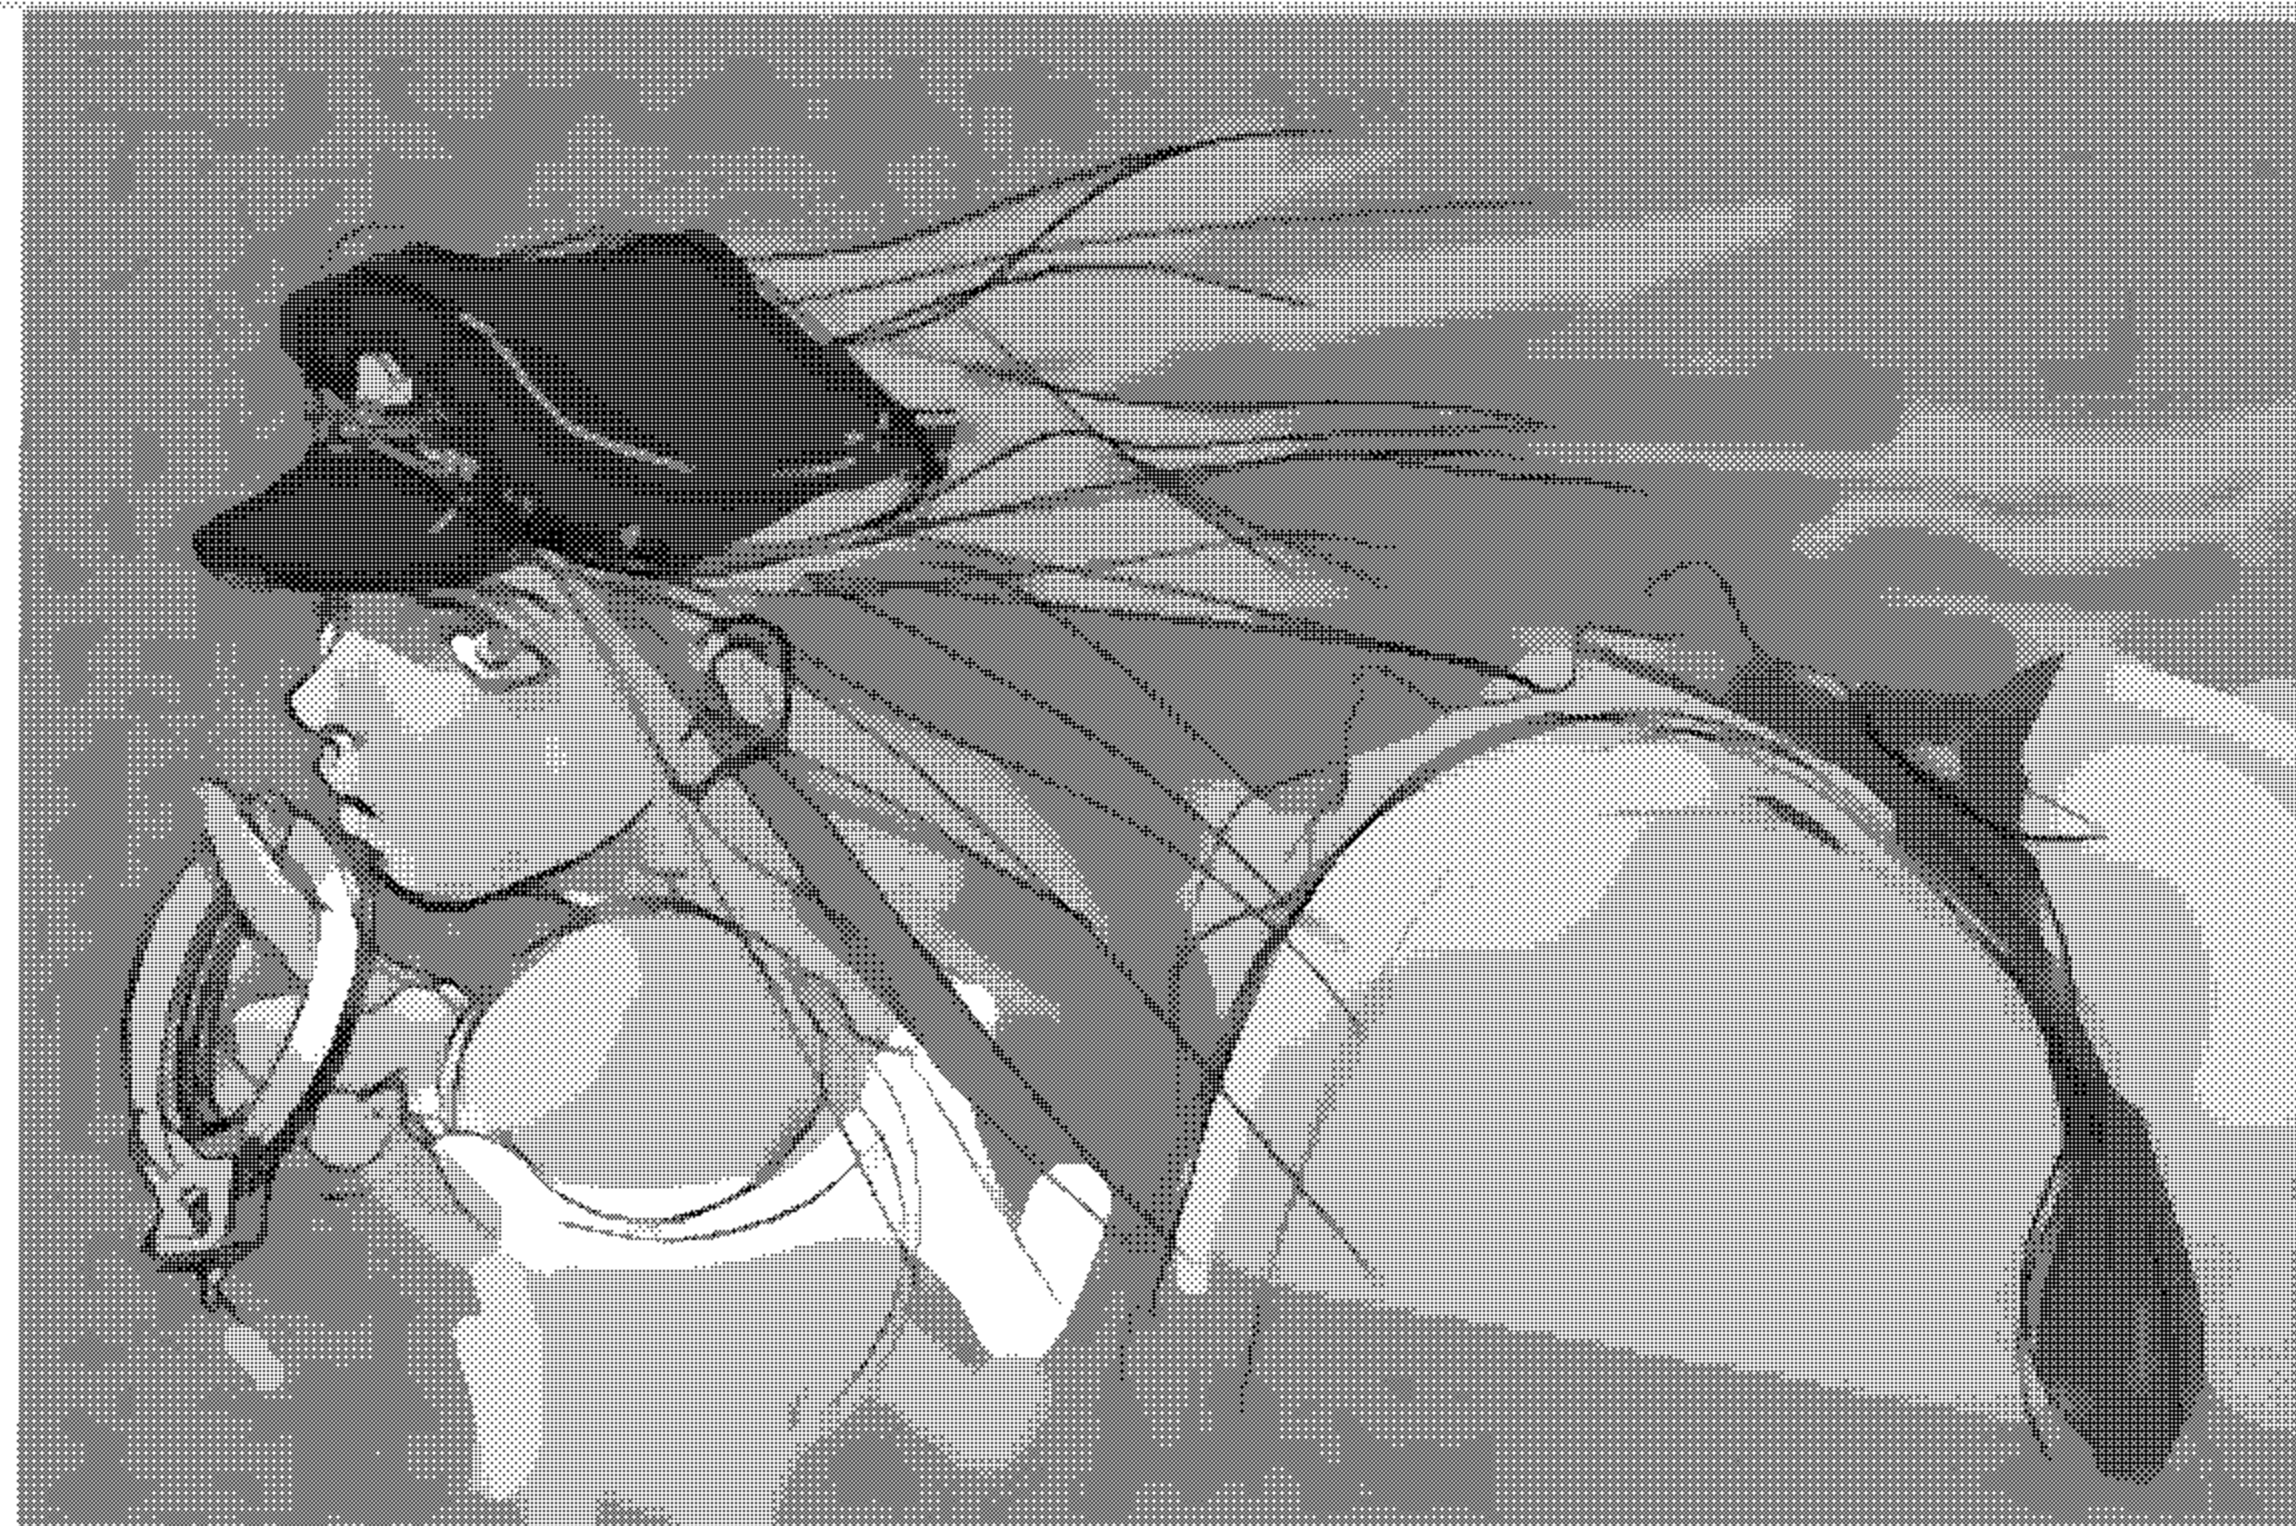

《街霸II》的诞生和格斗游戏的繁荣

FOLLOWING THE SUCCESS OF "FINAL FIGHT", WHAT LED TO THE START OF THE "STREET FIGHTER II" (HEREINAFTER "SFI") PROJECT?

AKIMAN: Due to some clever manipulation of the animation data, "Final Fight" required only half of the hardware capacity that "Forgotten Worlds" needed, but still managed to pull in respectable sales. Therefore, the "SFI" ship embarked with sails full of strong winds, and I couldn't have asked for a better start than that. Up until that point, I hadn't been able to get someone assigned to our projects to take care of graphics, but I was immediately given ten people for "SFI". I recall dancing a little jig and exclaiming, "Awesome! We can't lose!" A lot of drafts and major concepts for "SFI" had already been finished before we started working on "Final Fight", with the main roadblock being the ROM capacity. Thanks to certain advancements, however, that was no longer an issue, so we were able to resume creating "SFI" the way we had envisioned it.

WHAT WAS THE MAIN CONCEPT BEHIND "SFI"?

AKIMAN: Capcom's arcade games were always based on the concept that "it's more fun to play with others"; in other words, playing an arcade game with someone else will always be more fun than playing alone. This theory was proven pretty handily with "Final Fight", so we wanted to make two-player

由于某一事件,毒药的性别在北美版游戏中改成了“变性人”,安田朗在一段卡普空粉丝俱乐部通讯中也发表过个人看法。

gameplay a major part of the "SFI" experience, rather than some extra bonus like it was in "SFI". That previous installment had only offered Ryu and Ken as playable characters, so increasing the roster and making it so that each character could fight any of the others was an important goal for "SFI". We also wanted to tweak the physical game system itself. Instead of using an upright console with sensors, Nishitani and I agreed that a table-style console -- one that you could sit at that had six buttons -- would be better. "SFI" includes Ryu, Ken, and Sagat from "SFI", though we had initially planned to leave Ryu out. Upon reconsidering, we felt that it would be sad to leave out the main character who helped make "SFI" so successful, and we also wanted Ryu to bring in the "SFI" fans for this sequel. With regard to game balancing, I had really come to rely on Nishitani's instincts through our time together on "Forgotten Worlds" and "Final Fight", so I left all of those details in his capable hands while I focused my efforts on art direction. I was determined to make every character's moves interesting so that the game wouldn't get visually boring. To this end, I happily dragged the entire team into hell with me in order to accomplish my goal. Despite perpetually being on the brink of death, our workspace was usually full of laughter and good times. Dhalsim's arms only stretched a little bit at first, but on one of our more mischievous days, we decided to stretch them to impossible lengths. We didn't stop there, of course, and eventually Dhalsim's legs were just as stretchy. We were comfortable trying anything we thought would be fun, because I knew we could count on Nishitani to make any necessary adjustments to keep the game balanced. Blanka actually started out with a pretty human skin color, but we stumbled upon his now-unmistakable green just by messing around with his color palette. Likewise, E. Honda only had a touch of red on his face at first, but we thought his sprite would look cooler with more, so we gave him a nice makeover. In this way, a lot of things were basically just decided on a whim. If working on "SFI" taught me anything about making games, it's how important it is not to let yourself be trapped or limited by an idea. You have to be willing to experiment and let things evolve on their own if you want to discover the best chemical reactions.

AS A RESULT, "SFI" WAS A HUGE HIT AND LIT THE FUSE FOR THE BIG FIGHTING GAME BOOM. DID YOU PERSONALLY FEEL THE EFFECTS OF WHAT PEOPLE HAVE COME TO CALL THE "STREET FIGHTER II MOVEMENT"?

AKIMAN: Well, I'd see people playing the game in arcade centers and I was always happy to see that, but I have to say that the first time I personally experienced the reality of the "Street Fighter II Movement" was when I heard a random kid scream "Shoryuken!" on the train. That was a special moment.

“卡普空的街机游戏总是基于‘跟别人一起玩才更有趣’的理念.换句话说,跟别人一起玩街机总归比一个人玩要有意思。”

“春丽会受欢迎不是因为她是女的.我认为她的受欢迎源自于她公开宣称'女人也能成为英雄'这样的社会性议题!”

(laughs) I'm pretty sure that was after "SFII" had been released on the Super NES (1992), and the notion that the game was reaching such a young audience made me think that we may be on to something. Other than that, I didn't really experience anything or feel any different because, regardless of what was going on in the world after the game's release, I was usually locked away inside the studio. Even when the movie deal came around and the big boss went to Australia along with the marketing guy to watch over the filming process, I was left to hold down the fort with my pixels and animation patterns. (laughs) Strangely enough, it seemed like I was the one person who was unaffected by the "Street Fighter II Movement".

ONE OF THE MOST POPULAR CHARACTERS FROM "SFII" WAS CHUN-LI, THE SOLE FEMALE FIGHTER. SHE STILL BOASTS A RESPECTABLE FANBASE TODAY, BUT WERE YOU EXPECTING HER TO BECOME THIS POPULAR?

AKIMAN: I was confident that she would be popular, but I never could have expected this level of intensity. By the time Chun-Li made it out into the world, another female character had gained popularity using Chinese martial arts in another arcade game, so I was certain the design concept would be accepted by the players. However, I believe Chun-Li's popularity was based on more than just her external appearance. One of the major gameplay features of "SFII" was the two-player mode, and players tend to choose characters that they feel some kind of connection to. So it was only natural that female players would consider Chun-Li to be a representation of themselves in the world of fighting games. In other words, Chun-Li's popularity wasn't a result of her being a woman. I believe her popularity stemmed from the fact that she represented social issues and openly declared that "a woman can be a hero too"! It's not like I just put her in there because I'm a perverted old man. (laughs) I wanted women to feel comfortable playing fighting games, and I wanted them to feel like equals when fighting against male players. Chun-Li's moves tended to have simpler input commands because I wanted female players who were just getting into arcade games to be able to pull off some of Chun-Li's most powerful attacks with ease. Later, we created Cammy as a more technical female character to satisfy female players who had come to find Chun-Li to be too easy to use. Chun-Li was the only female character in "SFII", which made her the avatar for every type of female player. This is why Chun-Li seems to represent different traits for different

people. Some describe her as cute, while others see her as more graceful or cool. Current fighting games start out with a full roster of diverse female characters, but back then, Chun-Li had to satisfy a wide range of demands all by herself. I'm sure it was quite a responsibility for her.

《恶魔战士》的赛璐璐动画风格不是安田朗的主意

THE CAPCOM FIGHTING GAMES FOLLOWING "SFII" USED GRAPHICS REMINISCENT OF CEL ART FROM ANIMES. WHAT WAS THE REASONING BEHIND THIS SHIFT?

AKIMAN: At the time, we were using what we called the "shaggy" method to give sprites a sense of depth. This involved adding darker pixels along the edges of a character, and was considered a traditional method. In 1992, our boss started calling the shaggy method "passé" and told us that cel art graphics were the wave of the future, similar to what was seen in "Prince of Persia" (Brederbund/1989). Our boss believed that using this style would increase productivity, but he was mistaken. It was certainly faster, but the graphics themselves were comprised of less data, so the base image had to be much more detailed, with more intricate animation patterns to keep it interesting. At around that time, I too had been experimenting with reducing the use of the shaggy method for "Captain Commando" (1991), and I thought I had managed to reach a fair compromise. But my boss just kept nagging me, "Cel... cel... cel..." What could I do? I had to give in eventually. (laughs) I wasn't technically assigned to any particular team at the time, as I was simply supervising the graphics work for every department. Now that I had decided to bend to my boss's will, though, I figured the new "Darkstalkers" project would be as good a place to start as any. To get things started off right, I gave the team strict instructions to produce solid character designs. We had previously managed with just myself and up to two other designers working on character designs, because all we had needed was a base from which to build the sprites. This time, however, we would need designs of finished quality and a calculated array of animation patterns. Without these sorts of preparations, the game would just be filled with empty characters flitting here and there on the screen. I squeezed every last drop of character design ability out of each team member until they screamed for mercy. By the time I was done with them, they were dying to go back to the days of pixels. Still, due to their selfless efforts, the team produced a good game with a solid example of cel shading in fighting games. "Darkstalkers" was released in 1994, and I think Morrigan's animation patterns in particular were quite impressive.

AND THIS NEW METHOD WAS INHERITED BY "STREET FIGHTER ALPHA" (1994).

AKIMAN: The "Street Fighter Alpha" project got its start from the Street Fighter illustrations drawn by Bengus (currently using the pen name Gouda Cheese). It was sort of a remake of "SFII", using the same world but with the addition of characters like Chun-Li and M. Bison. I was a bit worried about what the players' reactions would be, but "Street Fighter Alpha" proved to be a success.

"VIRTUA FIGHTER" (SEGA/1993) AND "TEKKEN" (NAMCO/1994) WERE RELEASED AT AROUND THE SAME TIME. WHAT WERE YOUR OPINIONS REGARDING THESE 3D FIGHTING GAMES?

AKIMAN: Many games outside of the fighting game genre had already been experimenting with 3D polygons by that time, but Capcom had decided not to get involved. The 3D games of that period were a bit too vague in that sometimes you had no idea why you just took damage. It was very difficult to get projects approved if it seemed like the player would feel ripped off after popping money into the arcade machine. Things are much better with 3D games now, but back then, the quality of CG technology was another concern for potential

《街头霸王II》为一次出乎意料的格斗游戏繁荣拓宽了道路.这个传奇般的名字改写了电子游戏世界的历史.

3D games. When "Virtua Fighter" came out, I have to admit I was amazed. I had a little trouble getting used to the Guard button, but it didn't take me too long to figure it all out. The graphics were also fresh and new. I was quite certain that "Virtua Fighter" would influence 3D games to come in a big way. Now, I can look back and say I was right. (laughs)

ARE THERE ANY MORE GAMES RELEASED BY OTHER COMPANIES THAT HAVE STUCK WITH YOU OVER THE YEARS?

AKIMAN: "Battle Arena Toshinden" (Takara/1994) left quite an impression on me. The fact that pressing a button was enough to send your character into a crazy spinning move was pretty shocking. As for 2D fighting games, "Waku Waku 7" (Sunsoft/1997) was fun. The market was overflowing with 2D fighting games at the time, but the characters of "Waku Waku 7" were unique enough to stick out from the crowd and be memorable in their own right. I played "Samurai Shodown" (SNK/1993) too. I remember that they had an event at Neo Geo Land (*2) one time where Roko Chiba from the Neo Geo TV commercial was going to make an appearance. I felt that it was my duty to go try the game as part of my clever "undercover investigation" of the competition. (laughs) I did play "Tekken" (Namco/1994) a bit when it first came out. The thing I noticed most about it was that "Tekken" seemed to focus more on being a game, while "Virtua Fighter" was focused on being as realistic as possible. This differing approach meant that "Tekken" felt like it was created with a greater sense of freedom. The "Tekken" character designs were certainly unique, to say the least. It's actually kinda funny now to think that the "Tekken" from my old memories is now collaborating with "Street Fighter". (laughs) As 3D fighting games became more popular, Capcom wanted to become the bastion of 2D fighting games. We started developing "SFIII" (1997), but that project was technically started before "Street Fighter Alpha". With mid-development console changes and the release of "Street Fighter Alpha" acting as speed bumps, the release of "SFIII" was delayed a bit. Also, I should probably mention that "SFIII" was actually being developed as something entirely separate from the "Street Fighter" series, but after I joined the team, it was announced as "SFIII". By the time I joined, the team had already done a lot of impressive work. They all wanted to create something that would surpass "SFII". Despite their best efforts, however, the schedule wasn't very forgiving, and we had to figure out a game plan. The solution was to turn the game into another "Street Fighter" title instead of trying to break totally

自春丽初次登场(1991年底)已经有20年了,可她的受欢迎程度看不到任何衰减的迹象.这是她原本设定精彩之处的确实证明。

这是由安田朗所画的一八写生图,他说他认为《铁拳》更看重游戏的乐趣而非贴近现实。

new ground. Once again, Ryu wasn't originally planned to be in this game, but once we changed it into a "Street Fighter" game, it was pretty much a given that he would have to be in it. The compromise was that we wouldn't make him the main character this time.

HOW DID YOU FEEL WHEN YOU FIRST SAW "SFIV" (2007)?

AKIMAN: The "Street Fighter" series did make a quick stop in the world of 3D with "Street Fighter EX", but the CG technology was still evolving at the time, so I imagine they had a pretty tough time of it. "SFIV" offered gorgeous graphics with the nostalgic fun and satisfying controls of the old 2D games, so I was confident that we could bring players back to the fighting game genre with it.

TO FINISH THINGS UP, PLEASE TELL US WHERE YOU THINK THE "STREET FIGHTER" SERIES WILL GO FROM HERE.

AKIMAN: The "Street Fighter" series has become very powerful and broad, for starters. With "Street Fighter", it is not unreasonable to have professional martial artists fighting alongside some of the weirdest characters out there (some of them are even non-human!). This vast and open world we've created will allow the series to establish roots just about anywhere and expand indefinitely, even as it evolves into new forms and absorbs all kinds of content. Whether 2D or 3D, I think the call of "Street Fighter" will continue to attract all kinds of warriors, and the series will live on in new games.

THANK YOU FOR YOUR TIME.

BANDAI NAMCO GAMES 铁拳团队

《铁拳》系列最为独特的一点就在于它一切皆有可能,宛如漫画一般的世界。

ITS IMAGINATIVE WORLD AND HIGHLY ACCESSIBLE GAME SYSTEM MADE "TEKKEN" A TRUE FORCE TO BE RECKONED WITH IN THE GENRE OF 3D FIGHTING GAMES. IN THIS INTERVIEW, WE PUT THE SPOTLIGHT ON THE TEKKEN WORLD'S MEMORABLE CHARACTERS BY TALKING TO A COUPLE OF KEY MEMBERS FROM THE DEVELOPMENT TEAM.

铁拳世界的缘起

SINCE THE RELEASE OF ITS FIRST GAME IN 1994, THE "TEKKEN" SERIES HAS PRODUCED NUMEROUS INTRIGUING CHARACTERS. WHAT IS THE THOUGHT PROCESS BEHIND THE CHARACTER DESIGNS?

MIZUSHIMA: One key point we always consider is the pursuit of theatrical and realistic visuals. As CG technology evolves, it is becoming easier to achieve a greater level of realism. The problem with that is, if you take it too far, you might as well just use real people. The important thing is to keep a healthy amount of theatrical essence and even manga-style symbolism in there, and of course there's plenty of bluffing involved too. When you have just the right mix of all of those things, you get Tekken characters. I joined the Tekken team for "Tekken 2", so I didn't actually have anything to do with the first "Tekken" game. By the time I was introduced to the Tekken world, the characters were already "unique". (laughs) Without losing the qualities that made the original game so great, I wanted future "Tekken" titles to have a modern touch that would ensure they remained relevant as time passed and the genre evolved. That's why I added the "theatrical essence" I mentioned earlier to the basic design process. "Virtua Fighter" (Sega) was another polygon-based 3D fighting game, but it employed a more stoic, realistic approach to its characters and gameplay. To remain distinct from that pure pursuit of realism, we decided to make the Tekken world a more surreal place. Distinctiveness may have been the initial goal of turning the world into something that might usually be expected from a manga setting, but that style eventually took on an identity of its own, and it started spreading from the world into the enjoyment of the gameplay itself. I think it's the characters' sheer force of will that has helped pull the "Tekken" series this far.

THE CHARACTERS ARE CERTAINLY UNIQUE. WHAT ARE THE STEPS LEADING UP TO FINALIZING A NEW PLAYABLE CHARACTER?

MIZUSHIMA: First, the Planning team presents us with key words for a character. These can include gender, age, race, fighting style, and personality traits. At that point, several designers will start drafting up a huge pile of rough ideas, which we will then sift through together to pick out the final design. Some of the more difficult characters require extra time or a lot more trial and error before we find something we like, while others will jump out at us from the first set of drafts. Harada, our Project Director, once pointed out to us that the

characters we put a lot of serious thought into don't receive a lot of positive feedback from the players. On the other hand, characters that we selected as sort of a joke because we thought it'd be funny turn out to be some of the most popular characters. (laughs) Character making is an art in and of itself.

KAZUYA, HEIHACHI, AND JIN (CHARACTERS WITH TIES TO THE MISHIMA HOUSEHOLD) FORM THE CENTRAL CORE OF THE "TEKKEN" SERIES. IS THERE ANYTHING IN PARTICULAR THAT YOU HAVE TO BE AWARE OF WHEN WORKING ON THESE CHARACTERS?

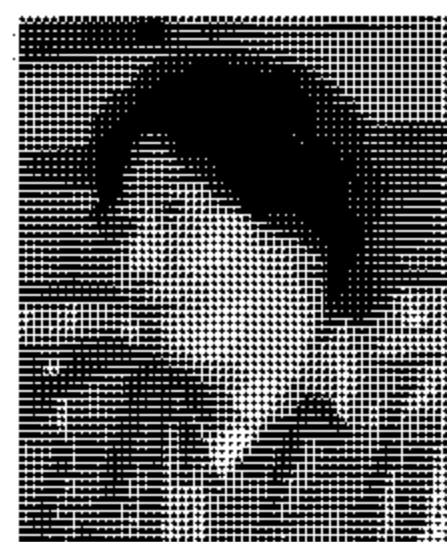

KIMURA: From a design point of view, the Mishima men have some unique, defining features like their pointy hairstyles and energetic eyebrows, so we're definitely careful about how those look every time. We probably start by considering how we will depict those features in whatever game we are working on. I first joined the team for the PS version of "Tekken 3", so Heihachi, Kazuya, and Jin all existed already. Jinpachi and Lars came in after that, and we were certainly aware of how important those features would be where they were concerned. Jin and Lars are what one might consider "archetypical" main characters, and in the Tekken world, archetypical characters are the most difficult to deal with. With Jinpachi, he didn't have any hair to make pointy, so we knew we had no choice but to make up for that with his beard. (laughs)

MIZUSHIMA: When you first see Jinpachi's silhouette, you see two pointy things jutting out on either side of his head, and you first assume you are looking at Heihachi. Upon closer inspection, however, you realize it's his beard and not his hair. It's enough to make you think that he's trying to compensate for something. (laughs) Jinpachi's case was pretty rare in that Kimura's first draft of him made such a strong impact that it was immediately approved. By this time, Heihachi had already taken on the illustrious position of the series' "Tekken King", so I thought that creating an even more intimidating father character would prove to be an impossible challenge.

"TEKKEN" ISN'T JUST POPULATED BY HUMANS. WE'VE ALSO BEEN INTRODUCED TO A BEAR, A PANDA, A KANGAROO, AND EVEN A DINOSAUR. WHAT IS THE STORY BEHIND THESE NON-HUMAN FIGHTERS?

MIZUSHIMA: I can't really comment on Kuma's origins, as he was already present by the time I joined the team. If I had to guess, I'd say he was brought in because taking on a bear is like a rite of passage for martial artists. I also find it pretty awesome that they've simply kept nouns like "Kuma" (the Japanese word for "bear") and "Panda" as their names. (laughs) The most unique thing about Tekken is its manga-ish world where anything is possible. It may seem like we have a very specific worldview, but we're really just making it up as we go along. We can have serious characters like Raven standing next to silly characters like Ganyu. Drama and comedy are just colors in the Tekken palette. In this way, the animal characters are like symbols of Tekken's "anything

PROFILE Yoshinari Mizushima

goes" worldview. The truth is, while players who actually use Kuma and Panda may be in the minority, if we were to remove those characters, "Tekken" simply wouldn't be "Tekken" anymore.

SO THE ANIMALS ARE MANDATORY VARIABLES IN THE TEKKEN FORMULA.

MIZUSHIMA: Exactly. It's the kind of game that would make a female gamer who is not particularly familiar with fighting games say something like, "Oh look, a panda's fighting! That panda's beating up the scary men." It's quite possible that this shocking moment will be enough to get that player interested in the "Tekken" series. So as you can see, the animal characters play a vital role.

DO YOU USE SPECIAL MODELS AND MOTIONS FOR ANIMAL CHARACTERS LIKE KUMA AND ROGER THE KANGAROO?

KIMURA: We don't have any animal-specific skeletal structures, and we just use the same base model that we use for the humans. Kuma and Panda may look reasonably realistic, but if you actually compare them to real animals, you will find that their limbs are not proportioned correctly. This is because real animal proportions would result in arms and legs that are too short for the kind of fighting you do in the game. This level of physical distortion is a necessary evil when creating a character for a fighting game. The hard part is finding the right balance between deforming their limbs, maintaining the general appearance of the animal, and not making the character look too unnatural.

MIZUSHIMA: If we're not careful, the animal character would just look like some guy wearing a costume, and we don't want that.

铁拳系列所遭遇的挑战

THE "TEKKEN" SERIES HAS BEEN A PIONEER IN MANY RESPECTS, ONE OF THE MORE MEMORABLE BEING THE DIFFERING PLAYER 1 AND PLAYER 2 COSTUMES FOR EACH CHARACTER. THIS IDEA WAS QUITE A HOT TOPIC WHEN THE GAME WAS FIRST RELEASED.

MIZUSHIMA: The differing costumes were an attempt at making "Tekken" stand out in the fighting game crowd, but were also our way of doing something

Even among the already unique cast of the "Tekken" series, Kuma definitely stands out. As would be expected, Kuma makes his presence known in "SFxTK" as well.

First generation "Tekken" Kazuya and Heihachi. At this point, Kazuya displayed no outward hints of the Devil Gene, and even Heihachi's face seems somewhat serene.

special for the players. When I joined the team in the middle of development for "Tekken 2", we already had things like mid-bosses, and different looks for Player 1 and Player 2. The trials and tribulations that awaited me were so crazy that I sometimes found myself screaming, "Who the hell came up with this mess of a system!" (laughs) Kazuya's Player 2 costume for the first game was a t-shirt and jeans combo, even though he was mainly conceptualized as a cold-hearted, yet well-bred rich boy. (laughs)

KIMURA: Not to mention his hobby is collecting sneakers! (laughs)

MIZUSHIMA: It'd be funny to put him in another game with that outfit again.

ANOTHER GREAT FEATURE OF THE HOME CONSOLE VERSIONS OF THE "TEKKEN" SERIES IS THAT EACH CHARACTER HAS A CINEMATIC EPILOGUE.

MIZUSHIMA: This was, once again, a reflection of our appreciation for our fans. The opening cinematic was something that was included in the arcade version, but creating all those ending cinematics was quite a task. It would have seemed more feasible if we only had to deal with ten or 12 characters, but the more recent games have well over 40 characters! Seriously crazy! (laughs) I've already begged Harada not to add any more characters, but I'm sure a growing roster will just be a necessary part of continuing the series. Despite my complaints, I have to admit I don't feel a desire to remove any of the existing characters. I know it wouldn't be the right thing to do, considering how many players have stuck with us from the very beginning.

PLEASE TELL US ABOUT THE PROCESS OF CREATING A CINEMATIC.

MIZUSHIMA: Before we can get started, we need a story for the character. The truth is, most of the Tekken stories turn out better if it's something we just throw together rather than meticulously write out as some epic saga. I suppose it's because the Tekken world is such an "anything goes" type of place, but if we try to build a complex story for one character, we're almost guaranteed to run into continuity issues. Del Sato wrote the script for the movie "Tekken: Blood Vengeance", and I think he did a great job of depicting the "anything goes" vibe

“动物角色伊然是《铁拳》世界观'任何事都可能发生'的象征。”

“《铁拳》一直都是形形色色的开发人员在同一个项目中各展长才的成果.这就是新技术的进步方式。”

of the Tekken world. For example, Xiaoyu's the only person who can understand Panda in the movie. Panda will make random panda noises, and Xiaoyu will respond with something like, "I said no. Bamboo is expensive, you know!" Clearly, making sense is not a high priority when it comes to the Tekken world. (laughs) Anyway, once we've come up with some kind of story for a character, we'll apply it to storyboards and move on to the actual cinematic.

DO YOU HAVE ANY STORIES ABOUT HAVING TO GO THAT EXTRA MILE FOR A CINEMATIC?

MIZUSHIMA: In the opening cinematic of "Tekken 5", there's a scene where Asuka leaps off the Tsutenkaku while riding her bike. The cinematic director and I actually went to Osaka and got special permission to go out onto the roof of the Tsutenkaku. There, we took photos and detailed measurements so that we could faithfully recreate the roof for that scene.

THE CHARACTER MODELS USED IN THE "TEKKEN" SERIES SEEM VERY ADVANCED, AND REALLY FEEL LIKE THEY HAVE A SKELETAL STRUCTURE. DO YOU DO ANYTHING SPECIAL TO ACHIEVE THIS EFFECT?

MIZUSHIMA: We do put a lot of thought into things like skeletal structure when creating models. There's even something we refer to as "bone" in the modeling process, which involves moving the bone and muscle as one. The most unique bone that we've had since the first "Tekken" game is the clavicle. If you try moving your joints, you'll notice that the shoulder joint has the widest range of movement in the entire human body. While the knee can only rotate along one plane, the shoulder is capable of three-dimensional rotation. As a result, the shoulder joint is very complex in structure, and simply sticking an arm onto a static shoulder would not produce realistic movement. The clavicle connects to the scapula, which in turn connects to the humerus. If we didn't make it look like the bones and the muscles were all moving together, the character's motions would look very unnatural.

KIMURA: In creating character motion, we use values called "weight" that are applied to muscles. These values determine how a muscle will move in relation to the associated bones. By adjusting these values correctly, the model skin linked to the muscle will automatically react properly when the bone makes a complex

In the new game "Tekken Tag Tournament 2", Heihachi seems remarkably younger. This is the kind of thing the Tekken team must be referring to when they say "anything goes".

movement. Back in the day we had to input these values manually each time, so for every movement, we would punch in a value, test it, then adjust the value accordingly. Modern advancements in this tool have made these steps unnecessary.

MIZUSHIMA: On the other hand, realistic movement of muscles now requires a greater number of supportive bones to be added. Though the advancements in the tool have made some steps easier, each muscle now affects a greater number of bones with each movement, so the actual process is a lot more complex.

KIMURA: The clavicle area is probably the trickiest part when it comes to setting the weight values. That area has such a wide range of movement, and many bones are affected by its movement, so fine tuning the weight values can take a lot of time.

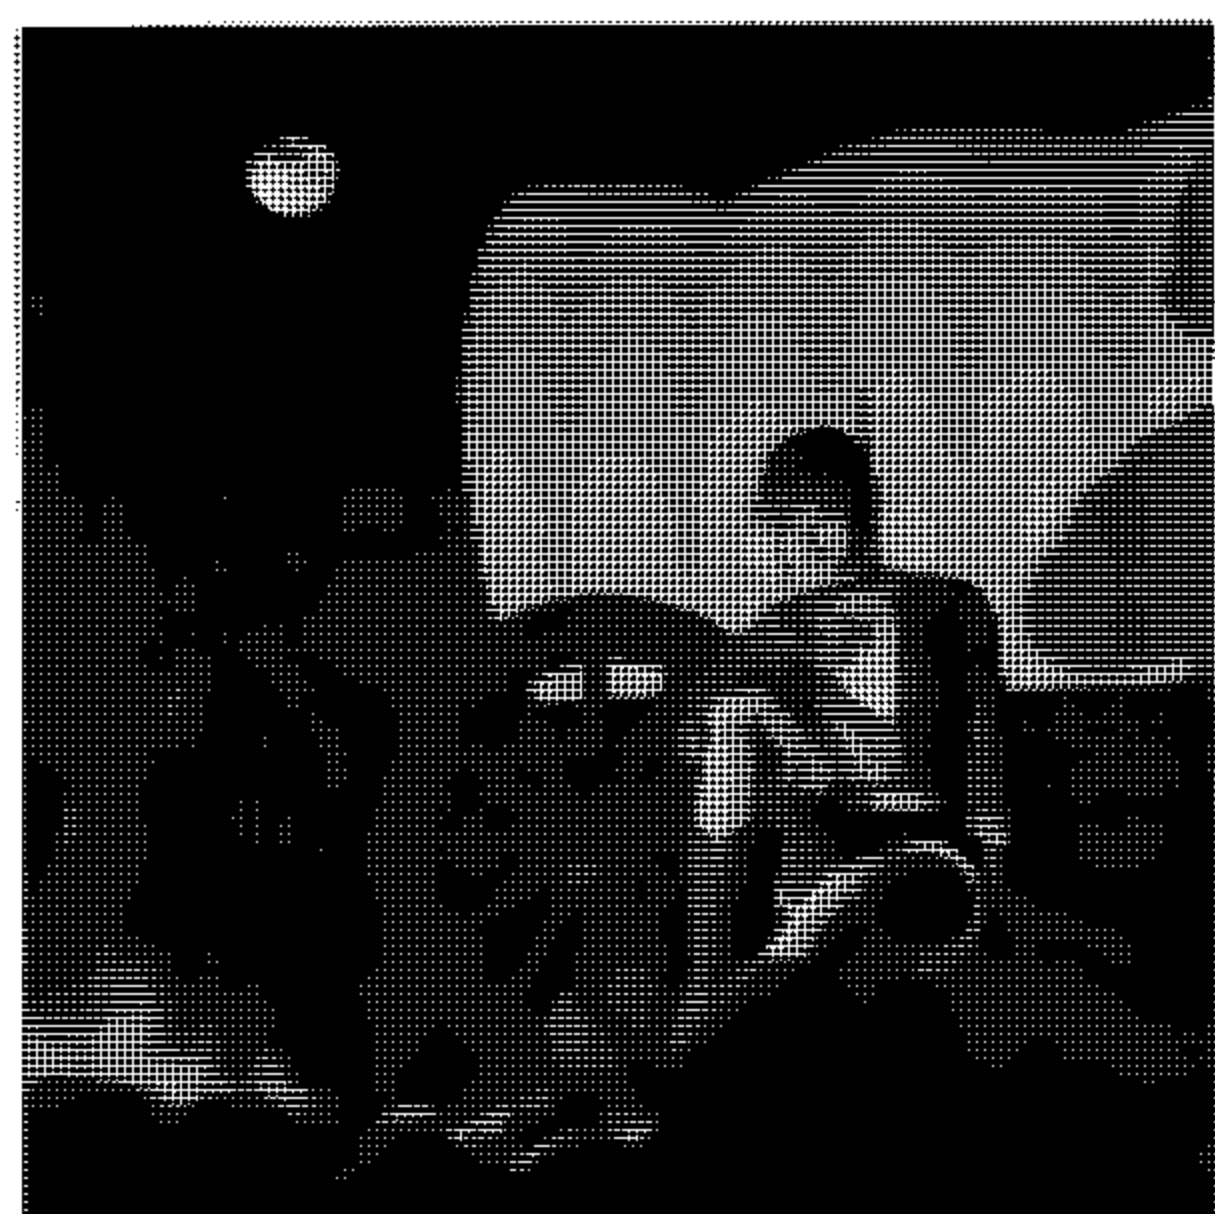

MIZUSHIMA: When creating a sequel to a fighting game, you usually recycle a lot of the motion assets from the previous game. In particular, the bones — once set — are very costly to change. Since the earliest Tekken bones were set so carefully, we've been able to produce increasingly realistic movement in each game without having to make major changes to the bones.

IT'S A GOOD THING, THEN, THAT THE "BONES" WERE TREATED WITH SUCH REVERENCE EARLY ON.

MIZUSHIMA: If you want to talk about reverence, I should tell you about Michelle's thighs. There's a shading method called "Gouraud shading" that produces a smooth, continuous shading of surfaces. At the time, using this method on an entire character was out of the question because it was such a resource hog. But there was one programmer who insisted on applying this method to Michelle's thighs, and wouldn't give up on the idea. Eventually, he was allowed to put together a shading program that would apply Gouraud shading only to Michelle's thighs and nowhere else. Everyone on the team called this ridiculous new technology the "Thigh Gouraud". (laughs) This guy was our Chief Programmer, who had graduated from a pretty prestigious university, and here he was pulling multiple all-nighters just for a set of virtual thighs. I gave him total respect. I thought he was the most awesome Chief Programmer ever. Of course, I was a lowly newbie at the time. (laughs)

KIMURA: His passion inspired a revolution in techniques! (laughs)

MIZUSHIMA: It's not like the Tekken team has been blessed with outrageously advanced technology or abilities. Tekken is always the product of a diverse pool of developers, each bringing their unique touch to one project. This is how new

专门开发的“大腿高洛德描影工具”用在蜜雪儿的大腿上,可在《铁拳2》中细细欣赏。

techniques evolve.

I UNDERSTAND THAT "TEKKEN X STREET FIGHTER (TEMPORARY TITLE)" IS NOW UNDERWAY! CAN YOU GIVE US AN UPDATE ON ITS STATUS?

KIMURA: We've finally gotten it on its feet, and we plan to put the best that Bandai Namco Games has to offer into this one package, instead of being held back by the mold of the project.

MIZUSHIMA: It used to be that we were divided into separate teams. We had a "Tekken team", a "Soulcalibur team", etc. The teams were pretty solid, and the people from the Tekken team didn't touch anything that wasn't related to Tekken. But as the hardware we use has evolved, our expectations and technological capabilities have also evolved. Every so often, I will turn to look at another team working nearby and be genuinely impressed by what they are creating. From a customer's point of view, I imagine it's difficult to understand why we would work this way. To them, we are one company full of people who work side by side, so it would only make sense if we were working together. (laughs) Well, we've decided to heed that customer wisdom. Recently, we shifted gears so that everyone at Bandai Namco Games works together, bridging the distances between the teams. For example, I think anyone who has played the "Soulcalibur" games knows that they are extremely expressive. That team had a lot of refined techniques that the Tekken team didn't have. Now, for "Tekken x Street Fighter (temporary title)", we're going to blend all the teams' technical achievements together. This game will also mark Kimura's debut as an Art Director, so we've got high expectations! (laughs)

KIMURA: I have to admit I feel the pressure. (laughs) This game does represent both Bandai Namco Games and Capcom, after all.

HOW DOES THE TEKKEN TEAM FEEL ABOUT THE STREET FIGHTER CHARACTERS AND OTHER CAPCOM GAMES?

KIMURA: They're the best at creating characters with flavor and individuality. In the early '80s, I was still in high school, and I would go to the local arcade every day to play Capcom games like "Strider" and "Ghouls 'n Ghosts". Of course, I played "SFII" like crazy as well. I honestly think they do an amazing job of creating memorable characters.

MIZUSHIMA: A lot of the character designers on the Tekken team are "SFII" fans. In most cases, they will refer to 2D fighting games over 3D ones with regard to character building methods and ideals. I think this is related to the whole theatrical style I mentioned before. Among all of the 2D fighting game series, however, the "Street Fighter" series has always held a special place of distinction in our hearts. That is probably why we're all feeling the weight of extra pressure mixed in with our excitement over this collaboration.

Kimura designed Jinpachi of the Mishima household for "Tekken 5", and the epic beard immediately won the development team's hearts.

WHY DON'T WE FINISH UP WITH A PERSONAL MESSAGE TO ALL THOSE PLAYERS OUT THERE WHO ARE EAGERLY AWAITING THE RELEASE OF "TEKKEN X STREET FIGHTER (TEMPORARY TITLE)"?

KIMURA: I'd like to deliver this new collaboration with the Tekken world through a visual experience no Street Fighter fan has ever had. We'll do our best to create an impactful game that makes the best use of all the strengths a 3D fighting game has to offer.

MIZUSHIMA: 2D and 3D... our genres may be different, but we've always had a very real respect for the "Street Fighter" series. We want to do right by "Street Fighter", but most of all we want to create something that will please both "Tekken" and "Street Fighter" fans alike. We don't want this to be a simple equation like "1+1=2"... We're going to cause a synergistic effect with phenomenal results!

"TEKKEN X STREET FIGHTER (temporary title)" - now in the works!

These are a couple of image boards for "Tekken x Street Fighter (temporary title)". They were created to help solidify the image of the Street Fighter characters. Bandai Namco Games' flavor is so different from Capcom's that this new collaborative fighting game has already garnered much attention and anticipation.

The above illustration was done by Kimura, who was kind enough to participate in this interview. Now it's time for Ryu, Chun-Li, and the others to storm the Tekken gates!

POLYGON PICTURES

两个系列的体态平衡大不相同,所以最困难的部分就在于达成令人满意的妥协。

POLYGON PICTURES HAS BEEN ENCHANTING PLAYERS WITH THEIR FRESH VISUAL WORK SINCE "STREET FIGHTER IV", WHERE THEY WERE RESPONSIBLE FOR CREATING THE CINEMATIC SEQUENCES AND CHARACTER ART. THIS INTERVIEW EXPLORES THEIR METHODS AND REVEALS SOME BEHIND-THE-SCENES ANECDOTES ABOUT "STREET FIGHTER X TEKKEN".

烟灰墨风格的冲击

PLEASE START US OFF BY TELLING US HOW POLYGON PICTURES CAME TO WORK ON "STREET FIGHTER X TEKKEN" (HEREINAFTER "SFxTK").

OHASHI: We did cinematic and illustration work for "Street Fighter IV" (hereinafter "SFIV") and its sequel "Super Street Fighter IV" (hereinafter "SSFIV"), and it was due to those experiences that we were invited to join the "SFxTK" project.

THE "SFIV" TRAILER'S SUMI INK STYLE LEFT A PRETTY STRONG IMPRESSION ON MOST FOLKS. CAN YOU TELL US HOW YOU CAME UP WITH THIS IDEA?

OHASHI: At first, we weren't actually slated to work on the trailer, but Producer Ono asked us to submit a few image boards for "SFIV", and one of them was of Ryu launching a Hadoken in the sumi ink style. At the time, I wasn't thinking about how it would look in CG or if it would even be possible to recreate that effect; I just thought it would look interesting.

TESHIGAWARA: We also submitted image boards of Dhalsim in psychedelic colors, a t-shirt print-style Ken, and Chun-Li in a traditional Chinese art style. The sumi ink Ryu was apparently exactly the kind of look they were going for.

OHASHI: Producer Ono told us that instead of the realistic textures the "Street Fighter" series had come to be known for, he wanted to try a more artistic approach; one where it looked like illustrations were being brought to life. That's when we realized that we were all on the same page, and the task was officially handed to us.

THE FINISHED "SFIV" TRAILER MADE BEAUTIFUL USE OF THE SUMI INK STYLE, WITH STREAKS OF INK TRACING THE CHARACTERS' MOVEMENTS AND SPLATTERS OF INK REPRESENTING THE IMPACT OF ATTACKS. HOW DID YOU ACTUALLY CREATE THIS EFFECT?

OHASHI: I'd love to say that we had a sophisticated method of pre-calculating the sumi ink's behavior, but the truth is that we didn't have that kind of technology at the time. Instead, we had to rely on good, old-fashioned hand drawing.

WATANABE: In addition to CG and hand-drawn elements, we also incorporated some live-action footage to help form the sumi ink style.

OHASHI: The first trailer we pushed out into the world was the Ryu vs. Ken trailer. The version we originally created received less-than-stellar reviews from our staff members, so we decided to trim all of the excess and try putting in only what we absolutely wanted. During the subsequent attempt, I decided to experiment by pasting in one of the ink splatters Watanabe had been working on. The splatter actually looked like the forest in the background, and that's when

I knew we had struck gold. A lot of Japanese visual culture is about subtle suggestion, so we figured we couldn't go wrong as long as it "looked like" a forest. We then proceeded to use the ink to represent other things, and that's how the world in the trailer came together.

WATANABE: The whole experience was so live and raw. We all had a blast pasting splatters of ink onto the background. (laughs)

OHASHI: Whenever one of our staff members asked, "Is this right?" I'd just reply, "Who's to say?" (laughs) There was no precedent for a CG trailer centered around sumi ink, so there was no real way to judge whether or not we were doing things the right way. I suppose the proof was in the pudding, as we got a massive flood of positive feedback after the trailer was released at a North American convention and on YouTube.

TESHIGAWARA: We were very pleased with the positive feedback. Every time we checked the YouTube video, the number of views had shot up considerably.

OHASHI: Of course, we can't give all the credit for that widespread attention to the sumi ink style. The biggest factor was the very fact that this was "SFIV", an unexpected resurrection of a series that had been silent for a decade. The whole world was buzzing with talk and speculation about the new "Street Fighter" game.

THE SUMI INK STYLE CAN ALSO BE SEEN IN VARIOUS PARTS OF THE ACTUAL "SFIV" GAME. WAS THIS INFLUENCED BY THE TRAILER?

OHASHI: When we were invited to view a mid-development "SFIV", we were told that they wanted to incorporate the sumi ink style into the actual game. Examples of ideas were having splatters of ink behind the "K.O." text or accompanying a Shoryuken. As a company, we are usually called in to create graphics for a project according to the specifications we are given, so it was an exciting and entirely new experience finding out that our own original idea was going to have such an impact on the game itself. I'm very happy that the development team saw that much potential in our idea.

THE "SFIV" TRAILER ALSO MADE USE OF OTHER VISUAL STYLES, LIKE WATERCOLOR AND SAND PAINTING. WHAT WAS THE INSPIRATION FOR ADDING THESE OTHER STYLES?

OHASHI: I suppose we could have just made all of the trailers in the same sumi ink style, but the second one we put out was of a watercolor Chun-Li. That set a dangerous precedent for us, and we had to come up with even more ideas. We did a sand painting-styled Guile, a tie-dye Seth, an Akuma in gold folding screen format, etc.

TESHIGAWARA: It was also a way for us to explore the idea of "moving illustrations" that Producer Ono presented. We used that phase to experiment with various art styles and methods of expression.

PROFILE Toshio Ohashi

Polygon Pictures.
Art Director for "Street Fighter IV" and "Super Street Fighter IV". Flexed his artistic muscles for "Street Fighter x Tekken" as well.

PROFILE Kazuma Teshigawara

Polygon Pictures.
Handled the character illustrations as the games' Chief Designer, starting with "Street Fighter IV". Also did the package art for "Street Fighter x Tekken".

PROFILE Jun Watanabe

Polygon Pictures.
Best known for his work in "Street Fighter IV" and "Super Street Fighter IV". Took on the responsibilities of composer and editor for "Street Fighter x Tekken".

从墨线到水花

THE HATCHING USED IN THE "SSFIV" CINEMATICS AND CHARACTER ILLUSTRATIONS WAS VERY EFFECTIVE.

OHASHI: We wanted to add a little extra something for the sequel, so we headed to a bookstore to look for ideas. There, we discovered an art book of Hikoze Ito's (*) work. He draws illustrations using only a pen and hatching. I had never seen hatching used in a CG environment, so I was very excited by the notion. I presented the idea to Ono, who agreed that it could be worth pursuing. At first, I wasn't familiar with the term "hatching", so I just told everyone we'd use "that dashy-line method". (laughs)

TESHIGAWARA: The hatching on the character illustrations was done with CG, but the background hatching was done entirely by hand. We went to the local office supply store and bought a ton of ballpoint pens, then spent quite a few days doing nothing but "dashy-lining" the backgrounds. I can't even begin to guess how many pens we went through.

YOU DECIDED TO FOLLOW THESE STYLES UP WITH THE USE OF WATER IN "SFxTK". WHAT WAS THE REASONING BEHIND THIS CHOICE?

OHASHI: I went to visit my in-laws, and my father-in-law showed me a book containing photographs of Koun Takamura's (**) work. One of the sculptures was titled "Old Monkey", and depicted an elderly monkey with his hand on a leaf. The "less pertinent" areas of the sculpture were carved away in a bold and generalized fashion, while the area that was the main focus of the piece was carved with delicate attention to detail. This balance struck a chord in me, and I knew that was what I wanted for our next CG style. My plan was to use a texture that looked like some hard material had been carved into shape, then make it transform into liquid. I explained it to Teshigawara by telling him that the character would look solid, but would start melting away with an effect similar to motion blurring when they got hit.

TESHIGAWARA: Did you understand what he just said? Because I sure didn't at the time. (laughs) Still, we prepared some concept art, which showed Ryu in what looked like a spray of water.

OHASHI: We took that to Capcom, and Ono instantly said, "The water's nice!" After that, we began adding more and more of the water effect to our subsequent pieces of concept art, and before I knew it, water was our theme. (laughs)

IN ADDITION TO WATER, YOU ALSO MADE CAREFUL USE OF THINGS LIKE FOG AND OTHER GASEOUS BODIES.

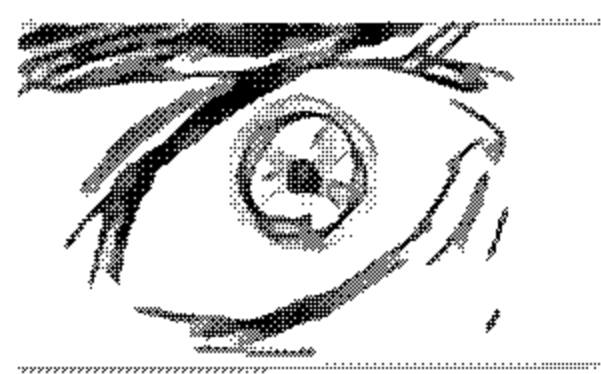

OHASHI: "Gaseous bodies" was one of our minor themes. We employed plenty of fog in the trailer, using it to hide parts of the character or background. The fog sort of served as a dynamic "margin" in the illustrations. By obscuring the less important parts, we were able to draw attention to specific areas. This idea is something that I adapted from the monkey sculpture I mentioned earlier.

I HEARD THE TRAILERS WERE CREATED UNDER THE GUIDANCE OF DIMPS. WHAT WAS THAT PROCESS LIKE?

OHASHI: Dimps provided us with the team match-up and general plot for each trailer. We put the storyboards together based on this information. Initially, the plan was to go with silent trailers like we did with "SFIV" and "SSFIV", but we put in a request to have dialogue added to the trailers, which in turn changed the trailers' plots in a big way. Episode 3 was particularly affected by this change, aside from the character lineup. The backstory about Jin trying to get in touch with Ryu that was hinted at in Episode 5 is another detail that we asked to have

第1集以一八踩在隆的头上这惊人的场面起头.这足以令观看者期待之后的精彩格斗了.

Episode 01 Storyboard

RYU'S EYE SNAPS OPEN. WE SEE A TOUCH OF RED IN HIS PUPIL, SUGGESTIVE OF THE SATSUI NO HADO.

RYU GRITS HIS TEETH AND EMITS A GRUNTING ROAR.

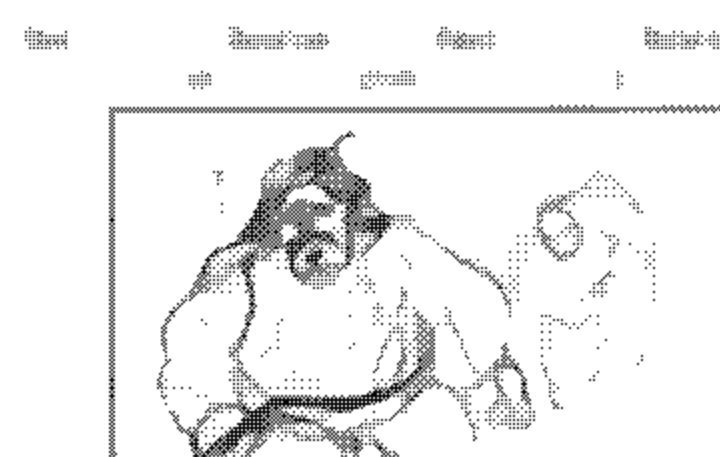

RYU GRABS KAZUYA'S FOOT, TWISTS IT, AND KICKS UP WITH HIS OWN FOOT.

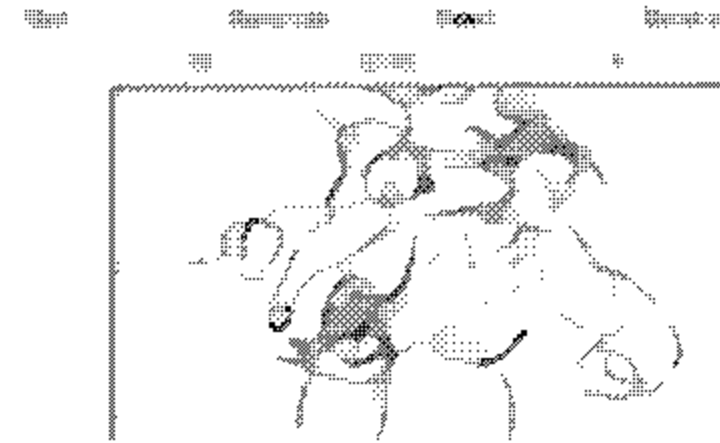

RYU MANAGES TO KNOCK KAZUYA OFF BALANCE, THEN ROLLS UPRIGHT.

我们在真正的职业摔角手身上应用了动作捕捉技术,来呈现雨果,金和马杜克之间的格斗.

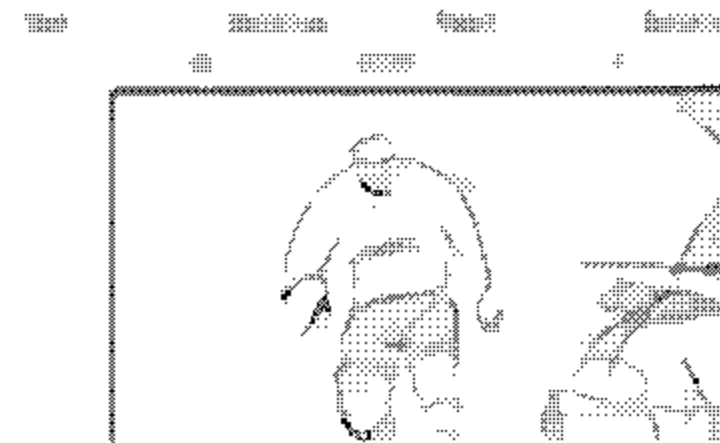

Episode 02 Storyboard

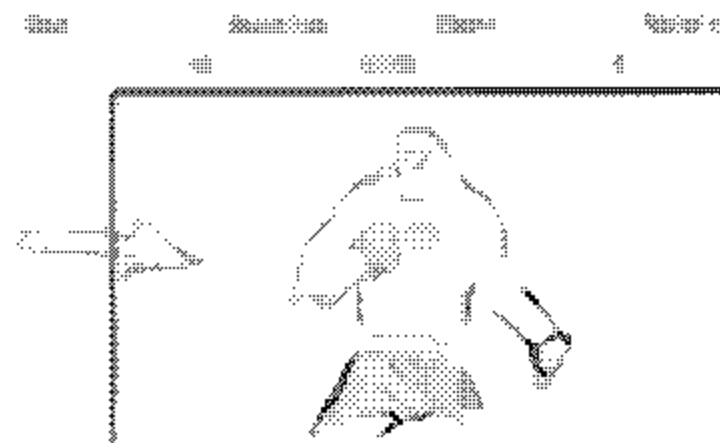

HUGO BOUNDS UPRIGHT.

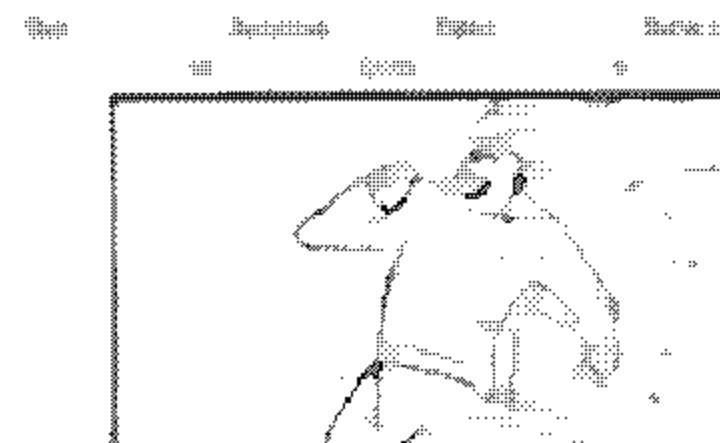

KING, SHINING WIZARD.

MARDUK TURNS SUDDENLY.

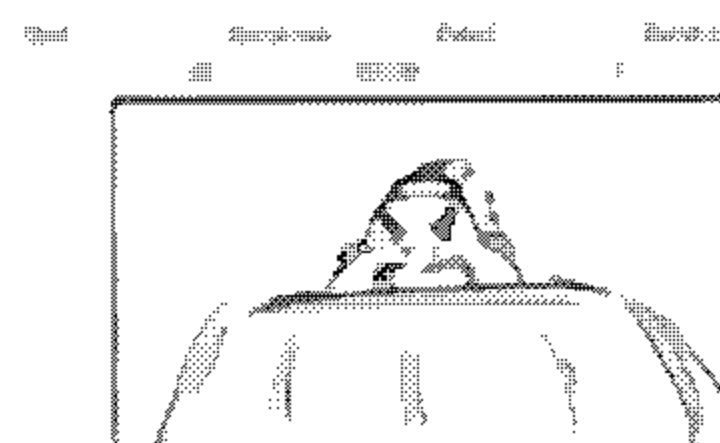

POISON'S AEOLUS EDGE HITS MARDUK. WE SEE SWEAT SCATTER FROM HIS ENTIRE BODY.

最初是想让一把刀插向鲁夫斯所在的木桶,但最终版使用的是叉子和其他餐具.

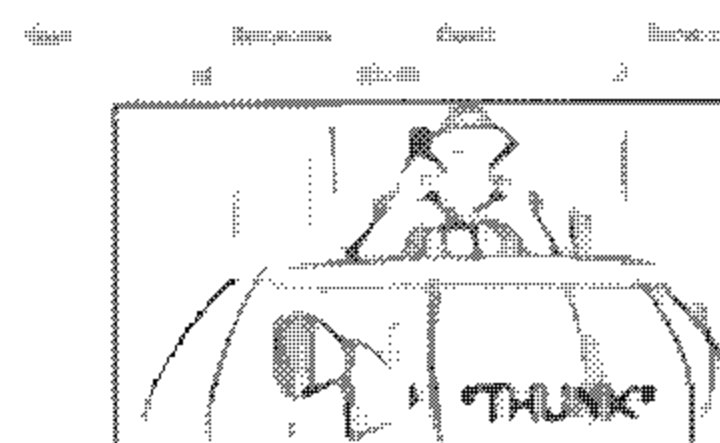

Episode 03 Storyboard

RUFUS MEANT TO LAND IN A COOL POSE, BUT ENDS UP FALLING STRAIGHT INTO AN OPEN BARREL INSTEAD. THE BARREL IS A BIT SMALLER THAN RUFUS, SO IT'S A SNUG FIT.

CONFUSED PAUSE.

A KNIFE OR CLEAVER STABS A LITTLE WAYS INTO THE BARREL. REMINISCENT OF "POP-UP PIRATE".

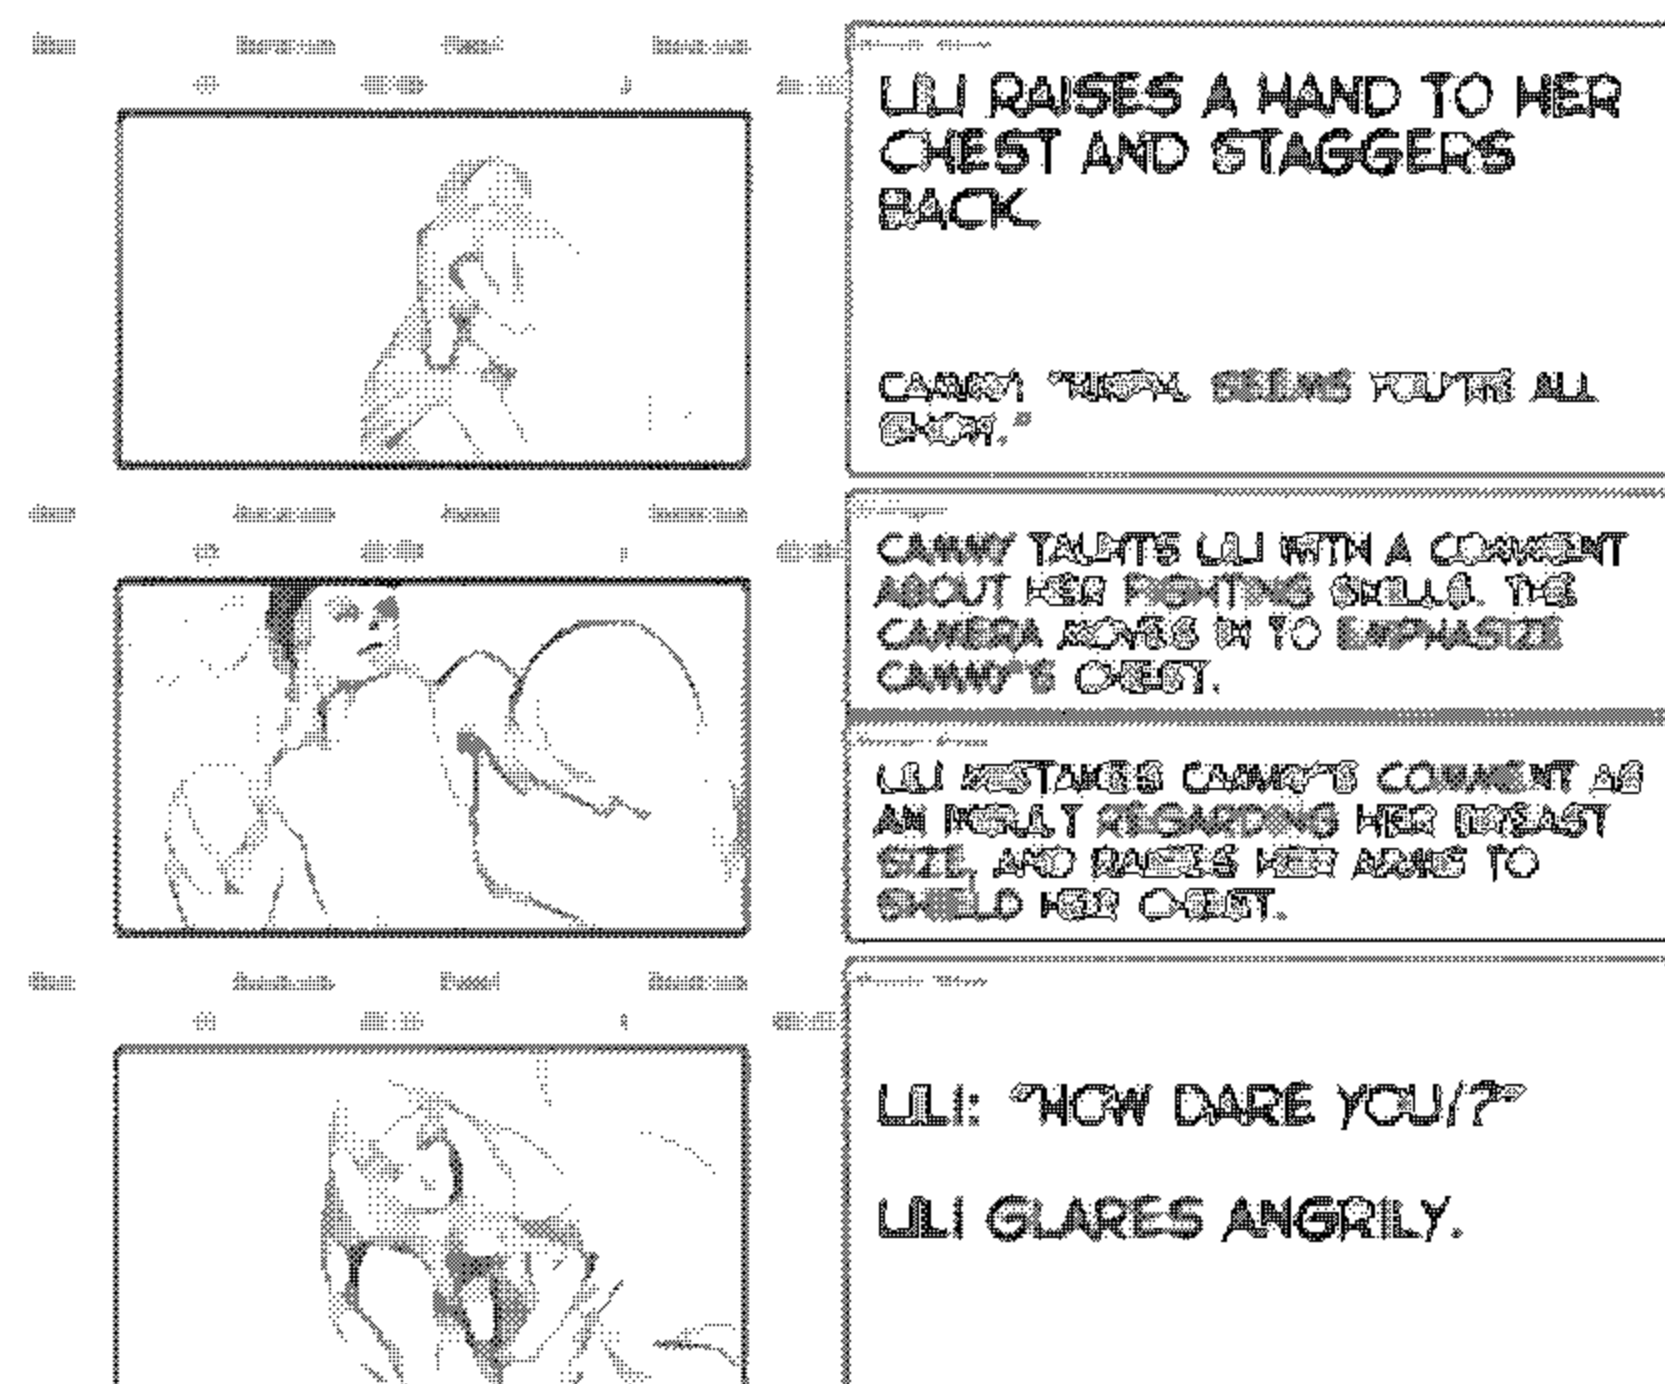

Ryu is surrounded by a spray of water as he lunges forward. In order to outdo the beautiful spectacle of sumi ink that was used for "SFIV", water was chosen as the main visual theme for "SFxTK".

"我们通过模糊化不那么重要的部分,来把视线引向特定的区域."

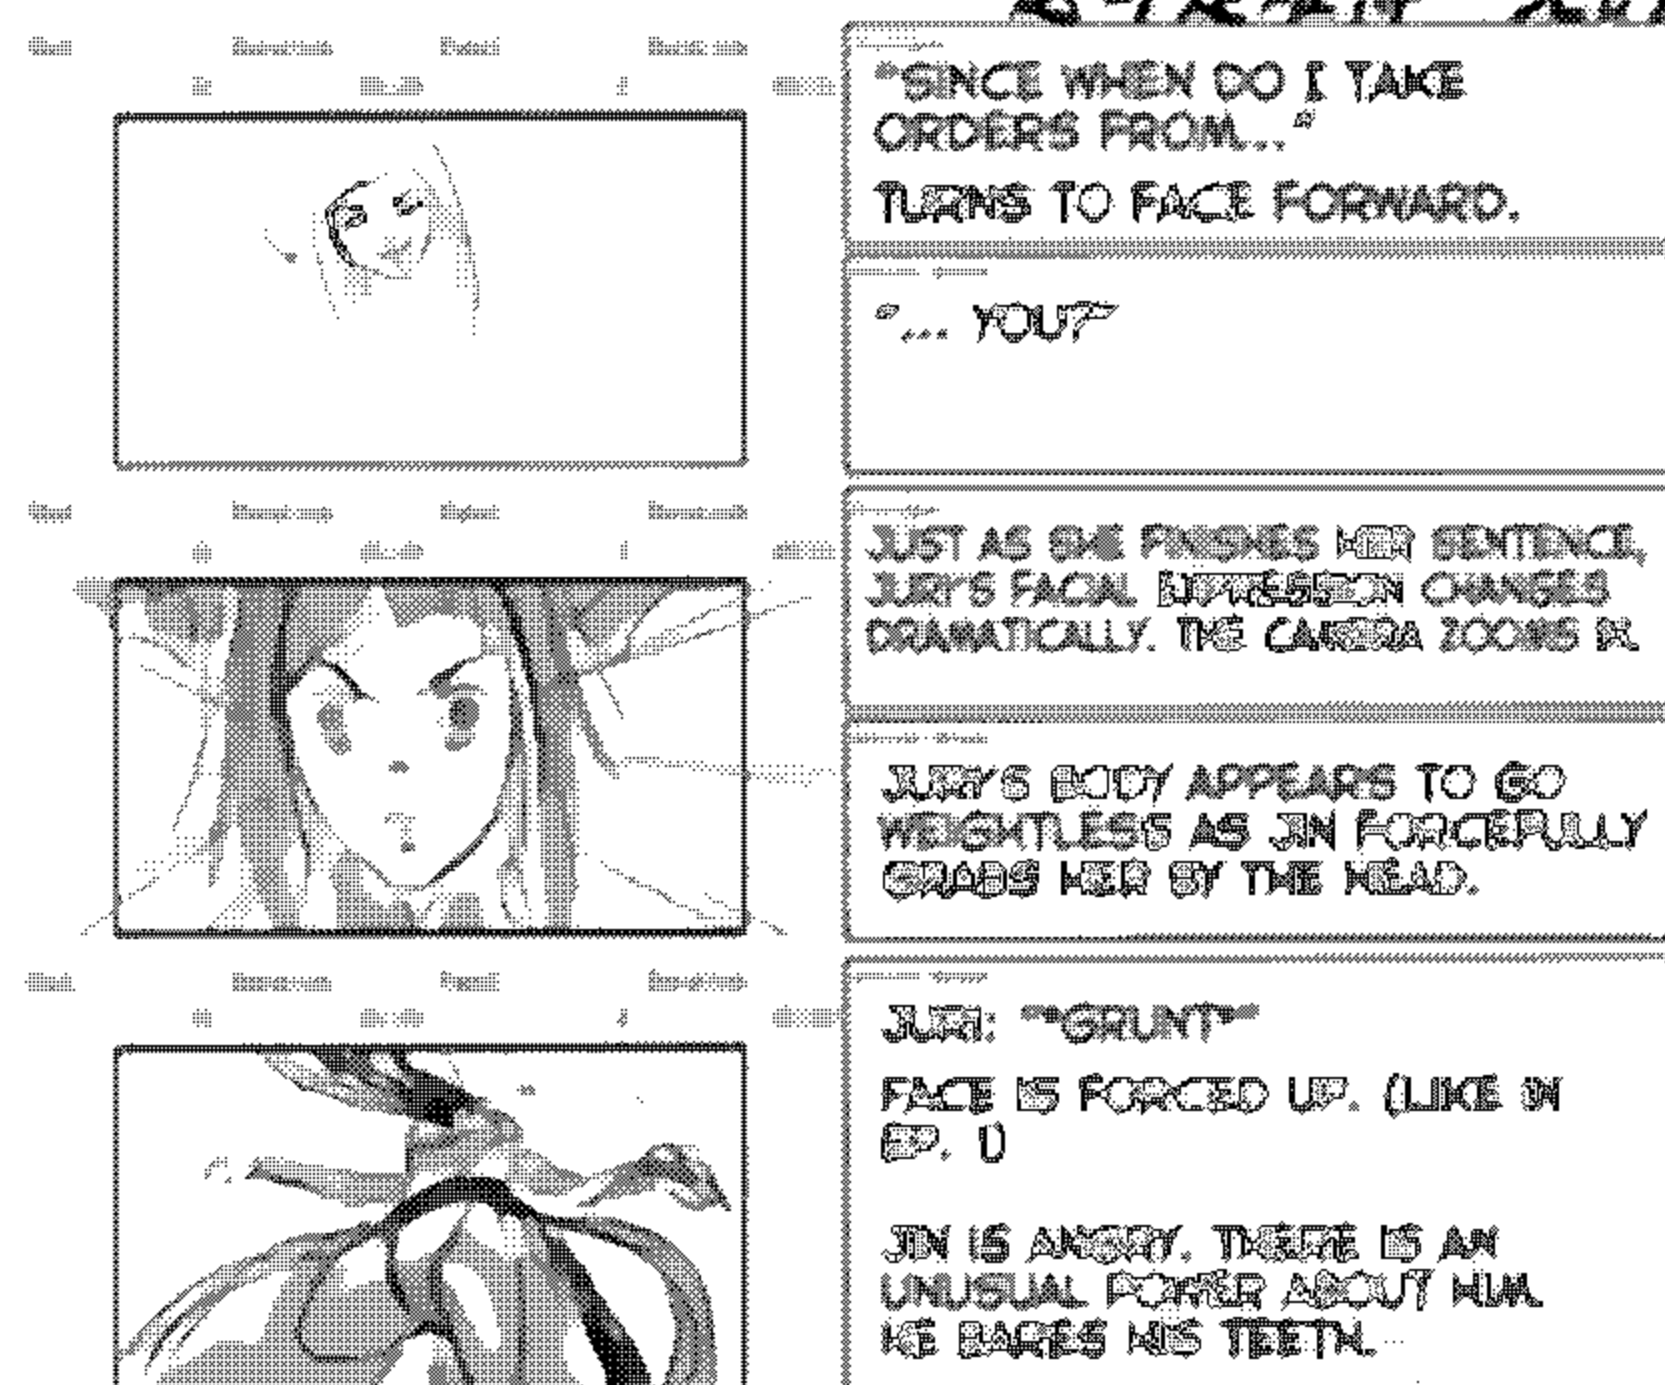

Episode 04 Storyboard

莉莉将嘉米的话误解为说她胸小,第4集真是一段尤为华丽的预告。

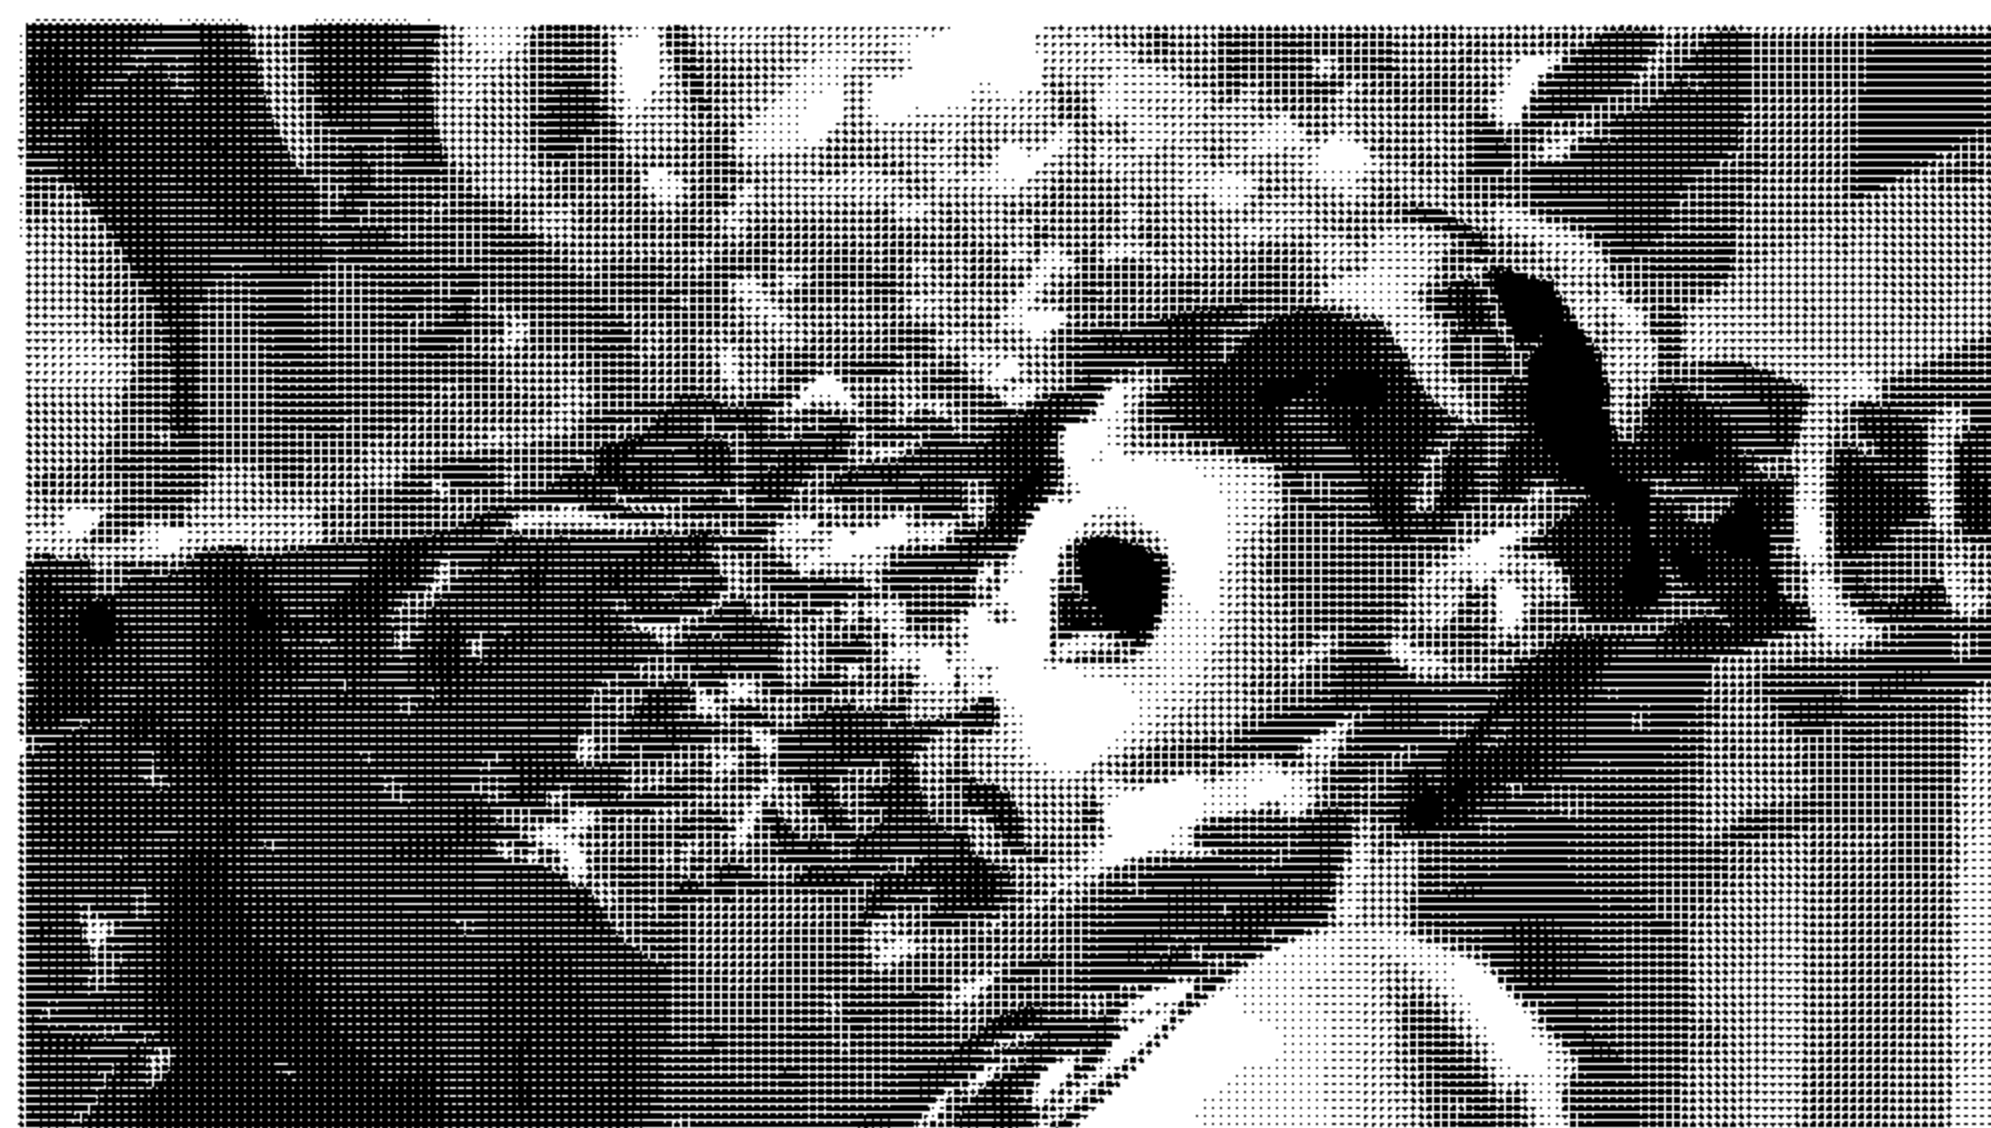

Episode 05 Storyboard

蛛俐通常的表情都是傲慢自大的,但在风间仁抓住她的头时,她表现出近乎纯粹的惊恐。这可是难得一见的景象。

Episode 06 Storyboard

第6集是激动人心的一段预告,充分展现了最鬼和斗神在潘多拉盒前剑拔弩张的对峙。

The main concept of "SFxTK" is the merciless conflict between the "Street Fighter" and "Tekken" teams. The numerous fights shown in the trailers depict raw encounters between the hardened fighters.

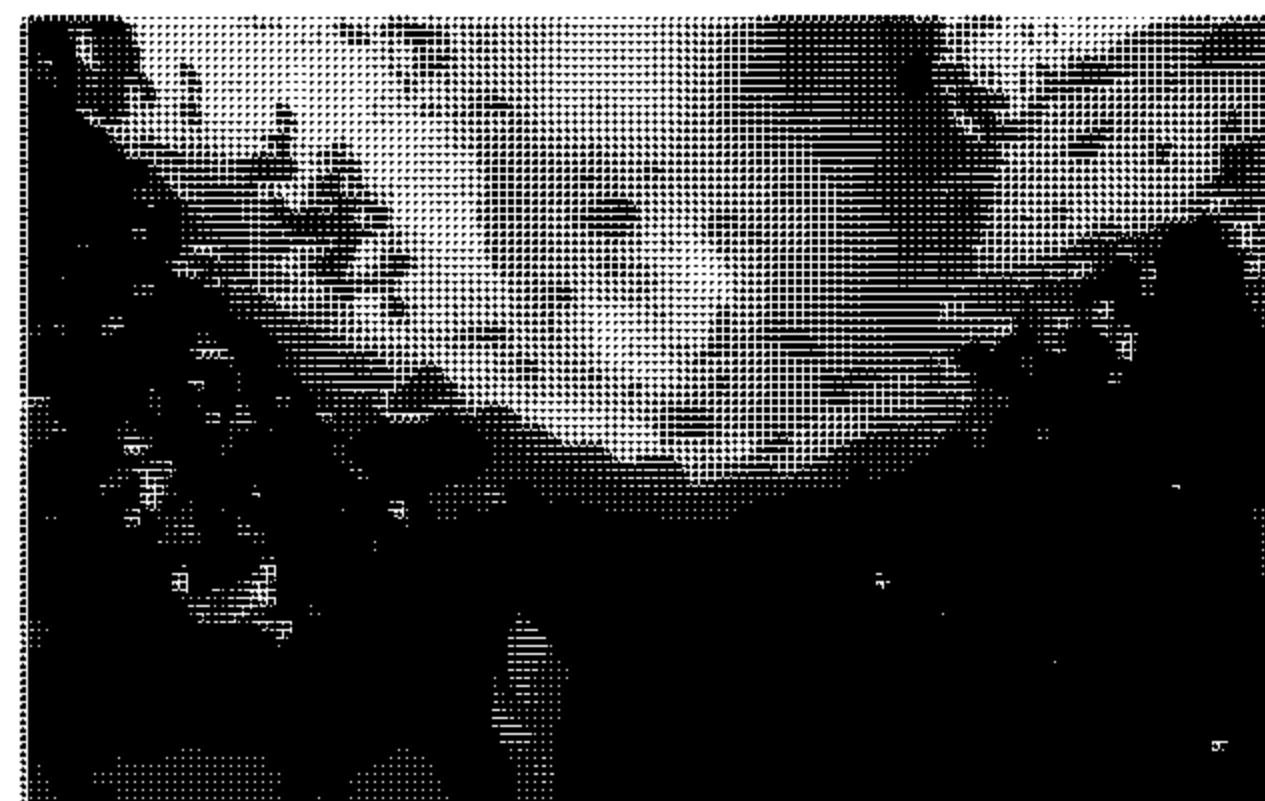

added. All of the dialogue was approved by Dimp.

NOW LET'S DISCUSS EACH TRAILER, IN ORDER OF RELEASE. IN YOUR OPINION, WHAT WAS THE BEST PART OF EPISODE 1?

OHASHI: I'd have to say that a really cool part was when Kazuya dodges Ken's Hadoken, and the blur he leaves behind is split into two wing-like images. This was supposed to hint at Devil Kazuya, but I doubt many people noticed it. (laughs) Another cool scene was toward the end, when Ryu and Kazuya simultaneously land a blow on each other, and their faces crack apart to reveal new faces underneath. The only thing about that scene is that I don't think we got the distancing quite right, and we probably could have done a better job with the tempo.

EPISODE 2 TAKES PLACE IN A WRESTLING RING AND, APPROPRIATELY ENOUGH, THE TRAILER PUTS ON QUITE A SHOW.

TESHIGAWARA: The stars of the show are Poison, Hugo, King, and Marduk. OHASHI: There's a scene in that trailer where King lands a Shining Wizard on Hugo, and all such moves were performed by real, professional wrestlers with our motion capture system. Unfortunately, we had a bit of an accident, and one wrestler's knee actually made contact with his opponent. (laughs) When we checked the instant replay, we realized that the accident had given us the ideal shot, so I guess you could say that he literally took one for the team.

EPISODE 3 WAS DISTINCT FROM THE OTHER TRAILERS DUE TO ITS COMICAL NATURE.

OHASHI: A dance battle and motorcycle race were a couple of the other ideas we had considered for Episode 3.

TESHIGAWARA: We were even planning to show Zangief's limbs sticking awkwardly out of the motorcycle's sidecar, and possibly have the sidecar being twisted out of shape under the sheer pressure.

OHASHI: We had used motion capture to create the basis for all of the animations, but Episode 3 was an exception in that we didn't use any motion capture at all. As a result, there are some qualities about Episode 3 that you can only get from animation done purely by hand. For instance, if you look closely at Rufus while he's being blasted through the air, you'll see that his belly is actually rippling slightly.

WATANABE: An animator's TLC. (laughs)

OHASHI: The reddish-brown tinge to the screen was inspired by the effect of old-school film.

WHAT CAN YOU TELL US ABOUT EPISODE 4?

OHASHI: When explaining the trailer to the team, I described it as "an underwater tropical fish battle". (laughs) I wanted it to look like the characters were glowing fish moving through an illuminated aquarium. Even the lights in the background move slowly, like marine snow.

WATANABE: We thought we had created an awesome trailer, until we went to show it to Ono. He seemed to like it enough, but after the presentation, he asked, "You guys just haven't gotten around to adding all of the water effects yet, right?" Needless to say, we held an emergency staff meeting as soon as we got back. (laughs)

EPISODE 5 SEEMS TO HAVE A MORE SERIOUS AND DRAMATIC BENT THAN ANY OF THE OTHER TRAILERS.

OHASHI: The coolest part of Episode 5 is probably the instant when Jin uses the shattered window to form wings. Our initial plan was to have Devil Jin rise from the debris of the fallen building, but we thought that would be a bit too cliché. We made sure that the mass of glass shards looked like swirling water as it formed the wings.

TESHIGAWARA: Jin's grin at the end of this episode was the only scene in all the trailers that we retouched by hand.

LAST BUT NOT LEAST, EPISODE 6.

OHASHI: The truth is, we only had enough budget left to make a 15-second trailer by the time we got to Episode 6. We panicked at first, but managed to stretch it out to one minute by adding lots of shots of the Antarctic environment and Pandora. Akuma and Ogre don't get a whole lot of screen time, so we had to make sure every second counted.

在《街霸X铁拳》震撼的视觉效果幕后

WHAT WAS THE PROCESS FOR DRAWING THE CHARACTER ILLUSTRATIONS FOR "SFxTK"?

TESHIGAWARA: We basically work on them as a team. Each character illustration for "SFxTK" took approximately 15 days. With the "SFIV" character illustrations, we started with the 3D models that were used for the trailer. We put them in the desired poses, used CG to make them look like illustrations, then retouched them one by one. On the other hand, we made very few CG alterations to the models when doing the "SFxTK" illustrations. We used each model as a base and did the retouching by hand. The backgrounds were done entirely by hand. The backgrounds for "SSFIV" were also all done by hand.

DO YOU HAVE FAVORITES OUT OF ALL THE ILLUSTRATIONS YOU'VE DONE SO FAR?

TESHIGAWARA: Personally, I think the illustrations of Ryu are always in their own category. The first Ryu piece usually sets the tone for the entire project, and he also happens to be one of my favorite characters. I also really liked the illustrations for Sakura and Dhalsim from "SFIV", as I thought those made particularly good use of the sumi ink effect. The "SSFIV" limited edition package art of Ryu and Ken was also one of my favorites. As for "SFxTK", I think Ryu and Yoshimitsu made for the best combinations of character and concept. Also, on a more personal note, I'm just really happy that I got the opportunity to draw Poison. (laughs)

DID YOU EXPERIENCE ANY DIFFICULTIES WHEN TRYING TO ADAPT THE "TEKKEN" CHARACTERS TO THE "STREET FIGHTER" WORLD?

OHASHI: The body balance between the two series is very different, so the hardest part was reaching a happy medium. "Street Fighter" characters tend to have large hands, feet, and heads. I guess you could describe them as being stocky. So we started the process by trying to bring the "Tekken" characters visually close to that "Street Fighter" style.

WATANABE: This also might be a good time to note that we didn't simply recycle the characters from "SFIV" into "SSFIV" and "SFxTK". We modify each character for every title, so Ryu has a different model for each game.

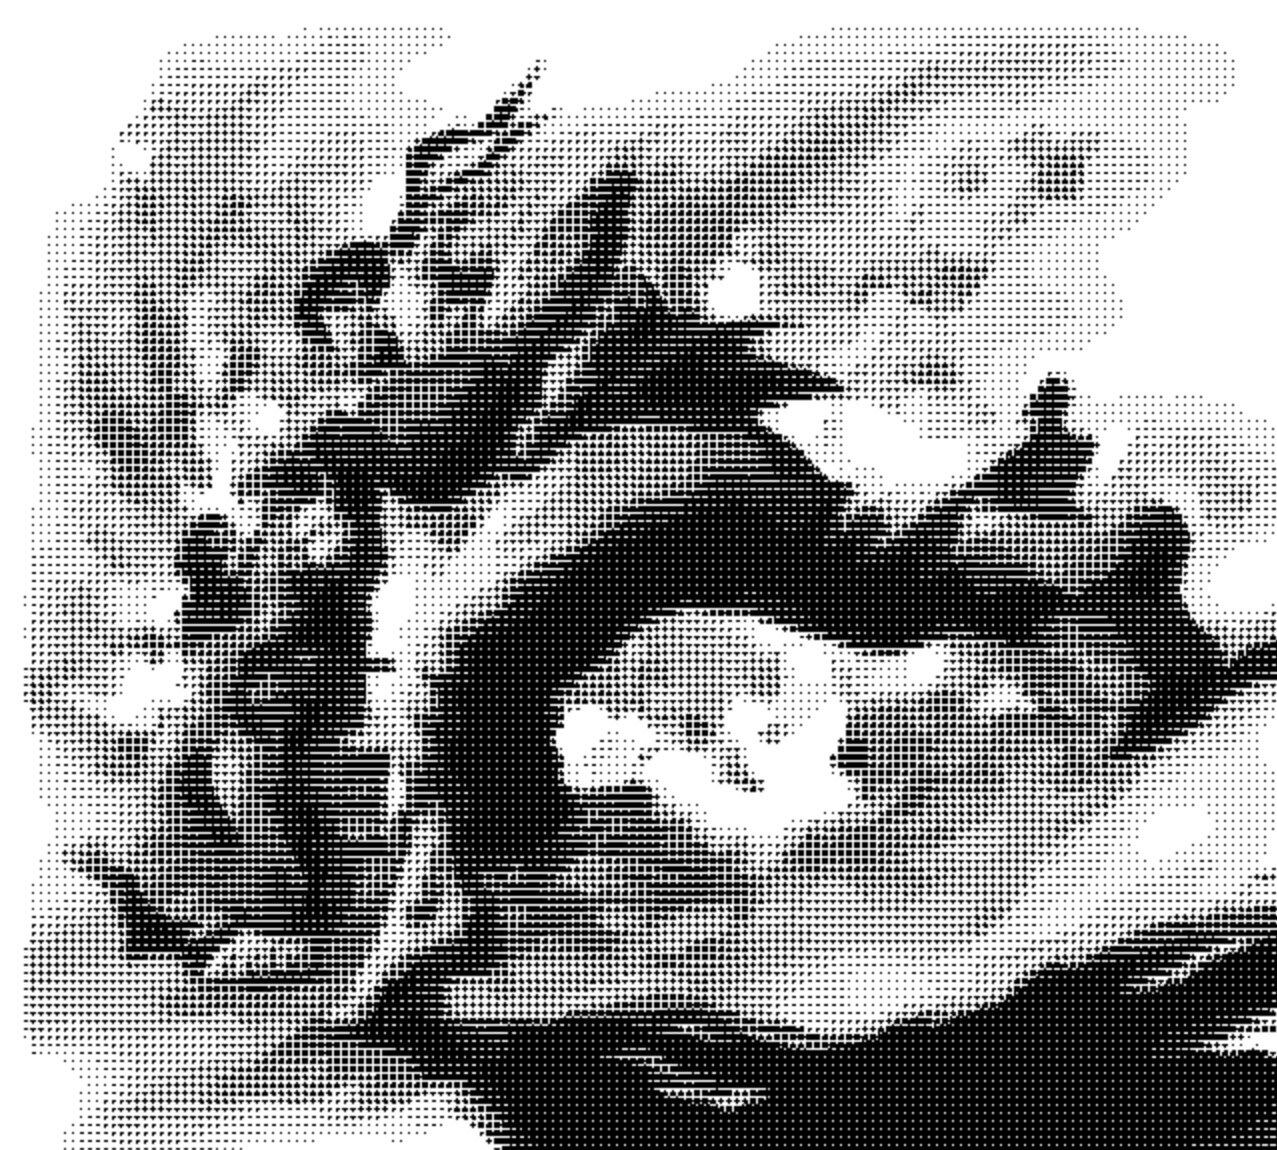

IT WAS OBVIOUS THAT YOU PUT A LOT OF TIME AND EFFORT INTO THE ENDING CINEMATICS AS WELL.

OHASHI: Since each character was guaranteed a starring role in an ending, we had to read tons of source material to study up on their personalities. They are all put in the same situation, that being the discovery of Pandora in the Antarctic, so the most difficult part was making each ending unique.

WATANABE: I hope the players will take the time to watch every official tag team's prologue and ending.

TESHIGAWARA: They'll have to play the game a lot to get the full "SFxTK" experience.

THANK YOU VERY MUCH FOR YOUR TIME.

Teshigawara's favorite illustrations from "SFIV" and "SSFIV". Both are included in "Street Fighter IV / Super Street Fighter IV Official Complete Works" (available from UDON).

*1 - Hikozo Ito: An illustrator famous for his period piece illustrations of beautiful young men. Ito used his amazing hatching skills to become professionally successful during the Taisho and Showa eras.

*2 - Koun Takemura: A pioneer of modern Japanese sculpting. One of his most famous sculptures, the "Old Monkey", is considered to be a national treasure in Japan.

“得知我们最初的概念对游戏本身会有如此大的影响，就是一种令人兴奋的全新体验。”

DIMPS

《街霸X铁拳》整体的氛围如此生动,简直仿佛节日一般。

DIMPS WAS RESPONSIBLE FOR THE GRAPHICS, CHARACTER MODELING, AND THE BALANCING ACT INVOLVED THEREIN. WE ASKED THEM TO TELL US ABOUT THE STRUGGLES ASSOCIATED WITH "SFxTK".

开发《街霸IV》所带来的有利条件

WHAT WAS THE REACTION WHEN YOU WERE FIRST APPROACHED ABOUT "STREET FIGHTER X TEKKEN (HEREINAFTER SFxTK)"?

DIMPS: It was going to be a collaboration between two major fighting game series that everyone knew, so the reaction was pretty intense and quite vocal. We had confused staff members asking, "Why collaborate with a 3D fighting game?" While others simply exclaimed, "Yes! We've been waiting for this day!" Still others took a more practical stance and began considering jump attacks for the Tekken characters. We have many serious Tekken fans within our team, and we all know the "Tekken" series has its fair share of hardcore fans, so we did feel the pressure knowing that we'd have to do better than our best.

WHAT SORT OF OPINIONS DID DIMPS HAVE ABOUT THE "TEKKEN" SERIES BEFORE THIS POINT?

DIMPS: We all pretty much agreed that it was one of the longest running and most

loved fighting game series out there. It was a pioneer in the genre of 3D fighting games, and as fellow game creators, it is a series we will continue to watch very closely. The "Tekken" series' unique approach, with comical characters that seem to have jumped right out of a manga, is a trait that we feel it shares with the "Street Fighter" series.

PLEASE TELL US ABOUT SOME OF THE UNDERLYING CONCEPTS BEHIND "SFxTK".

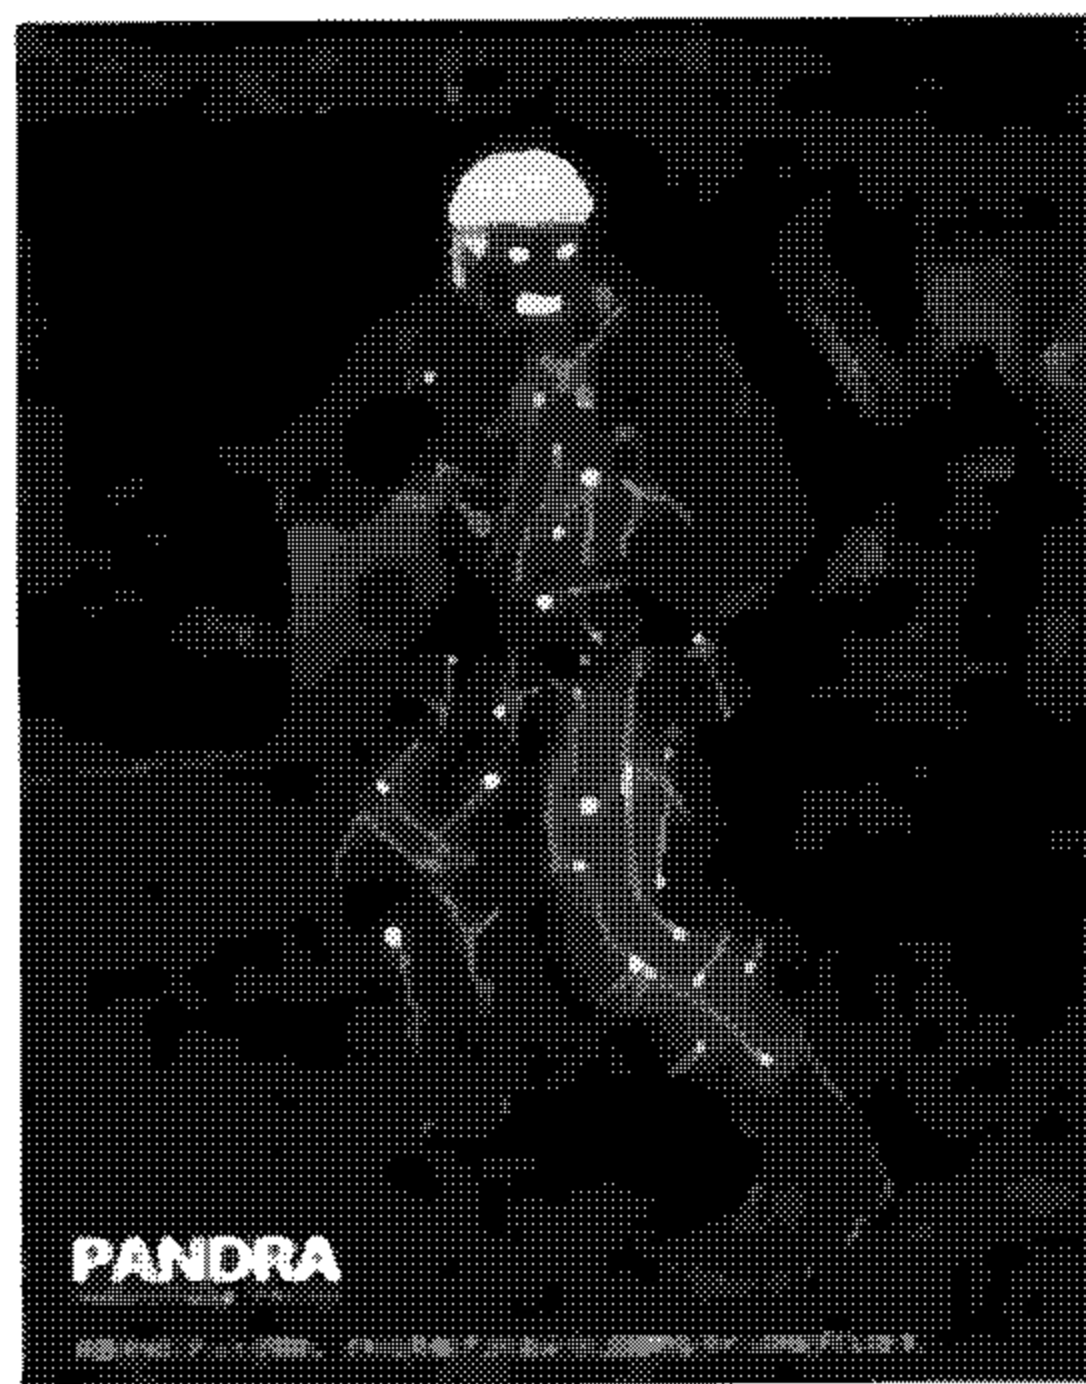

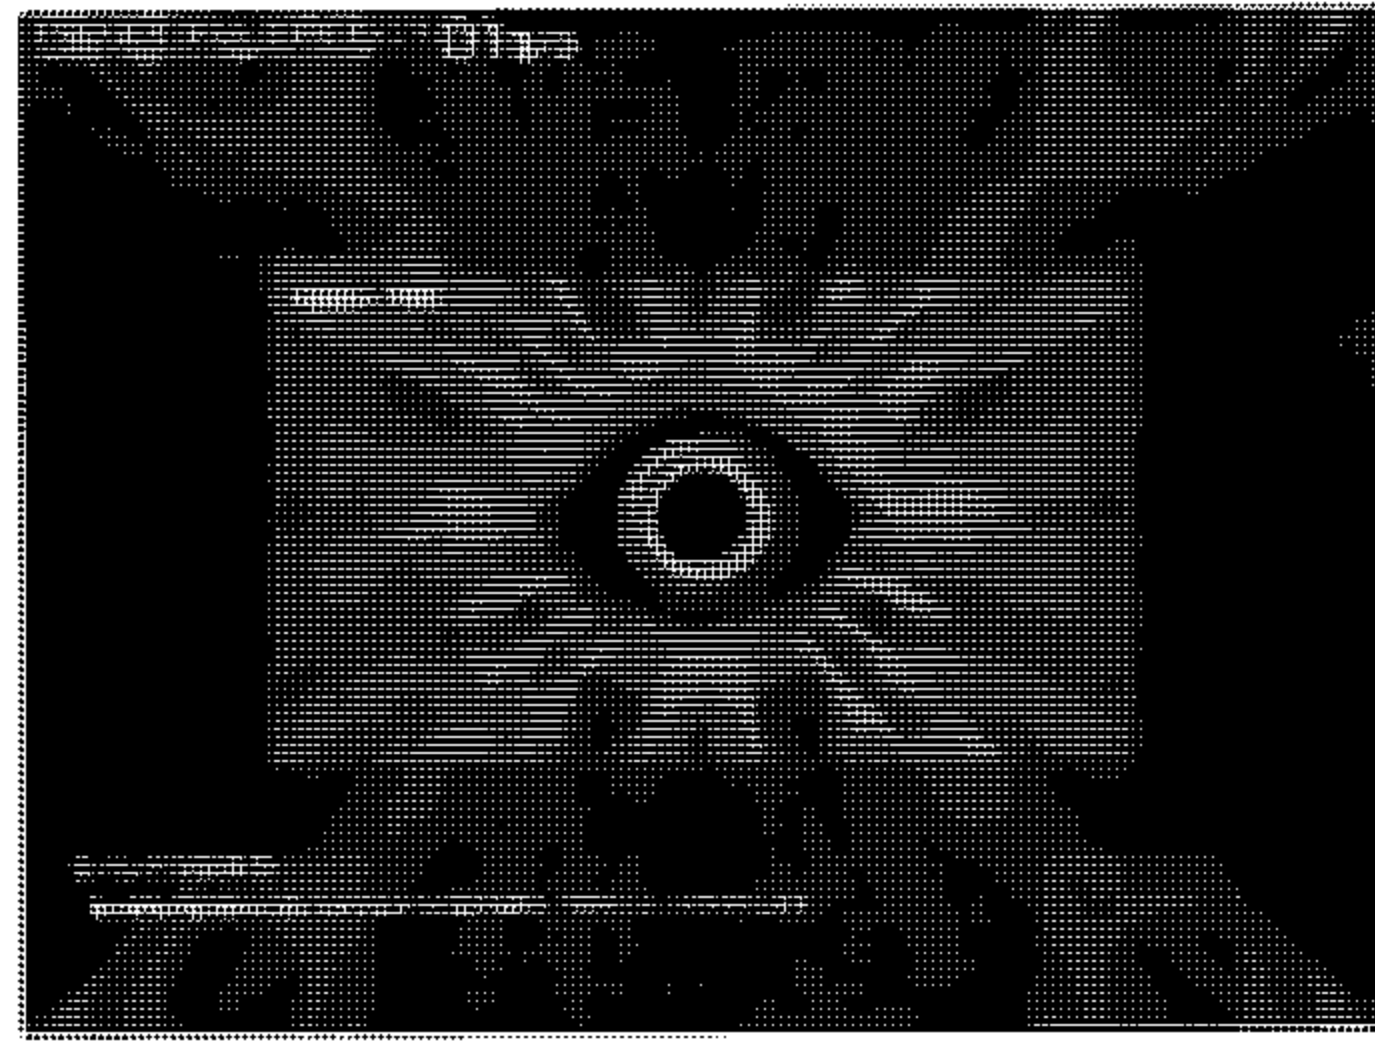

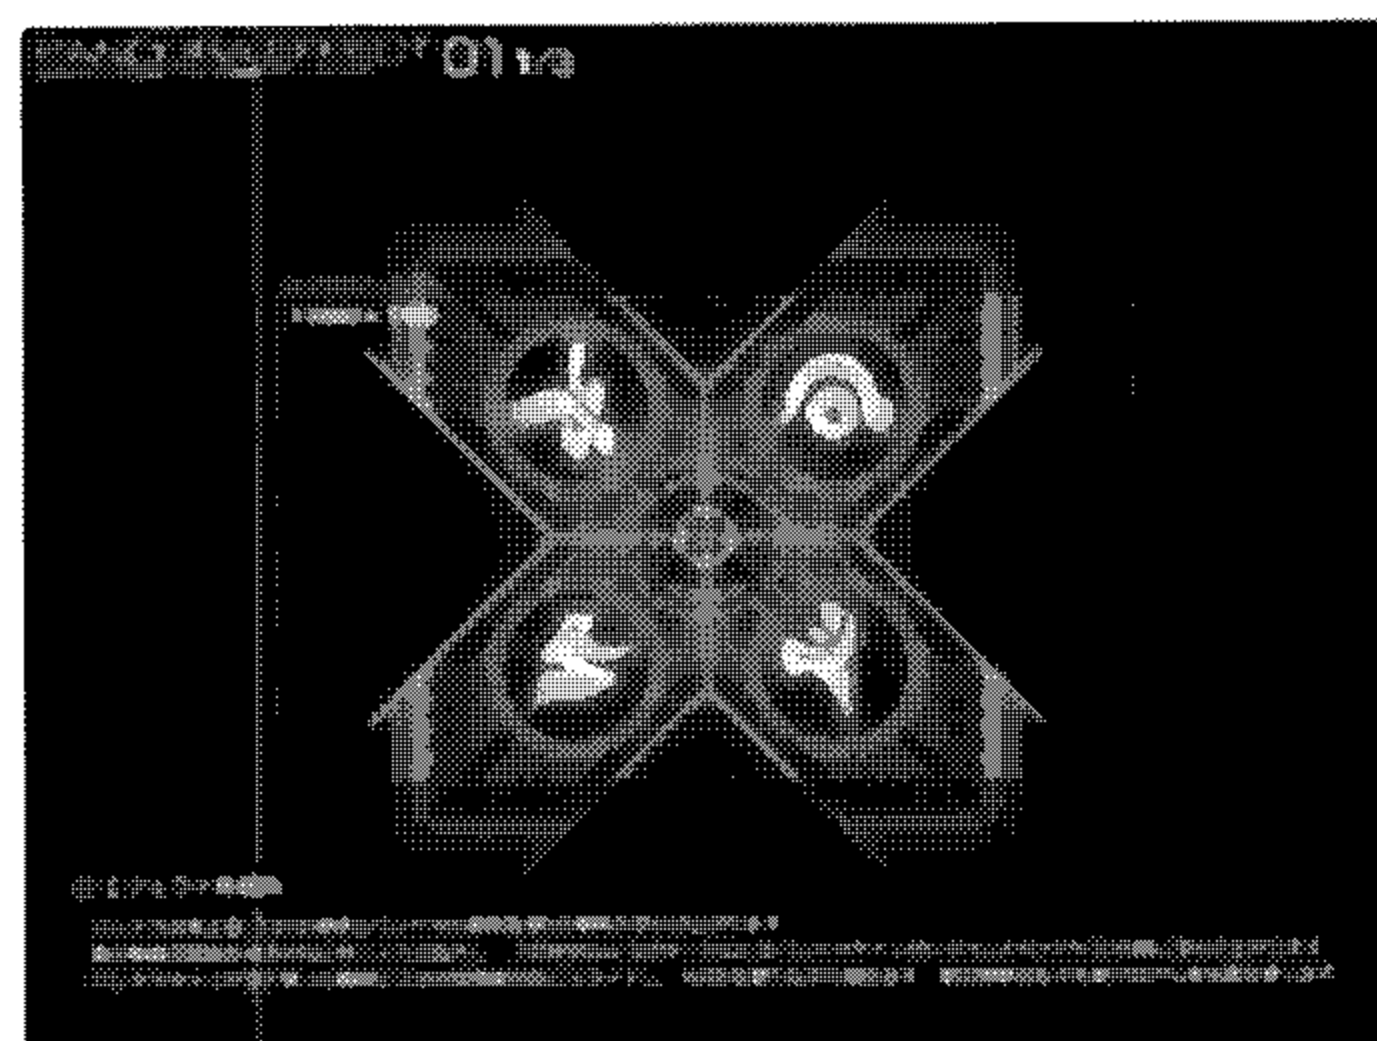

DIMPS: The main gameplay concept was that it would take place in the "Street Fighter" world despite the presence of the Tekken characters. We used our previous project, "Street Fighter IV (hereinafter SFIV)", as a base for "SFxTK" because we felt that would allow us to take advantage of all the Street Fighter flavor we had absorbed. In terms of design concept, our main concern was to make "SFxTK" distinct from "SFIV". With "SFIV", we focused on a weighty serenity, whereas with "SFxTK" we focused on a lively party vibe. With regard to the effects and user interface, we decided that combining "Street Fighter heart" and "Tekken metal" into a "molten metal" theme would bring it all together quite well.

WHAT WERE SOME OF THE HURDLES YOU HAD TO OVERCOME WHEN DEVELOPING "SFxTK"?

DIMPS: The truth is, we had to deal with some serious hardware considerations right off the bat. We had already pushed the specs to their limits with "SFIV", and since

潘多拉盒激活效果

In exchange for your partner's health, Pandora is willing to activate its unimaginable powers. As its name suggests, Pandora is a forbidden box full of mystery and unknown possibilities. The images below are the effects proposed for Pandora's activation sequence. The effects offer a visual experience that can be described as divine, yet unspeakably foreboding. Once Pandora has been opened, will you be left with a final ray of hope, or...?

潘多拉形态示意图

When a character activates Pandora during a fight, they are transformed into an alternate "Pandora form". The development team came up with a variety of visual ideas for the transformation, and countless sessions of trial and error eventually led them to the final designs. Some of the potential ideas included physically bulking up the character, or having a mysterious symbol appear behind them.

"SFxTK" featured tag team fighting that would require up to four characters to be on the screen at the same time, just maintaining (and not improving) the character quality would mean overloading the hardware. This was the first brick wall we hit once we started development. We were able to overcome this problem by creating all of the character models from scratch, but it was definitely a scary moment. In terms of the nature of the game, we had built up a solid foundation for the "Street Fighter" world through "SFIV", and we struggled to figure out how best to blend the "Tekken" series into that world. Another consideration was the fact that the "Tekken" series already had a tag team fighting game called "Tekken Tag Tournament", so we knew we'd have to take this game to a whole new level.

探索新的边界,改编铁拳的世界

PANDORA PLAYS A VITAL ROLE IN THE MAIN STORYLINE OF "SFxTK". WAS THE NOTION OF A "FORBIDDEN BOX" SOMEHOW RELATED TO THE COLLABORATION BETWEEN 2D AND 3D FIGHTING GAMES?

DIMPS: We all wanted the "SFxTK" world to have a completely original story to tell, so we had a lot of diverse ideas during the early stages of development. We considered serious and dramatic elements, funny elements, and even metaphysical elements. The first story that almost made it to the final stages of development was one about a newly discovered set of ancient ruins, but that was eventually changed to one single artifact with mysterious powers that the official tag teams would seek out. That artifact was, of course, Pandora. As development progressed, Pandora grew to become part of the gameplay system itself, and we are quite pleased with its role in the game. As for your question about the "forbidden box" being some kind of reference to the idea of mixing 2D and 3D fighting games, I have to admit that was not part of our intention. Still, that is a great way to interpret it.

WHAT STEPS DID YOU HAVE TO TAKE TO ADAPT THE TEKKEN CHARACTERS FROM THEIR 3D FIGHTING GAME ENVIRONMENT TO THE STREET FIGHTER WORLD?

DIMPS: All of the Tekken characters are stylish and refined, whereas the Street Fighter

characters have a raw vibe. Since we were using the Street Fighter world as a base for "SFxTK", simply importing the Tekken characters would have made them stick out like sore thumbs. The first thing we did was adjust their physical proportions to match those of the Street Fighter crew by tweaking things like the length of their limbs. We wanted to maintain each character's original appearance while squeezing them into their new Street Fighter-styled bodies, and that required a lot of trial and error. Street Fighter moves are weightier and require more suspension of disbelief, so that was yet another way in which we had to adapt the Tekken characters. We also had to convert their facial expressions into ones that would better fit with the Street Fighter mood, while still making sure each character retained their uniqueness. For their moves, we used effects that suited each character's personality, such as Lil's flower petals and Xiaoyu's sparkles. These effects are "SFxTK" originals, so I hope the players noticed them.

DID YOU USE THE MODELS FROM "SFIV" FOR THE STREET FIGHTER CHARACTERS THAT APPEAR IN "SFxTK"?

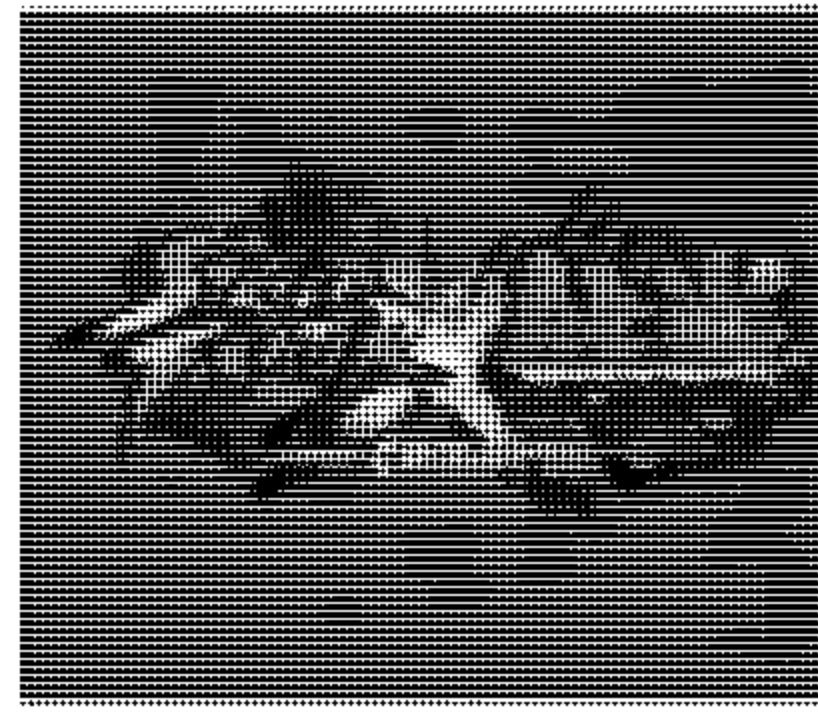

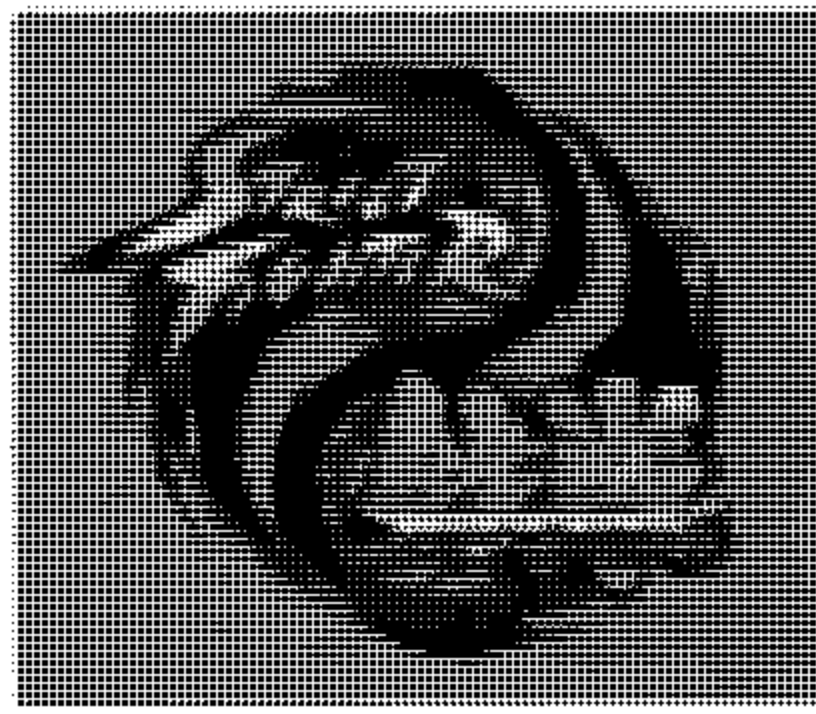

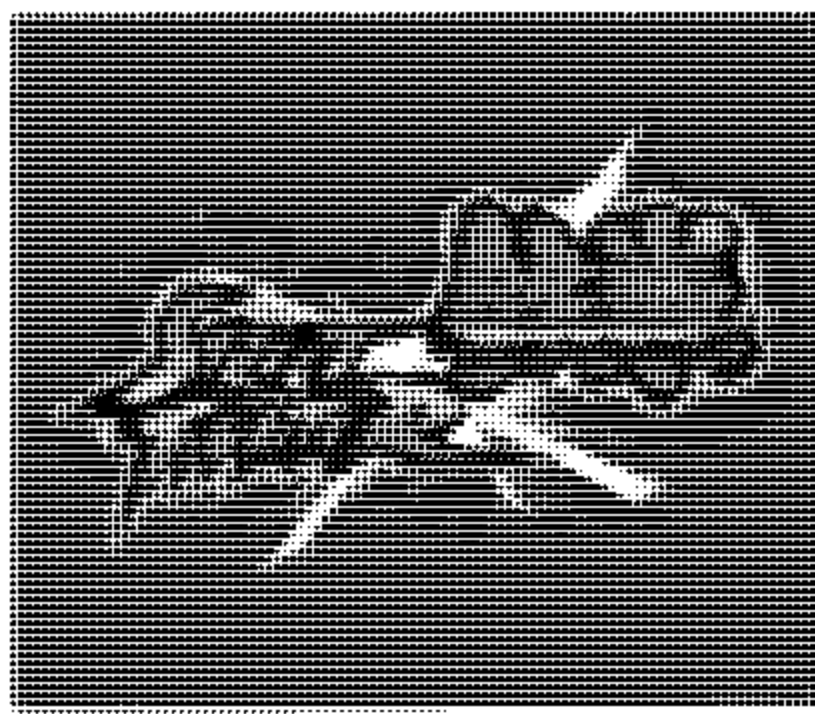

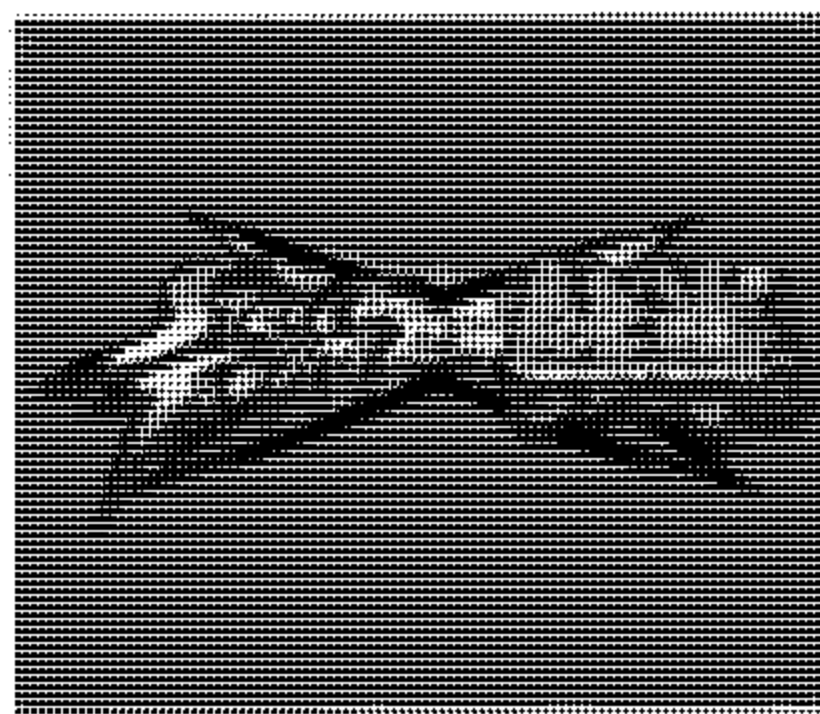

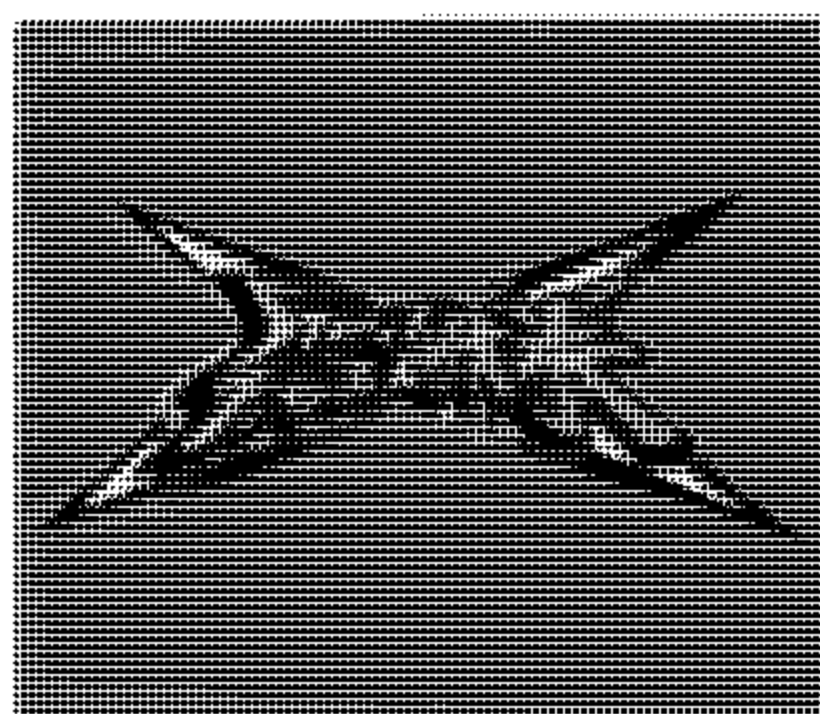

DIMPS: The designs remained the same, but the model data for each character had to be significantly lightened in order to allow for up to four characters to be on the screen at the same time. We had to make these changes without compromising the visual quality of the models, and I'm sure our designers had a really hard time with that, but in the end I believe the final models aren't inferior in any way to those of "SFIV". The concept behind the "SFxTK" models was to create a slightly different visual style from "SFIV". In "SFIV", we hardened the edges to highlight the characters, but for "SFxTK", we used an original method we developed ourselves in order to make the characters stand out on-screen.

EARLIER, YOU MENTIONED EFFECTS LIKE LIL'S FLOWER PETALS AND XIAOYU'S SPARKLES. PLEASE TELL US MORE ABOUT THE DIFFERENT EFFECTS YOU USED.

DIMPS: Since "SFxTK" is a tag team game, each fight naturally tends to last longer. In order to keep the tempo of each fight moving at a fair pace, we intentionally shortened the performance time of each move. But the shortened performance times detracted from the "festival" vibe we were trying to create, so we tried playing around with

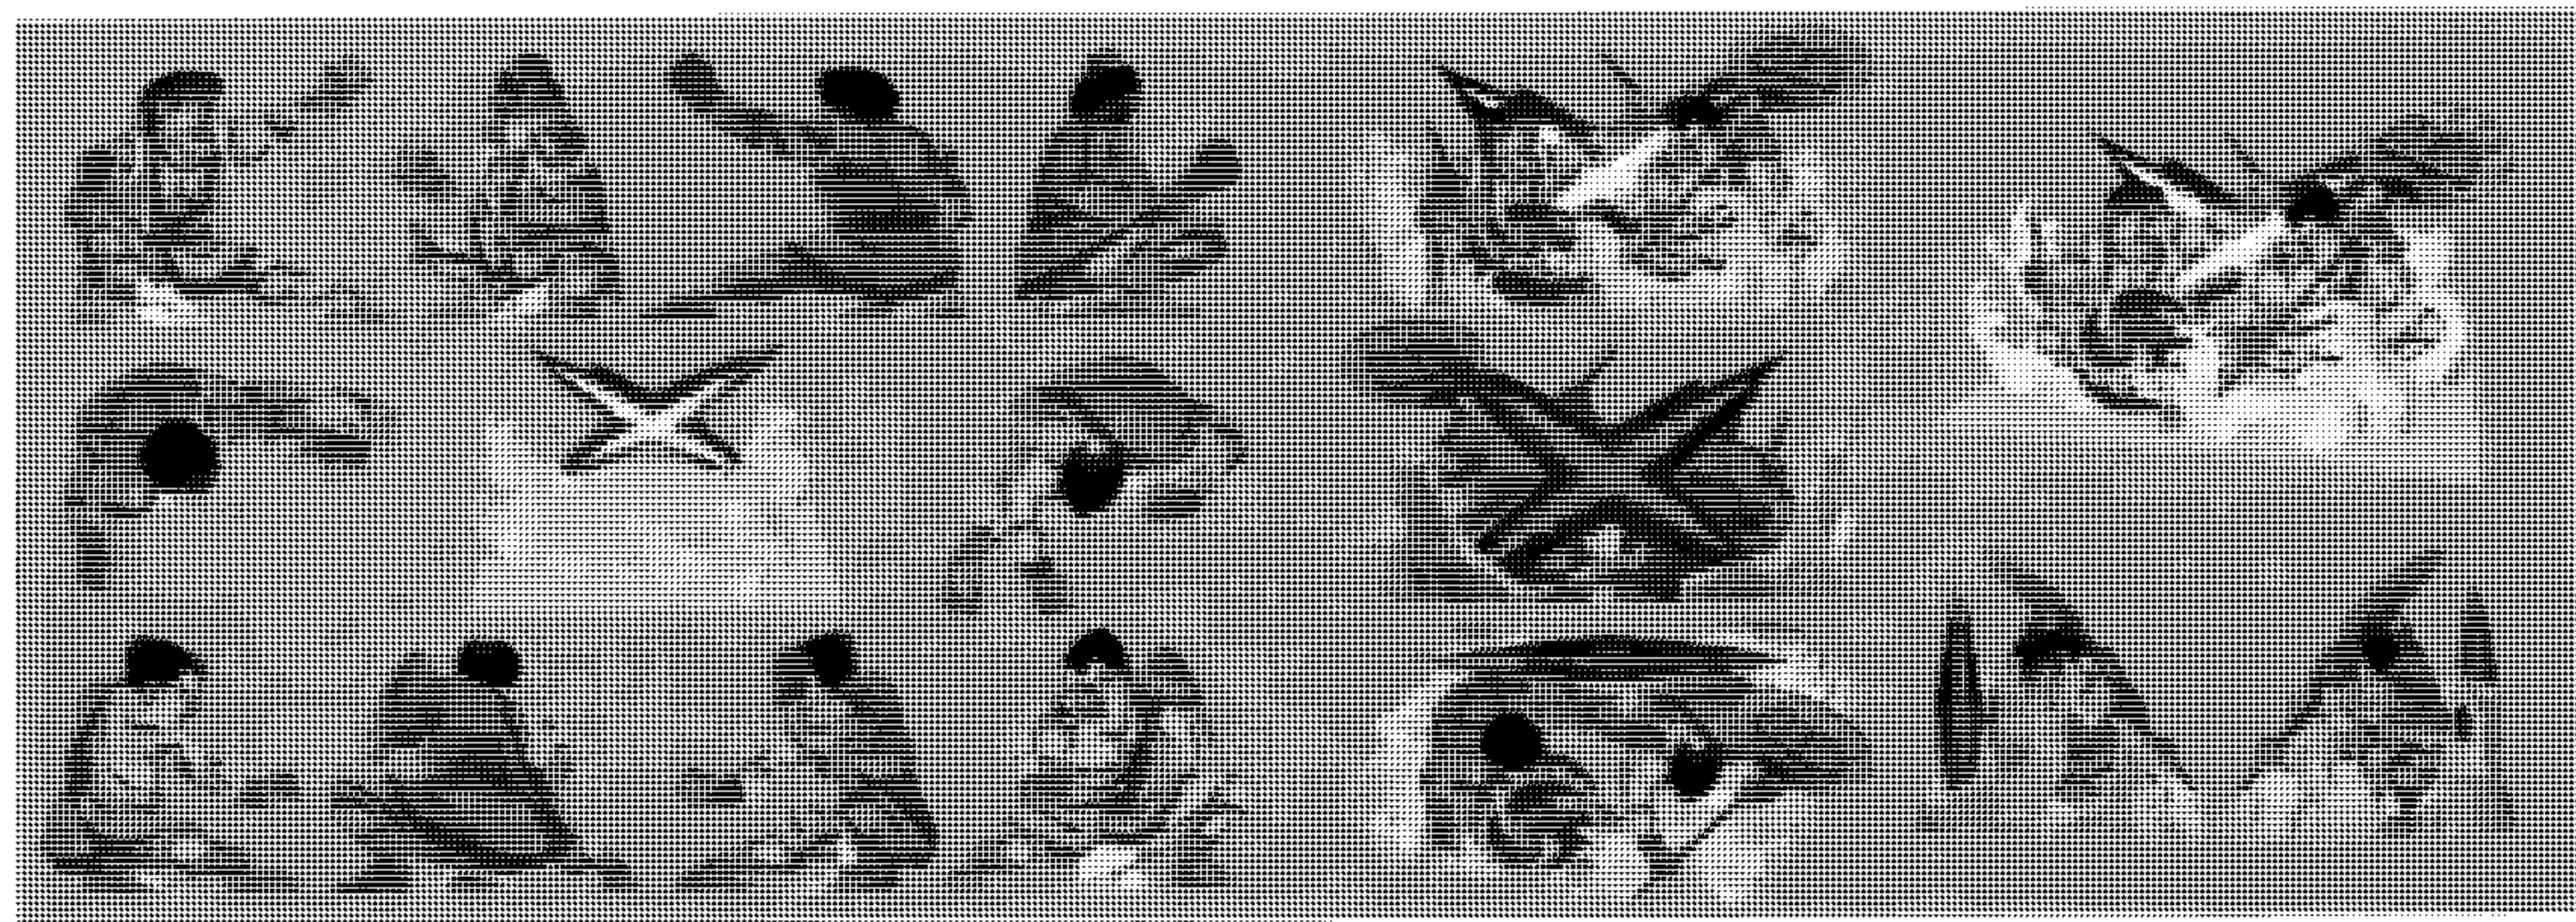

主题标志概念图

As the collaboration of the century, many exciting title logo ideas were submitted to stand as a symbol of the game and everything it offered. The "X" was a common element in most of the submissions, representing the clash between the two series. One of the more unique logo ideas incorporated the yin-yang symbol.

东京电玩展独占周边

These Nebuta-style polygon models were prepared for the 2011 Tokyo Game Show. The style is based on the famous floats that are displayed during the Aomori Nebuta Festival. Ryu represents the Street Fighter crew, while Kazuya fills the same role for the Tekken team. The two men are seen clashing furiously amidst waves of water. The image of Ryu and Kazuya in bioncloths to the right was printed on towels and distributed at the show.

“我们对每一个《铁拳》角色都相当用心,在将他们的身体比例调整到接近《街霸IV》风格同时,又要避免他们的形象发生改变。”

different camera motions to keep things lively. You can see the fruits of our labors in the way the camera does a little something extra for throw moves, and the way the camera focuses on the impact of a launch attack. This 'camera focus' method, by the way, is something that we adapted from the "Tekken" series. With the Super Arts and Cross Arts, we made sure the camera angle changed depending on how the move was initiated. With all of this taken into consideration, we had to make sure the effects were still clearly visible. I think these little details are what make "SFxTK" so visually distinctive from "SFV".

灌输于《街霸X铁拳》中的欢乐和趣味

BESIDES THE CHARACTERS, IT SEEMS LIKE YOU PAID EXTRA ATTENTION TO THE STAGES AS WELL. DID YOU KEEP ANYTHING IN PARTICULAR IN MIND WHILE WORKING ON THE STAGES?

DIMPS: To keep in line with our "festival" theme, we wanted to make each stage extraordinary and super busy. The stages in "SFV" involved a lot of people and objects moving independently in the background, but the stages of "SFxTK" were designed to move as one. The stages of "SFxTK" have more width to them than the "SFV" stages, which allows for the players to move around the floor a lot more, and I think that adds an extra element of fun to the game.

EACH STAGE HAS SOME FUN GIMMICKS, LIKE THE PEOPLE AND OBJECTS IMPORTED FROM THE TWO SERIES.

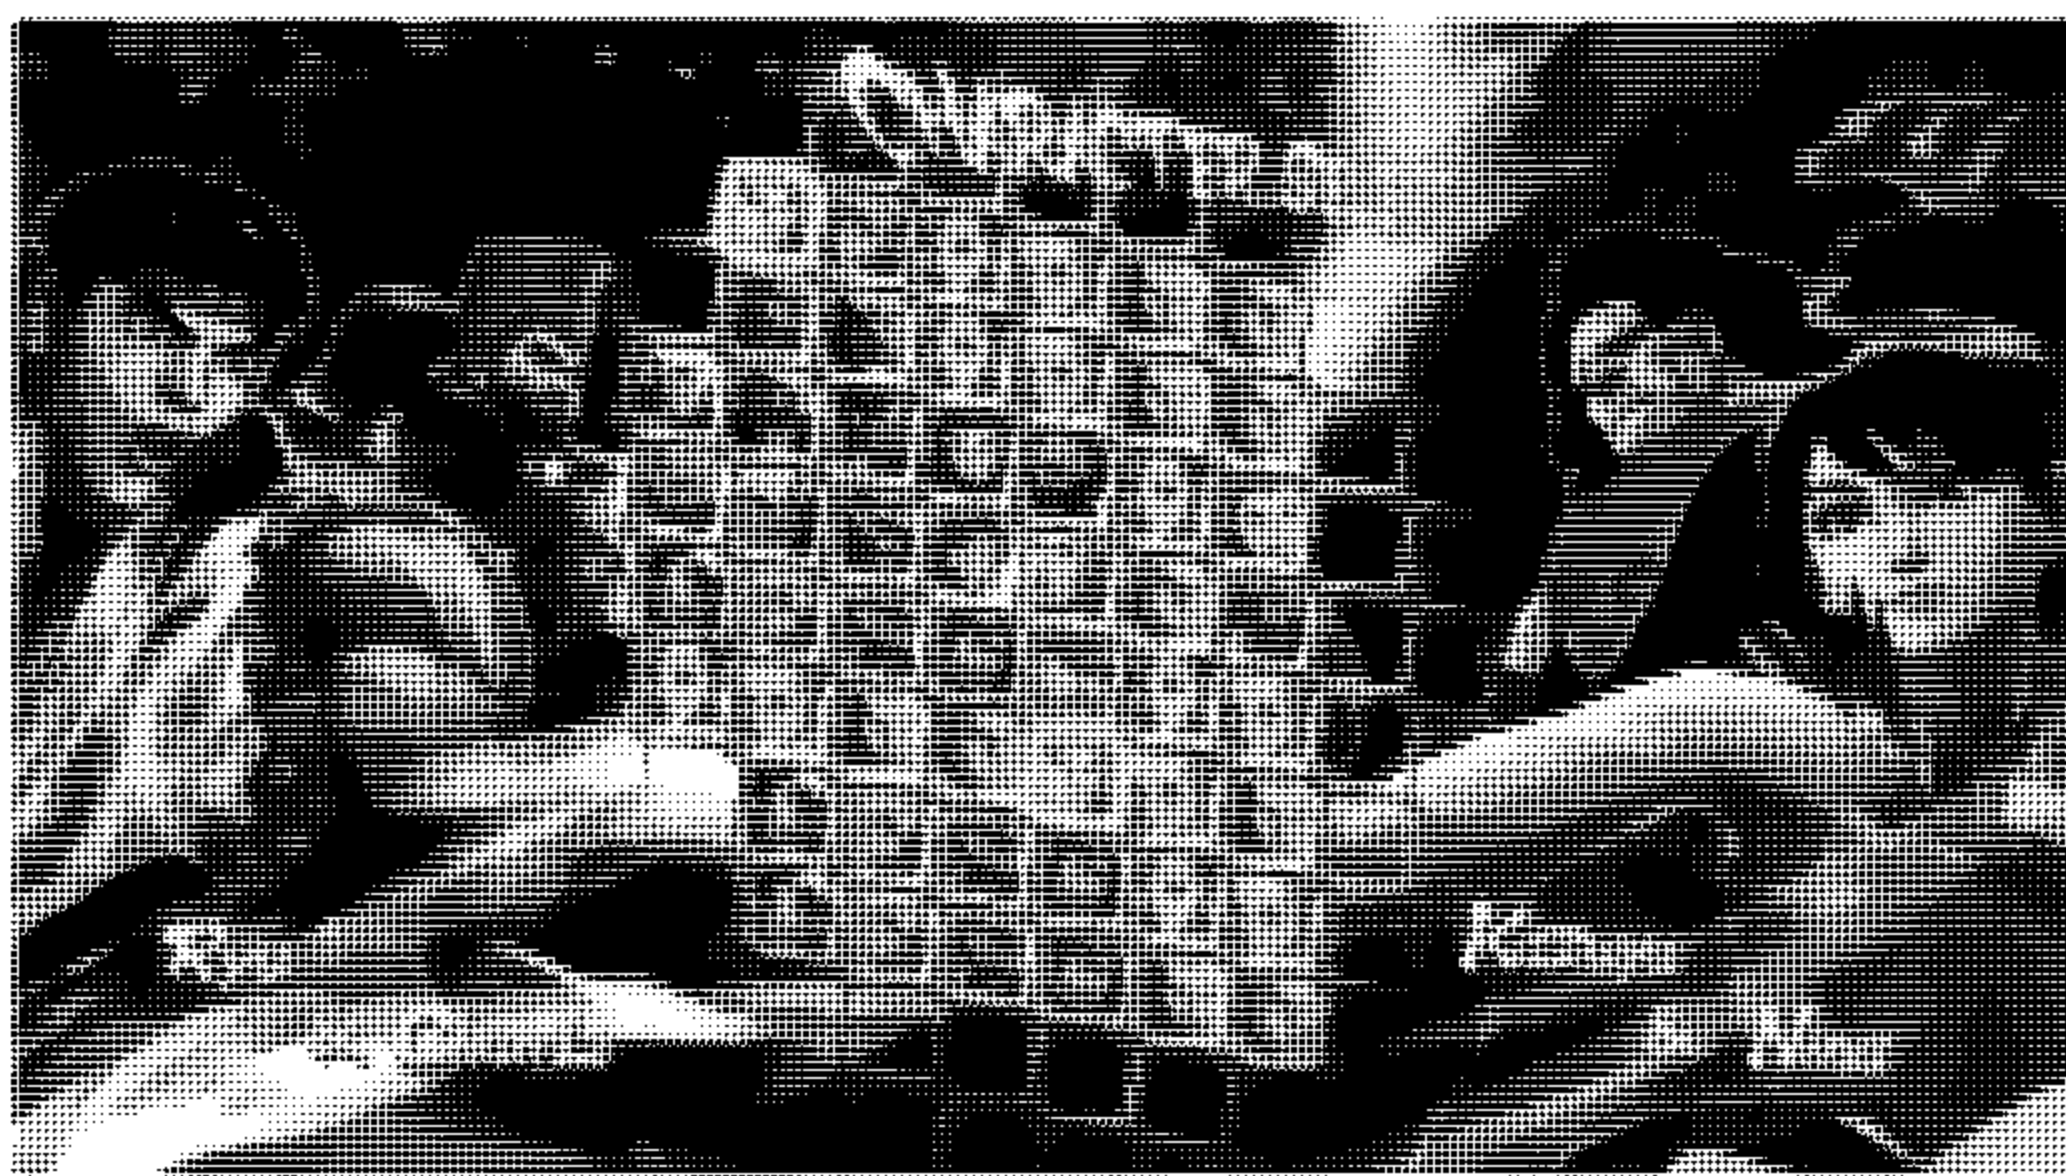

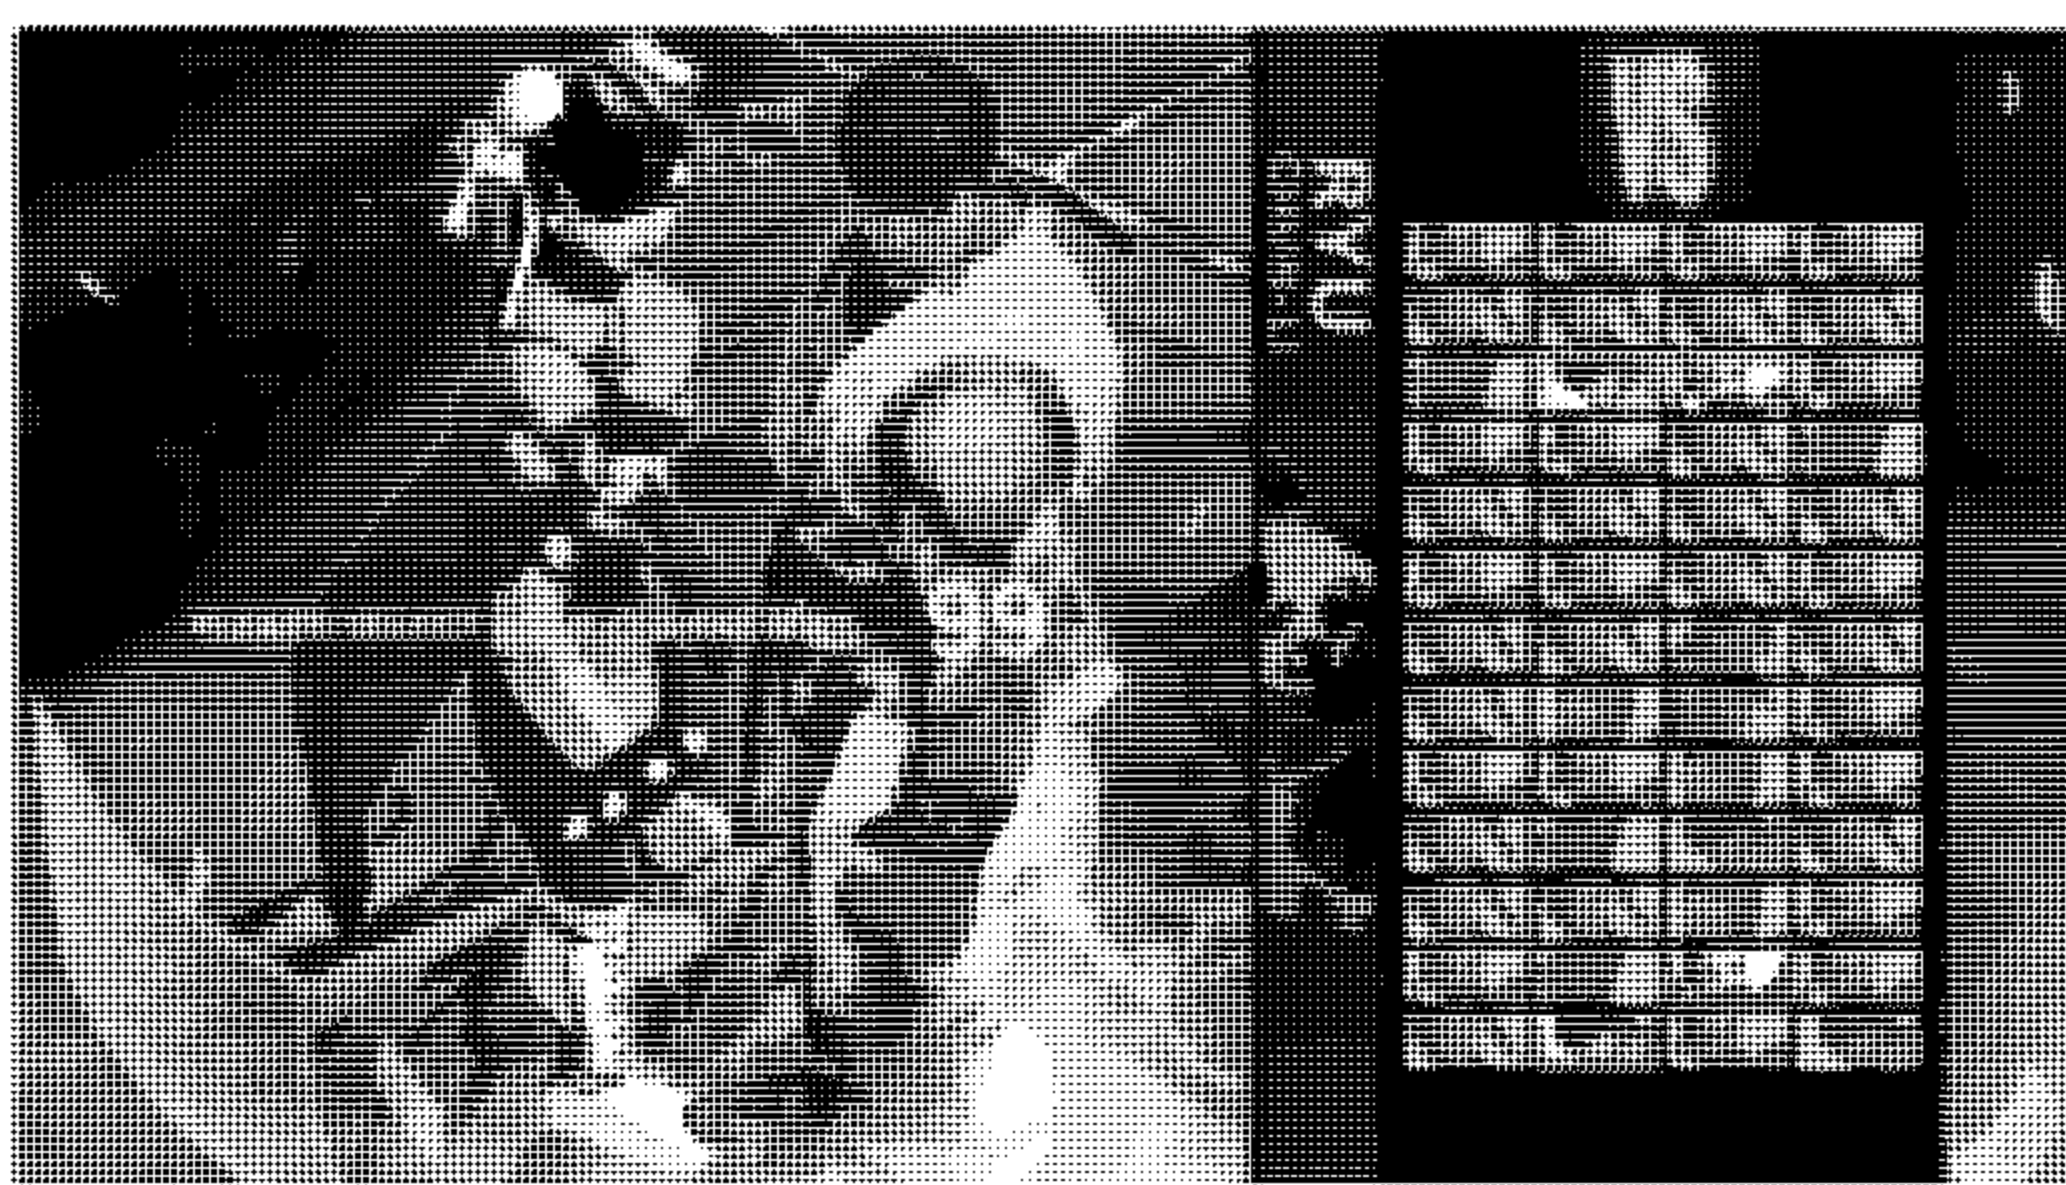

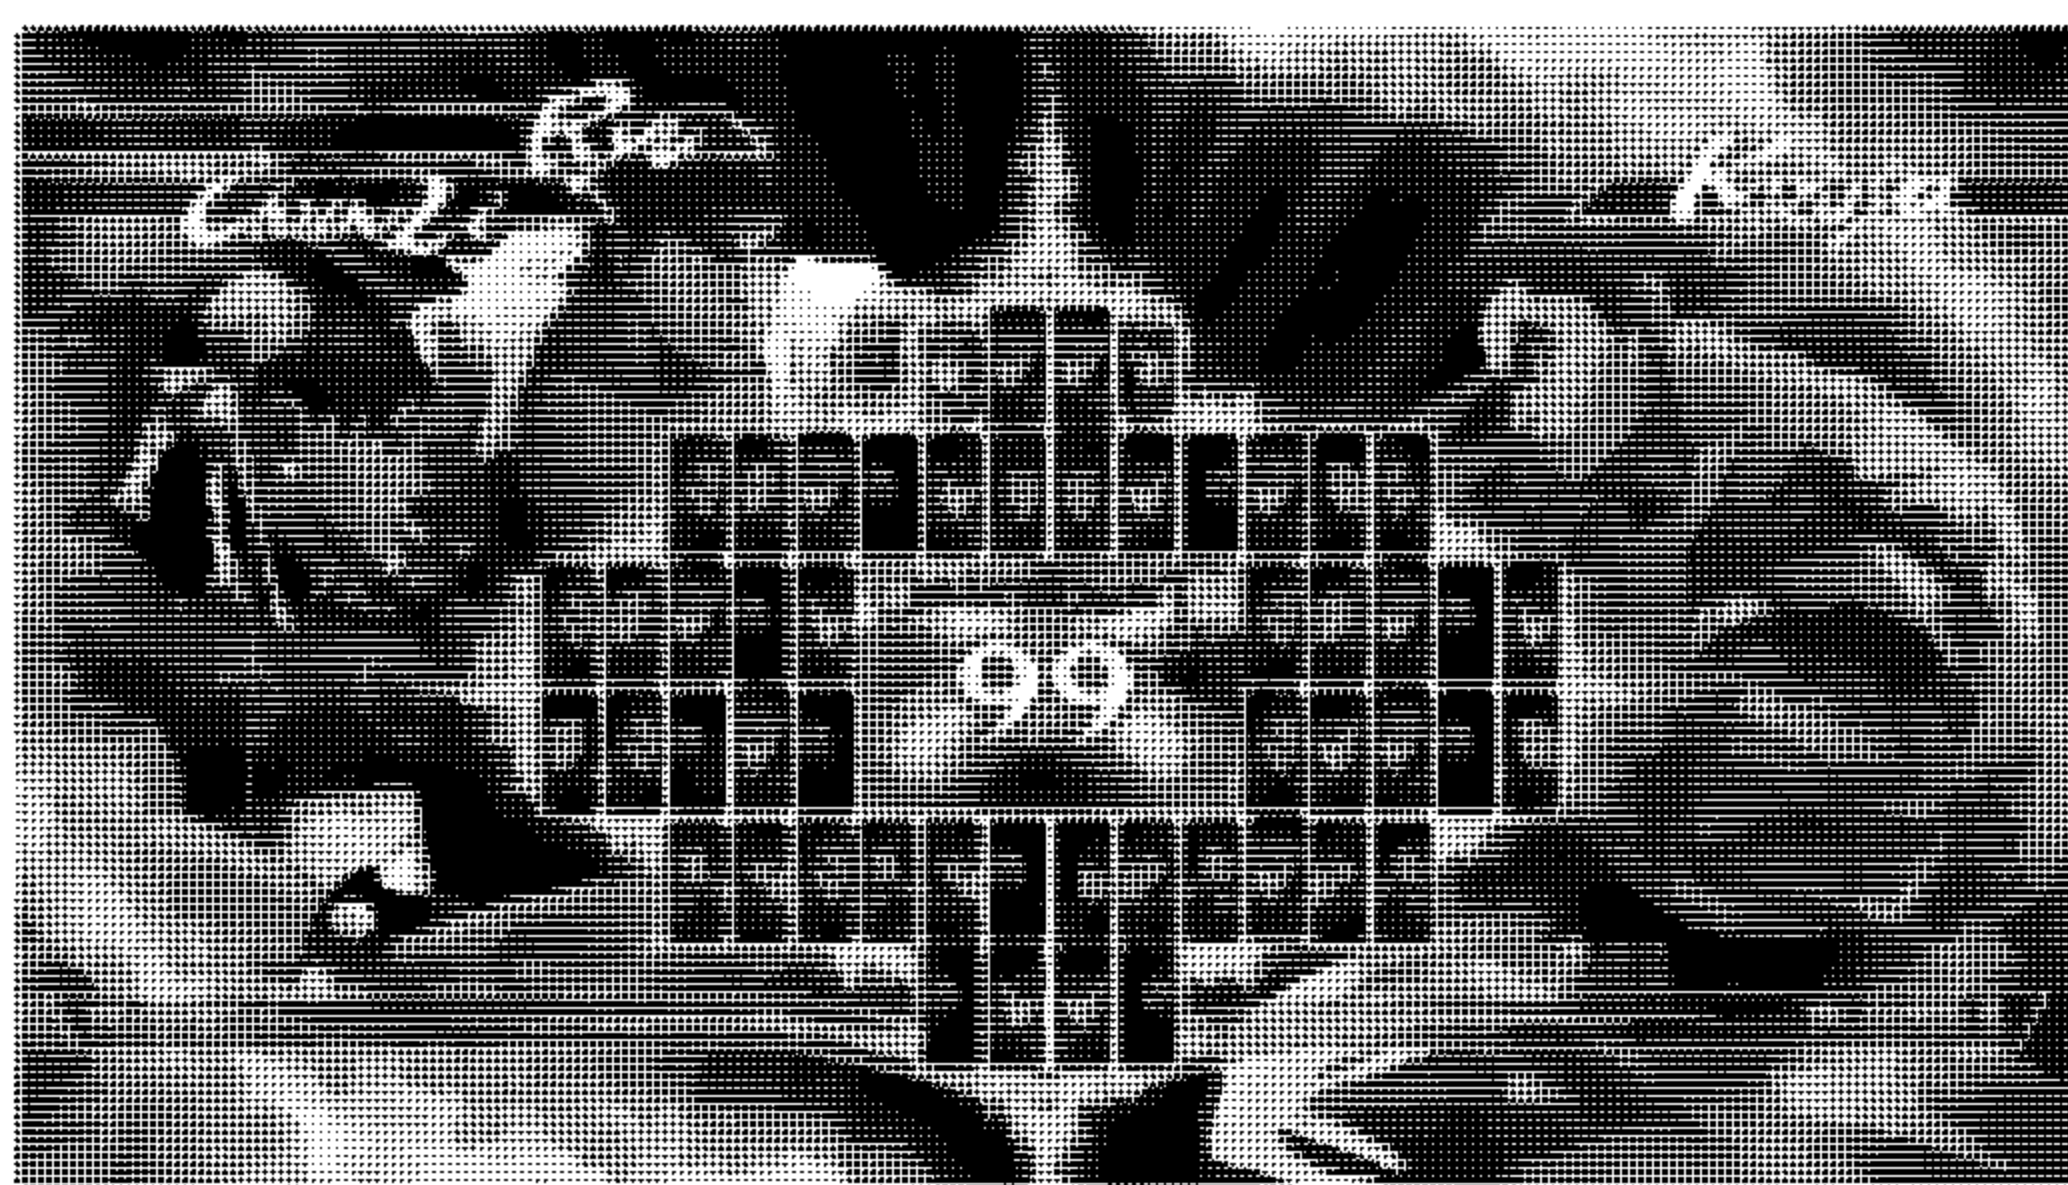

DIMPS: A festival is open to everyone, so we wanted to include as many collaborative characters and objects as possible. This also extends to the stages themselves. The stage called "Urban War Zone" is a perfect example, as it was directly adapted from a stage that appeared in "Tekken 6". The original stage was a much more realistic war zone, but we added a comical touch to it for "SFxTK" to put it more in line with the Street Fighter style. This stage includes references to a certain organization from "SFV", so I hope the players will take the time to look for them.

IF I RECALL CORRECTLY, PRODUCERS ONO AND HARADA MADE "QUEST APPEARANCES" IN THE STAGE KNOWN AS "THE HALF PIPE", DIDN'T THEY?

DIMPS: We included them in one of the billboards that randomly appears. Under some circumstances, the billboard will actually fall to the floor and break apart... Sometimes I wonder if it was okay for us to treat them like that. (laughs) The other stages have their own gimmicks too, and some are even directly related to the actions taken by the player. For example, Genryu is present in the "Blast Furnace" stage, and if the player selects Julia, he will get increasingly excited in the final round. One of the rejected ideas was to have giant Pandora squids in place of the mammoths in the "Antarctica" stage. The final stage, "Pandora's Box", has the entire stage shifting from "quiet mode" to "active mode", and I am very happy with the way the unassuming surroundings transform into something much more vivid. If you pull through with a K.O. in the final

角色选择概念图

The character select screen is a screen that the player will see repeatedly while playing the game. Many players consider this screen the doorway to the ensuing fight, so it was designed with much care, and many potential designs were submitted. Most of them focused on the conflict between the two series' respective crews, and though the final version only shows bust-up portraits of the selected characters, an earlier design idea displayed the characters' entire bodies.

“洛克人刚开始是个帅气的'普通'超级英雄,可他不知怎的进化成了你们在游戏中所见的'恶趣味'人物,不过有心的玩家可以发现我们吸收了很多NES上《洛克人》的动作与招式。”

round, all of the objects on the stage get sucked into the sky, returning the stage to its original state of serenity. The ending cinematics were designed to flow directly from this state of peace and quiet. It took us a long time to get it just right, but I believe we succeeded in creating a truly interesting stage.

ONE OF THE REALLY FUN FEATURES OF "SFxTK" IS THE COLLABORATIVE COSTUMES. PLEASE TELL US ABOUT THESE.

DIMPS: The idea of a costume collaboration was something that was brought up early on in development, but we knew we couldn't simply dress characters in someone else's costume without it getting a bit boring. We instead decided to mix each character's collaborative costume with a bit of their own personality as well. To organize our ideas, we started writing down which characters would make for fun collaborations, then handed our written ideas to the designers, who turned them into character models. I think the results are exactly what we had envisioned.

WILL MORE COSTUMES BE ADDED LATER, THE WAY THEY WERE FOR "SFIV"?

DIMPS: There are no plans for anything like that at this time, but if the fans let us know what they want, we'll do our best to accommodate them.

HOW DID YOU SET ABOUT DESIGNING THE GUEST CHARACTERS MEGA MAN AND PAC-MAN?

DIMPS: Mega Man started off as a pretty "normal" superhero, but the more adjustments we made, the looser his physique became, and his clothes started looking

cheaper, too... until we somehow ended up with the "acquired taste" that you see in the game. But attentive players will notice that we incorporated many moves and actions from the original "Mega Man" game on the NES into the version of Mega Man seen in "SFxTK". When we found out that Pac-Man would also be appearing in the game, we immediately wanted to put him on a robot. That idea was rejected at first, but was revived during the following meeting. Once the robot idea was approved, we decided that a regular robot would be too boring, and chose to put him on a big wooden dummy.

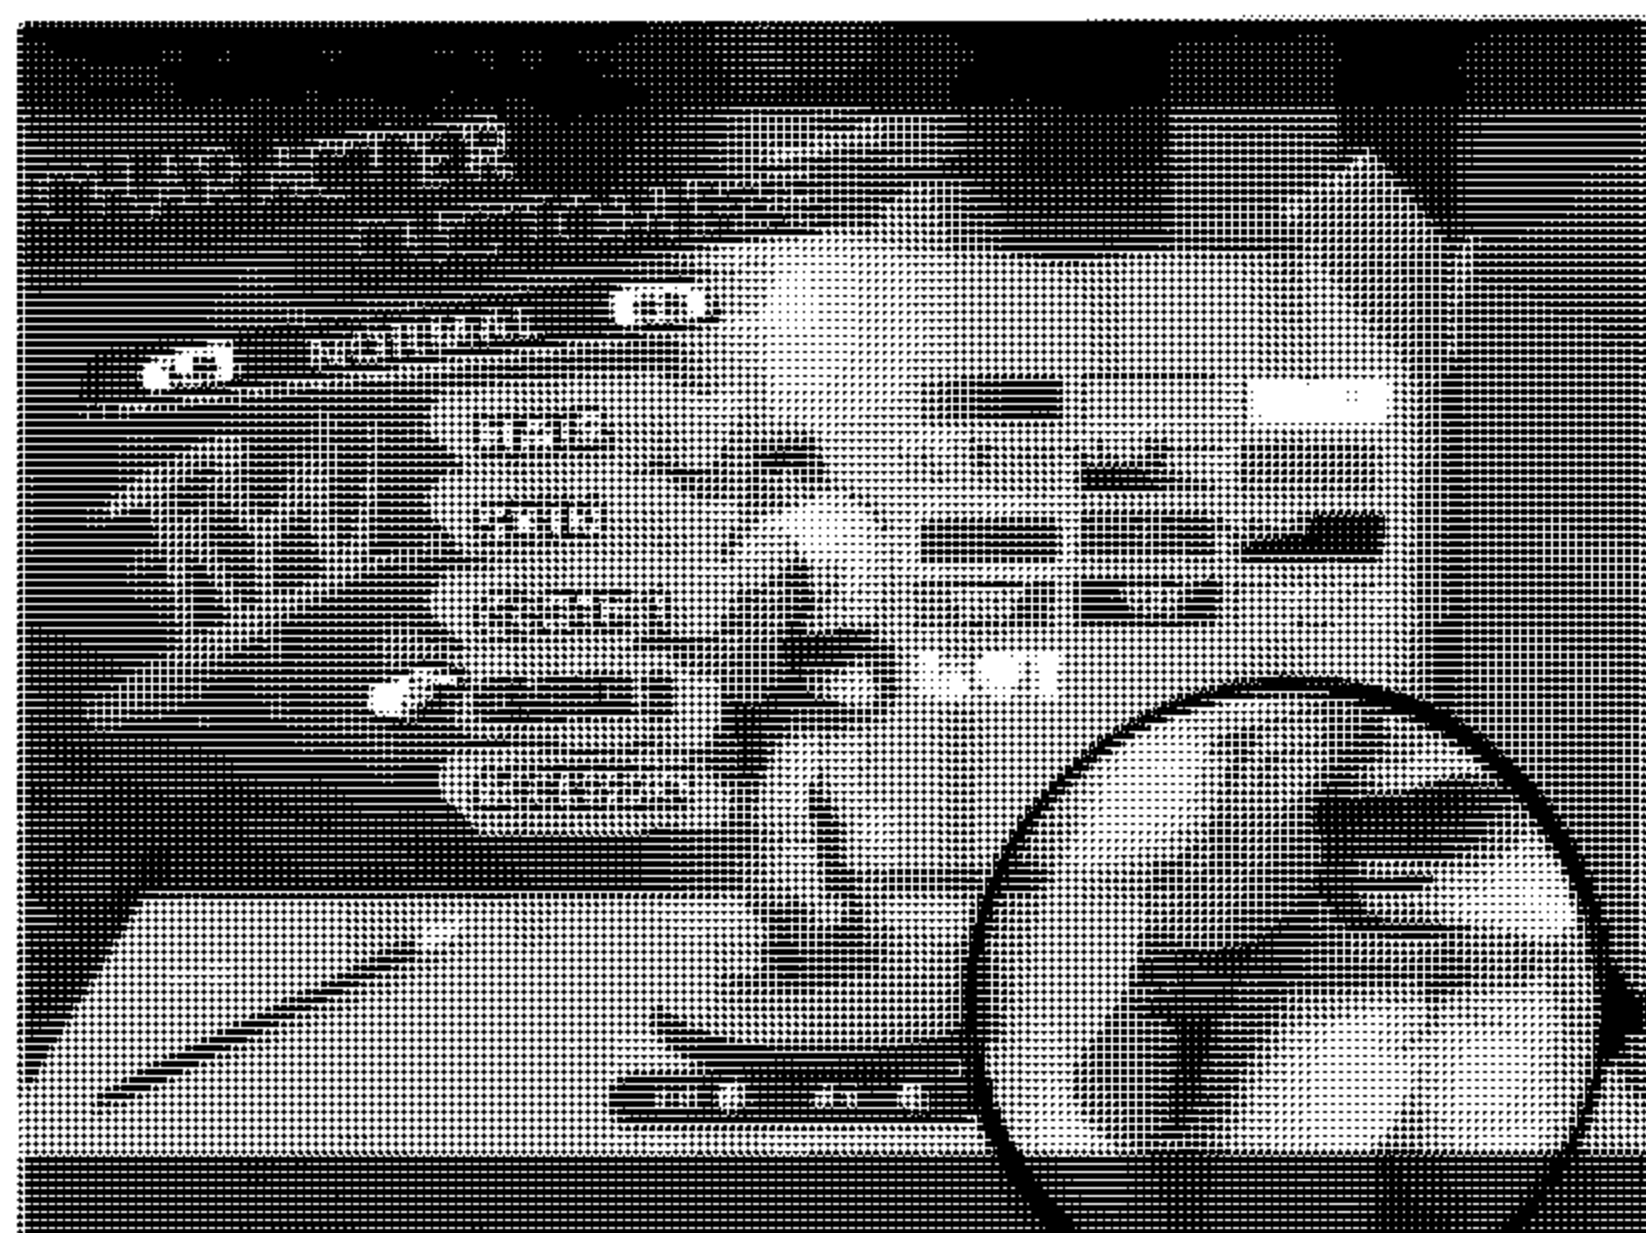

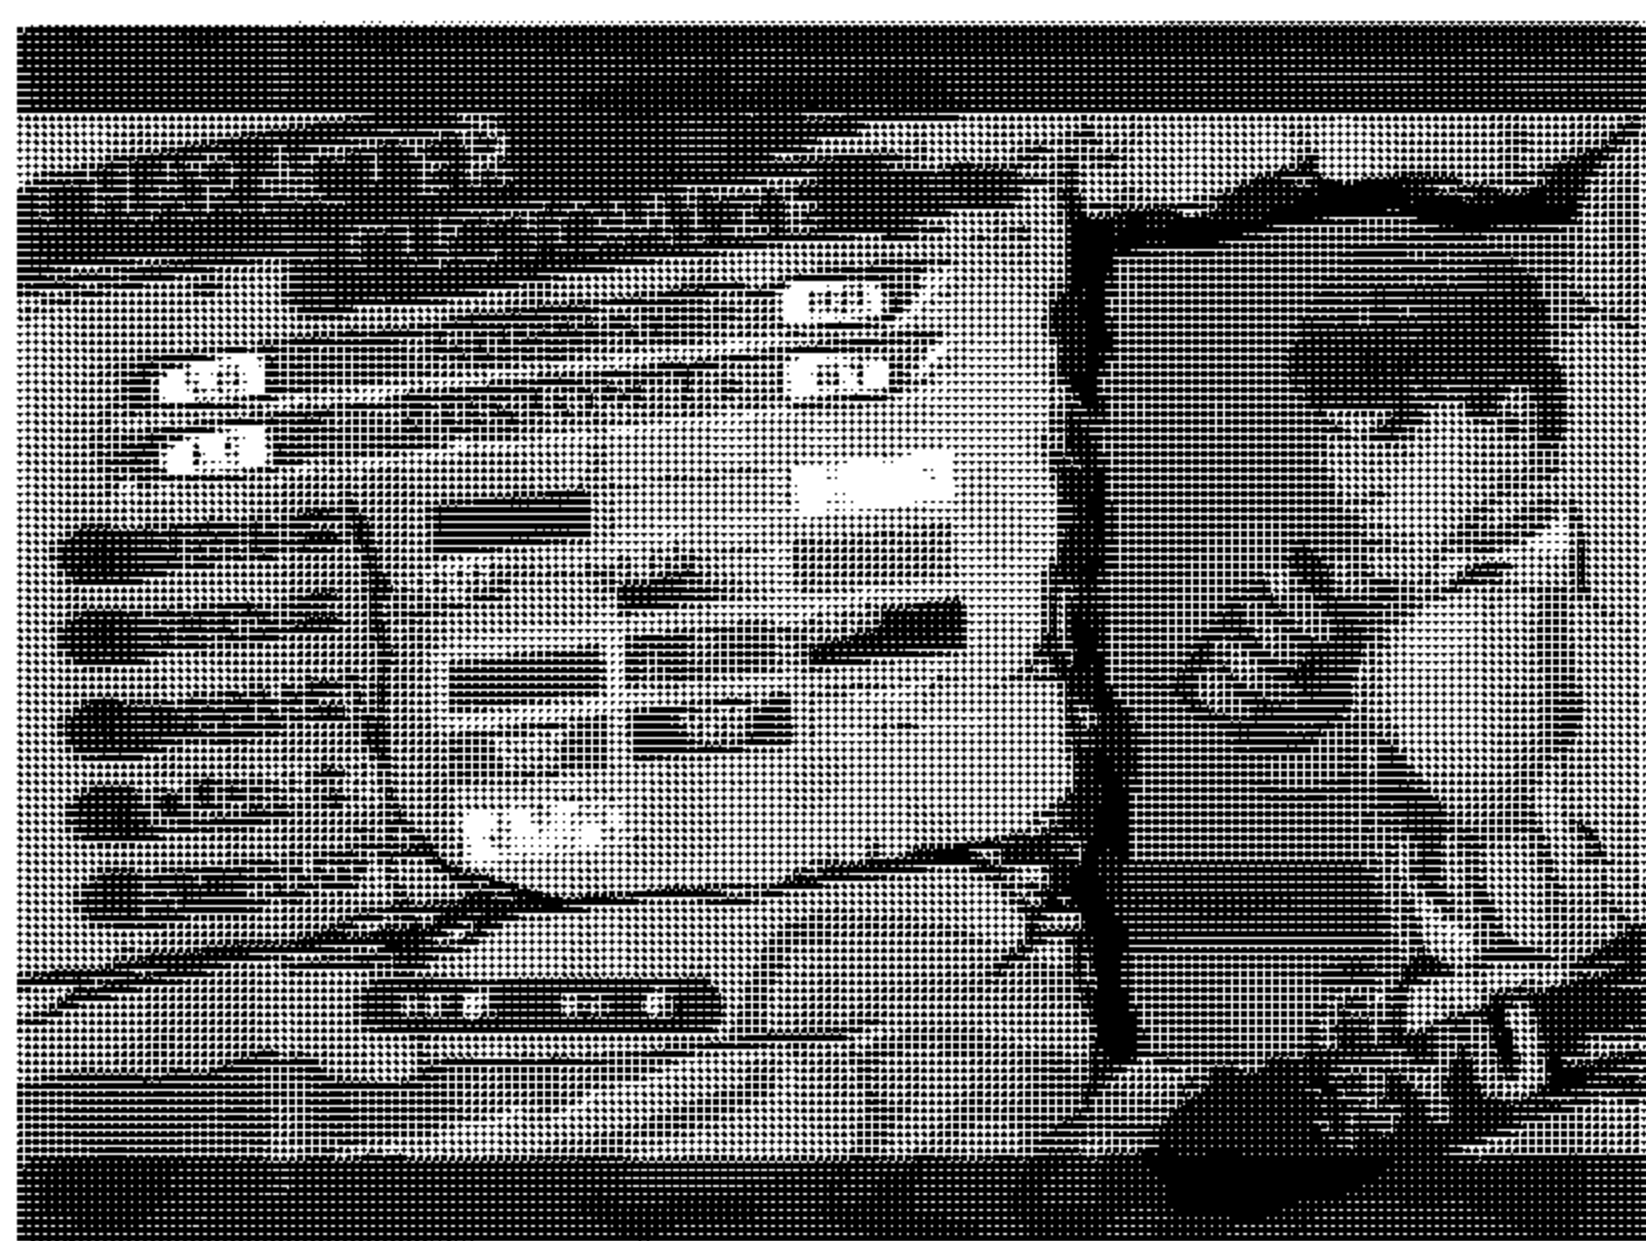

DO YOU HAVE A PERSONAL MESSAGE YOU'D LIKE TO DELIVER TO THE PLAYERS?

DIMPS: The larger roster of characters posed a greater amount of challenge for us, but we did our best to bring the "festival" to life, so I hope you will take the time to pore over every inch of the game and enjoy it to its full potential.

THANK YOU FOR YOUR TIME.

角色颜色自定义

"SFxTK" allows the player to customize each character's colors. The customization screen, like so many other screens in the game, had many potential designs submitted for it before one was selected. Some of the ideas included a closet-style fashion zone, or a painting area that displayed the character like a toy figure. There was also a magnification feature that allowed the player to view certain parts of the character more closely.

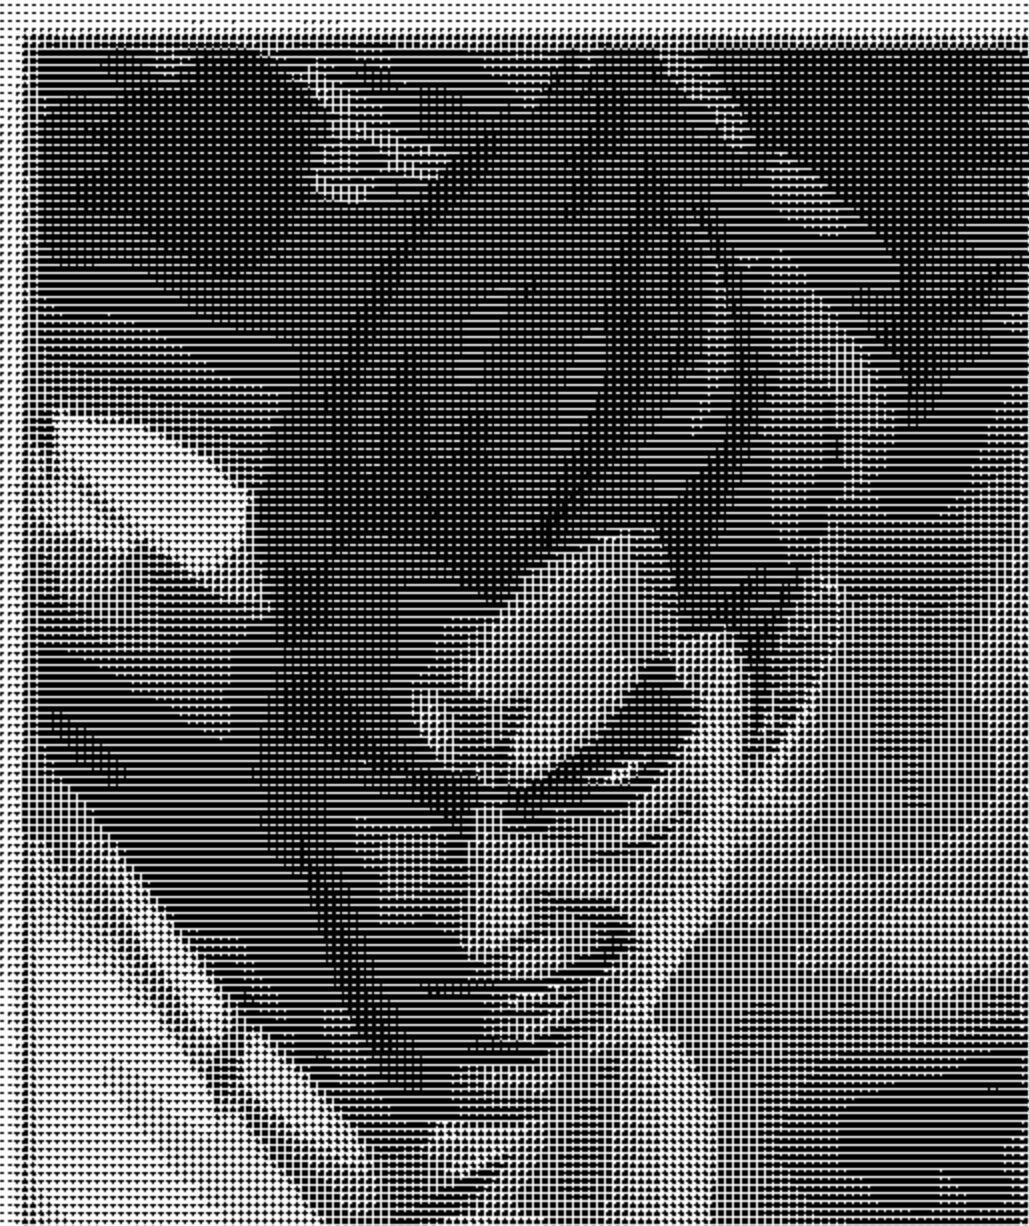

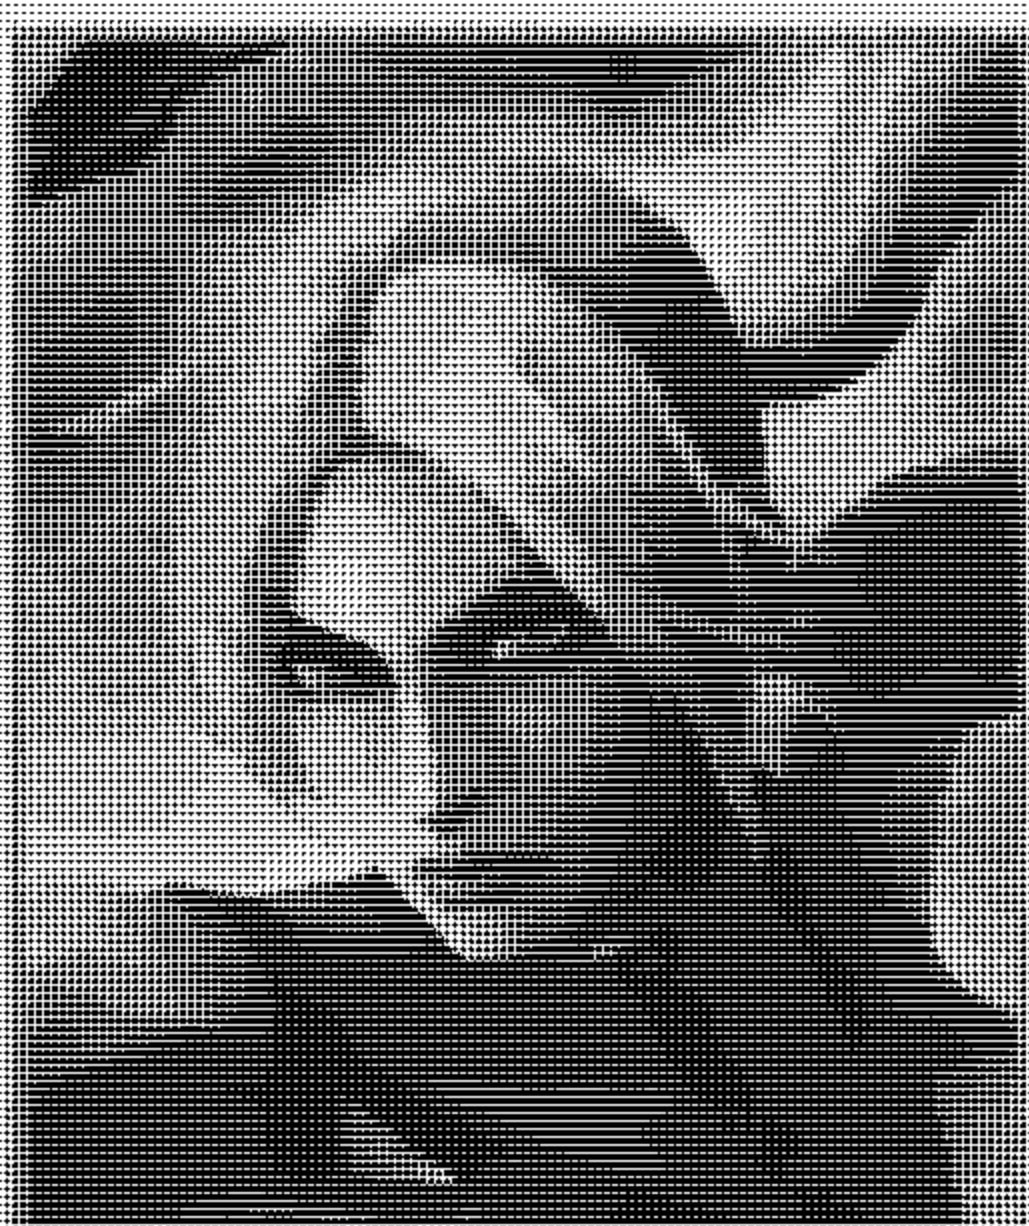

Parts that are hard to see or that are in need of detailed examination appear within the magnification field.

STREET FIGHTER X TEKKEN ARTWORKS

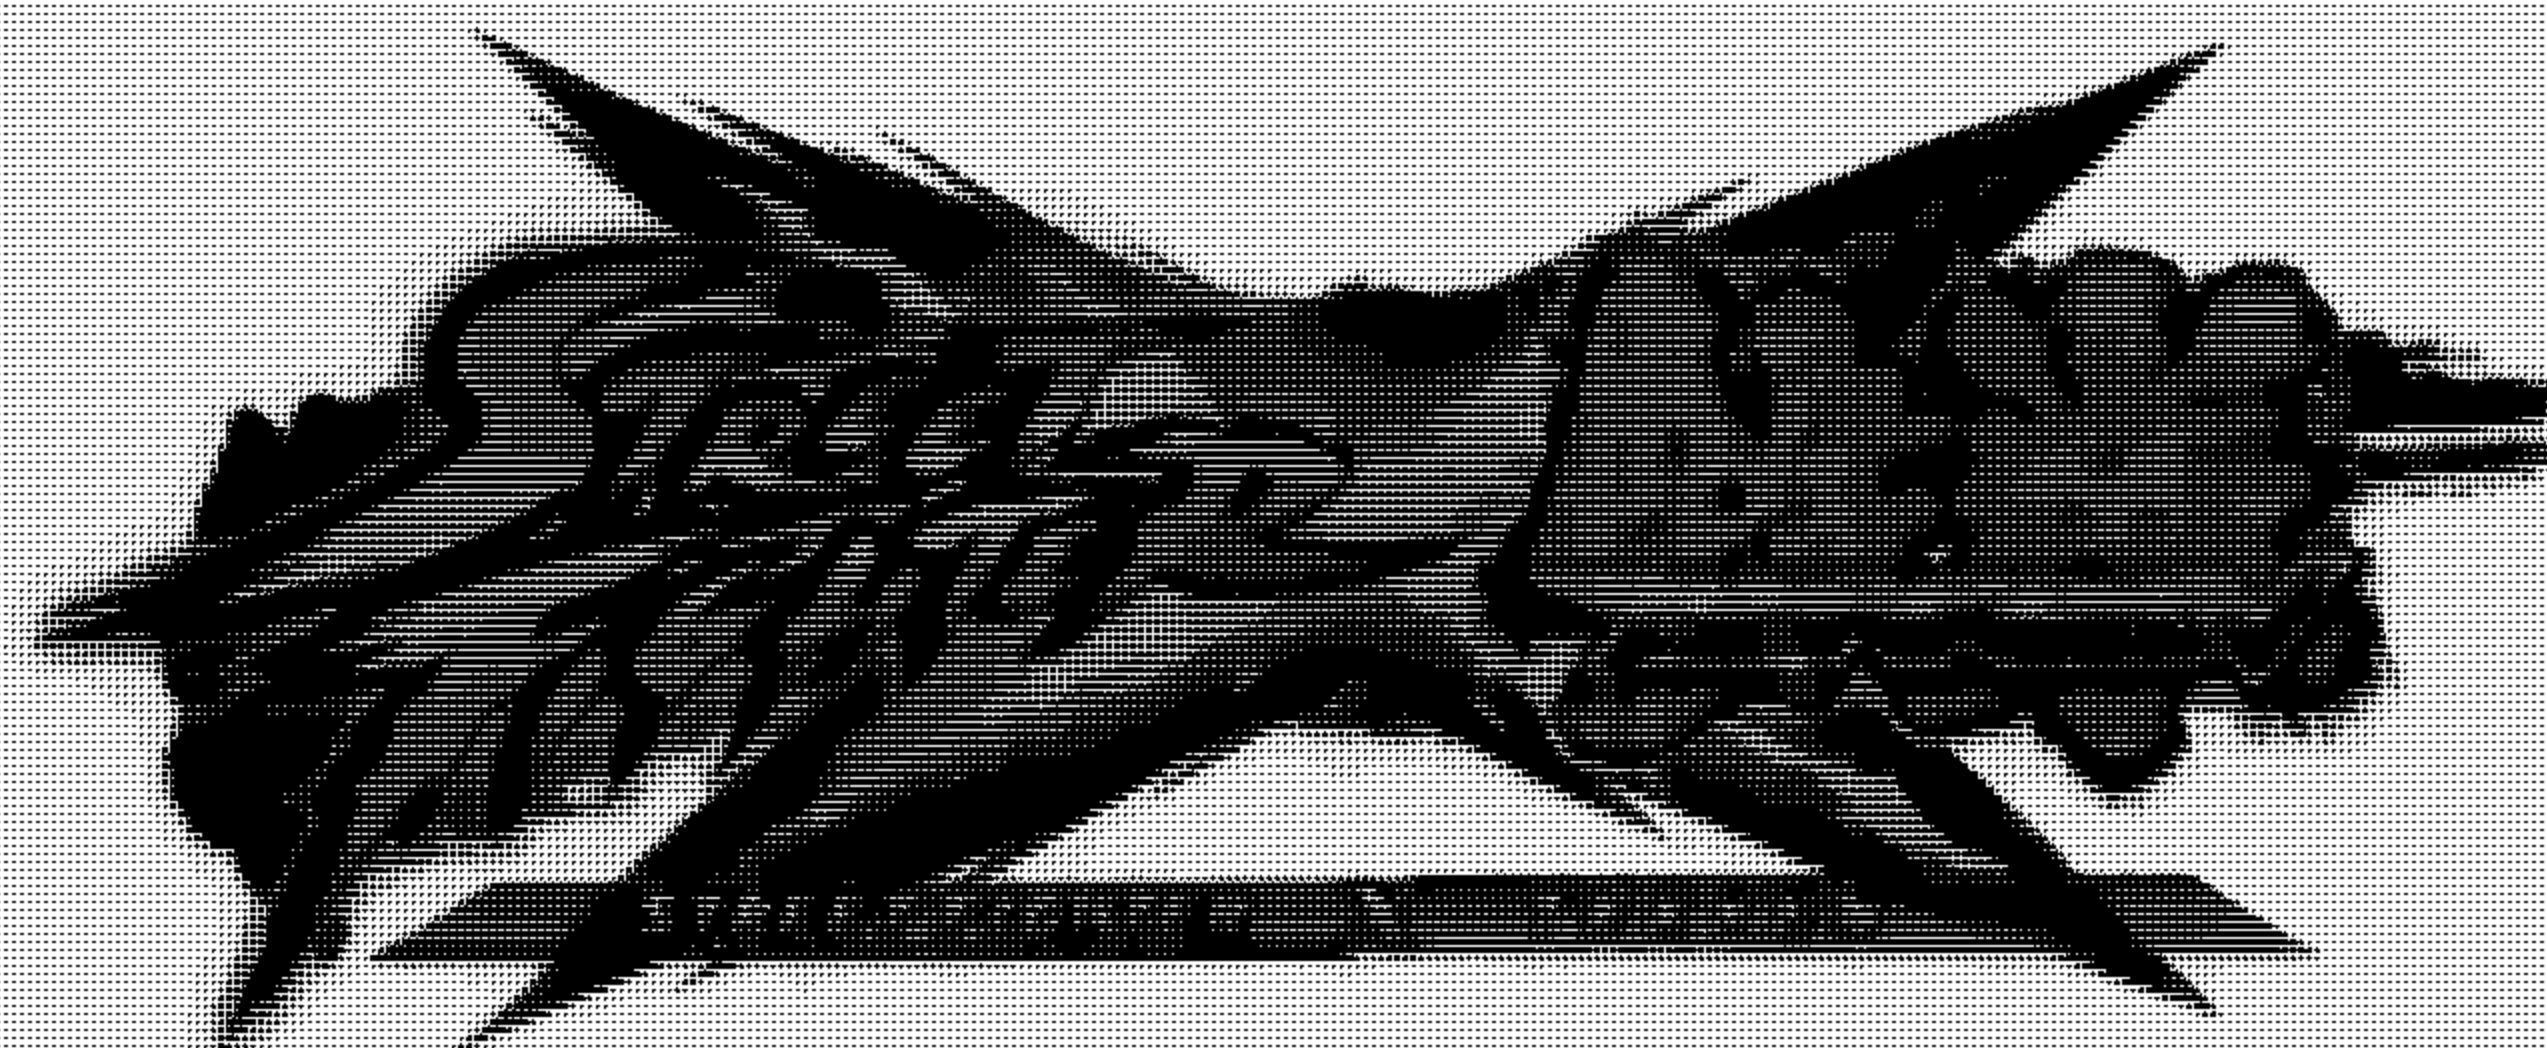

ストリートファイター X テkken アートワークス

The greatest war in the history of fighting games has begun!

Welcome to **STREET FIGHTER™ X TEKKEN™**, where *Street Fighter* and *Tekken* series' stalwarts Ryu, Chun-Li, Kazuya Mishima and Nina Williams headline a memorable cast of your favorite fighters in a tag battle dream match for the ages!

STREET FIGHTER X TEKKEN ARTWORKS collects the spectacular artwork behind this historic crossover! Inside you'll find character artwork, rough sketches, costume designs, creator commentary & interviews, and more!
